Dr Tucker  
The Manor Practice

Dear Dr Tucker

Vincent BAKER, DOB= **GRO-C** NHS No: 4842074914  
**GRO-C**

Mr Baker looks the best he has ever been since I last saw him. Obviously remaining on Spironolactone 200mg once a day and 100mg at night has kept his ascites at bay. He is not encephelopathic and he remains teetotal. I will be referring him to King's Liver Unit for assessment for possible liver transplant since he has Child's Grade C Cirrhosis with a hepatitis C virus and alcohol related aetiology. I have given him a form for some more blood tests and I will see him again in 3 months but hopefully he will hear from King's in the meantime.

Yours sincerely

**Dr Andy Li**
