Dr. J. Adamson

Dear Jamie,

Richard Warwick - GRO-C 65

GRO-C

Thank you for asking me to see this young man. He obviously feels very angry that Dr. McVerry withheld from him the information that he is HIV positive and this anger continues. I think it would be very helpful for him to be offered some help locally both for convenience to him and in view of the likelihood of him requiring admission some time in the next few years.

He has lost about 1½ stone in weight over the last year but is otherwise well apart from having very recently developed a sore throat associated with a cold. Examination reveals no abnormality apart from a slight tonsillar enlargement. I have taken a throat swab and am checking his full blood count, and doing a baseline chest x-ray. I have suggested he continue taking AZT 100 mg twice daily together with dispersible Septrin 1 twice daily and phenytoin 200 mg twice daily. I have made arrangements to see him again in six weeks' time when Derek Johnstone will be sharing the clinic.

Yours sincerely,

P. M. BROWN,  
Consultant Physician
