	31st May 1978

Factor IX Batch 9D 1049

Thank you for copy of your letter of 12 May to Professor Hardisty about the above batch. I look forward to seeing Professor Hardesty's reply.

With regard to the last paragraph of your letter, as neither BPL nor PF Lab has been formally inspected or licensed, I do not think we are obliged to report complaints. We must, however, as I have said before, keep files of any complaints received about products issued for clinical use. If, however, there were a large crop of complaints associated with a particular batch, I would immediately inform Medicines Division.

GRO-C

W. d'A. Maycock.
