- Published extracts/ posters – 25 [as supplements in the journal `AIDS`]

Interests:- Medical: New emerging Infections, HIV infect., Tuberculosis, Disease ecohistory.

Non-medical: Prehistory [esp. migrational genetics], Expressionist Art, Opera, Africa

Part 2 = HIV aspects [this added for the Infected Blood Inquiry]

The HIV aspects of my CV are separately documented below. I undertook 32 years of HIV clinical work between 1984 and 2015 [Namibia]. It`s curious to reflect that the scale and range of my ultimate HIV involvement was contingent on the chance admission of the first two HIV cases in Scotland to my ward. Here, in the context of a completely new disease, the

novel experience of 2 cases immediately elevated you to be 'an expert'. Everything is relative!

Committees/ Working groups on HIV infection:-

London:

- 1] Medical Research Council [MRC] -Working party on AIDS -Therapeutic Studies '85-87
- 2] MRC Working Party on AIDS – Virology Sub group -1986-89
- 3] Advisory Council on Misuse of Drugs–[ACMD] joint commit of Home/Health Depts '87-97
- 4] ACMD – AIDS and Drugs Working Group '87-94]
- 5] ACMD – Technical Committee '87 -92

Edinburgh [Scottish office]:

- 6] Ministerial Task Force on AIDS 1991-2
- 7] Ministerial Task Force on Drugs 1993-4
- 8] National Co-ordinating group on prevention of AIDS 1992
- 9] Scottish Committee on HIV Infection 1985-6
- 10] Working party on Health Service Implications of HIV Infection 1986-87
- 11] National AIDS Trust -Scottish Sub-Committee 1987-92

Also 2 other national [Scotland] and 6 Glasgow HIV committees [chairman in 2]

Trustee of Milestone charity to establish and operate a HIV/AIDS hospice for Scotland

Scientific Committees - membership of 10 in total; principally that of 'International Congress on Drug Therapy in HIV Infection' [otherwise known as 'the Glasgow Conf.']. The SECC in Glasgow 'gave a good deal' so this has now become a fixture with about 3,500 attendees every 2 years. I was involved from 1992 to 2008 including as session chairman [5 occasions]. As the 'local unit' we contributed poster studies to each one with my participation in some 19 posters.

Publications on HIV Infection:

Book Chapters:- 3 HIV [of a total of 13]= 2 chapters on HIV in Nursing textbooks; 1 in a epidemiological book

Total publications in journals = 79 of which 40 were HIV related; further divided as:

Peer reviewed Publications:- 61 in total; of these 36 or 59% were HIV related.

Editorially reviewed publications:- 18 of which 4 [22%] were HIV related
