To: Carter, David
Subject: PASSIVE IMMUNOTHERAPY FOR HIV (PIT)
Date: 21 April 1999 09:59
Priority: High

David

As discussed, please would you confirm with lawyers that what Dr Karpas is now proposing does not constitute the manufacture of a relevant medicinal product and therefore does not need a Manufacturer's "Specials" Licence.

He is proposing to take single donations of plasma (from HIV-infected individuals) which will be frozen and stored before being thawed and subsequently infused into AIDS patients. The individual plasma donations will not be pooled and will not undergo any processing.

Please could you give this high priority.

Thanks,

Mike.
