Barnet Dialysis Review

I would be most grateful for your thoughts in this patient of Dr Patch-s whom you have seen once before for Dr Sweny. He has resistant hepatitis C with portal hypertension, varices and hypersplenism. David Patch-s view was that we should perform a TIPPS procedure which seemed like an excellent idea, however, he has recently been admitted with two episodes of what the liver team felt was a hepatic encephalopathy. I would be most grateful for your updated views on this gentleman-s management.

In the meantime, you will see I have put him on Octreotide?, Neomycin and Midodrine.

Many thanks.
