12th December 1983,

Dr B.A. Kernoff MD MRCP
Consultant Haematologist
Royal Free Hospital
Pond Street
LONDON

11 4 DEC 1983

Dear Dr. Kernoff,

Re: John Dinkel

GRO-C

I gather your department is supervising the treatment of this Haemophiliac who lives in Brighton. He appears to be going through a bad patch at present, with recurrent Haemarthrosis and therefore has been advised to start a regime of prophylactic Factor VIII infusions. This will continue for one month until he is reviewed.

I saw him last week when he came to collect his supply of Factor VIII concentrate, and it is clear that he wishes to continue to attend your department. We will of course continue to supply him with his concentrate from here, but if there are any aspects of his Haemophilia that you feel would be better treated locally I would be happy to help out.

Kind regards.

Yours sincerely,

GRO-C

M.W. Kenny
Consultant Haematologist
