London  
NW1 0LB

Dear Dr Shina

Re: GRO-A - DOB: GRO-A 1940  
GRO-A London, GRO-A

**Diagnoses:**

1. Settled well following sequential cataract surgery.
2. Dry eye symptoms.

**Visual Acuity:** Right eye 6/12 unaided, 6/6 pinhole. Left eye 6/12 unaided, 6/7.5 pinhole.

This gentleman's vision has improved following sequential cataract surgery. He is experiencing significant dry eye symptoms now and I have told him this is common following cataract surgery.

I have advised using regular lubricating drops such as Hypromellose. I have not arranged a routine review in the Eye Clinic but he should see an Optician every one to two years routinely.

Please refer him back to us if there are any problems.

Yours sincerely

**Mr Anthony Khawaja**

Miss Clare Davey  
Consultant Ophthalmologist  
Royal Free Hospital

Dear Miss Davey

Re: **GRO-A** DOB: **GRO-A 1940**  
**GRO-A** London: **GRO-A**

I would be very grateful if this patient who is complaining of rapid onset of visual loss can be seen in your clinic. He is under our care for severe von Willebrand's disease, recurrent CVA and a previous left lobectomy for lung cancer.

Thank you for your input in the further management of this patient.

Yours sincerely

**Dr P. Chowdary**  
Consultant Haematologist
