Previous imaging: abdominal x-ray - 23 October 2010

Findings:
 A destructive lesion seen in the right iliac bone. Please refer to subsequent CT abdomen report (30th April 2018), for detail comment on the right iliac bone lesion. The bowel gas pattern is relatively nonspecific. No obvious free peritoneal air seen.

Where is this x-ray. There is only 3 x reports in file, for the date 23rd October 2010. attached. (23rd Oct. 2010 Report Missing)

This is 4 wks before Seamus died, looks like a bone lesion was seen on Seamus's pelvic bone (iliac bone), from 23rd Oct 2010
