MR GRO-B  
GRO-B

Dear MR GRO-B

Thanks for coming to attend for the fibroscan. This was performed recently by one of our Nurse Specialists and I am pleased to report that the scan was entirely normal with a liver stiffness of 3.9 kPa and no evidence of fatty tissue in your liver. There is no need for follow up at the Liver Clinic and we wish you well.

Yours sincerely,

Dr Johnny Cash  
Consultant Hepatologist
