Dear Bill

I have discussed the 'AIDS' leaflet with a number of colleagues and they think it is very good and should be available to all donors. There is some support that certainly at present each donor should positively be given a copy.

Could "? risk of AIDS" be included in the list of questions donors are asked to read ? I am against including non-specific questions in the list and reference of every donor so responding to the Medical Officer would cause unacceptable delays.

Yours sincerely

A K Collins MB BS MRCPath
