Mr Peter Foster,
 Protein Fractionation Centre,
 Ellen's Glen Road,
 Edinburgh

Dear Peter,

Purity of PFC Factor VIII Intermediate Preparations

I got into a discussion the other day in which it was alleged that our PFC Factor VIII preparations were at a much lower purity than current commercially available intermediate preparations. I didn't have the relevant current information in my head so I had to shut up, but I would be grateful, if you have the information at hand, if you could give me an idea of how the present PFC product compares with some of the major commercial intermediates in respect of Factor VIII content per unit of total protein, and fibrinogen content.

I can explain the background more fully the next time we meet.

With kindest regards.

Yours sincerely,

GRO-C

D B L McClelland,
Director
