 ACTION.....

Dear Dr Burnouf-Radosevich

Further to your correspondence with Duncan Pepper I enclose details of the method used to prepare our FVIII (S-8) material.

This work has not been published and is expected to form the basis of a patent application by ourselves. In the event of this being successful we would of course licence the method to CRTS Lille free of charge as part of our information exchange programme.

In these circumstances I am sure that you are fully aware of the need for strict confidentiality.

Best wishes.

Yours sincerely

GRO-C
