

## HISTORY SHEET (Continuation)

Hospital No.

Surname

First Names

DATE

(Each entry must be signed)

28.4.87 Anti-HIV neg.  
Anti-HB<sub>s</sub> neg (planned)

GRO-C

21.7.87 Seen with husband. Samples  
taken for herosominidias - A screening  
→ to screen at Guys.

GRO-C

24/4/89 I have spoken to Mr Amso.  
Probably to have collection May 2nd.  
He may be able to confirm 28<sup>th</sup> April.  
I think we will need to treat with FXI  
∴ bleeding into pouch of Douglas can occur.

GRO-C

8/6/89 Spoken with Dr. Reid (3865/6)  
To have harvest of ova on Mon 12.6.89.  
→ uls at 0800 → Deanery  
then 0900 → HLC. For Factor XI → 100% (single dose  
+ levels, then back to Deanery. long t<sub>1/2</sub>)  
Procedure is scheduled for 1130.

GRO-C

10.11.89 These message from Dr Amso:

Egg collection planned for 10:30am  
Monday 13.11.89 under GA.

Being admitted to Deanery ward early Monday.

Give 1 dose XI to bring level to 100%

Pre- & Post assays, but can go to theatre without  
Assay result.

Let Dr Amso know (Theatre 3x3704)  
(But XI has been given)
