ST. MARY'S HOSPITAL, MANCHESTER M13 0JH  
DEPARTMENT OF HISTOPATHOLOGY

LAB. No.

P 362/81.

Consultant.....I.W.D. Ward.....Clinic, Haemat.  
Patient's Name.....AHEARE.....Brien.....Adolescent Ward.  
Hospital Reg. No. 67/8620.....Age.....Date 1.9.81.

REPORT

Microscopical Appearance:

A core of liver tissue showing several portal tracts which display increased numbers of chronic non-specific inflammatory cells. There is no evidence of cirrhosis or bile stasis. The hepatic parenchyma is normal. The appearances are compatible with a chronic persistent hepatitis.

Diagnosis: Liver - chronic persistent hepatitis.
