Dr. M. Winter,  
Director, Haemophilia Centre,  
Isle of Thanet District Hospital,  
Department of Pathology,  
St. Peter's Road,  
MARGATE,  
KENT, CT9 4AN.

Dear Dr. Winter,

Re: Heat Treated Factorate, Batch No. Y69402

Very many thanks for the helpful information given in your letter of 10th June.

In view of the fact that all three patients were HTLV 3 positive prior to receiving Factorate batch Y69402 and two were already showing some lymphadenopathy, any symptoms will be virtually impossible to relate to the Factorate batch in question with any conviction.

Nevertheless, in the generation of an overall picture of all patients treated with the batch, the subsequent progress of these patients will be of interest.

Again, our thanks for your collaboration and interest.

Kind regards,

Yours sincerely,

GRO-C

Robert B. Christie,  
DIRECTOR OF CLINICAL SCIENCES
