Dear Dr Hay

HUGH LAW (GRO-C62)
GRO-C

Diagnosis: Hepatitis C PCR Positive
Previous IV drug abuse

I had a further chat with Mr Law today. I told him that he has still got active viraemia and as such we need to go on for a liver biopsy. He readily agreed to this, he has not used any IV drugs for many years and I think he would be an ideal candidate for treatment should this be required on liver biopsy.

We will get him in within the next two months with a view to further outpatient review in three months time to discuss the options available.

Yours sincerely

GRO-C

PETER BRAMLEY
Consultant Physician - Gastroenterologist
