28 JUL 1982

2 <u>Dr. R. S. Lane</u>	From GRO-C: B.S. Combridge BLOOD PRODUCTS LABORATORY 29 JUL 1982
---------------------------------------	--

Ref. letter of Dr. Gardner.

I think the HBsAg panels are a good method of assessing a laboratory's technique. Unfortunately all past panels have contained very obvious positives for HBsAg and anti HBs. If Colindale is unable to do this service in the future should we consider setting up panels with weaker positives for the Transfusion Service?
