Professor C Lee  
Haemophilia Department  
Ground Floor  
RFH

Dear Christine,

Re: Stewart Angus - dob [GRO-C] 1938

[GRO-C]

[London]

[GRO-C]

I can see no reason why Mr Stewart cannot have or should not have injections under the usual conditions. Certainly the polyps, diagnosed at colonoscopy in July 2000, could not possibly be responsible for his anal symptoms or his bleeding. I have given him an appointment to come back for this purpose following attendance at the Haemophilia Centre on the same day.

Yours sincerely,

Mr A A M Lewis FRCS  
Consultant Colorectal & General Surgeon
