Dear Dr.

GRO-B

GRO-B

D.O.B. GRO-B 81

Mrs. GRO-B asked me to see GRO-B with her at the GRO-B Hospital, after she had attempted an audiogram at her clinic in GRO-B

GRO-B is a very timid child who has a fear of Hospitals, and initially he was very tearful. When he did calm down he co-operated quite well with voice tests, he responded well to commands made in a whispered voice and he would answer questions, he also co-operated well with free field audiometry for a short period of time but he does not concentrate very well and soon became restless. He would not wear the earphones and he became very upset when we attempted tympanometry so this could not be done.

We both felt that GRO-B would not co-operate any further today, but Mr. & Mrs. GRO-B are willing to bring him back for a further attempt at Play Audiometry on the 27th March 1987. In the meantime they will try to let him wear their own earphones at home, and hopefully he will be more willing to co-operate with pure tone audiometry on his next visit.

Yours sincerely,

GRO-B
