

Witness Name: Royal Free Hospital (Jennifer Moira Cross)
Statement No. WITN3095001
Date: 23 May 2019

EXHIBIT "WITN3095001/2"

This is the exhibit marked "WITN3095001/2" referred to in the first witness statement of Jennifer Moira Cross dated 23 May 2019

William Spellman, 18/12/1943, NHS No.4227741688

12/09/2006

Referral

Could you think about William Spellman and his hepatitis C. He is having a second course of Interferon (Pegylated Interferon at this time) but without Ribavarin. This does not seem to have had a dramatic effect on his HCV viral load. He would like a renal transplant. I am concerned that immunosuppression is going to exacerbate his hepatitis C.

I would like to hear what you think. My initial feeling was not to list him for a year so that we can see the full effects of any Interferon response. In the meantime he needs some stress cardiac testing as an ECHO in 2003 showed him to have a low ejection fraction with global systolic impairment.

PROBLEM LIST:

1980s acute myeloid leukaemia
Numerous blood transfusions
1980s Hepatitis C genotype I
Iron overload cirrhosis
Portal hypertension
Varices
Initially unresponsive to Interferon and Ribavarine
Nephrotic Syndrome (? hepatitis C related MCGN)
Chronic renal failure
Haemodialysis
2005 Hypertension
Left wrist fistula
GI bleed (Aspirin and Clopidrogel)
A melon stomach
Laser therapy to stomach
June 2006 second course Interferon (Pegulated Interferon)
2000 Polyarthropathy
Chondrocalcinosis
Positive rheumatoid factor
Splenomegaly
Thrombocytopenia
Arterial calcification

MEDICATIONS:

NeoRecormon 10,000iu three times a week sc cont
Calcichew 1 tab tds po cont
Ketovite T tab od po cont
Folic acid 5mg od po cont
Propranolol 40mg bd po

Anusol prn to haemorrhoids
Lidocaine 2% gel prn to arthritic knuckles
omeprazole 20mg bd
1-alfacalcidol 0.25micrograms once weekly po HD
