

Friday, 1 November 2019

(10.00 am)

(Proceedings delayed)

(10.14 am)

**SIR BRIAN LANGSTAFF:** Now, our first witness this morning is anonymous and will be known as Mr AW.

Let me read out the restriction order guaranteeing his anonymity.

The name and address of witness W3023 -- that's Mr AW to you and me -- and any other identifying information, such as the names of members of his family, as well as the witness's image or a description of their appearance, cannot be disclosed or published in any form unless express permission is given by me, or by the solicitor to the inquiry acting on my behalf.

Witness W3023 must be referred to only as "Mr AW".

This order remains in force for the duration of the Inquiry, and at all times thereafter, unless otherwise ordered, and I may vary or revoke this order by making a further order during the course of the Inquiry.

Mr AW, would you come forward, please.

**MR AW (sworn)**

1

Then if we have 3023016, please, we can see from your notes that in addition to the treatment you have identified in your witness statement, you received in June platelets on a number of occasions, through into early July, when you received two units of packed red cells.

**A.** Yes, that's following the bone marrow transplant, which was the final part of my treatment.

**Q.** The bone marrow transplant you had in May at University College Hospital.

**A.** Correct, yes.

**Q.** In April 1993, the tests showed that you were clear from leukaemia, and you essentially got on with your life after that.

**A.** Yes.

**Q.** You had check-ups initially monthly but afterwards on an annual basis.

**A.** Correct, yes, yes.

**Q.** You felt pretty well.

**A.** I think it took a bit of time to get back to normality, just as a teenager of that age. It took me a little while to get up to what I felt normal, comfortable, confident in myself. So probably I'd say a year after the treatment had finished I'd actually say I was back to my normal health.

3

**Questioned by MS RICHARDS**

**MS RICHARDS:** Mr AW, you were diagnosed with leukaemia at the age of 18 in December 1992?

**A.** Correct.

**Q.** And you were treated at Luton and Dunstable Hospital and at University College Hospital London.

**A.** Yes, correct.

**Q.** You've explained in your witness statement that between December 1992 and May 1993 you received range of different treatments. At Luton and Dunstable in December 1992 you received a transfusion of five units of platelets and two units of blood.

**A.** (Nodded)

**Q.** Then at University College Hospital, between December 1992 and May 1993, you received 14 units of blood and 15 units of platelets.

**A.** Yes.

**Q.** Then we can also see just from some records that you received some further treatment in July 1993. Henry, could we have 3023015 on screen, please. We can see here it's a letter of 7 July 1993, and it says:

"I am grateful to you for arranging a local top-up blood transfusion with two units of leucocyte depleted blood for this 19-year-old lad with ALL."

2

**Q.** It was then ten years later, in 2003, that you received a letter from Luton and Dunstable Hospital. Now, we don't currently have a copy of that letter, but what can you recall it saying?

**A.** There was a letter I received where -- from the previous appointments I had been seen at the haematology department where they'd noticed some raised -- some liver issues, shall we say, in terms of the results in the blood. And then I was going to actually see a different haematologist, a different name, someone I hadn't seen before to go on an appointment I didn't know too much about, really. For me it was a complete surprise.

**Q.** So you went along to this appointment, and what did the consultant say to you?

**A.** I do remember the words vividly. I think the first words that he mentioned were, "Do you actually know why you're here?" And I think that was -- at that point in time, okay, what's -- there was a bombshell about to be dropped. So, yeah, I vividly remember those words being mentioned to me. Just me myself, a consultant I hadn't seen before, never in all the different visits I'd had to the appointment, never seen this chap before. So that's when he said -- gave me the news, he said, "Unfortunately it looks like

4

1 you're hepatitis C positive."

2 **Q.** Can you recall if you were given any information at

3 that stage about prognosis or treatment?

4 **A.** Not a great deal, really. I think when you get hit

5 with health news -- this wasn't obviously the first

6 time, this was ten years plus after having the

7 leukaemia side of things -- your brain goes into a bit

8 of a fog, shall we say. But I don't really remember

9 too much information. I think in my head

10 hepatitis C -- didn't know too much about what

11 hepatitis C was. I think probably I banded it in as

12 something similar to what HIV is, essentially, and how

13 and why essentially was kind of buzzing around in the

14 head.

15 **Q.** We're going to look at a couple of documents related

16 to that appointment.

17 Henry, could we have 3023005, please, first. We

18 can see it says this. It's dated 16 April 2003. It

19 relates to a clinic on 14 April. It says:

20 "Thank you for referring this 28-year-old man to

21 clinic. He was unfortunately unclear as to the reason

22 for his attendance, and when I explained it was

23 because his liver function tests were abnormal and

24 that he had been found to be hepatitis C positive

25 in September 2000, he appeared rather shocked. His

5

1 was kind of his reassurance, that okay, it's not too

2 much of a bad thing those years have passed as such.

3 So I do remember that being mentioned, trying to put

4 my mind at rest, shall we say, but didn't seem to as

5 such.

6 **Q.** We'll just look also at the consultant's records of

7 that attendance.

8 Henry, it's 3023007, please.

9 It's the first entry for 14 April 2003, "Has

10 C" -- or it might be, "Hep C positive 2000. Didn't

11 know why here!" No explanation in the records of that

12 appointment as to the delay in informing you.

13 So from your perspective, you were told out of

14 the blue that you had hepatitis C.

15 **A.** Yes.

16 **Q.** If we have up on screen, please, 3023002, we can see

17 this is a letter written by a consultant at the Royal

18 Free Hospital where you were subsequently referred,

19 and we can see the consultant's view again set out as

20 to what the cause is or was of the hepatitis C.

21 "Many thanks for referring this 28-year-old man

22 and sending his liver biopsy slides for review. He

23 first became aware of hepatitis C virus infection in

24 April 2003. This was discovered as part of his

25 routine follow-up for ALL."

7

1 risk factors for hepatitis C are clearly the multiple

2 transfusions he would have had in 1993, when having

3 treatment for ALL. At present, he is completely well

4 and has no symptoms of liver disease. I have arranged

5 for him to have hepatitis C PCR and deliver

6 ultrasound, and assuming the PCR is positive and the

7 ultrasound normal, we will arrange for a liver biopsy

8 thereafter."

9 So we can see from that you're described as

10 unfortunately unclear as to the reason for your

11 attendance.

12 **A.** Mm.

13 **Q.** You are told that you have hepatitis C, but that you

14 were found to be positive in September of 2000.

15 **A.** Three years earlier.

16 **Q.** Was there any discussion with you at that first

17 appointment as to why you were only being informed of

18 this in 2003?

19 **A.** With it being such a long time ago, I can't really

20 remember -- recall why the reason for the time lapse

21 as such.

22 I do actually -- one thing I do probably recall

23 at the time, that the consultant mentioned that

24 because it being a slow acting thing, it's -- we don't

25 have to kind of catch things quickly. I think that

6

1 Then it says this:

2 "At first diagnosis of ALL he received blood

3 transfusions and blood products, and this is the

4 likely source of transmission of hepatitis C."

5 You've seen a number of doctors in different

6 hospitals in relation to this. The impression created

7 by your records is that all are of the view that the

8 cause of your hepatitis C are the transfusions you

9 received in late 1992 or 1993.

10 **A.** Correct, yes.

11 **Q.** No one suggested to you that there's anything about

12 your life or lifestyle that would lead to a view of a

13 different cause.

14 **A.** No, no.

15 **Q.** If we then have up on screen, please, 3023003, please,

16 Henry.

17 We can see this -- it's a letter of referral to

18 Professor Dusheiko at the Royal Free hospital. You

19 were referred there by the consultant you saw at Luton

20 and Dunstable after the clinic in which the news was

21 broken to you.

22 **A.** I was, yes.

23 **Q.** We can see what's said there:

24 "I wonder if you would be kind enough to see

25 this somewhat anxious 27-year-old who has recently

8

1 been diagnosed with hepatitis C related liver disease.  
2 He was treated in the 1990s for ALL and had a bone  
3 marrow transplant in 1993, when he obviously had  
4 a number of blood products. He is well from that  
5 point of view now, but the haematologist noted that he  
6 was hepatitis C antibody positive."

7 Then it says this:

8 "In fact, they found this on a blood test from  
9 three years ago, which only came to light this year.  
10 [Mr AW] is rather upset that this has taken a long  
11 time to discover."

12 Then there's references to liver function tests  
13 showing a persistently raised ALT at 170, and a liver  
14 biopsy showing features suggesting early cirrhosis.

15 Is it correct to say you were rather upset it  
16 had taken three years to tell you of your results?

17 A. Yes, pretty much.

18 Q. Had you been aware in 2000 that you were even being  
19 tested for hepatitis C?

20 A. Not in the slightest.

21 Q. Now, could we have up on screen, please, Henry,  
22 3023006.

23 This is a letter from January 2003, and it may  
24 be that this helps explain why a letter was then sent  
25 to you inviting you to come in to see the clinic. It

9

1 So it was around 2000, would you say roughly?  
2 2000, 2001 period. Where probably on a quarterly  
3 basis I'd have to go in just to give blood and over  
4 time they would check and just see to make sure those  
5 iron levels had come down to sort of a normal level.  
6 So that was something -- the only thing, shall we say,  
7 that around that time I was given sort of notification  
8 of and some action against those, but nothing else.

9 Q. We'll have a look and see what opportunities there  
10 might have been between 2000 and 2003 to tell you of  
11 the diagnosis earlier.

12 We'll start, please, Henry, with 3023008, which  
13 is a later letter. It's dated March 2006, and it's  
14 sent from a haematologist to the legal services  
15 department within the trust. The context for that,  
16 I think, is you approached solicitors and there was  
17 some consideration being given to the possibility of  
18 bringing a claim.

19 A. Yes, yes.

20 Q. And we can see this:

21 "We cannot deny that the hepatitis C infection  
22 was detected in September 2000 and [Mr AW] was not  
23 informed of this result until April 2003."

24 Then it says this:

25 "However, this was at least in part due to his

11

1 says:

2 "I wonder if you would see this 28-year-old  
3 gentleman. He remains in remission from the leukemia,  
4 but more recently I have noticed that his liver  
5 function tests show a raised ALT."

6 Then it says:

7 "Looking back in his notes, he was hepatitis C  
8 positive when checked in September 2000, when the  
9 first abnormality in his liver function test was  
10 detected."

11 So it would appear that in early 2000,  
12 consultants looked at your notes and picked up upon  
13 the 2000 record in the context of considering abnormal  
14 liver function tests.

15 A. Yes.

16 Q. Had you been told that there was anything abnormal  
17 about your liver function tests prior to 2003?

18 A. Nothing at all. There was a point probably around  
19 about the 2000 period, from memory, and the only thing  
20 that was picked up at that point in time, which is  
21 quite a common thing from the treatment, the blood  
22 transfusion being given, the body and the liver stores  
23 too much iron, so the iron levels were quite high and  
24 dangerously high, I think, to a degree. The normal  
25 thing for that procedure then is just to give blood.

10

1 failure to attend an outpatient appointment at the  
2 time the result first came available and several  
3 appointments before and after."

4 Then it goes on to say:

5 "When the oversight was recognised, you were  
6 promptly informed and referred to the gastroenterology  
7 clinic."

8 We'll look then at the previous years and see  
9 whether what's said here could be correct.

10 Could we have, please, Henry, first of all --

11 **SIR BRIAN LANGSTAFF:** Just pausing there for a moment.

12 So far there have been two explanations for the  
13 delay: one that it was -- I think that was 003 -- only  
14 just come to light, when it appears it had been in the  
15 records all the time; and this, that it was his fault  
16 for not attending an outpatient appointment when it  
17 might have been discussed. But it goes on to say that  
18 when the oversight was recognised, he was referred to  
19 the gastroenterology clinic.

20 I thought the inference from the documents you  
21 have shown us a moment or two ago was that the reason  
22 for his referral was because of his high liver  
23 enzymes.

24 **MS RICHARDS:** Yes, that appears to be what other letters  
25 say.

12

1 **SIR BRIAN LANGSTAFF:** So this is a different view of what  
 2 took place.  
 3 **MS RICHARDS:** That would seem to be the case. We are  
 4 inviting the hospital to respond to Mr AW's statement  
 5 in this documentation.  
 6 **SIR BRIAN LANGSTAFF:** Yes, thank you.  
 7 **MS RICHARDS:** So, Henry, could we have 3023014.  
 8 We can see this is a letter from September 2000.  
 9 It says:  
 10 "Dr Rejman has asked me to write to you as we  
 11 have sent several appointments to you but you failed  
 12 to attend."  
 13 So there were non-attendances prior  
 14 to September 2000. This says:  
 15 "He would like you to have a further blood test  
 16 and I am therefore enclosing the necessary forms.  
 17 Please could you come to the pathology department to  
 18 have these tests done at your own convenience."  
 19 Then the second paragraph says:  
 20 "When we have the results of these tests, we  
 21 will write to you again. In the meantime, we will be  
 22 sending you an appointment for January 2001, which  
 23 will be your next review in the clinic."  
 24 So that's the invitation in September 2000 for  
 25 you to come and have blood tests. No explanation in

13

1 a test.  
 2 **A.** A blood test, yes.  
 3 **Q.** Which is exactly what you did.  
 4 **A.** Yes.  
 5 **Q.** Then the doctor continues:  
 6 "When I saw him, I didn't appreciate the fact  
 7 that he had not been told his hepatitis C result  
 8 previously."  
 9 Then refers to subsequent visits and rising ALT  
 10 liver enzyme levels.  
 11 So the doctor who saw you on 21 February says  
 12 here that that doctor did not appreciate you hadn't  
 13 been told your hepatitis C result.  
 14 **A.** Mm-hm, yes.  
 15 **Q.** If we just look at the record of the notes of the  
 16 attendance -- well, we'll look at two documents.  
 17 We'll look at a letter first of all to your GP  
 18 following that clinic. 3023013, please.  
 19 So we can see the haematologist writing to your  
 20 GP. Again, there's the reference to you having been  
 21 lost to follow-up, but that's all  
 22 before September 2000.  
 23 Then it says you remain completely asymptomatic,  
 24 you have been completely well in the last year, weight  
 25 is stable, refers to examination, full blood count

15

1 the letter as to what the blood tests were for.  
 2 **A.** No, nothing there at all, no.  
 3 **Q.** You did go in response to this letter to the pathology  
 4 department and you did have the blood tests?  
 5 **A.** Mm-hm, yes.  
 6 **Q.** This letter suggests that when they have the results,  
 7 they'll write to you again. Did you ever receive  
 8 a letter telling you the results of  
 9 those September 2000 blood tests?  
 10 **A.** No.  
 11 **Q.** We'll look then at your next attendance, which was  
 12 in February 2001.  
 13 Could we please have, Henry, 3023009.  
 14 This is a later letter in the context of the  
 15 litigation, but it gives us some dates. It says:  
 16 "I first saw [Mr AW] on 21 February 2001. He  
 17 had missed a number of clinic appointments since  
 18 12 January 2000."  
 19 So, again, clinic appointments earlier.  
 20 **A.** Mm-hm.  
 21 **Q.** Before your blood test, not afterwards:  
 22 "He had come up for a blood test on  
 23 18 September 2000 but without actually being seen."  
 24 You haven't been invited to be seen, you've just  
 25 been invited to go to the pathology department for

14

1 completely normal, given you an annual follow-up. So  
 2 no reference to anything to do with hepatitis C blood  
 3 result, no reference to anything to do with abnormal  
 4 liver function tests.  
 5 **A.** No.  
 6 **Q.** If we look at the notes -- Henry, it's 3023017,  
 7 please -- we can see that the entry for  
 8 21 February 2001, they have your new address now, we  
 9 see halfway down the page, we can see you obviously  
 10 attended in February 2001, various matters there set  
 11 out, but nothing to do with hepatitis C.  
 12 **A.** Yes.  
 13 **Q.** That was February 2001.  
 14 You attended in fact again in October of that  
 15 year, October 2001. It's 3023012, please, Henry.  
 16 You had gone for a check-up on 15 October 2001  
 17 in view of your previous history in relation to the  
 18 leukaemia and the bone marrow transplantation, and  
 19 you're seen in the haematology department. There's  
 20 a discussion of your leukaemia. No evidence of  
 21 recurrence and a normal blood picture.  
 22 Again, October 2001, you're seen again.  
 23 **A.** Yes.  
 24 **Q.** No one tells you anything about liver function results  
 25 or hepatitis C.

16

1 A. No, no.  
 2 Q. If we have 3023020, please, Henry.  
 3 We can see here in the first half of the page  
 4 the clinic notes for that attendance in October 2001.  
 5 Hepatitis C not referred to there.  
 6 So we've had February 2001, October 2001. We  
 7 come on to March 2002. Could we have, please, Henry,  
 8 3023011.  
 9 A. Yes.  
 10 Q. This is again a letter from the haematologist to your  
 11 GP. It refers to a clinic on 6 March 2002. So you've  
 12 attended, you've had your annual review in the  
 13 haematology clinic:  
 14 "He remains well and has been free of infections  
 15 over the last one year."  
 16 Refers to blood count, blood film, clinical  
 17 examination, and that you're in complete remission.  
 18 Next review will be in a year's time.  
 19 If we look again at the clinic notes, 3023020,  
 20 this time the bottom half of the page, we can see  
 21 again that you've been seen there. These are the  
 22 records that have been recorded by the doctor. A  
 23 further opportunity to tell you of the blood result,  
 24 the hepatitis C --  
 25 A. Yes.

17

1 someone's written -- we don't know whether it's the  
 2 same date or a later date, the handwriting does look  
 3 as though it might be different:  
 4 "Hepatitis C positive September 2000. Rising  
 5 ALT. Refer to hepatologist."  
 6 Was that drawn to your attention  
 7 in December 2002?  
 8 A. No, not at all.  
 9 Q. So nothing until that April 2003 appointment that  
 10 we've looked at?  
 11 A. Yes.  
 12 Q. If we have one further document on screen, please,  
 13 Henry. It's 3023019.  
 14 This is a letter, again written perhaps in the  
 15 context of the threat of a legal claim because it's  
 16 from the hospital's litigation adviser to the  
 17 haematologist. It says:  
 18 "Thank you for your memorandum dated  
 19 9 September 2004. Your comments are noted."  
 20 Pausing there, you've not seen, I think, a copy  
 21 of that memorandum.  
 22 A. No.  
 23 Q. Then it refers to a potential claim against the  
 24 hospital in respect of the failure to inform you of  
 25 the result of the hepatitis C blood test.

19

1 Q. -- and nothing was said to you.  
 2 A. (Nodded)  
 3 Q. That was March of 2002. You were seen again  
 4 in December of 2002. 3023010.  
 5 We can see it's a letter of 21 December 2002.  
 6 It refers to a clinic on 18 December, and we can see  
 7 in the first sentence you've attended for your routine  
 8 review earlier because you were starting a new job in  
 9 the January and you wanted to get the appointment  
 10 done.  
 11 A. Yes.  
 12 Q. We can see there set out you are described as  
 13 clinically and symptomatically well with no clinical  
 14 problems. There's a reference to haemoglobin and  
 15 platelets, and a reference to discussions about the  
 16 possibility of starting a family.  
 17 A. Yes.  
 18 Q. If we go to the notes for that appointment -- we can  
 19 see in the letter there's no reference to hepatitis C  
 20 or liver function tests of any kind. But can we look  
 21 at 3023018, please, Henry.  
 22 The notes show a different picture.  
 23 18 December 2002, we have various things there set  
 24 out. Starts new job in January, et cetera. All well,  
 25 no problem, fertility discussed, see one year. Then

18

1 Then it says this:  
 2 "It is pleasing to note that steps have been  
 3 taken to improve the review and follow-up of the  
 4 laboratory results."  
 5 Has the hospital explained to you what steps  
 6 have been taken to improve the review and follow-up of  
 7 laboratory results or --  
 8 A. No, this one is an interesting one. So in terms of my  
 9 records, certain things you just -- glare and jump out  
 10 at you, and this one in particular was interesting  
 11 because obviously this memorandum must have some sort  
 12 of information based on me, myself. So it would be  
 13 helpful to kind of see what reference is actually made  
 14 in this in terms of what was done to improve those  
 15 steps.  
 16 Q. I understand you would like to both see the memorandum  
 17 and also know what had led to the identification of  
 18 a need to improve the review and follow-up of  
 19 laboratory results.  
 20 A. Very much so, yes.  
 21 Q. Now, if we then go back to April 2003, when you were  
 22 given the diagnosis of hepatitis C.  
 23 You say in your statement that the constant  
 24 thought you've had and have had since then and not  
 25 been able to expel is about whether there are others

20

1 in the same position as you. Could you elaborate upon  
2 that?  
3 A. Yes. So I think for me, for definite, it was  
4 having -- a strange one, almost like fortunate to have  
5 been found and know I have that, and in my head I have  
6 this kind of image of all the times when I had the  
7 transfusions given, and there's potential that there  
8 was someone next to me in a hospital bed in a ward,  
9 someone had maybe some sort of bike accident, needed  
10 two or three pints of blood given to him, and that  
11 person -- same blood type, and then let's just say  
12 they go on, fit, healthy life, lifestyle, 10/15 years,  
13 nothing's wrong at all, and all of a sudden certain  
14 things start to change, they go to see the GP, the GP  
15 says, "Okay, maybe we need to do some tests on you",  
16 and that person, or persons, who knows, then has that  
17 terrible news and finds out they're 15 years plus,  
18 whereas for me, for myself -- that for me didn't seem  
19 right. Could I actually just be that one person? It  
20 just didn't seem right. And I had that fear, is  
21 some -- are there other people in that same boat that  
22 don't get to know, and I did? So, yeah.  
23 Q. I want to ask you a little about the impact of the  
24 diagnosis on you.  
25 You describe in your statement how you became

21

1 on top of what I was having.  
2 So me in my stubbornness, I guess, was just to  
3 go -- let's concentrate on this issue first as opposed  
4 to the mental side of things, really. Obviously  
5 things have changed a hell of a lot now, we're in  
6 a different world when it comes to mental health and  
7 how it's perceived, but for me my core focus was  
8 getting over the treatment and getting through the  
9 treatment.  
10 Q. Did you receive any offer of counselling or  
11 psychological support?  
12 A. Not from memory.  
13 Q. Now, you physically had felt okay. You weren't, as  
14 far as you know, experiencing any physical symptoms of  
15 hepatitis C.  
16 A. Absolutely not.  
17 Q. But you were told that there were potentially signs of  
18 moderate liver damage, and so you were referred, as  
19 we've seen in the correspondence, to Dr Dusheiko. You  
20 had your liver biopsy and ultrasound scan.  
21 A. Yes.  
22 Q. Then in October 2003 you were seen at the Royal Free.  
23 You were told your genotype, which was 3A.  
24 A. Mm.  
25 Q. It was recommended to you that you embark upon

23

1 very introverted, in a deep place.  
2 A. Yes, yes. Probably just after my 30th birthday, and  
3 I do remember at the time one vivid instance of going  
4 to a certain friend's birthday party, and at the time  
5 I had just started the treatment. Mentally, being in  
6 a social environment did have an effect on me as  
7 a person. Confidence, just being in a social  
8 environment with other people, in a gathering area,  
9 did they -- I did tell the close-knit friends that  
10 I had at the time. I think some of those did  
11 understand and obviously knew what happened to me ten  
12 years earlier, but I don't think they fully understood  
13 what hep C was as a condition.  
14 And I do remember in certain instances just from  
15 a mental perspective it definitely changed me as  
16 a person. The mental impact was hard.  
17 Q. You said in your statement you didn't take  
18 antidepressants, but in retrospect you've wondered  
19 whether you should have done and that they might have  
20 helped.  
21 A. Yes. I think definitely from my side, having the  
22 treatment I went through ten years prior and the drugs  
23 you're given at the time, I suppose really for me,  
24 knowing I had to take two sets of drugs for hep C, the  
25 last thing I probably wanted was additional medication

22

1 pegylated interferon and Ribavirin.  
2 A. Mm.  
3 Q. You say in your statement that the potential  
4 side-effects were spelt out to you by the doctor at  
5 the Royal Free.  
6 A. Yes, they did say that obviously there's a variety of  
7 side-effects, and everyone is different in terms of  
8 how those side-effects hit you as a person, so kind  
9 of, you know, what was going to come. But, yeah,  
10 I had no idea in terms of how it would affect me and  
11 obviously everyone is different.  
12 Q. You started the six-month course of treatment  
13 in August 2004. How was that?  
14 A. The -- to know -- it was going into the unknown again,  
15 really. I suppose in some ways being of a -- wouldn't  
16 say call it a benefit as such, but having the  
17 treatment I had ten years prior, having to take more  
18 medication for a prolonged period, how it's going to  
19 affect you as a person, how it's going to affect the  
20 people around you, having to inject yourself.  
21 So, yeah, it's not just how it's going to affect  
22 you, but it's how it's going to affect the people  
23 around you as well, and then the unknown, once use  
24 start taking them, what sort of side-effects are going  
25 to come and be seen. Obviously for me the

24

1 side-effects did build and they got to a point where I  
2 think, of the six-month period, I had to stop the  
3 treatment probably five months in.

4 Q. You've described in your statement physical symptoms;  
5 loss of appetite, loss of weight, fluctuating thyroid  
6 functions.

7 A. Yes.

8 Q. After about four months you felt so ill, you were  
9 having severe palpitations.

10 A. I think the palpitations were the ones which were  
11 probably the big thing, really, so it's not nice.

12 Q. That led to your decision to stop the treatment early.

13 A. Yes, through the -- through the consultant I was  
14 seeing at the time at the hospital. The reaction my  
15 body had given to the drugs, clearing the virus  
16 I think fairly early on, they were confident in  
17 thinking really at that point in time it would be  
18 a good point to stop rather than going for the full  
19 six-month cycle.

20 Q. Your mum's provided a statement to the Inquiry, and  
21 she talks about the psychological effects of the  
22 treatment on you. She said it made you angry. You  
23 could fly off the handle. We've heard descriptions of  
24 mood swings and anger from a number of witnesses who  
25 have undergone this particular course of treatment.

25

1 on your relationship with your wife.

2 A. Exactly, as well, so --

3 Q. We'll come on to your employment in a few minutes, but  
4 you weren't during the treatment working, and your  
5 wife ended up reducing her full-time employment to  
6 part-time in order to assist you.

7 A. Yes.

8 Q. So it was financially hard.

9 A. Yes, it was. Yes.

10 Q. In mid-2005, following further blood tests, you were  
11 told that you were clear of hepatitis C.

12 A. Yes.

13 Q. What follow-up in terms of monitoring of your liver  
14 have you received since the hepatitis C treatment was  
15 completed?

16 A. So from kind of being discharged off from the Royal  
17 Free, from the treatment for the hep C, there was no  
18 follow-up from beyond that point.

19 Up until recently, we're only talking in the  
20 last sort of six months where I'd had two phone calls,  
21 evening phone calls from my GP surgery. One was  
22 an out-of-the-blue call, "Very quick question we just  
23 need to ask you, were you ever informed or told or  
24 have any evidence that you were fully cleared and  
25 discharged from the hospital where you had the

27

1 She says you felt unclean.

2 A. Yes, I think the uncleanness is probably that early  
3 kind of -- the mental side of things, and as  
4 I mentioned that scenario there of being out in  
5 a social environment, how you're perceived, the  
6 paranoia was a big thing.

7 That's the vivid thing my mind, the paranoia,  
8 being out and -- I think as well, it's -- since that  
9 point in time there's only certain people that  
10 probably have kind of known about the hepatitis C and  
11 I've actually told. So it's not something that I've  
12 kind of divulged in -- only to certain people, really.  
13 It's sort of kept in -- even my friends probably at  
14 the time, if I was to -- they probably won't even know  
15 about -- I've mentioned to one or two close friends  
16 about the Inquiry and everything, but it's -- yeah,  
17 it's not something you -- I feel I can kind of talk  
18 about too much really.

19 Q. You were worried you might have infected your wife.  
20 You hadn't, but it was a cause of concern.

21 A. Yes. That spun through my head, that moment of  
22 sitting with the consultant and, "Do you know why  
23 you're here for?" and that was very ... yeah. Just  
24 think straight off the bat and -- yeah.

25 Q. You were worried about the strain that it would place

26

1 treatment?"

2 And quizzically getting a call from the GP in  
3 the evening randomly out of the blue was enough of  
4 a shock anyway, so that started putting sort of  
5 questions in my mind and the cogs start turning again  
6 saying, "Okay, what's happened here?"

7 This was probably from a timing perspective,  
8 I would say, probably six to three months prior to the  
9 Inquiry starting, so that -- I probably put two and  
10 two together potentially.

11 More recently I've had a few trips to the GP --  
12 GP surgery. I'm not tied into a dedicated GP there.  
13 I tend to have two or three GPs which I kind of trust  
14 in. One of these was a new gentleman, quite newish to  
15 the surgery, and I went for different symptoms at the  
16 time, and he was just looking through my notes and  
17 said, "Regarding hepatitis C, when were you last  
18 tested?" And I said, "Well, I haven't been tested",  
19 and he said, "Okay, I think it might be just good for  
20 you potentially just to have a random test just to  
21 make everything's okay in that area". I was taken  
22 aback by that a little bit, thinking, well, this was  
23 15 years prior, could it return? Can it return?

24 So I did have a blood test done and from that  
25 there was nothing found. Obviously, the antibodies

28

1 still remain in the system, but they did say, "Oh,  
2 we've found raised levels in the liver", the ALTs  
3 I think it was, or FTs, I'm not sure which one, but he  
4 said, "I need to refer you to the gastroenterologist",  
5 and I thought, "Okay, this path, where is this leading  
6 to?" So I had to go and have an ultrasound.

7 The ultrasound was done probably talking three  
8 months -- yeah, in the summer this year, so went to  
9 have the ultrasound done, and then back to see the GP,  
10 and the GP said, "Okay, we've noticed from the  
11 ultrasound results that the liver is quite bright,  
12 it's quite bright", so from that he said, "I need to  
13 get you referred to the gastroenterologist."

14 So a few weeks after then I went to see the  
15 gastroenterologist at the hospital. Again, that was  
16 a kind of a moment thinking we're going into  
17 a situation again where you're just going to be given  
18 that kind of bombshell news.

19 So there was a little bit of apprehension, yeah,  
20 yeah, what was going to be found, shall we say. The  
21 good news really was reassured straight away that  
22 there was no scarring found on the liver, so they said  
23 the scarring -- there's no visible scarring there.  
24 The brightness in the liver from the ultrasound  
25 probably would be down to a number of different

29

1 a route of IVF.

2 A. Correct, yes.

3 Q. You needed to do that anyway, that wasn't due to  
4 hepatitis C. But your hepatitis C diagnosis did cause  
5 problems in terms of where you could have your IVF.

6 A. It did, yes. So with the fact that the hepatitis C  
7 antibodies obviously were found in me, you're  
8 restricted. So the first thing we were kind of told  
9 was we can't freeze any embryos or -- from my side --  
10 from us, essentially, there are only two clinics  
11 available for you in the UK that would actually allow  
12 you to go and have the IVF treatment, [redacted] ...  
13 Okay, it was two clinics, and Chelsea and Westminster  
14 was the one of choice we went with eventually. But,  
15 yes, having that kind of -- be told again, you are  
16 hitting another hurdle and it felt like, okay, what --  
17 another kind of kick in the teeth that something you  
18 want to have and being restricted down to two clinics,  
19 or the other alternative would've -- alternative  
20 would've been obviously to seek further afield.

21 Q. Your mum again in her statement explains how  
22 everything that you've described caused you to lose  
23 confidence and self-esteem. She says it wasn't really  
24 until you saw a Panorama programme in 2017 that you  
25 began to be able to speak a little more freely about

31

1 things, could be down to cholesterol, which has  
2 happened, my cholesterol is slightly raised, it could  
3 be down to blood pressure, but it's more a case of  
4 a dietary change or just a health style change,  
5 really, so there's nothing there. She said, "I don't  
6 really need to see you for many follow-up from that  
7 side."

8 But this is only really recently. We're talking  
9 the summer of this year.

10 Q. So between 2005, after you'd cleared hepatitis C and  
11 you'd been told you cleared it --

12 A. Yes.

13 Q. -- from that point until 2019 --

14 A. Correct, yes.

15 Q. -- there was no follow-up in terms of liver.

16 A. Like I said there, to have that kind of brought back  
17 into the foreground again, saying, okay, it -- yeah,  
18 it was -- definitely that kind of fear factor started  
19 to creep back in again, thinking, hang about, should  
20 I have not been every year in the same way as  
21 leukaemia, you're given a outpatient view of things,  
22 but, no, given nothing at all.

23 Q. You and your wife had wanted to have children, but  
24 because of the cancer treatment you'd had, the  
25 treatment for your leukaemia, you had to go down

30

1 what had happened.

2 A. Yes. Just sitting watching that programme was -- not  
3 just probably me watching that, but many others out  
4 there, just seeing that was incredible.

5 Q. You also saw or heard evidence given during the first  
6 week of the Inquiry hearings --

7 A. Yes.

8 Q. -- in which there was a witness who spoke about  
9 infection with hepatitis C, again through transfusions  
10 post the autumn of 1991.

11 A. Yes, yes.

12 Q. When you heard that evidence, you felt I think less  
13 alone in what you'd experienced.

14 A. Yes. We just were sitting watching the News at 10.  
15 Probably first/second week of the trial. It was just  
16 the moment of ... just sort of blown away. It was  
17 a new -- for me, it was like, I knew I wasn't the only  
18 one. Yes.

19 Q. What was the effect of the hepatitis C diagnosis and  
20 the treatment that you then had to go through on your  
21 wife, your partner, and on your parents?

22 A. Yeah, I -- it's not something probably I've talked  
23 about enough with them, but I know that -- like I said  
24 before, it's not just you that are having to deal with  
25 it; you have that periphery around you that are having

32

1 to see the effects it's having on them. Yeah.

2 Q. We have a statement from your mum to the Inquiry as

3 well in any event, which we've read.

4 A. Okay.

5 Q. What happened in terms of your employment? You had

6 been in work at the time of your diagnosis. What then

7 happened?

8 A. At the time I had started in the January of 2003 with

9 an IT company at the time. It was my second job

10 post-university. Probably from a company perspective

11 very small. I probably was in probably not

12 a fantastic company to be in at the time to be

13 supportive, shall we say, of my scenario. I mean,

14 since that point in time I've worked for a lot --

15 let's say bigger companies and companies that kind of

16 can know and understand, and I've seen people in

17 situations where they've been given support, time off,

18 things like that. So I was in this small company and

19 obviously I told them my situation, the diagnosis, and

20 I would probably need time off work as such. It

21 wasn't long after that I could see things changing,

22 and I was put in a position where literally I was,

23 shall we say, pushed out of the company. So they're

24 talking -- only been there sort of five months at that

25 point in time.

33

1 ability to get life insurance.

2 A. Yes. That's been a challenging one. I think it's

3 a combination of both, so with the leukaemia plus the

4 hepatitis C, life insurance in the very early days

5 of -- once we'd got our first house, a few years

6 after, looking at insurance policies, you go

7 through -- you get to -- asked the standard questions.

8 When those questions get ticked, that's it, "Sorry, we

9 can't take things further."

10 It's got to the point really that thinking after

11 such a window things would be made easier, they

12 haven't, so to the point now where I've -- I have got

13 life cover, shall we say. It's kind of based on

14 an American company that I've gone with, so it's not

15 your standard -- yeah, it doesn't cover you for that

16 kind of -- the illness side of things. So I have some

17 cover as such, but -- yeah, so that's been another

18 challenging thing, ringing through. You can't --

19 again, you're sort of deemed as a second class citizen

20 in some ways and there's that blocker there.

21 Q. You were not eligible for any payment from the

22 Skipton Fund.

23 A. Correct.

24 Q. We can see a letter at -- it's a different reference,

25 please, Henry, it's 2926003, and it's page 3, please.

35

1 So then knowing you're jobless and at the same

2 time having to then deal with a condition -- about to

3 have treatment for a condition as well, it's not

4 a nice scenario to be in.

5 Q. You were worried that you would not be able to get

6 further employment because you didn't know how you'd

7 explain your 14 months out of work.

8 A. Yes, yes, that was the other thing I was thinking:

9 okay well, at some point I need to get myself back

10 into employment, how -- you are going to be looked at

11 and say, "Okay, what's happened in this window? Why

12 have you been out of work for that point in time?" If

13 I mention the hepatitis C, how is that going to come

14 down on a prospective employer? Does it make me

15 employable still? So, yeah, that was a constant kind

16 of worry in your head as well.

17 Q. You have happily been able to obtain subsequent

18 employment.

19 A. Yes, I think the blessing for me was in February 2005

20 I started again with a small IT company, but this one

21 was a very, very good one, and there was no -- no

22 look-back, shall we say, of my kind of history. And

23 I've spent five and a half years at this company.

24 It's probably the best company I've ever worked with.

25 Q. One of the other problems has been the effect on your

34

1 We can see it's a letter written by the

2 Department of Health, Jane Ellison, to your mum's MP,

3 and it says:

4 "I am sorry to read that [Mr AW] is not eligible

5 for the Skipton Fund. As your constituent highlights,

6 only those who have contracted hepatitis C as a result

7 of receiving blood or blood products from the NHS

8 prior to September 1991 are eligible to apply. This

9 is because the Skipton Fund was set up with a specific

10 purpose of providing ex gratia support to those who

11 were infected before blood donor screening tests were

12 introduced.

13 "As [Mrs AW] suggested that her son was infected

14 with hepatitis C during the course of his treatment

15 for leukaemia from December 1992, he is over 15 months

16 away from this point of eligibility."

17 And I understand you've since approached the

18 EIBSS but had a similar response.

19 A. Yes, my mother's -- yeah, she's gone down that path,

20 and from a timing perspective obviously post-1991.

21 Q. You've referred in your statement to a letter from

22 a legal adviser representing the National Blood

23 Authority. It's dated 8 July 2005. We don't have the

24 letter at the moment, but you've quoted from it, and

25 it says this:

36

1 "We understand from our client, the National  
2 Blood Authority, that the transfusion history  
3 indicates significant donor exposure. Unfortunately  
4 our client is unable to investigate all of these  
5 donations and such an investigation is in any event  
6 likely to produce a definite conclusion."  
7 You've said in your statement you think that's  
8 a typographical error in the letter.  
9 A. Yes.  
10 Q. It should be "unlikely to produce a definite  
11 conclusion."  
12 So there has clearly been some contact --  
13 I think it may have been through your mother -- with  
14 the legal adviser to the National Blood Authority back  
15 in 2005.  
16 You're not aware of there having been, I think,  
17 any more recent contact with the transfusion service?  
18 A. No.  
19 Q. You say this, Mr AW, in your statement. You'd like to  
20 know if there's anyone else in your situation who is  
21 infected so late, post the 1991 screening, and you  
22 would like to know what happened and how it happened  
23 to you.  
24 A. Yes.  
25 Q. You pose this:

37

1 a sense of anxiety, apprehension, which has been added  
2 to by a sense of isolation until recently. You  
3 described yourself at one stage almost as being  
4 paranoid.  
5 We are very grateful that you've overcome those  
6 feelings, and it can't have been easy to come here  
7 today, even with the protection of anonymity, and tell  
8 those who are here what you find difficult to tell  
9 some of your friends.  
10 It's important to hear evidence like yours for  
11 all sorts of reasons. Thank you very much.  
12 A. Thank you.  
13 SIR BRIAN LANGSTAFF: We'll take a break until 11.30.  
14 MS RICHARDS: Sir, I should say that there will be no live  
15 streaming of the next witness, who is also anonymous.  
16 Her evidence will not be live streamed.  
17 SIR BRIAN LANGSTAFF: So if anyone is watching remotely,  
18 they should know that the next witnesses, the  
19 remaining witnesses of the day --  
20 MS RICHARDS: No, just the next witness.  
21 SIR BRIAN LANGSTAFF: The next witness.  
22 MS RICHARDS: Then the live stream will be on again this  
23 afternoon.  
24 SIR BRIAN LANGSTAFF: Yes, I was going to say the next  
25 witness, after lunch, and the two witnesses after

39

1 "Was it really just a freak accident and the  
2 blood donor just slipped through the net?"  
3 A. Mm.  
4 Q. Those are the questions I have for you. I am going to  
5 ask Mr Snowden if there's anything else he would like  
6 me to ask.  
7 There's nothing further. Is there anything you  
8 would like to say?  
9 A. Just a thank you, really, to my family for their  
10 support, their patience for me as a person.  
11 Especially my mother. She's been fantastic in  
12 terms of what she's done, taking things this far.  
13 Obviously my wife as well and what she's had to  
14 go through with myself.  
15 Probably too -- probably this is a bit of  
16 a strange one at the moment, for someone to thank MPs.  
17 I'm going to thank two MPs. For Diana Johnson, what  
18 she's done. She's been immense in what she's done to  
19 promote the message of what's happened. And  
20 Andy Burnham as well. So those two MPs, to thank them  
21 for their efforts in taking things to where things  
22 have got to now.  
23 MS RICHARDS: Thank you.  
24 Sir Brian.  
25 SIR BRIAN LANGSTAFF: What you've described to us is

38

1 lunch, will both be fully available on the stream, but  
2 not the next.  
3 11.30.  
4 (11.05 am)  
5 (A short break)  
6 (11.30 am)  
7 SIR BRIAN LANGSTAFF: Well, our next witness, as you  
8 already know, is anonymous. She will be known as  
9 Mrs AX.  
10 In her case too I make the same type of order as  
11 I made earlier, but let me read it out so that you all  
12 hear it.  
13 The name and address of the witness W0507 --  
14 that's Mrs AX to you and me -- the name of her late  
15 husband and any other member of her family, and any  
16 other identifying information, such as the witness's  
17 image or a description of their appearance, cannot be  
18 disclosed or published in any form, unless express  
19 permission is given by me or by the solicitor to the  
20 inquiry acting on my behalf.  
21 Witness W0507 must be referred to only as  
22 "Mrs AX".  
23 This order remains in force for the duration of  
24 the Inquiry and at all times thereafter, unless  
25 otherwise ordered, and I may vary or revoke the order

40

by making a further order during the course of the Inquiry.

As you know, there will be no live streaming, either visually or orally.

With that protection, may we have Mrs AX, please.

**MRS AX (sworn)**

**Questioned by MS FRASER BUTLIN**

**MS FRASER BUTLIN:** Mrs AX, you are here to tell us about your late husband, and you are going to refer to him by his name, [redacted], because it's too hard not say his name when we're talking about him, but just to make it clear that his name is covered by the restriction order and mustn't be used outside of this room.

You met in 1972. Can you tell us a little bit about what your husband was like before he became unwell?

**A.** He was just a normal, hardworking man. He had his own business. We had nice holidays. We were just a normal couple.

**Q.** He loved to ski.

**A.** He loved to ski. We had lots and lots of skiing holidays before he became ill, and summer holidays, and we just had a nice lifestyle.

41

**A.** Yes.

**Q.** Can you tell us about that process?

**A.** What do you mean?

**Q.** What did [redacted] have to go and do?

**A.** Oh, it's a form of dialysis, but he just used to go to the local renal unit once a fortnight and they would draw off his old -- his plasma and give him new plasma from a donor.

The old plasma then was drained off and that seemed to work for a while, stopped the kidneys from failing, you know. It was a gradual failure and it seemed to slow things down a little bit.

**Q.** You have a particular recollection of what the new plasma looked like.

**A.** Yes, it looked like peach melba.

**Q.** And the new plasma had "Baxter" written on the bags.

**A.** I think it was "Baxter". You know, it's a long time ago. I can't -- I remember it being in a clear -- it was clear fluid in a bag that was fed through a dialysis machine.

**Q.** The old stuff coming off looked like peach melba --

**A.** The old stuff coming off looked like peach melba.

**Q.** -- and the new was clear.

**A.** Yes.

**Q.** You said in your statement that you recall that

43

**Q.** In July 1985, his ankles started to become swollen and he was tired all the time.

**A.** Yes.

**Q.** What did the doctors find that was the problem?

**A.** Well, the GP was -- she didn't know what the problem was, so she referred him to the local hospital and they did various blood tests, and eventually said that he had glomerulonephritis.

**Q.** Which is a kidney condition?

**A.** A kidney condition, yes.

**Q.** He always had to clear his throat.

**A.** Yes, he always had -- not a sore throat, but he always had this sort of (**Demonstrated**) whenever he was talking, and he had had that from being a child. He'd had his tonsils out but it didn't make a difference, but he'd always had that and they said eventually that's where the infection could've come from. It's like a meningitis type infection.

**Q.** They thought he had had an untreated streptococcal throat infection, which had then affected the kidney function.

**A.** That's correct, yes.

**Q.** He started receiving steroid treatments, but after a while that was deemed to be unsuccessful, and he was started then on plasma exchange.

42

"Baxter" was written on those bags.

**A.** I think it was "Baxter", yeah.

**Q.** Your husband had that treatment every fortnight for about 18 months?

**A.** Yes.

**Q.** But over time, as you say, his kidney function did gradually decrease.

**A.** Yes, he carried on -- he was still running the business, we were still having holidays, he kept filling up with fluid obviously, but -- because his kidneys weren't working properly.

So, yeah, for 18 months we just tried to carry on as best we could, but then they started to fail.

**Q.** His kidney function went down to just below 20 per cent.

**A.** Yes.

**Q.** And at that point he became more unwell, I think.

**A.** Yeah, yeah. And the consultant at the time said he thought that he would need full-time haemodialysis.

**Q.** In your husband's medical records there's a laboratory report from April 1993 that we're just going to put up on the screen. It's a different witness number, Henry. It's 3807003, please.

We can see in the bottom right-hand corner there the date of report, 26 April 1993, and it indicates

44

1 that he was positive for hepatitis C.  
 2 Were you or your husband aware in 1993 that he  
 3 had tested positive for hepatitis C?  
 4 A. No.  
 5 Q. Now, in your statement you thought your husband had  
 6 discovered he was hepatitis C positive in about 1995,  
 7 but having looked at some records, you think it was  
 8 actually 1996.  
 9 A. Yes.  
 10 Q. Can you tell us about how you came to find out?  
 11 A. It was a routine renal appointment. We used to go  
 12 every three months because we were dialysing at home  
 13 then, so it was just a routine clinical appointment,  
 14 and they did routine bloods. We had the consultation  
 15 and then he said at the end, "Oh, we just need to take  
 16 these bloods", so he got the blood forms out and then  
 17 he got a category 3 risk sticker out of his drawer and  
 18 stuck that on and I asked him why he was doing that,  
 19 and he said, "Oh, I don't really know", and he sort of  
 20 flicked through the notes and said, "Oh, it looks like  
 21 you've got hepatitis C."  
 22 Q. Because at that point -- we won't explain your role --  
 23 you actually worked in the hospital, so you understood  
 24 what category 3 risk stickers were.  
 25 A. Yeah.

45

1 Dr Throssell. There is a general discussion about  
 2 your husband's condition, and if we go over the page,  
 3 there is a single line: "Counselled re hepatitis C."  
 4 That consultation was then followed with  
 5 a letter to the general practitioner, which we'll have  
 6 a look at. It's 3807005, please. We can see it's  
 7 dated 12 April 1996.  
 8 There is general discussion about your husband's  
 9 renal failure and being on home haemodialysis, and  
 10 then in the very last paragraph -- thank you -- it  
 11 simply says:  
 12 "Routine screening has shown him to be  
 13 hepatitis C positive, and I explained the significance  
 14 of this to him today."  
 15 What do you recall of being told about  
 16 hepatitis C at that appointment?  
 17 A. Not a lot. It made it more difficult because I did  
 18 know a little bit about hepatitis C anyway through my  
 19 job, and although Dr Throssell was really nice,  
 20 I don't think he knew as much about it as I did, and  
 21 he sort of dismissed it as, you know, saying, "But  
 22 there's nothing for you to worry about". And that's  
 23 when I questioned him about whether or not he ought to  
 24 see a gastroenterologist, you know, to have his liver  
 25 checked, and he more or less said, "Well, you can if

47

1 Q. We asked the doctor, Dr Throssell, to respond to your  
 2 statement, and he said he can't now recall specific  
 3 details of what you discussed at the appointment, but  
 4 he provided us with some of the medical records and  
 5 we've correlated them with those that you had.  
 6 A. Yeah.  
 7 Q. He noted the 1993 test results and he indicated that  
 8 the next note in the clinical records is the document  
 9 3807004.  
 10 We can see it's in different handwriting to the  
 11 rest of the page. It's dated 1 March 1996. It says:  
 12 "To discuss and counsel re hepatitis C  
 13 positivity on next attendance. Needs category 3  
 14 stickers on samples."  
 15 So it doesn't appear that this was  
 16 a consultation in March 1996, but that there was  
 17 a note of the need for those stickers that you recall.  
 18 A. Mm-hm.  
 19 Q. You've provided us with the medical records, and  
 20 Dr Throssell has obviously looked at them as well, and  
 21 there isn't anything else between the 1993 result and  
 22 this note in 1996 that has any reference to  
 23 hepatitis C.  
 24 We then come to the next entry in the notes,  
 25 which is 10 April 1996. It is an entry made by

46

1 you want, but I don't think it's going to be -- it's  
 2 not going to help you in any way, you're not going to  
 3 die of it", I think were his words. "Hepatitis C  
 4 won't kill you," he said, "it will be something else."  
 5 So we just waited then for the appointment to go  
 6 and see the gastroenterologist.  
 7 Q. In terms of that referral to the gastroenterologist,  
 8 Dr Throssell responded and said he thinks it may have  
 9 been in relation to an appointment you had a year  
 10 later with a different doctor.  
 11 A. Mm.  
 12 Q. You're not entirely sure whether it was Dr Throssell  
 13 or whether it was in fact a year later with  
 14 a different doctor.  
 15 A. I can't remember.  
 16 Q. What you do know is that at the appointment when you  
 17 raised the question of going to see  
 18 a gastroenterologist --  
 19 A. Yes.  
 20 Q. -- that was the response that a doctor gave you.  
 21 A. Yeah, yeah.  
 22 Q. When your husband was referred to the  
 23 gastroenterologist, he had an ultrasound of his liver  
 24 and he was told there was no scarring to it. What's  
 25 your recollection of what happened in relation to

48

1 having a liver biopsy and the discussions around  
 2 having treatment for the hepatitis C at that point.  
 3 **A.** As I don't think he -- the way it was explained to us  
 4 was a liver biopsy would determine if there was any  
 5 damage to the liver, but it also came with  
 6 complications, and I think we decided at the time he'd  
 7 got enough going on, he'd got end stage renal failure  
 8 and everything else that goes with that, and it was  
 9 just something else that, you know, if it wasn't  
 10 affecting him and it wasn't making him ill, then we  
 11 didn't want to do it.  
 12 **Q.** Because you were also advised alongside that the  
 13 prospects of success of interferon treatment --  
 14 **A.** Were very low.  
 15 **Q.** -- were very low.  
 16 **A.** Yes.  
 17 **Q.** Your husband obviously had the renal failure, and he  
 18 also then had to have his parathyroid removed. You've  
 19 wondered whether the hepatitis C exacerbated his  
 20 renal failure, but you're not very sure.  
 21 **A.** I don't know.  
 22 **Q.** But it is a concern you have.  
 23 **A.** Yes, yes.  
 24 **Q.** He also had to have a hip replacement.  
 25 **A.** Yes.

49

1 **Q.** Can you tell us a little bit about the emotional  
 2 effect of the diagnosis of hepatitis C on your  
 3 husband?  
 4 **A.** Well, it -- like I said before, it was just something  
 5 else to deal with at the time, you know, you -- with  
 6 any chronic illness, you -- it's not something -- it's  
 7 not going to get better, so you adjust your life  
 8 around that. And then when somebody else comes along  
 9 and says, "You've got this as well" -- I'm sorry ...  
 10 **Q.** [Redacted] changed as a person.  
 11 **A.** Massive change. Yeah. He was -- he was horrible to  
 12 live with. He was just like a different person. And  
 13 I think he felt that, you know, life had been so  
 14 cruel, and he just didn't deserve to have something  
 15 else as well, you know, with everything else that was  
 16 going on. Yeah, he changed a lot.  
 17 **Q.** He became more insular.  
 18 **A.** Very, yes. He never told anybody he'd got  
 19 hepatitis C, because at the time I think people  
 20 thought -- they associated it with HIV, and there was  
 21 a lot of stigma, you know, people thought they could  
 22 catch it by being -- touching you or whatever.  
 23 I mean, I knew different, but other people didn't  
 24 know. And so we just lived in our own little world.  
 25 Yeah, we just got on with it.

51

1 **Q.** Again, you've wondered whether the hepatitis C  
 2 affected his bone strength.  
 3 **A.** Yes.  
 4 **Q.** What particularly made you concerned about that?  
 5 **A.** Well, when he had the hip replacement, the surgeon  
 6 told us that when he went -- when he went in, he put  
 7 his hand in and the bone just disintegrated in his  
 8 hand, literally just disintegrated.  
 9 He made a good recovery, made a really good  
 10 recovery, but, you know, we -- I think we were a bit  
 11 shocked at the time as to how bad it was. We  
 12 didn't -- I mean, he was in a lot of pain, he was in  
 13 a wheelchair, you know, he couldn't walk. So, you  
 14 know, he needed to have it done. But I don't think we  
 15 realised at the time the extent of the damage.  
 16 **Q.** Your question has arisen, you don't know, but was  
 17 there a link to it being particularly bad because of  
 18 the hepatitis C?  
 19 **A.** A link, yes, yes, that made it worse, yes, yes.  
 20 **Q.** You've said earlier in your evidence that when your  
 21 husband was having the dialysis and dealing with the  
 22 renal failure, he had carried on working.  
 23 **A.** Yes, he ran his own business.  
 24 **Q.** And life had carried on for the two of you.  
 25 **A.** Yes, yes.

50

1 **Q.** Not even the rest of the family knew.  
 2 **A.** No.  
 3 **Q.** Nobody knew.  
 4 **A.** No. [Redacted] knew, but [Redacted] is a nursing  
 5 sister that dealt with -- well, we've been friends  
 6 55 years. So she's like my sister.  
 7 **COMPANION:** A big sister.  
 8 **MS FRASER BUTLIN:** And that feeling of isolation and of  
 9 stigma was made worse because of changes to how your  
 10 husband had his dialysis.  
 11 **A.** Yeah.  
 12 **Q.** Can you tell us --  
 13 **A.** Very much so.  
 14 **Q.** -- about that? What happened?  
 15 **A.** We -- for -- well, I dialysed him at home for  
 16 21 years, and -- but when he started to deteriorate,  
 17 we had to attend the hospital renal unit. But when  
 18 we'd gone abroad on holiday, we obviously had to tell  
 19 them that he'd got hepatitis C.  
 20 So we were isolated from all the other patients,  
 21 and sometimes in not a very nice area. You'd be  
 22 pushed into a little corner somewhere with the oldest  
 23 machine, the oldest chair, no TV, no contact with  
 24 anybody else, and just made to feel, you know, like  
 25 you'd got some contagious disease. It was awful.

52

1 Q. Sometimes your home dialysis machine would break.  
 2 A. Yes.  
 3 Q. You'd then have to go into the hospital in this  
 4 country.  
 5 A. Yes, yes.  
 6 Q. And much the same thing happened.  
 7 A. Yeah, I mean the -- it was an isolated -- you were in  
 8 isolation again, and you're on dialysis 4 hours  
 9 45 minutes, three times a week. It's a hell of a long  
 10 time to sit there on your own, you know, with no --  
 11 I mean, I used to sit there with him, but, you know,  
 12 it's not -- just not -- it's not really nice to have  
 13 to do. And then if you're not feeling well anyway,  
 14 you know, the way that you're treated, because they  
 15 need to isolate you, you know, and everybody used to  
 16 come in all this protective gear, you know, and it was  
 17 just awful.  
 18 Q. There was one particular occasion when you were going  
 19 down to the coast and wanted to be -- [redacted] would  
 20 obviously need to be dialysed down there. What  
 21 happened?  
 22 A. He could only go two days without dialysis, so if we  
 23 were going for any longer than that, he had to dialyse  
 24 wherever we were, and his mum lived in Paignton at the  
 25 time, and he hadn't seen her for a while. We were in

53

1 A. Yes.  
 2 Q. What can you tell us about how he came to be diagnosed  
 3 with renal cancer?  
 4 A. He was getting short of breath, and they advised us to  
 5 see a consultant cardiologist. So they made the -- he  
 6 had various tests, appointments, and then we went  
 7 back, and I thought it was just a routine follow-up  
 8 appointment, and when we actually got into the  
 9 consultant's -- it was a consultant I'd never seen  
 10 before, it was the first time I'd met him, and he'd  
 11 never met [redacted] before, and he was just -- he was  
 12 just looking through his notes and said, "Well, I'm  
 13 sorry to say it looks like you've got renal cancer".  
 14 And we were absolutely flabbergasted. We'd got no  
 15 idea.  
 16 Then of course everything gets set into motion  
 17 about surgery and to remove the kidney. I mean, up to  
 18 that point, he did have cysts on his kidneys, but  
 19 they'd been beneficial because, without getting too  
 20 technical, dialysis patients don't make  
 21 erythropoietin, which is in your blood, which keeps  
 22 your haemoglobin high, stops you feeling tired all the  
 23 time, and his cysts were producing EPO on their own,  
 24 so he didn't need to have it as an injection. So they  
 25 were a good thing.

55

1 Sheffield, so, you know, it's a long way. By the time  
 2 we got there he would've needed to dialyse.  
 3 So the renal unit in Sheffield contacted Exeter,  
 4 which was the nearest hospital, and said could they  
 5 dialyse them, and they said no, because of his  
 6 hepatitis C, they hadn't got -- they hadn't got the  
 7 facility -- they hadn't got a machine that they could  
 8 use.  
 9 So she came -- she -- I mean, I wish she hadn't  
 10 have done it, but the renal nurse that tried to fix it  
 11 up said that his -- [redacted]'s mother was dying, so  
 12 he needed -- that's why he needed the dialysis, and  
 13 they relented and they said they'd do it. But  
 14 I didn't know any of this and when I got there she  
 15 said, "I'm so sorry to hear about your mother-in-law",  
 16 and I had no idea what she was talking about. It was  
 17 only when we got back to Sheffield that she'd told me  
 18 what she'd done. She said, "If I hadn't have done  
 19 that, they wouldn't have dialysed you."  
 20 Q. Your husband was on the renal transplant list, but his  
 21 health continued to deteriorate.  
 22 A. Mm-hm.  
 23 Q. He took early retirement in 2001.  
 24 A. Yes.  
 25 Q. Then in 2006 you were told he had renal cancer.

54

1 But then one turns rogue or whatever it does,  
 2 but then they assured us, they said, "If you're going  
 3 to get it, it's the best cancer to get because it's  
 4 isolated in the kidney, it's not going anywhere", you  
 5 know, so we were a little bit reassured, you know.  
 6 I mean, it's still a devastating diagnosis.  
 7 But we just sort of said, well, we'll -- you  
 8 know, just go along with whatever they advise -- you  
 9 know, advising you to do.  
 10 Q. He was then referred to the oncology department to  
 11 look at surgery to remove the kidney.  
 12 A. Yes, correct.  
 13 Q. What were you told?  
 14 A. In --?  
 15 Q. What were you told originally about the removal of the  
 16 kidney?  
 17 A. That they would just take it out, you know, they would  
 18 remove the kidney, and then -- there was no mention of  
 19 chemotherapy or anything. That was it, really. They  
 20 just said they would remove it and dialysis would  
 21 carry on as normal.  
 22 Q. There were then some concerns about his lungs.  
 23 A. Yes.  
 24 Q. Because he had got some fluid on the lungs.  
 25 A. Got some fluid on his lungs, yes.

56

1 Q. So what happened in relation to that?  
 2 A. He was referred back to the Northern General and to  
 3 a cardiology lady, who they put a tube in his back and  
 4 drew off all this fluid. It was quite a lot of fluid,  
 5 apparently. And they said they would test the fluid  
 6 that they'd taken off and they would ring us. He was  
 7 in hospital for about three days or something.  
 8 And I can remember getting the phone call at  
 9 home, and this lady rang and said, "There's no cancer  
 10 in the lungs, you know, the fluid was clear". You  
 11 know, it's sort of good news and we thought -- we were  
 12 sort of, "Oh yay, at last some good news."  
 13 Q. So you went back to discuss the removal of the kidney.  
 14 A. Yes.  
 15 Q. And what happened between the August and the October?  
 16 A. I can't remember. Nothing happened, you know --  
 17 Q. You kept phoning.  
 18 A. I just kept phoning and saying, "Have we got a date  
 19 for the surgery? You know, when is it going to  
 20 happen?" And I kept getting fobbed off with, you  
 21 know, "Oh, there's problems with the theatre because  
 22 of his hep C. They can only do it either at the end  
 23 of the day or" -- yeah, it was the end of the day,  
 24 that's the only time they could do it and the theatres  
 25 were full, and then they were only available on

57

1 A. Absolutely.  
 2 Q. -- element of it.  
 3 A. Yeah, yeah.  
 4 Q. Your husband had been given some treatment to try and  
 5 slow the cancer down, but as you say, by the October  
 6 it had spread into the renal vein and into the lymph  
 7 nodes.  
 8 A. Mm.  
 9 Q. It was also into the lungs.  
 10 A. Yes.  
 11 Q. Your husband remained on medication to try and slow  
 12 the course of the cancer, even though it was  
 13 inoperable, but he died on [redacted] 2008.  
 14 A. My birthday.  
 15 Q. You've said in your statement you had to stay strong  
 16 while your husband was alive and you were caring for  
 17 him, but that after he died you didn't want to see  
 18 anyone.  
 19 A. (Indicated dissent)  
 20 Q. And you stayed off work for three months and couldn't  
 21 face the world.  
 22 A. Except this one (Indicates).  
 23 Q. We talked earlier that you didn't particularly want to  
 24 say any more than that, but then there were  
 25 difficulties as well with the undertakers, and you did

59

1 certain days, and they had to co-ordinate it with his  
 2 dialysis, and -- you know, it just seemed like it was  
 3 just too much trouble.  
 4 Q. When your husband finally went back in in the October  
 5 of 2006, what did they find in relation to the kidney?  
 6 What were you told?  
 7 A. That the cancer had spread, you know, and that it was  
 8 inoperable, and it had spread to his lungs. And we  
 9 said, "Well, you know, we've already been told that  
 10 there was no cancer there", so it's -- this must have  
 11 happened between being told there was no cancer to  
 12 waiting for the surgery.  
 13 Q. Within your husband's medical records there's quite  
 14 a lengthy letter explaining what was going on during  
 15 that time. We haven't got it up on the screen, but  
 16 the explanation in relation to the delay from  
 17 mid-August to October was:  
 18 "... a problem we have with organisation of  
 19 lists across the two hospitals and the need to access  
 20 the dialysis unit. There is quite a considerable  
 21 administrative problem organising and getting access  
 22 to the theatre lists."  
 23 There's no reference to hepatitis C being an  
 24 issue but you recall in your conversations that that  
 25 was a significant --

58

1 ask me to read a couple of paragraphs from your  
 2 statement about the difficulties you had in relation  
 3 to the funeral arrangements. I'll do that now, okay?  
 4 "My husband's hepatitis C infection affected his  
 5 funeral arrangements. I have a good friend of more  
 6 than 50 years who is a clinical nurse specialist and  
 7 who worked at the hospital and in the course of her  
 8 job dealt with death all the time. When my husband  
 9 was dying, she held his hand and tried to make his  
 10 final moments less traumatic. She also advised me not  
 11 to go to the funeral home because the undertakers  
 12 would refuse to prepare his body due to his hepatitis  
 13 C infection.  
 14 "My husband always dressed very smartly and he  
 15 had several beautiful suits. I picked out a lovely  
 16 suit for him to wear, but the funeral home wouldn't  
 17 allow them to dress him, and he was cremated in his  
 18 hospital gown, with his suit laid on top of him."  
 19 That's something you found particularly  
 20 upsetting.  
 21 A. Yes.  
 22 Q. The final part I wanted to ask you about.  
 23 You and your husband received one payment from  
 24 the Skipton Fund at some time between 2003 and 2007,  
 25 but since then you've heard nothing further from the

60

1 Skipton Fund, and nothing from the new scheme, the  
2 EIBSS.  
3 **A.** No.  
4 **Q.** In fact, you're not even particularly aware of who the  
5 EIBSS is.  
6 **A.** I didn't know it existed.  
7 **Q.** Until I asked you whether you'd heard from them.  
8 **A.** Yes.  
9 **Q.** Mrs AX, that's all I have to ask you. Is there  
10 anything else you would like to say?  
11 **A.** No.  
12 **MS FRASER BUTLIN:** Sir.  
13 **SIR BRIAN LANGSTAFF:** It's really important that you've  
14 come to give this very moving evidence, and one of the  
15 features of giving evidence orally is it is not just  
16 what is said, but how you say it. And sometimes what  
17 isn't said, but how you say it nonetheless, tells you  
18 everything you need to know which words couldn't  
19 convey. In my view, that's what you've shown us  
20 today.  
21 So thank you very much.  
22 **A.** Thank you.  
23 **SIR BRIAN LANGSTAFF:** We'll take a break. We'll take  
24 a break until 1.20.  
25 **MS FRASER BUTLIN:** Thank you, sir.

61

1 potentially cause me harm. The main impact would've  
2 been at school, when I was prevented from any sort of  
3 physical activity. So I believe teachers didn't want  
4 the responsibility of being in charge of me when  
5 an injury occurred.  
6 For instance, I was very keen to play football  
7 as a young lad, but prevented from doing so because of  
8 the risk of injury. However, I was given a linesman's  
9 kit and encouraged to run the line. Not the same  
10 thing. My hero was Gordon Banks and I wanted to be  
11 a goalkeeper.  
12 **Q.** You were initially treated with plasma, then with  
13 cryoprecipitate until about 1983.  
14 **A.** Yes.  
15 **Q.** We'll come to the 1983 point in just a moment.  
16 Your mum passed away about five years ago, but  
17 when she was still alive, she organised for your  
18 medical records to be obtained, and you had a chunk of  
19 them at that point.  
20 **A.** Yes.  
21 **Q.** Within those documents there was a document from 1969.  
22 We're just going to have a look at that.  
23 It's 3742005, please, Henry.  
24 We can see that it's a letter to your family  
25 doctor at the time saying that you had received

63

1 **SIR BRIAN LANGSTAFF:** 1.20.  
2 (12.05 pm)  
3 (Luncheon adjournment)  
4 (1.20 pm)  
5 **SIR BRIAN LANGSTAFF:** Our next witness is David.  
6 **MS FRASER BUTLIN:** That's correct, sir.  
7 **SIR BRIAN LANGSTAFF:** David, please.  
8 **DAVID RANKIN (sworn)**  
9 **Questioned by MS FRASER BUTLIN**  
10 **MS FRASER BUTLIN:** David, you have haemophilia A, and you  
11 started bruising when you were very young. You had  
12 been adopted, so there were concerns that your  
13 adoptive parents were mistreating you.  
14 **A.** That's correct.  
15 **Q.** But then you were diagnosed with haemophilia by  
16 a family friend, GP, who spotted the signs, and you  
17 were told that it was severe initially.  
18 **A.** Yes.  
19 **Q.** But subsequently that was changed down to moderate.  
20 **A.** Yes. In the 1970s, late 1970s, there was  
21 a re-diagnosis from mild to moderate.  
22 **Q.** While you were growing up as a child, what impact did  
23 the haemophilia have on your life?  
24 **A.** I was prevented from doing a lot of things. I was  
25 encouraged not to do any activities that could

62

1 treatment with cryoprecipitate between August  
2 and September 1969, and it indicates that:  
3 "This centre is taking part in a survey arranged  
4 by the MRC cryoprecipitate working party in order to  
5 discover whether transfusion jaundice occurs in  
6 patients suffering from haemophilia or Christmas  
7 disease who have been treated with blood, plasma or  
8 plasma concentrates."  
9 The doctor is then asked to indicate whether or  
10 not jaundice had occurred following your treatment  
11 in August and September 1969.  
12 As far as you're aware, did your parents consent  
13 to being part of that study?  
14 **A.** I actually think this document came to light fairly  
15 recently as opposed to when my mother was trying to  
16 obtain records, because I'm sure she would've reacted  
17 somewhat differently to that, had she known about it.  
18 As far as I'm aware, my parents were not made  
19 aware of this study, and certainly I -- the first  
20 thing I knew was when this letter came to light fairly  
21 recently.  
22 **Q.** As you were growing up, there were discussions about  
23 you going to Treloar's, but your parents didn't want  
24 you to go there.  
25 **A.** No.

64

1 Q. What was their thinking?  
 2 A. When I was initially adopted and it was discovered  
 3 that I had haemophilia, an offer was made to take me  
 4 back and replace me with somebody else, and my parents  
 5 fought to keep me, fortunately. So my parents always  
 6 had this attitude that I should stay within mainstream  
 7 education and grow up with other people, normal  
 8 people, and whilst Treloar's offered the opportunity  
 9 for excellent medical care, my parents felt that being  
 10 in a school that was exclusively for people with  
 11 medical conditions, that that possibly wasn't the best  
 12 way forward for me.  
 13 Q. With hindsight, you're very glad that you remained  
 14 where you were.  
 15 A. Indeed, the statistics for haemophiliacs from  
 16 Treloar's do not make good reading.  
 17 Q. We'll come back to that feeling of being very  
 18 fortunate to be here in a moment.  
 19 You wanted to join the RAF as you were growing  
 20 up.  
 21 A. I did.  
 22 Q. You wanted to fly jets, so you tried to join the  
 23 school Cadet Force.  
 24 A. Yes.  
 25 Q. And they declined.

65

1 and set off in the very early hours of the morning  
 2 from Truro station, about 5.30 in the morning,  
 3 I remember, to get to Biggin Hill in Kent. I arrived  
 4 at Biggin Hill, presented myself to the guard room,  
 5 and my name was not on the list. So I was quite  
 6 insistent and I said I had travelled all the way from  
 7 Cornwall, I had the letter with me that was the  
 8 initial acceptance letter.  
 9 So after a little bit of digging around,  
 10 somebody came to see me and said I wasn't on the list  
 11 because they had sent me another letter saying that in  
 12 view of the haemophilia, which I had declared, I would  
 13 not be suitable for service in the RAF. That letter  
 14 had obviously arrived after I left to get to  
 15 Biggin Hill.  
 16 On the strength of me being quite keen and  
 17 insistent, they said, "Seeing as you're here, you  
 18 might as well undertake the testing."  
 19 Q. And you passed.  
 20 A. So the way it worked is at the end of the weekend, the  
 21 list was read out, first of all for pilot, then for  
 22 navigator, then for those who were lucky enough to  
 23 pass the aptitude test for both pilot and navigator.  
 24 The list was read out in alphabetical order, and first  
 25 list for pilot, my name was not on the list; for

67

1 A. I went to Portsmouth Grammar School and they had  
 2 a combined Cadet Force unit, and attendance was  
 3 compulsory. You needed to do a minimum of a year,  
 4 attend an annual camp and one weekend camp and  
 5 complete a proficiency certificate, so initial  
 6 training syllabus. I assumed I would be joining it,  
 7 and when I was excluded I wanted to know why. They  
 8 felt, again, that the risks involved in cadet training  
 9 were not appropriate for somebody with haemophilia.  
 10 I did not want to be excluded from the  
 11 activities that my peer group were undertaking, and  
 12 so, with my parents' support, I argued and eventually  
 13 the school said "Okay, join the CCF", and I elected to  
 14 join the RAF section of the CCF.  
 15 Q. Your parents subsequently moved down to Cornwall and  
 16 there you were able to join the local Cadet Force.  
 17 A. Yes.  
 18 Q. At 16 you applied to join the RAF itself.  
 19 A. Yes.  
 20 Q. What happened?  
 21 A. So at that stage you could apply for a test in  
 22 advance. So at 16 you could apply to the RAF, test in  
 23 advance and they would test -- it was a short test,  
 24 a weekend at Biggin Hill to test your aptitude for  
 25 pilot and/or navigator. I applied and was accepted,

66

1 navigator, my name was not on the list; for pilot and  
 2 navigator, my name was not on the list. So at that  
 3 point I figured I'd made a complete and utter fool of  
 4 myself.  
 5 However, because I was not on the list, my name  
 6 was read out last, having passed both the aptitude  
 7 test for pilot and navigator.  
 8 Q. But subsequently the chief medical officer declined to  
 9 allow you to go forward because of the haemophilia.  
 10 A. So initially I received a letter saying, despite the  
 11 pass for the aptitude test, in view of my medical  
 12 history, I was deemed permanently unfit for service.  
 13 I argued that such characters as Douglas Bader had  
 14 successfully flown with the RAF, despite being  
 15 a double amputee, and at the time -- I cannot remember  
 16 the name of the pilot, but somebody had undergone  
 17 fairly major heart surgery and had also continued to  
 18 fly with the RAF.  
 19 So eventually I was invited for an interview  
 20 with the chief medical officer at Goodge Street in  
 21 London. I argued my case, he argued -- not his case,  
 22 but the case on behalf of the accountants, who didn't  
 23 want to run the risk of training me, only for me to be  
 24 run over outside the base and be unable to fulfil my  
 25 duties.

68

1 After a lot of toing and froing, he did offer me  
 2 a desk job, which I, in the pride of a teenager,  
 3 declined, rather foolishly. I subsequently realised  
 4 that if I'd taken the desk job, I probably could've  
 5 transferred over into a flying role at a later date.  
 6 **Q.** That meant you had to decide on something you've  
 7 described as your plan B for your career.  
 8 **A.** Plan B had already been initiated. The process of  
 9 arguing with the RAF took some six years, so I didn't  
 10 really give up arguing until I was 21/22. In the  
 11 meantime, I had elected to find a job, and I found  
 12 a job with National Westminster Bank.  
 13 **Q.** Your parents then moved away from Cornwall and you  
 14 went with them.  
 15 **A.** Yes.  
 16 **Q.** And ended up working in a bank in London.  
 17 **A.** Initially in Crawley, and then I got transferred to  
 18 the Haywards Heath branch, where I ran into a chap  
 19 called Dick Simmons, who subsequently became the  
 20 training manager for the area. He spotted something  
 21 in me which I hadn't spotted, and he got me a job or  
 22 got me on a training course for a role in London in  
 23 the insolvency and debt recovery office. So, yes,  
 24 I ended up working in King's Cross.  
 25 **Q.** That timeline of being in Cornwall, then moving on up

69

1 **A.** The swelling was no longer increasing. The bat had  
 2 walloped me. I hadn't lost consciousness. It had --  
 3 it had broken the joint between the cartilage and the  
 4 bone, but it wasn't to my mind a severe injury. Yes,  
 5 looking back at it today, it was a head injury of  
 6 sorts. But as I say, I wasn't suffering from any  
 7 nausea, the bleed seemed to be under control, it  
 8 seemed to be sorting itself out, and I would've  
 9 preferred to have waited 24, 48 hours. My usual MO  
 10 for bleeds was I would clot and either it would hold  
 11 or it wouldn't hold. So subsequent to this I'd often  
 12 leave things for 24 hours before doing anything about  
 13 it.  
 14 **Q.** When you received the Factor VIII, were you warned of  
 15 any risks involved in receiving it?  
 16 **A.** I had no recollection of being told that there was  
 17 a risk with the treatment, and I have had this  
 18 conversation subsequently with my parents and neither  
 19 of them remember it being mentioned at the time,  
 20 because although I was over 18, my mother was  
 21 accompanying me because obviously I wasn't fit to  
 22 drive myself to the hospital, so she had driven me.  
 23 **Q.** You've tried to obtain your medical records from  
 24 Treliske Hospital, but you were told they've been  
 25 destroyed.

71

1 eventually to London helps you pinpoint the date on  
 2 which you received Factor VIII --  
 3 **A.** Yes.  
 4 **Q.** -- that you believe infected you with hepatitis C.  
 5 **A.** I'd been very fortunate in Cornwall. So from the tail  
 6 end of 1979 onwards, I hadn't received any treatment  
 7 at all, and then I joined the bank on 2 August 1983,  
 8 a Tuesday. The following Monday I was playing  
 9 rounders with the local Rotaract club on the beach  
 10 near Trevoze Head in Cornwall. I was second into bat,  
 11 and the person in front of me, rather than throwing  
 12 the bat on the floor, threw the bat over his shoulder.  
 13 I hadn't anticipated that, and it hit me in the face,  
 14 cracking my nose, my cheek and blacking my eye.  
 15 So I ended up at Treliske Hospital in Cornwall,  
 16 just outside Truro, with a half-open packet of peas  
 17 clutched to my face, hoping that they'd have a look at  
 18 it and sort it out for me.  
 19 **Q.** That was August 1983.  
 20 **A.** It was, it was August 1983.  
 21 **Q.** At that point when you went in, you received  
 22 Factor VIII products.  
 23 **A.** Yes.  
 24 **Q.** You believe that they weren't necessary on that  
 25 occasion. Can you tell us why you think that?

70

1 **A.** My mother did that on my behalf. So when I started to  
 2 become ill in the mid-1990s, I deteriorated slowly,  
 3 but mentally a little bit quicker than physically, and  
 4 my mother took it upon herself, as was in her  
 5 character, to try to find my medical records to  
 6 pinpoint when this infection must have happened.  
 7 She was told by Treliske Hospital that my  
 8 records were no longer available and that they had  
 9 been destroyed. She did enquire whether they had any  
 10 records of the treatment that they'd used and what  
 11 they'd had and what they'd done with it, and they said  
 12 no, they didn't have those records either.  
 13 **Q.** Subsequently there is an entry in your UKHCDO  
 14 record --  
 15 **A.** Yes.  
 16 **Q.** -- of the treatment.  
 17 **A.** Yes.  
 18 **Q.** Did you ever receive Factor VIII again after that  
 19 incident as far as you know?  
 20 **A.** I think possibly I did. I'm not certain. The next  
 21 time I can recall receiving treatment will have been  
 22 when I'd moved back to the south-east and was  
 23 registered with St Thomas', and the first time I can  
 24 recall requiring treatment, expecting to get  
 25 Factor VIII, I was offered either DDAVP or tranexamic

72

1 acid, which surprised me until I was told that they  
 2 thought they had some issues with Factor VIII.  
 3 Q. So you'd gone in expecting Factor VIII at that point.  
 4 A. Yes.  
 5 Q. You were offered something different, and what exactly  
 6 did you say and what did they say?  
 7 A. I was suffering from nosebleeds and I was expecting to  
 8 be treated with Factor VIII, and St Thomas' said, "No,  
 9 we'd rather go down the route of trying these  
 10 alternatives". And in the end, for that injury, my  
 11 nose was cauterised.  
 12 Q. Did they say specifically what they were concerned  
 13 about in the Factor VIII?  
 14 A. I cannot recall that. All I know is that my  
 15 recollection is that there was an issue with it.  
 16 Q. In 1990, you were working in London and went for  
 17 a routine check-up at the Haemophilia Centre.  
 18 A. Yes.  
 19 Q. You received a phone call a few days later.  
 20 Can you tell us what was discussed on that phone  
 21 call?  
 22 A. So I can't remember the day but, yes, I'd been in for  
 23 a blood test, and they telephoned me and asked -- they  
 24 said they'd got some interesting results and they  
 25 wanted to enquire whether I had been drinking the

73

1 A. Unfortunately I've not been able to obtain my sickness  
 2 record card, but I can visualise it and the entries  
 3 were regular for flu-like symptoms. So I would ring  
 4 up and say, "Look, I'm sorry, I'm unwell and it's  
 5 flu."  
 6 These flu occurrences were happening more and  
 7 more regularly, and I didn't think an awful lot about  
 8 it, but some of my colleagues sort of said, "You don't  
 9 seem yourself, you don't seem to have the same amount  
 10 of energy, the same vitality". And so it wasn't  
 11 a huge surprise when the diagnosis was eventually  
 12 given that I had hepatitis C.  
 13 Q. With your move north, your treatment transferred to  
 14 Birmingham.  
 15 A. Yes.  
 16 Q. And you were asked to have blood tests.  
 17 A. Yes.  
 18 Q. What happened after that?  
 19 A. So I received a phone call saying that they'd like me  
 20 to come in as a result of the blood test. So  
 21 I attended the hospital. I wasn't able to see the  
 22 person in charge, Jonathan Wilde. A junior doctor  
 23 spoke to me in a corridor and delivered the death  
 24 sentence that I had hepatitis C. He went on to say  
 25 that he felt it was as a result of my lifestyle

75

1 night before. I said yes, there had been somebody's  
 2 leaving do and I had three or four pints, and they  
 3 said, "Oh, okay, that possibly explains the results  
 4 that we've got."  
 5 I enquired what that was and they said, "Some of  
 6 your liver function enzymes are elevated", and that  
 7 was the end of the conversation. I was reassured by  
 8 the fact that they thought it was possibly down to  
 9 having a couple of beers.  
 10 Q. From then until your diagnosis, was there any  
 11 follow-up of those blood tests that you are aware of?  
 12 A. Not that I recollect at the time. I know from  
 13 subsequent conversations that in addition to the blood  
 14 tests, they were also testing for at least HIV, and  
 15 I think subsequently they did mention they were  
 16 looking for non-hep A, non-hep B as well.  
 17 Q. But as far as you're concerned, at the time, between  
 18 1990 until you were diagnosed, there weren't regular  
 19 checks of your liver function tests that you knew  
 20 about?  
 21 A. No, not that I knew about.  
 22 Q. You then moved north because you received a promotion.  
 23 A. Yes.  
 24 Q. And in 1992, you started to struggle at work. What  
 25 was happening?

74

1 choices and that was pretty much the tail end of the  
 2 conversation. I was left to drive myself back from  
 3 Birmingham to [redacted].  
 4 Q. That news was delivered in the corridor.  
 5 A. In a corridor.  
 6 Q. With other patients around?  
 7 A. And people walking past, yes.  
 8 Q. After you had driven home, you then subsequently met  
 9 with Dr Wilde, Jonathan Wilde, and what did he say to  
 10 you?  
 11 A. So he apologised for the way the news had been  
 12 delivered. He was very sincere in his apology. He  
 13 went on to say that it was his choice to let patients  
 14 know, his patients know, that they had hepatitis C,  
 15 and that other clinics and other trusts were not  
 16 telling their patients because they had nothing to  
 17 offer them in the way of treatment.  
 18 He went on to say that he didn't have anything  
 19 to offer, but there was a hope that there might be  
 20 something available in the future, and as soon as  
 21 there was, he would let me know.  
 22 Q. You've recorded in your statement that he said that he  
 23 felt compelled to share the information with patients.  
 24 A. He felt it was important that his patients, that all  
 25 patients, should know the conditions that they were

76

1 suffering from in order that they could make either  
 2 arrangements or changes in their lifestyle  
 3 accordingly.  
 4 **Q.** You received a letter following up from that  
 5 discussion with Jonathan Wilde. We're just going to  
 6 look at it. It's 0357002, please.  
 7 We can see the letter in the middle saying:  
 8 "We are currently reviewing all our patients who  
 9 have received coagulation factor concentrates in the  
 10 past to see whether they have evidence of chronic  
 11 inflammation of the liver caused by the hepatitis C  
 12 virus. It is well recognised that prior to heat  
 13 treatment of concentrates hepatitis C virus was very  
 14 readily transmitted in factor concentrates. In some  
 15 individuals, the virus settles in the liver and causes  
 16 chronic inflammation. It has recently been shown that  
 17 the drug interferon can eradicate the virus in some  
 18 people."  
 19 Then it goes on at the end to indicate:  
 20 "We are setting up a joint clinic with the liver  
 21 doctors so we can discuss hepatitis C infection with  
 22 you further and, with your agreement, take the  
 23 opportunity to perform the new blood test to establish  
 24 the situation for you."  
 25 **SIR BRIAN LANGSTAFF:** And the new blood test is that

77

1 resignation letter.  
 2 **Q.** So we'll come back to that.  
 3 **A.** Yes.  
 4 **Q.** But in 1996, you became unwell, and then did start  
 5 treatment, and you went on interferon and Ribavirin.  
 6 **A.** Yes.  
 7 **Q.** What was that like?  
 8 **A.** Not enjoyable at all. The Ribavirin was supposed to  
 9 attenuate some of the side-effects of the interferon,  
 10 not too successfully. The main side-effects of  
 11 interferon are mood swings, violent mood swings. You  
 12 know it's going to happen, but there is absolutely  
 13 nothing you can do about it. Additionally, night  
 14 sweats, increased flu-like symptoms. It's not a nice  
 15 process at all.  
 16 **Q.** By then you were married.  
 17 **A.** Yes.  
 18 **Q.** And you've said you were surprised that your wife put  
 19 up with you at that point.  
 20 **A.** My then wife had previously been out with  
 21 a haemophiliac who tragically died, so she was aware  
 22 of some of the things with haemophilia. We had the  
 23 discussion before we were married. After my  
 24 diagnosis, we had a further discussion, and at all  
 25 stages up to the point we actually got married, I said

79

1 referred to in the last sentence of the first  
 2 paragraph?  
 3 **MS FRASER BUTLIN:** It is, apologies, sir. Yes, exactly.  
 4 **SIR BRIAN LANGSTAFF:** Thank you.  
 5 **MS FRASER BUTLIN:** You attended for that blood test.  
 6 **A.** Yes.  
 7 **Q.** And you were confirmed to be PCR positive.  
 8 **A.** Yes.  
 9 **Q.** You didn't start treatment at that point, but  
 10 treatment came later.  
 11 **A.** My recollection is that it was still very much  
 12 a trial. So it was a fight to get on that trial. My  
 13 viral load at the time indicated that the trial would  
 14 potentially not be successful, and obviously the trial  
 15 was expensive, so there was a struggle to get me on  
 16 that trial with interferon.  
 17 **Q.** But at around this time, you decided to resign from  
 18 the Cadet Force that you'd been part of all of those  
 19 years.  
 20 **A.** That was actually a little later than this.  
 21 **Q.** Ah, apologies. Sorry, your statement had -- can you  
 22 tell us when you did resign from it, was it after  
 23 treatment?  
 24 **A.** Once I moved back to Sussex in early 2000 -- I believe  
 25 2002/2003 springs to mind. I'd have to find my

78

1 to her, "If you want to back out of this, I will  
 2 understand entirely". And she chose not to.  
 3 **Q.** You've described in your statement that you were  
 4 a very difficult person to live with during that time.  
 5 **A.** I didn't like living with me and I can't imagine that  
 6 anybody else would've found it in any way an enjoyable  
 7 experience.  
 8 **Q.** You continued to work during the treatment.  
 9 **A.** Yes.  
 10 **Q.** But a senior manager at work tried to remove you.  
 11 **A.** My immediate line manager had noticed difficulties,  
 12 and I had mentioned to him what was going on and he  
 13 was extremely sympathetic. I was then approached by  
 14 the clerk to this senior manager, and the clerk said  
 15 that this senior manager wished to interview me. He  
 16 then went on -- we had worked together, this clerk and  
 17 I, and he went on to say a warning, more than anything  
 18 else, that he felt that she intended to use the  
 19 interview as a means of dismissing me, or perhaps  
 20 start the process of dismissal.  
 21 So forewarned, I went into the interview.  
 22 A statement had been prepared for me and the interview  
 23 was along the lines that I must know that my  
 24 performance was not of a standard that was acceptable,  
 25 and that therefore I should sign this witness

80

statement to that effect, and that would then be the mainstay of the dismissal process. I declined to sign that statement. I felt it was inequitable and unfair and incorrect. This senior manager wasn't particularly happy about that, but there was very little that she could do about it at that point.

**Q.** Then what happened in relation to work?

**A.** My line manager suggested that the health -- the occupational health nurse, who was due to visit anyway, should speak to me. I spoke to the occupational health nurse. She was most sympathetic and she said, "Go and pack up what you got from your desk and go home". I said, "What do you mean?" She said, "Go home. We'll take it from here. You will be paid sick for a minimum of six months. If I can organise it, it will be a year. During that period of time, we'll refer all of this to the bank doctor. He may wish to see you, he may not, and a decision will be taken."

The bank doctor was most sympathetic. He phoned me up and said, "Look, there's no need to drag you all the way down to London. If you're happy for me to speak to your medical team, I'll do that and I'll keep in contact with you and let you know what the decision was."

81

bed. You can have brief bursts of activity, but it's a general deterioration in both physical health and consequently mental health. I certainly became extremely lethargic, tendency to become melancholy or depressed, and uncommunicative.

**Q.** And in 2001, your marriage broke down.

**A.** Yes.

**Q.** Partly because of the strain of her working all day, you being retired, and all the mental effects that you were suffering from.

**A.** You know, I understand entirely, it must be extremely difficult to work all day to support somebody who initially -- you got married, we're going to support each other. To leave the house with this person still in bed being miserable, come home perhaps to find them in the armchair, sat in front of the TV having done nothing all day in the way of housework, contributing to the household. I was offering absolutely nothing and, yeah, it took its toll. I do not blame her, and hopefully she doesn't blame me too much either.

**Q.** One sadness from that time is the fact that you never had children.

**A.** The period of time this happened was absolutely the sweet spot for most couples to start a family, and that didn't happen for us, which is possibly

83

And the decision was very favourable. NatWest was a fantastic employer. It was a case of, "No, no, we understand entirely, most unfortunate set of circumstances, we'd like you to retire early through ill-health. We'll increase your service from 14 years to 20 years for pension purposes. You may draw down your pension immediately, and whilst you continue to live, you will have full staff benefits."

I did take the precaution of showing this offer to the union, and the union said, "It's the best offer we've ever seen, you should rip their arm off at the shoulder". So I was very, very grateful to both the bank's doctor and the senior management at NatWest.

**Q.** In terms of that first round of treatment, it was unsuccessful.

**A.** Yes.

**Q.** How were you told about that?

**A.** Essentially, it was a phone call to say, been unsuccessful, no, they were taking me off the trial, so that was it. A little bit of hope disappeared.

**Q.** What was your health like when you finished that treatment?

**A.** I think anybody whose had hepatitis C, it is -- it's described as flu-like symptoms. Severe malaise. You don't want to do anything, you'd much rather stay in

82

fortunate, the difficulties with being ill, and also the awareness that I might not be around to father any children for very long was very much in the forefront of both of our minds.

**Q.** You've described that between 2003 and 2005, you became very insular.

**A.** Yes.

**Q.** Do you want to tell us anything else about that period of time in your life?

**A.** It's -- the slippery slope is one that you don't perceive at all when you're at the top of it. It's only really when you're well and truly going down that slope and you start to realise that, having had quite an active social life, various hobbies and activities, friends, parties, meals out, et cetera, et cetera, it just dawns on you that suddenly, through no fault of anybody else's but your own, you're sitting there on your own, hoping that nobody comes and knocks on the front door, not answering the phone, and just building a wall, is how I would describe it, and hoping to hide behind that wall until it all goes away or it's all over.

**Q.** One of the activities you had withdrawn from was the Cadet Force.

**A.** Yes.

84

1 Q. Why had you stopped doing that?  
 2 A. It was an activity -- I'd got so much out of cadets as  
 3 a young lad, I wanted to pay that debt back, and  
 4 I continued to try and do so until I realised that  
 5 I really wasn't doing the things that I should be  
 6 doing. I was now no longer physically capable of  
 7 doing those things. So, with much regret, I offered  
 8 my resignation. I felt it was no longer fair to the  
 9 young people. I couldn't do what I was supposed to  
 10 do.  
 11 Q. In 2005, you went with some friends down to watch the  
 12 24-hour Le Mans.  
 13 A. I did.  
 14 Q. On the second day, you became unwell.  
 15 A. I had usual flu-like symptoms on the way down.  
 16 I drove my car on the way down there, and the -- we  
 17 would go down several days before the race started,  
 18 set up camp, a large marquee tend, lots of individual  
 19 sleeping tents. We went to collect some firewood and  
 20 I was feeling more and more unwell, letting other  
 21 people do most of the donkey work, and then I just  
 22 took to my bed, and that was it. I never did get to  
 23 see any of the race. I heard it, but I didn't get to  
 24 see any of the racing.  
 25 I was in more and more pain. Not entirely sure

85

1 Q. Looking back, sometimes you're not entirely sure what  
 2 was really going on and what were the hallucinations  
 3 and the paranoia that you were feeling.  
 4 A. Certainly. I do know that I had already had the  
 5 diagnosis of hepatic encephalitis, so that would have  
 6 contributed to it, plus also large amounts of  
 7 morphine.  
 8 Q. You stabilised and were allowed to go back to your  
 9 parents' house.  
 10 A. Addenbrooke's got me stable and they said, "Look, you  
 11 can wait here for a liver, but it's probably going to  
 12 be better for you if you're in a more familiar and  
 13 friendly environment". So I went back to -- rather  
 14 than going back to my house, because I wasn't fit to  
 15 look after myself, I went to wait at my parents'  
 16 house, mainly bedridden.  
 17 Q. You were waiting for a call to say there was  
 18 a suitable liver --  
 19 A. Yes.  
 20 Q. -- transplant.  
 21 A. The process had been explained to me quite clearly,  
 22 that when a suitable liver -- I was fairly close to  
 23 the top of the list at this stage, and as soon as  
 24 a suitable liver -- for those who don't know, it's  
 25 basically blood type for liver transplants, so as soon

87

1 where it was, it was just about all over, and so once  
 2 we were due to come home, I was not in a fit state to  
 3 drive. So I said to my friend, "I'm afraid you're  
 4 going to have to drive home", and it was an agonising  
 5 trip home for me.

6 Shortly after we got back I realised that things  
 7 were not getting better, so the next thing was  
 8 an ambulance trip from my house to St Thomas'.  
 9 Q. And then subsequently you were moved from St Thomas'  
 10 up to Addenbrooke's.  
 11 A. My recollection is there was some -- dispute is the  
 12 wrong term. My mother wanted me to go to  
 13 Addenbrooke's. I'd already been to Addenbrooke's for  
 14 my assessment prior to transplant, and my mother felt  
 15 that this was -- I needed to be in Addenbrooke's. St  
 16 Thomas' didn't think I was stable enough to transfer.  
 17 But eventually the point came when both hospitals  
 18 agreed that that was the way forward, so it was a trip  
 19 from St Thomas' to Addenbrooke's.

20 In the meantime, my reaction to the painkillers,  
 21 mainly morphine, was that I'd become delusional,  
 22 I think, certainly was having some very spectacular  
 23 hallucinations. I've got -- I have got some  
 24 relatively clear memories of that time, but they are  
 25 pretty haphazard.

86

1 as an O positive liver became available, they would  
 2 give me a call and I would get myself up to  
 3 Addenbrooke's, my dad would drive me up to  
 4 Addenbrooke's, and then we'd go through the  
 5 pre-operation process in preparation for a liver.  
 6 And that's indeed what happened. We got a phone  
 7 call. We did get told to treat it as a dry run  
 8 because they weren't certain whether that liver would  
 9 be in a fit state to transplant by the time we got the  
 10 liver and me up to Addenbrooke's. I don't recall  
 11 being told where the liver was coming from but they  
 12 did say it wasn't sourced in-house.

13 I got to the hospital and they said, "Look,  
 14 time-wise, it's still within the time frame, so we're  
 15 going to go for it, with your consent". At that  
 16 stage, it's not a case of consent; it's the only  
 17 choice you've got. So prepared for the operation,  
 18 told to get a little bit of sleep while they did the  
 19 work, went down, premeds, lights out, and the next  
 20 thing I knew I was coming round in the recovery room.

21 Q. Initially it seemed like everything had gone fairly  
 22 well, but after 48 hours you deteriorated.  
 23 A. Initial sense of absolute euphoria. I'm alive. All  
 24 is good. And that was pretty much -- I was very weak.  
 25 It's a huge operation, two surgeons having their hands

88

inside you; one doing the removal, one putting the other one back in. I wasn't really aware of anything other than the faces of the medical team, looking more sombre than I would expect, and eventually it was explained to me that although the liver had gone in nice and pink and healthy, it hadn't started to do its job. So blood (inaudible) was still good, it wasn't dead, it wasn't being rejected, it just was not working.

Consequently, the only course of action was another liver transplant, and they hoped that another suitable liver would be available in time.

**Q.** There was one particular Saturday afternoon when it was very solemn.

**A.** So initially I was quite well, but I started to deteriorate. I ended up on the high dependency unit at Addenbrooke's and in an awful lot of pain. I was not healing, so as fast as they were trying to get units of blood in me, it was leaking out from all over the place, basically.

I had been in and out of consciousness, and it was a Saturday afternoon, and I remember coming to and seeing a lot of familiar faces, but the one thing that struck me was in amongst those familiar faces was the hospital padre, and none of those faces looked

89

of it. Yes, I was aware of it.

**Q.** That continues to give you nightmares.

**A.** I had some very, very bad nightmares at the time and, yes, it -- it's still somewhere that -- unfortunately your mind takes you back to these places when you least expect it and certainly you don't want it.

**Q.** You were very weak after the second transplant.

**A.** When I went into hospital, first of all, I weighed about 22/23 stone. When I finally left hospital in February 2006, I weighed just over 11 stone.

Physically I got to the point where I could do nothing for myself whatsoever. To pick up a plastic cup half full of water was almost all I could manage. So it really did take its toll on me.

I had become institutionalised. I was not getting any better, any worse. Although I did not fulfil the criteria to leave hospital, it was felt that the only way I would make any form of recovery would be back in, again, a familiar environment and not staring at the same walls in the ward that I had been for several months.

**Q.** You say in your statement you had become a difficult and uncooperative patient.

**A.** Yes. I've had counselling for this. I still haven't quite forgiven myself for it. I had had plenty of

91

particularly cheerful.

Slipped into unconsciousness, and on the Sunday morning I remember sort of coming to and croaking at the nursing staff and they all looked very surprised to see me. No breakfast had been ordered for me, and subsequently the medical team did say they had not expected me to make that Sunday.

**Q.** You had a second transplant --

**A.** Indeed.

**Q.** -- at the beginning of December 2005. What can you tell us about that?

**A.** I was incredibly weak by that stage. It was very touch and go as to whether it was a waste of everybody's time. But we did go ahead with it, and that liver had actually been sourced in-house, so Addenbrooke's were very confident that it would be -- well, it'd be down to me physically whether I could cope with it or not, and we went for it and here I am.

So I came to after the second operation -- actually, in truth, I came to during that operation.

I was in such a weakened state that the anaesthetist had tried to use the minimum amount of anaesthesia, and unfortunately I had slipped back into consciousness during the operation. It had been noted. I was subsequently asked whether I was aware

90

spells in hospital and had remained cheerful and

co-operative. On this occasion, I wasn't able to do so, and I recognise that my behaviour was certainly

not what I would hope for myself, although obviously the nursing staff were very understanding. When

I subsequently went back to apologise, they said there was absolutely no need, but it's still something which does not sit well with me.

**Q.** You've said in your statement logically you understand that anyone else in the position would've been exactly the same.

**A.** I would forgive anybody else, but I struggle to forgive myself.

**Q.** You were discharged back to your parents' house.

**A.** Yes.

**Q.** And you say that the initial delight of being discharged soon faded.

**A.** I hadn't smelt fresh air for -- well, since the middle of October until the middle of February. So I remember being wheeled out, because I wasn't capable of walking, into the ambulance, and that just brief smell of fresh air was quite euphoric again.

They got me home to my parents' house, lifted me in, and -- a combination of things. So obviously my parents had other things to do, so I didn't have the

92

1 nursing staff at my beck and call as I had done  
 2 before, and it was a long and painful process to get  
 3 back to a state where I could look after myself.  
 4 Q. It took three months before you could walk again.  
 5 A. Yes.  
 6 Q. It took until August 2006 when you managed to find  
 7 your car keys --  
 8 A. Correct.  
 9 Q. -- and drive.  
 10 A. Yes.  
 11 Q. It took about a year before you could function  
 12 independently.  
 13 A. Certainly. My mother would -- she really didn't want  
 14 me to go and live on my own again, but it was  
 15 important for me to do that, but I would have regular  
 16 visits, and she'd come round with food and with  
 17 housekeeping materials and so -- yeah, although I was  
 18 living on my own, it was certainly not unaided.  
 19 Q. While you were in hospital, you had been given a lot  
 20 of opiates.  
 21 A. Yes.  
 22 Q. You continued to use fentanyl after your discharge.  
 23 A. Lovely stuff! Yes, I had been given lozenges,  
 24 fentanyl lozenges. A bit like some of the candy you  
 25 would have had as a kid, sort of a lollipop stick with

93

1 probably demolish two of them on the journey on the  
 2 way home. So my consumption was rapidly accelerating.  
 3 It came to the point where I decided it was  
 4 an issue, so I would stop using them. I can't  
 5 remember how many I was using at the time. But in my  
 6 wisdom, I decided to go cold turkey. A friend of mine  
 7 asked if I'd help him collect a vehicle he had  
 8 purchased, an old ex-army fire engine from a place  
 9 called Withams near Grantham on the A1. So  
 10 I accompanied him, and on the way back I was driving  
 11 said fire engine. Lovely warm day coming down the  
 12 M11, had both doors open on the side of it, and  
 13 I started to shiver, and I became very, very shivery.  
 14 I thought, that's a bit odd, obviously a bug of some  
 15 sort.  
 16 By the time we got back to Plumpton -- quite  
 17 a long journey -- I started to experience paranoia.  
 18 I could feel my skin crawling. Local pub, I was quite  
 19 convinced all these people -- I know everybody in  
 20 there, but they were all staring at me, they all had  
 21 some intent, I don't know what.  
 22 So I retreated home, spent a very uncomfortable  
 23 night, and the following day I rang my mother to say,  
 24 "I don't know what's going on, something's wrong".  
 25 She figured it out. She said, "When is the last time

95

1 little blob of material on the end, quite  
 2 sweet-tasting, and you get a very good initial hit  
 3 from these things. They come in various strengths,  
 4 and at one stage I was on the strongest ones.

5 By all accounts from other people I'd become  
 6 very talkative having got the initial hit, and it is  
 7 phenomenally addictive, but I was not told that at the  
 8 time. I did notice that my use of these lozenges --  
 9 I was in pain, I did need to use the lozenges, but my  
 10 usage accelerated, which obviously, with the benefit  
 11 of hindsight, is a clear indication that not only was  
 12 my body becoming tolerant of it, but it was starting  
 13 to want and crave the drug.

14 It got to the point where I realised I had  
 15 a problem with them. I had -- the phrase I used to  
 16 choose to use was I had become dependent upon them,  
 17 but in reality that's an addiction. I was addicted to  
 18 them.

19 I decided not to keep them in the house because  
 20 I would just consume them, so I kept them at my  
 21 parents' house, which is some 6 miles away from mine.  
 22 But I had a key, so I would sneak over there in the  
 23 small hours of the morning. So 2.30/3 o'clock, I'd  
 24 drive over there, help myself to -- they come in  
 25 a strip of four and sneak off back home, and I'd

94

1 you had some fentanyl?" I said Friday. This is now  
 2 Sunday. But I hadn't got any, and I had used the  
 3 stash at her house, unbeknownst to her, so she phoned  
 4 the local pharmacist who said, "I can't give you any  
 5 fentanyl, I haven't got any, but I have got a patch,  
 6 I'm willing to let you have a patch, which -- it will  
 7 take a while to kick in, but will tide you over until  
 8 we can get you some lozenges."

9 So that was it, straight back on the lozenges  
 10 for another period of time. I did speak to my GP,  
 11 a very understanding man, but he said, "No, we're  
 12 going to step down the analgesic", and I wasn't  
 13 prepared to do that. So in the end, I went cold  
 14 turkey again. I went on holiday with some friends of  
 15 mine to Spain without any lozenges. It was a torrid  
 16 four or five days, more for them than for me I  
 17 suspect, but I did come home and I haven't touched  
 18 them since.

19 Q. But it had taken you three years to --

20 A. Yes.

21 Q. -- be free of the dependency.

22 A. Mm.

23 Q. Since the second liver transplant, you've had regular  
 24 blood tests for hepatitis C.

25 A. Yes.

96

1 Q. And you are undetectable.  
 2 A. Yes.  
 3 Q. The doctors are puzzled by that.  
 4 A. Puzzled would be an understatement, yes.  
 5 Q. Do you want to say what has been happening?  
 6 A. So I had an enormous viral load before my first liver  
 7 transplant and before my second liver transplant.  
 8 There is no other case on record of somebody with such  
 9 a high viral load no longer having any trace of  
 10 hepatitis C in their system. So it was 2005, the last  
 11 transplant, so we are now nearly 14 years on, and  
 12 regular six-monthly blood tests, no sign of  
 13 hepatitis C to date.  
 14 However, the medical team are not willing to  
 15 give me an assurance that that's the end of it, so  
 16 I still have that sword of Damocles hanging over my  
 17 head.  
 18 Q. You've said in your statement that although doctors  
 19 are keen for you to live as long as possible, they're  
 20 also keen to make lifestyle choices for you. What do  
 21 you mean by that?  
 22 A. So we have had some discussions. I have always been  
 23 overweight, fat, and so I stopped attending my annual  
 24 check-up a couple of years ago simply because I was  
 25 fed up of driving 80 miles to be told, "You're still

97

1 seem to be some missing, and then in August this year  
 2 your father received a further letter from them  
 3 providing further records.  
 4 A. Yes, out of the blue he said to me, "I've had contact  
 5 addressed to your mum, do you want me to follow it  
 6 up?" I said, "Yes, by all means". So totally  
 7 unsolicited on our behalf, somebody had done a trawl  
 8 through the records and discovered that they did have  
 9 some records that they claimed they didn't have the  
 10 previous time.  
 11 Q. The original letter, which, as you say, was addressed  
 12 to your mum, was:  
 13 "We have recently become aware of the fact that  
 14 we have additional information. If you want it,  
 15 please email us."  
 16 A. Yes.  
 17 Q. Your dad followed that up.  
 18 A. He did.  
 19 Q. We have the letter in response. It's 3742003, please,  
 20 Henry. Thank you.  
 21 It's from August 2019, and it says this:  
 22 "We are contacting you because you previously  
 23 requested a copy of the personal information held  
 24 about your relative at the National Haemophilia  
 25 Database. Following that request, we sent you all the

99

1 overweight, you need to lose weight". The  
 2 conversation regarding my blood work -- my blood work  
 3 has been constant for all of that time, so I elected  
 4 not to go anymore.  
 5 Q. Part of that was the discussion around weight, but  
 6 you've also said in your statement you struggle to  
 7 trust doctors.  
 8 A. I am far more cynical, sceptical, call it what you  
 9 will, now than I used to be. So I have no choice.  
 10 I need to trust the NHS, and I'm absolutely convinced  
 11 that every person I deal with has got my best  
 12 interests at heart. But it is difficult to  
 13 disassociate what has happened to me with current  
 14 treatment.  
 15 Q. Another aspect of that has been the question of  
 16 records going missing and the availability of your  
 17 medical records.  
 18 A. Yes, yes.  
 19 Q. As we spoke about earlier, before your mum passed  
 20 away, she had tried to look for records and she  
 21 applied to the UKHCDO at that point.  
 22 A. I didn't know this, but yes, she had.  
 23 Q. You've now discovered that's what she had done.  
 24 A. Yes.  
 25 Q. And she received some documents from them, but there

98

1 information that was held on our electronic database.  
 2 It was assumed at the time that the electronic record  
 3 was a complete record.  
 4 "However, on recent inspection of the paper  
 5 archive, we discovered that some details, from paper  
 6 forms submitted to the database in the 1970s through  
 7 to the 1990s, were archived but not entered into the  
 8 electronic record. These forms were submitted many  
 9 years ago by your relative's Haemophilia Centre when  
 10 the database was held in Oxford, before paper  
 11 reporting was phased out in 2000.  
 12 "Please see the enclosed additional paperwork  
 13 that we have found on your relative when going through  
 14 this archived material. We apologise unreservedly  
 15 that you were not sent all the information after your  
 16 initial request and for any distress or difficulties  
 17 that this may have caused."  
 18 With that letter, you were provided with some  
 19 further documentation.  
 20 You've also said in your statement that you're  
 21 now a very different person to who you were in the  
 22 early 1990s.  
 23 A. Yes.  
 24 Q. Can you tell us a little of how you feel you've  
 25 changed?

100

1 A. I suppose the initial thing I should say is that  
 2 undoubtedly we all age and change. However, I think  
 3 I've changed more than you would expect.  
 4 Notwithstanding the insults both mental and physical.  
 5 I was very gregarious. I was an active member  
 6 of Round Table. I was involved in the Army Cadet  
 7 Force. I was the chairman of the sports and social  
 8 club at work, and, yes, my leisure time was full of  
 9 activities involving other people. All of those  
 10 things have been taken away from me.  
 11 I have rebuilt a life post-transplant, and the  
 12 people I mix with now are very nice people, but  
 13 it's -- it does strike me that an awful lot of the  
 14 activities I undertake now are less social and less  
 15 gregarious than they once were. I am a more  
 16 melancholy person than I once was, certainly more  
 17 cynical, less trusting. Yes, less full of the hope  
 18 I once might have had.  
 19 Q. You're now engaged to Jan.  
 20 A. Yes.  
 21 Q. You've tried to live together with her and her son,  
 22 but you've struggled to cope with that.  
 23 A. Yes. We have touched upon my building the wall.  
 24 Well, that happened again once I was back on my own,  
 25 so 2006 onwards.

101

1 that support and encouragement has been repaid by huge  
 2 amounts of anxiety and fear. No parent should stand  
 3 by a hospital bed, watching their child essentially  
 4 dying, repeatedly.  
 5 I have no idea of the anguish that my mother  
 6 went through during those months up at Addenbrooke's.  
 7 She effectively moved into a house up at Addenbrooke's  
 8 while I was there, and nothing was too much effort for  
 9 her. I would not be here without the effort of both  
 10 of my parents, but in particular my mother.  
 11 The only satisfaction or the only glimmer of  
 12 satisfaction, I suppose, is that she saw me come out  
 13 of hospital and start to rebuild my life, something  
 14 which I'm sure on more than one occasion she didn't  
 15 think was going to happen.  
 16 Q. You've mentioned that you've had counselling.  
 17 A. Yes.  
 18 Q. You had to seek that privately.  
 19 A. I did. I wouldn't have done so. It was at the  
 20 insistence of a very good friend and my mother, who  
 21 both said, "Look, we know you're going to be anti  
 22 this", and I was, and they said, "But go and give it  
 23 a go". And so I was on benefits at the time, so it  
 24 was at a reduced rate, but no, it did cost me, and it  
 25 was a very useful process. I embarked upon it merely

103

1 So when I first came out of hospital, my friends  
 2 were very pleased to see me, lots of social activities  
 3 were encouraged, people would come and visit. But  
 4 I obviously made it quite clear that's not what  
 5 I wanted, so those visits became less and less. My  
 6 going out became less and less. And I find that  
 7 keeping my own company is what I -- I don't think  
 8 "prefer" is the right word, but that's my default  
 9 method of operation. So I very much wanted to share  
 10 my home and my life with both Jan and her son, but  
 11 found I was incapable of tolerating them in my space.  
 12 Q. Your dad has also provided us with a statement, and he  
 13 has spoken about the fear and the anxiety that he and  
 14 particularly your mum had over you through the years  
 15 and the effect on their mental health. Do you want to  
 16 say anything particularly about your mum and the  
 17 effect it had on her?  
 18 A. So my attitude on this is, I was adopted, they had the  
 19 opportunity to give me back, they chose not to do so.  
 20 When I started counselling, we touched upon this and  
 21 I was asked how I felt as an adopted child, and I felt  
 22 cherished, and that hasn't changed.  
 23 My parents, John and Pat, have given me every  
 24 encouragement and every support, and it -- this is  
 25 going to become quite emotional -- in some respects

102

1 out of curiosity to see what the process was, but  
 2 I did find it very useful.  
 3 Q. Had you ever been offered counselling by the NHS?  
 4 A. No.  
 5 Q. We spoke earlier about your earlier retirement due to  
 6 ill-health and you were then reliant on benefits.  
 7 A. Yes.  
 8 Q. You applied for Disability Living Allowance, and that  
 9 was rejected initially.  
 10 A. Yes. Obviously my wife and I married, we were both  
 11 working for the bank in separate -- she was in branch  
 12 banking, I was in the head office department, and we  
 13 embarked upon our married lives with the assumption we  
 14 would both be earning for a period of time and we  
 15 would look forward to a future together that should've  
 16 been within remunerated. I was on a successful career  
 17 path. So it came quite devastating really that  
 18 suddenly there was I not earning any money, career  
 19 over. And it was a struggle.  
 20 The bank were very good, so I did draw down my  
 21 pension early, but it was -- a lump sum had been  
 22 commuted to settle the liabilities that any young  
 23 person would have at that time.  
 24 And, yes, we were struggling financially, and my  
 25 mother took umbrage at this, as anybody who met her

104

might imagine, and she had made enquiries as to whether there was any support available, because she saw what had happened to both myself and other haemophiliacs was unjust.

I do recall that Frank Dobson, the then health minister, stood up in the Houses of Commons and said, "These people are suffering, we have a system available, that's the benefit system, so they should apply for benefits". So that's what we did, and it was rejected out of hand, without so much as a by your leave.

Again, my mother waded in and wrote to my local MP, Nicholas Soames, and got a very nice letter from Nicholas Soames saying he would look into the matter and wished me all the best. Within a very short period of time -- I can't remember how long it was -- I received a letter saying, "Oh, we have reviewed the situation and you are going to receive benefits in full for life". So the higher rate of disability for life.

**Q.** We'll come to the for life point in just a moment, but in between you being rejected for the Disability Living Allowance and it then being accepted, as you say, your mum had written to the MP.

**A.** Yes.

105

issues involved, ministers decided that they could not make an exception to that general policy in the case of haemophiliacs infected with hepatitis C. The government is funding a project, developed by the Haemophilia Society, which aims to meet the advice and information needs of young people with haemophilia who have been infected with hepatitis C.

"I hope that Mrs Rankin and her son will accept that the issues were very difficult in this case and that the most careful consideration was given to them."

Then it notes you had been awarded the Disability Living Allowance.

What were your mum's thoughts about that response?

**A.** Inadequate I think would be an understatement. She wasn't satisfied that that was the right decision to have been made. She was adamant that a mistake had been made and, furthermore, that once that mistake had been realised, that the wrong approach had been taken and the wrong conclusions had been reached, some form of restitution was due.

**Q.** You said a moment ago that you were awarded the Disability Living Allowance for life.

**A.** Yes.

107

**Q.** You also received a letter back from your MP enclosing a letter from Frank Dobson.

**A.** Yes.

**Q.** We're just going to have a look at that now. 0357003, please, Henry.

It says this -- we are not entirely sure of the date. We can see it in the top right-hand corner, but it's not entirely clear what it is. But the response is this:

"I am sorry to hear that Mrs Rankin's son has haemophilia and has been infected with hepatitis C. On 28 July last year, I announced the decision not to introduce a special payment scheme for people infected in this way. Ministers do appreciate that they and their families felt deep disappointment at the decision. I wrote to the Haemophilia Society explaining the reasons for this decision and stressing the particularly careful consideration which had been given to all the issues.

"The government's general policy is that compensation or other financial help to patients is only given to patients when the NHS or individuals working in it have been at fault. After looking at a number of different approaches to the question of special payments and thinking long and hard about the

106

**Q.** What happened when the DLA changed to a PIP?

**A.** When the decision was made to switch from DLA to PIP, I was invited to attend an assessment for PIP.

I decided that that's not what I want to do. I did not wish to go through the embarrassment and ignominy of jumping through yet more hoops for something which I didn't think was right in the first place. So I decided no, I was not going to do that.

**Q.** You've said you decided for your own self-esteem that you needed to do something.

**A.** Yes.

**Q.** And what do you now do?

**A.** I very fortunately -- if I take a step back for a moment, the original prognosis post-transplant was that I could expect hopefully between five and seven years of life, possibly as little as three, depending on how virulently the virus returned.

About five years ago, my clinical team said, "Look, there's still no sign of hepatitis C, so as things stand at the moment, we see no reason why you shouldn't see 75". So the prognosis changed greatly and I thought, well, although I could sit on a sofa for the rest of my life watching daytime TV, that probably wouldn't be particularly healthy medically -- mentally. So I thought I best find something to do.

108

1 My skill set was far too out of date to return  
 2 to banking, and not that I wanted to anyway, bit of  
 3 a poison challis these days, so I thought: what can  
 4 I do? I'm afraid to say my confidence was  
 5 nonexistent. I thought: what can I offer?  
 6 I did think, well, perhaps driving examiner.  
 7 Nice civil service job with a pension at the end of  
 8 it, can't be too difficult. But that would have been  
 9 a full-time job, which is something I wasn't capable  
 10 of doing at the time.  
 11 I had a discussion with my next door neighbour,  
 12 who runs a small driving school, and he said, "Why  
 13 don't you think about coming and working with me and  
 14 teaching driving instruction?" I had been  
 15 an instructor with the Army Cadet Force, so I had  
 16 a skill set that was transferable there, and so, yes,  
 17 I've ended up in what I like to call logistics, but,  
 18 yes, it's various aspects of the logistics industry,  
 19 teaching people to drive, undertaking the delivery of  
 20 drivers' CPC, fork lift courses, et cetera, et cetera.  
 21 So, yes, I embarked upon a different industry, and I  
 22 have found it most rewarding. It has rebuilt my  
 23 confidence and given me something to do.  
 24 Q. That work is flexible, convenient, nearby the house.  
 25 A. Yes.

109

1 considerably less than that that I had anticipated as  
 2 a result of my career path.  
 3 Q. Those are the questions I have for you. Is there  
 4 anything else you would like to say?  
 5 A. No, other than to thank the chair and all of your  
 6 team. This was a process I was not certain that  
 7 I wanted to be part of. Like many haemophiliacs of my  
 8 age, we all remember the tombstone leaflet, where  
 9 suddenly it became necessary to be anonymous, and it's  
 10 something that stays with you. But your team have  
 11 made it, if not an easy process, a process that has  
 12 not been difficult. So thank you, Sir Brian, and  
 13 thank your team.  
 14 SIR BRIAN LANGSTAFF: Well, you've given us a detailed,  
 15 objective, precise account of what has happened to  
 16 you, concentrating, I suspect, more upon the facts  
 17 than upon your intimate feelings about it, that may be  
 18 a reflection of the wall that you've described, but  
 19 thank you very much for that.  
 20 It is, as all witness evidence is, but yours in  
 21 respects which is true of yours alone and not of  
 22 others, particularly valuable to this inquiry. Thank  
 23 you.  
 24 A. Thank you, Sir Brian.  
 25 SIR BRIAN LANGSTAFF: Well, we'll take a break until 2.50.

111

1 Q. Which makes it manageable.  
 2 A. It makes it manageable, it means that I can dictate  
 3 when I'm working, when I'm not working. And, yeah,  
 4 that's something that I find is necessary.  
 5 Q. You've also received payments from the EIBSS.  
 6 A. Yes.  
 7 Q. Which helps as well.  
 8 A. Yes, it does. Are we going to talk about finances?  
 9 Q. I was about to ask you, did you have anything else you  
 10 wanted to say about them?  
 11 A. When -- the last year that I worked in full for  
 12 NatWest bank which was in 1996. 1997 was when I was  
 13 retired through ill-health. My income for that year  
 14 gross was approximately £25,000. So that was 1996.  
 15 The payments from the EIBSS is -- have only just  
 16 caught up with what I was earning back in 1996.  
 17 Within the bank there was a tiering system, and  
 18 I was A tiered, which means I was suitable to go on to  
 19 senior management or even executive management. If  
 20 I had stayed working for NatWest, albeit now it's  
 21 Royal Bank of Scotland Group, assuming a natural  
 22 progression through that career path, I probably  
 23 would've retired as a senior manager by this age,  
 24 mortgage free and on a full salary pension.  
 25 So the remuneration I currently receive is

110

1 (2.30 pm)  
 2 (A short break)  
 3 (2.50 pm)  
 4 SIR BRIAN LANGSTAFF: Our next witness wishes to be known  
 5 as Mary, does she?  
 6 MS RICHARDS: Yes, sir.  
 7 SIR BRIAN LANGSTAFF: Mary, please.  
 8 MARY GRINDLEY (affirmed)  
 9 Questioned by MS RICHARDS  
 10 MS RICHARDS: Mary, you're here to talk about your late  
 11 husband, John.  
 12 A. That's right.  
 13 Q. Who had severe haemophilia A.  
 14 A. That's right.  
 15 Q. We're going to put a picture of John on the screen.  
 16 Henry, it is 2336018, please.  
 17 Was that your wedding day?  
 18 A. It was, yes.  
 19 Q. We're going to leave that picture on the screen apart  
 20 from when we have documents up.  
 21 So you met John first of all when you were at  
 22 teacher training college.  
 23 A. That's right, yes.  
 24 Q. He was the brother of a friend of yours.  
 25 A. That's right, yes. I was at training -- at teacher's

112

1 training college in north London, and I was a friend  
 2 of John's sister. Do you want me to elaborate?  
 3 Q. Well, I think it was -- you met him a few times over  
 4 the following years, but you didn't start going out  
 5 together until a few years later, in the mid-1970s; is  
 6 that right?  
 7 A. Yes, I became a family friend. I originally --  
 8 I first met John when I went to south-east London,  
 9 where he lived, with John's sister. And it was  
 10 actually the Romans that brought us together! Because  
 11 we went to -- I went with John's sister to a lecture  
 12 about the Romans at Hornimans Museum in south-east  
 13 London, and history was my main subject at college.  
 14 Q. And you stayed in touch with the family, you became  
 15 a family friend.  
 16 A. Yes.  
 17 Q. It was a few years later, in the mid-1970s, you and  
 18 John started going out.  
 19 A. Yes. It was mainly after John's sister got married  
 20 and left home.  
 21 Q. The two of you got engaged in 1977.  
 22 A. That's right.  
 23 Q. On the Silver Jubilee day.  
 24 A. That's right.  
 25 Q. You married the following year in Suffolk, which is

113

1 Q. Now, when you'd first met John, he had been in  
 2 a wheelchair because he had had some form of surgery  
 3 to his legs.  
 4 A. No, he was in -- he was in his wheelchair because of  
 5 his haemophilia, the deterioration of the joints. But  
 6 I don't know much about -- but he had some kind of  
 7 operation, which I considered quite a miracle, really.  
 8 He was able to walk much more than he had done. He  
 9 could not bend his knees. When we got married, he  
 10 couldn't kneel down at the altar. But he could walk  
 11 much better than he had been previously.  
 12 Q. You say in your statement you were drawn to him in  
 13 particular because of his strength of character.  
 14 A. Yes.  
 15 Q. And you observed many haemophiliacs that you've met  
 16 over the years have tremendous strength.  
 17 A. Yes, I would like to pay tribute to each and every one  
 18 of you here, because, yes, I think it is -- they've --  
 19 because they've had to fight for all that they --  
 20 their treatment and financial things.  
 21 Q. Up until the mid-1970s, John was receiving  
 22 cryoprecipitate as his main treatment.  
 23 A. Sorry, could you repeat?  
 24 Q. Up until about 1976, as we'll see from some  
 25 correspondence --

115

1 where you were from.  
 2 A. Yes.  
 3 Q. I just want to ask you a little about John's life  
 4 before the two of you met.  
 5 He had spent a lot of his childhood in Evelina  
 6 Children's Hospital in London.  
 7 A. He had, yes, yes. He lost a lot of schooling because  
 8 of his haemophilia, and I think his education suffered  
 9 quite a bit.  
 10 Q. But there then came a time when he went to Treloar's  
 11 College.  
 12 A. That's right, yes.  
 13 Q. And he became head boy.  
 14 A. He became head boy. I think it was because he was the  
 15 oldest. I think that was in 1971/1972.  
 16 Q. He recalled that as a happy time.  
 17 A. He did. He enjoyed it very much, yes. I was talking  
 18 recently to some old boys from Treloar's and they were  
 19 talking about the camaraderie that they had there,  
 20 despite their difficulties.  
 21 Q. He was able to do some City & Guilds qualifications in  
 22 electronics engineering, despite the amount of school  
 23 he'd missed.  
 24 A. Yes. He passed his City & Guilds in electronics  
 25 engineering.

114

1 A. Yes.  
 2 Q. -- John had been receiving cryoprecipitate, but he was  
 3 one of the first then to move on at St Thomas' to  
 4 Factor VIII concentrate and home treatment.  
 5 A. Yes, he was very eager to get on to home treatment.  
 6 Q. We'll just have look at a letter from early 1976.  
 7 Henry, it's 2336021, please.  
 8 We can see it's dated 21 January 1976. It's  
 9 addressed to John's GP, and it says this:  
 10 "We are at last receiving sufficient supplies of  
 11 freeze ..."  
 12 I'm sorry, are you able to follow it?  
 13 A. I'm fine, thank you.  
 14 Q. "We are at last receiving sufficient supplies of  
 15 freeze dried Factor VIII concentrate to be able to  
 16 offer to suitable haemophiliacs the material and  
 17 equipment to treat their own bleeding episodes at  
 18 home. This has come to be widely regarded as  
 19 an improvement in the management of the ordinary run  
 20 of episodes of haemophiliac bleeding. I have been  
 21 reviewing the haemophiliacs who attend here and I  
 22 think that Mr Grindley would be suitable for this form  
 23 of management."  
 24 The "here" was the Haemophilia Centre at St  
 25 Thomas' Hospital by this time.

116

1 A. That's right.  
 2 Q. The letter continues:  
 3 "We would see that Mr Grindley had sufficient  
 4 understanding of his disorder to know when he should  
 5 give himself a treatment and how much he should give.  
 6 We will teach him to perform his own venipunctures and  
 7 to administer his doses. We would see that he  
 8 understood the possible risks of intravenous therapy  
 9 and that he made appropriate plans for the storage and  
 10 disposal of his equipment. We would of course supply  
 11 the treatment materials and the necessary syringes,  
 12 needles and so forth."  
 13 Then it talks about and the possibility of  
 14 allergic reactions.  
 15 Do you know what information was given to John  
 16 about any risks of going on to this course of  
 17 treatment?  
 18 A. Well, I wasn't actually married to him then and I was  
 19 teaching in Suffolk. I only saw him during, you know,  
 20 holidays, school holidays. Not that I know of.  
 21 Q. Don't worry.  
 22 Then we're going to just look at the records and  
 23 see the wide range of Factor VIII products that John  
 24 received over the years.  
 25 Henry, could we have 2336009, please, and could

117

1 Q. After you married, you moved to London to join him.  
 2 A. Yes, I possibly had the better job, but we wanted John  
 3 to stay under St Thomas', and Suffolk wouldn't have  
 4 provided the -- such good treatment.  
 5 Q. You became pregnant and you had your son.  
 6 A. Yes.  
 7 Q. You talk about the relationship between John and your  
 8 son in this way in your statement. You say:  
 9 "There were things John couldn't do, like play  
 10 football with him, but he did what he could and was  
 11 a really good father to his son."  
 12 A. He was, yes.  
 13 Q. Indeed, your son in his witness statement has said:  
 14 "He was as good a dad as anybody could ask for.  
 15 I have nothing but fond memories."  
 16 A. Good.  
 17 Q. I wanted to ask you about a Haemophilia Society  
 18 meeting that you and John attended.  
 19 A. Mm-hm.  
 20 Q. Henry, if we could have the photo back up on the  
 21 screen, please.  
 22 You say in your statement you think it was 1983  
 23 and it was an AGM of the Haemophilia Society.  
 24 A. Yes, April 1983.  
 25 Q. You remember it because news had broken of the first

119

1 we go to page 9, please.  
 2 We can see here this is an extract from the  
 3 National Haemophilia Database records, and we see from  
 4 1969 -- there is a reference to 1969 John receiving  
 5 Factor VIII BPL, but then it's fresh frozen plasma or  
 6 cryoprecipitate until we get to 1970. Then there's  
 7 again some references to Factor VIII BPL.  
 8 Then we can see that John received a range of  
 9 different products, including Koate, Factor VIII,  
 10 Profilate and cryobulin.  
 11 Then, please, Henry, could we have page 16.  
 12 The last page took us up to 1980, and we see on  
 13 this page, from 1980 onwards, again we can see him  
 14 receiving cryobulin, BPL Factor VIII, haemophil,  
 15 Profilate -- so a full range of different commercial  
 16 products as well as the NHS product.  
 17 A. (Nodded)  
 18 Q. John was keen to use home treatment.  
 19 A. Yes.  
 20 Q. He found it liberating.  
 21 A. Yes, he did, and he did improve. He was able to go  
 22 out more and do more things, yes, definitely.  
 23 Q. He was working by this time in a small electronics  
 24 firm in south-east London.  
 25 A. That's right, yes.

118

1 English haemophiliac to die from AIDS.  
 2 A. That's right, yes.  
 3 Q. You recount in your statement you stood up at the  
 4 meeting and you asked what the implications might be  
 5 in terms of being able to have other children, because  
 6 you desperately wanted a second child.  
 7 A. Yes, that's right.  
 8 Q. And was there any response?  
 9 A. Yes, it was Dr Macfarlane who was speaking, and he  
 10 said basically, "We don't know how AIDS is  
 11 transmitted, put everything on hold as far as having  
 12 a second child."  
 13 Q. You and John went home and you discussed it and you  
 14 decided you couldn't take the risk of having a second  
 15 child.  
 16 A. No, that's right.  
 17 Q. You decided not to have a physical relationship from  
 18 that point onwards.  
 19 A. That's right, yes.  
 20 Q. You say in your statement the thought of no more  
 21 children nearly broke you.  
 22 A. It did. I remember an incident -- we lived in a small  
 23 flat, and my mother-in-law had brought a pram for my  
 24 son, and we asked her if she could take it away and  
 25 sell it because there would be no more children, and

120

1 it nearly broke me.  
 2 Q. You say from that day onwards, you and John changed  
 3 your lifestyle in other respects. He would use his  
 4 own towel, crockery --  
 5 A. Yes.  
 6 Q. -- cutlery and the like.  
 7 A. Yes.  
 8 Q. You think that was the first you'd heard of AIDS or  
 9 HTLV III, but you say in your statement you had been  
 10 aware, and John had been aware, of problems of  
 11 infections with hepatitis prior to that.  
 12 A. You're talking about non-A, non-B?  
 13 Q. Yes.  
 14 A. Yes, I think John was well aware before we got married  
 15 that he had non-A, non-B.  
 16 Q. You remember, your statement says, writing indeed to  
 17 Ronald Reagan in 1980 about that.  
 18 A. That's right, yes.  
 19 Q. Because you were concerned about American blood --  
 20 A. Yes.  
 21 Q. -- as long ago as 1980.  
 22 A. That's right.  
 23 Q. You wrote to Margaret Thatcher, who was Prime  
 24 Minister, in 1981.  
 25 A. Yes.

121

1 you that ministers are very much aware of the need for  
 2 the new laboratory.  
 3 "You have asked Mrs Thatcher to stop the impact  
 4 of Factor VIII from abroad. May I say that I can  
 5 understand your feelings, but I am afraid that this is  
 6 simply not possible at present. However, the  
 7 upgrading programme described by Sir George will  
 8 enable the Blood Products Laboratory to double its  
 9 output of Factor VIII by the end of next year, though  
 10 it will still be necessary for health authorities to  
 11 purchase some Factor VIII commercially."  
 12 So we can see from that that in early 1981, you  
 13 were sufficiently knowledgeable about and concerned  
 14 about the risks of American products to write to  
 15 central government.  
 16 A. Mm.  
 17 Q. That was the response that you received.  
 18 A. Yes.  
 19 Q. You continued to write on this particular issue to  
 20 politicians over the years.  
 21 A. Yes.  
 22 Q. There is a letter we'll pick up in 1987.  
 23 Henry, it's the same exhibit number, 2336007,  
 24 but it's page 7, please.  
 25 We can see from this -- it's just the last page

123

1 Q. You have said this -- sorry, we'll see the response,  
 2 actually. 2336007, please, Henry.  
 3 We can see it's a letter of 16 March 1981 from  
 4 the Department of Health and Social Security to you:  
 5 "Dear Mrs Grindley,  
 6 "Thank you for your letter of 12 February  
 7 addressed to the Prime Minister about Factor VIII. I  
 8 have been asked to reply. I am sorry I have not been  
 9 able to do so earlier.  
 10 "The National Blood Transfusion Service,  
 11 including the Blood Products Laboratory, was the  
 12 subject of an adjournment debate on 15 December. In  
 13 his reply, a copy of which I enclose, Sir George Young  
 14 spoke about the need to redevelop the Blood Products  
 15 Laboratory, which manufactures a range of blood  
 16 products for the NHS, including Factor VIII for the  
 17 treatment of haemophiliacs.  
 18 "However, Sir George emphasised that it is not  
 19 possible to redevelop overnight a facility as complex  
 20 as that laboratory. A number of issues are involved,  
 21 for example funding, technology and plasma supply, and  
 22 it will necessarily be several years before  
 23 redevelopment can be completed. Planning has already  
 24 begun, however, and although I cannot yet say how soon  
 25 it will be possible to start building, I can assure

122

1 of the letter.  
 2 A. Yes, I've lost the rest of it. I don't know where it  
 3 is.  
 4 Q. That's your handwriting at the bottom.  
 5 A. Yes, scribbled, yes.  
 6 Q. It's very legible, but this ending is important. The  
 7 ending of the letter from Lord Skelmersdale was this:  
 8 "We have fully financed the new 60 million BPL  
 9 at Elstree to ensure the earliest possible completion  
 10 date. The new factory was opened on 29 April 1987.  
 11 Production is expected within the next few months,  
 12 leading to very substantial products next year and  
 13 self-sufficiency in all products by 1989."  
 14 So we can see, although we don't know the date  
 15 of this letter, it obviously postdates April 1987, and  
 16 it's the same issue that you'd picked up on back in  
 17 1981.  
 18 A. That's right.  
 19 Q. You and John read what you could about AIDS and tried  
 20 to inform yourself about the situation.  
 21 A. That's right, yes.  
 22 Q. We can see that John raised concerns with your MP in  
 23 late 1983. We'll have a look at two letters, Mary.  
 24 A. Uh-huh.  
 25 Q. Henry, it's page 3 of this exhibit, please.

124

So this is a letter from your MP written at John's behest to Kenneth Clarke, then Minister of State and the Department of Health and Social Security. It is dated 2 November 1983.

It says:

"Dear Kenneth,

"Mr Grindley is a constituent of mine who came to see me. He suffers from haemophilia and, as a result, has to have regular blood transfusions. He is very concerned about the spread of AIDS, particularly as apparently the United Kingdom imports most of its blood products from the United States. The particular ingredient which he requires, Factor VIII, the clotting factor, is I understand imported mainly from Alpha Therapeutic Corporation in California. As you know, there has been a serious spread of the AIDS problem in the United States and it can be passed on by blood transfusions.

"Mr Grindley tells me that another haemophiliac recently died of AIDS, which he acquired from a foreign ..."

**SIR BRIAN LANGSTAFF:** Must be "blood".

**MS RICHARDS:** Should be "blood product".

"This seems to me to be a very serious, and I should be grateful if you could let me know what

125

by American blood products.

"Nevertheless, I would like to assure your constituent that the government is committed to making this country self-sufficient in blood products. Over £2 million has already been spent on improving the production facilities of the Blood Products Laboratory at Elstree, Herts, and a major redevelopment programme is underway. When this is complete, the Central Blood Laboratories Authority will have a new laboratory of a size capable of meeting the demands of England and Wales for blood products.

"Meanwhile, in the absence of a satisfactory alternative, we shall be dependent upon imports from the USA for an adequate supply of Factor VIII. While there is as yet no test for AIDS, such imports prepared from plasma collected after March this year will be subject to new regulations initiated by the US Food and Drug Administration designed to exclude donors from high risk groups, eg persons with symptoms and signs suggestive of AIDS, sexually active homosexual or bisexual men with multiple partners, intravenous drug abusers.

"Although future supplies of Factor VIII, both for export and for use in America, will be manufactured from plasma collected in accordance with

127

action the DHSS is taking to make sure that AIDS is not imported into the United Kingdom with foreign blood products. Is there any way of synthesising these products, and is there any programme to ensure that the United Kingdom is self-sufficient in blood products at some foreseeable time in the future?"

Then he refers to enclosing some copies of newspaper articles which John had passed on to your MP.

**A.** Mm.

**Q.** We'll see the response to this letter. It's the next page, please, Henry.

It's dated 16 December 1983, and it's from the Joint Parliamentary Undersecretary of State and the Department of Health, and it says this:

"Thank you for your letter of 2 November addressed to Kenneth Clarke about acquired immune deficiency syndrome (AIDS) and the supply of blood products in this country.

"I can well appreciate the anxiety, particularly amongst haemophiliacs and their families, which recent press reports on AIDS may have caused, and would first of all like to put matters into perspective. The cause of AIDS is as yet unknown and there is no conclusive proof that the disease has been transmitted

126

these regulations, there is still a quantity of stock which has been made from pre-March plasma. The FDA has recently decided not to ban the use of such stocks because to do so would cause a crisis of supply. The same considerations apply here.

"We are of course anxious to minimise the possible risk of the transmission of AIDS by blood donation in this country. My department, in conjunction with regional transfusion directors, has issued a leaflet, 'AIDS and how it concerns blood donors', which asks people from high risk groups to refrain from giving blood. A copy is enclosed. I hope you find this useful."

That was the response that you and John received to the concerns you'd raised about the spread of AIDS from blood products.

**A.** Yes.

**Q.** That we can see was late 1983.

You recall John having some kind of skin or patch test in November 1983.

**A.** Yes.

**Q.** We'll look at what happened to John's arm as a result, but before we do that, can you remember what the test comprised at all?

**A.** Well, I didn't actually go with John at the time. As

128

1 far as I remember, it was like a prick test that you  
2 would have for allergies. As you know, at this time  
3 there was no actual blood test for AIDS as far as  
4 I know, and as far as I remember, it's a prick test on  
5 the arm like you would -- it was about, you know, four  
6 or five different pricks on the arm.

7 **Q.** We can see a photo of how John's arm responded. It is  
8 2336028, please, Henry.

9 So we can see there what happened to John's arm,  
10 and then could we go to the next page, please, and see  
11 what was written on the back of the photo. There's  
12 a difference between the black and the blue ink here.

13 **A.** Yes.

14 **Q.** That has some significance in terms of when it was  
15 written.

16 **A.** Yes, in the blue was what I wrote on the back of the  
17 photograph when I took it in November 1983.

18 The rest of it, in black, is what I've put on  
19 the photo for the Inquiry.

20 **Q.** So we can see the date that it was was November 1983,  
21 and your understanding, yours and John's, was this  
22 some form of AIDS reaction test.

23 **A.** Yes. In his notes it doesn't say AIDS, but that -- we  
24 called it an AIDS test.

25 **Q.** Yours and John's understanding of the way in which

129

1 this extract from his notes.

2 **A.** Yes.

3 **SIR BRIAN LANGSTAFF:** Well, it must follow that if there  
4 was no test at the time, and this is referring to one,  
5 it must be looking at a sample retrospectively.

6 **A.** This test, when it says negative, it refers to the  
7 prick test.

8 **MS RICHARDS:** The skin test.

9 **A.** The skin test.

10 **SIR BRIAN LANGSTAFF:** I see.

11 **MS RICHARDS:** That was Mary and John's understanding at  
12 the time, that the skin test was the available test at  
13 the time, not a blood test.

14 **A.** Yes.

15 **MS RICHARDS:** And this is the information that they were  
16 provided with, as I understand from Mary.

17 **SIR BRIAN LANGSTAFF:** Thank you.

18 **MS RICHARDS:** Your recollection in your witness statement,  
19 Mary, was that John was given a diagnosis of HIV in  
20 1986.

21 **A.** Yes.

22 **Q.** The records and diary entries that we've been able to  
23 look at subsequently suggest that it was probably  
24 1985.

25 **A.** Yes. It's a bit confusing as to what happened.

131

1 John's skin reacted was that he was negative.

2 **A.** Yes. John explained it to me as -- that because the  
3 arm blew up, it meant he had good immunity at that  
4 time.

5 **Q.** We'll look at his clinical notes. 2336026, please,  
6 Henry. It's the entry at the very top of the page, if  
7 you could highlight the first three lines in yellow  
8 please, Henry.

9 We can see the words, "HTLV test neg 22/11/83  
10 sample."

11 **A.** That's right.

12 **Q.** So John's understanding that this was a negative and  
13 therefore a good result was shared by the clinicians  
14 or clinician who made the entries in the record.

15 **A.** Yes. And can I make the point that I think the first  
16 sentence possibly refers to him giving blood, because  
17 he used to give blood for research. But what that  
18 research was, I don't know.

19 **SIR BRIAN LANGSTAFF:** If the test for HTLV, HIV as it  
20 became, was not in operation in 1983, to your  
21 understanding, this must have been something written  
22 in afterwards, referring to a sample taken on  
23 22 November.

24 **A.** I really can't say.

25 **MS RICHARDS:** This is the form in which you've received

130

1 **Q.** Well, again, we'll just look at two or three documents  
2 to see what information there is in the records about  
3 dates.

4 Henry, could we have -- in fact, it's further  
5 down that page. Could you highlight the entry for  
6 1 April 1985, please.

7 **(Pause)**

8 So we can see the date is 1 April 1985.

9 **A.** Thank you.

10 **Q.** It refers to John being given Profilate, and then it  
11 says, "HTLV III positive. Serocon. To discuss  
12 implications with patient."

13 **A.** Yes.

14 **Q.** That appears to be the positive HTLV result.

15 **A.** Yes.

16 **Q.** But there is an entry in John's diary to suggest that  
17 what he was told in July of 1985 was that the test was  
18 negative, and we'll just look at that. 2336027.

19 We can see the date. If we could just zoom in,  
20 please, on the 16 July entry. Thank you. The date  
21 is July 1985. We can see a meticulous record here.

22 Is this your writing or John's writing?

23 **A.** This is John's writing.

24 **Q.** We can see a record there of a bleed, and the  
25 treatment that he received.

132

1 Then the very bottom entry is, "Got results from  
2 AIDS test. Neg."  
3 A. Yes.  
4 Q. So --  
5 A. Two months later.  
6 Q. John's understanding there -- we don't have any  
7 clinical records that show him being told of his  
8 diagnosis, but his understanding there was that it was  
9 negative.  
10 A. Yes. I don't think he would lie -- we had a very good  
11 relationship. I don't think he would have lied to me  
12 and put that in the diary if it wasn't true.  
13 Q. We can see a later blood test in October 1985.  
14 Henry, that's 2336023, please.  
15 We see this is a test for John. The serum date  
16 is 21 October 1985, "Antibodies to HTLV III detected."  
17 Indeed, it was after that the records show you  
18 yourself went to be tested too.  
19 A. Yes.  
20 Q. And had an anxious wait until the negative result came  
21 back.  
22 So whether it was April, July or October, in the  
23 course of that year, John and you learnt that he had  
24 been infected with HIV.  
25 A. I'm not clear. I'm still not clear. My memory is --

133

1 best you could.  
2 A. Well, yes, for the sake of our young son, we did,  
3 really.  
4 Q. It was in the early 1990s that John started to become  
5 seriously unwell.  
6 A. That right, yes.  
7 Q. We have a couple of photos that show you and John  
8 together in the early 1990s. Henry, could we have,  
9 first of all, please, 2336020.  
10 We can see that's a picture of the two of you.  
11 Was that in your garden?  
12 A. No, it was in a relative's -- no, a friend's garden.  
13 That was the summer before John died.  
14 Q. So that would've been 1993?  
15 A. That's right, yes.  
16 Q. And then we have 2336019, please.  
17 A. And that's I think more or less the last picture I've  
18 got of John. That was about -- it's possibly about  
19 four months before he died.  
20 Q. When John became ill, he decided he would tell people,  
21 and he made a list of the people he needed to tell.  
22 A. That's right.  
23 Q. And he just phoned them up and told them.  
24 A. That's right, yes.  
25 Q. You said that must have been incredibly difficult for

135

1 has gone. I've tried to put things in the back of my  
2 mind for many years, and the years -- this a long time  
3 ago.  
4 John always said that he converted from negative  
5 to positive on heat-treated blood, but I don't --  
6 I don't know. I --  
7 Q. Don't worry about the precise dates, Mary, because the  
8 records themselves do not paint a clear or consistent  
9 picture.  
10 A. Yes. But I can't remember, when I went to have my  
11 tests, whether we actually knew at that time or not.  
12 Q. Whatever the precise date, can you recall what  
13 information was provided to John about prognosis or  
14 treatment?  
15 A. There again my memory has gone. I mean, I think the  
16 general prognosis was only a few years, but I don't  
17 know what specific things were said to John. We  
18 certainly thought it -- you know, he wouldn't live  
19 very long.  
20 Q. Now, the two of you didn't tell many people of the  
21 diagnosis initially, you kept it to yourselves.  
22 A. Yes. Yes.  
23 Q. He was able to continue work and he didn't for  
24 a number of years show signs of physical  
25 deterioration, so you tried to carry on as normal as

134

1 him.  
2 A. Well, yes, yes, it was, yes. But he -- that was the  
3 way he was -- that was what he was like. He --  
4 I don't know whether you're coming to it, but he, two  
5 years before he died, when he more or less -- he was  
6 technically in work for the last two years of his life  
7 because they very kindly paid him, but he gave up  
8 about two weeks -- two years before he died. And he  
9 actually went into the undertakers and he paid for his  
10 funeral plan, and subsequently he went in two or three  
11 times and actually told them what was wrong with him  
12 so that I wouldn't have to deal with that when the  
13 time came. And also he thought of the undertakers  
14 themselves, that they knew what they were dealing  
15 with, and how they could handle him.  
16 Q. Indeed, he planned the music and the poetry he wanted  
17 to have at his funeral.  
18 A. That's right. We planned it all together.  
19 Q. He went to see the Reverend Tanner to ask him to  
20 conduct his funeral, which he agreed to do.  
21 A. That's right.  
22 Q. It was at that point you say this in your statement:  
23 "It was when we were planning John's funeral  
24 that I remember him lying down on the couch and crying  
25 for the very first time."

136

1 A. Yes.

2 Q. "John was an incredibly strong person and I never knew

3 him to cry. It was totally out of character. He

4 said, 'I don't want to die.'"

5 A. What do you say to somebody? What do you say?

6 Q. You said, "I know you don't."

7 A. When your partner is dying like that, you don't know

8 what to say, do you?

9 Q. Before John had to give up work in 1992, he was

10 starting to have to take time off work and was

11 starting to look unwell.

12 A. Yes.

13 Q. So he took the decision to tell the managing director

14 of the firm of his illness.

15 A. That's right.

16 Q. And word got around.

17 A. Excuse me, I think he -- I think they already knew

18 because there had been incidents at work, which you

19 may refer to.

20 Q. Yes, we'll look at a couple of the examples you've

21 given in your statement, Mary.

22 Henry, could we have 2336006, please.

23 We can see on the left-hand side:

24 "Danger, watch out, it's a Mr Grindley!"

25 You've written on there:

137

1 the stigma associated with HIV and AIDS.

2 A. Yes.

3 Q. You said that you and John had to lie to people.

4 Sometimes they became suspicious and you felt like

5 second class citizens.

6 A. That's right, yes.

7 Q. You've given a couple of examples in your statement of

8 experiences you had with neighbours.

9 A. Yes.

10 Q. One was where you were living in a house with two

11 flats and there was a young couple who had somehow

12 found out of John's condition. The young woman

13 upstairs came down the stairs with her child in the

14 pushchair, you opened the doors at the same time and

15 she suddenly shouted something to the effect, "Your

16 husband's got AIDS, your husband's got AIDS."

17 A. John wasn't even positive then, so I don't know --

18 yes, she backed off and I think that was the last

19 I saw of her. She got a transfer.

20 Q. You've also described another time where you had

21 a neighbour who was harassing you. You say she must

22 have found out about John. Amongst other things, you

23 saw her smash John's car window.

24 A. Yes.

25 Q. Eventually you were moved to a new house where you

139

1 "This is a copy of a notice put up on the wall

2 at the electronics firm where he worked."

3 Then if we have, please, the following page,

4 page 3:

5 "Danger, government health warning, Mr Grindley

6 can seriously damage your health. Congratulation,

7 you've just meet HF head-hunters [sic]."

8 A. HF is high frequency. It's an electronics term.

9 Q. Again, that's a copy of a notice put up on the wall of

10 the firm where John worked.

11 A. Yes. Yes, I think this was a prank. I don't think it

12 was actually malicious, because John was well liked,

13 but I really don't quite know the motivation.

14 I think the management got to know about it, it

15 was a small family firm, and it was soon taken down,

16 and the firm were very good about it.

17 But I do have another document, which you

18 probably haven't got, where John actually had to sign

19 to say that he was -- it was some kind of pass to get

20 into the store where the electronics parts were that

21 he needed for his work. So he had to sign this pass

22 to say he was -- it was okay for him to come in.

23 So -- but I must say, the firm, John's firm,

24 were very, very good to him. Very, very good to him.

25 Q. Now, you talk in your statement more generally about

138

1 didn't have trouble.

2 A. Yes, and that was through the police, actually.

3 Q. In 1987, early 1987, you saw the press reported some

4 comments made by Edwina Currie, then a junior health

5 minister, when she had said at a meeting:

6 "Good Christian people who wouldn't dream of

7 misbehaving will not catch AIDS."

8 A. That's right.

9 Q. You wrote to her about this.

10 A. I did, yes.

11 Q. We can see the reply that you got at 2336002, page 2,

12 please.

13 It's dated 23 March 1987 and it says this:

14 "Dear Mrs Grindley,

15 "Mrs Currie has asked me to thank you for your

16 letter of 13 February about her remarks on 12 February

17 about AIDS. She has asked me to reply.

18 "I am sorry that you do not agree with what she

19 said. We are very concerned about the dangers of

20 AIDS. There is no cure or vaccine and no prospect

21 that either will be developed for some years. The

22 government is supporting research and funding

23 a wide-ranging public education campaign to bring home

24 the threat that AIDS poses to us all. It is essential

25 that the message is put across clearly, at every

140

1 opportunity, that the only way to stop AIDS spreading  
2 is for all our people to behave responsibly.

3 "I understand that you take particular exception  
4 to Mrs Currie's reminder about good Christian people  
5 not catching the disease. She had in mind merely  
6 that, for most people, a responsible and caring way of  
7 life should protect them and their loved ones from the  
8 threat of AIDS in future.

9 "Thank you for taking the trouble to write about  
10 this important matter."

11 A. Can I just say --

12 Q. Yes.

13 A. -- how angry I was at the time, and how angry I still  
14 am at her remark.

15 Q. Now, you'd started to try and explain things to your  
16 son.

17 A. Yes.

18 Q. The time came when you had to tell him that his daddy  
19 was seriously ill and that he might die.

20 A. Yes.

21 Q. Unsurprisingly, you describe him as becoming quite  
22 anxious and not wanting to be parted from his father  
23 at the time.

24 A. That's right.

25 Q. John also learnt around 1992, your statement says,

141

1 Q. It was a relatively short period of time between John  
2 becoming seriously ill and his death.

3 A. He was losing weight and getting very tired, but  
4 I don't think he had major symptoms until he had two  
5 opportunist infections.

6 Q. He had pneumonia.

7 A. Yes, the one that's peculiar to AIDS.

8 Q. Yes, that was February 1994, and he was admitted to  
9 St Thomas'.

10 A. That's right.

11 Q. Then at Easter of 1994 he had serious diarrhoea and  
12 sickness.

13 A. Yes.

14 Q. And was admitted again.

15 A. It was -- I can never say it, crypto --

16 Q. Cryptosporidiosis.

17 A. Yes.

18 Q. We'll come back to that in a moment.

19 A. Yes.

20 Q. But around this time your father was also very ill.

21 A. Yes, he was, he -- I think -- in April 1993 the --  
22 about a year before, he'd had a major stroke and was  
23 in Ipswich Hospital, and then he was -- I think he was  
24 transferred to a hospital in the north of Suffolk,  
25 right in the wilds of Suffolk, and to a geriatric

143

1 that he had been infected with hepatitis C.

2 A. Yes.

3 Q. But he had been aware of non-A, non-B hepatitis and  
4 having that for some years.

5 A. He had, but I think at that time there was -- the  
6 hep C test had just come in.

7 Q. So the formal diagnosis was made and he was told.

8 A. Yes.

9 Q. You and he regarded it really as just one more thing  
10 because he was so ill with HIV by that stage.

11 A. He was, yes.

12 Q. But for the sake of completeness, we will put up  
13 a letter that was sent to you subsequently by the  
14 UKHCDO. It is 2336008, page 2, please.

15 It's a letter in response, I think, to a request  
16 from you for records about batch numbers.

17 A. Yes.

18 Q. It's May 2003. It's from Dr Hay. But it says this:

19 "Much later epidemiological evidence suggests  
20 that patients developed hepatitis C following their  
21 first exposure to concentrate, which in your husband's  
22 case was BPL concentrate in 1969."

23 So your understanding is that John had been  
24 infected with non-A, non-B hepatitis C for many years.

25 A. Yes.

142

1 hospital, and he had another stroke there.

2 Q. Your father died about eight months before John.

3 A. Yes.

4 Q. In the period prior to your father's death you were  
5 travelling to Suffolk to visit him.

6 A. Yes, yes.

7 Q. And then coming back to London.

8 A. Yes.

9 Q. And you had a particular fear in your mind at that  
10 time.

11 A. Yes.

12 Q. Because John had spoken of suicide.

13 A. That's right, yes. He -- well, he said in the past  
14 that if things got too bad he would inject himself  
15 with air. And I -- because he wasn't -- he was off  
16 work by then, but he wasn't too bad, he could just  
17 about fend for himself for a day or so, you know,  
18 and -- but I sometimes would have to stay overnight in  
19 my -- in my father's house when visiting him in  
20 [redacted] or further up in Suffolk, and I didn't  
21 know, when I came back, what I might find.

22 Q. Your fear was you might come home from visiting your  
23 dying father to find your husband had taken his own  
24 life.

25 A. I don't think John would've done it, but --

144

- 1 Q. But you had that extra worry.  
 2 A. Yes.  
 3 And also can I just mention, that in between my  
 4 father dying and John dying, John's father died, and  
 5 we went to see -- John was just about able to walk  
 6 then. We went to see John's father in hospital as he  
 7 was dying, and John said to his father, "See you soon,  
 8 Dad. See you soon, Dad."  
 9 Q. Was that the last time he saw his father?  
 10 A. Yes. They are actually -- they are buried together or  
 11 scattered together, the ashes are scattered together.  
 12 Q. So after -- when John was in hospital for the second  
 13 time around Easter 1994, you had to go and help nurse  
 14 him in hospital because there weren't sufficient  
 15 nursing staff to --  
 16 A. Well, there were nurses around, but they were busy.  
 17 He needed so much attention that, you know, he wasn't  
 18 getting it, you know. I had to help him onto the  
 19 toilet and things like that and try and feed him. He  
 20 wasn't eating much because -- and it was coming out of  
 21 different orifices, yes.  
 22 Q. You had to leave your son, who was now a teenager, to  
 23 fend for himself, you said, which you still feel  
 24 guilty about.  
 25 A. Yes.

145

- 1 A. Pads, that's right, for him, and that was about all.  
 2 So it was a very -- and we were sleeping in the  
 3 same bed because we didn't have any more room. It  
 4 was -- it was hell, actually.  
 5 Q. Eventually nurses from the local hospice helped you  
 6 nurse him for a few days at home.  
 7 A. Yes, that's right.  
 8 Q. Then John was transferred to St Christopher's Hospice,  
 9 which is where he had wanted to --  
 10 A. Yes, before he was discharged from St Thomas', he said  
 11 he wanted to die in St Thomas', but prior to that we  
 12 had -- when he was well, we had looked at a hospice.  
 13 Q. You visited him every day whilst he was there.  
 14 A. That's right, yes.  
 15 Q. And you've said the staff there were very good.  
 16 A. They were wonderful.  
 17 Q. And you were allowed to sleep there for the last four  
 18 days.  
 19 A. Yes, in a bed in the same room, yes. I didn't wash,  
 20 I didn't take my clothes off, I didn't eat, I just  
 21 paid attention to him.  
 22 Q. On the last day of John's life, you say his mother was  
 23 there.  
 24 A. Yes.  
 25 Q. There was a nurse from St Thomas' there.

147

- 1 Q. John was sent home from St Thomas' with little  
 2 warning.  
 3 A. That's right.  
 4 Q. And you describe he was sent home in an ambulance with  
 5 other patients and he was the last to be dropped off  
 6 because you lived furthest away, so it was a long  
 7 journey.  
 8 A. I was with him when he was actually discharged, but  
 9 they wouldn't allow me to go home in the ambulance  
 10 with him, and so I managed to get home. It was a long  
 11 way from St Thomas' to where we lived, and he was the  
 12 last one to be dropped off. They discharged him, and  
 13 when the ambulance dropped him off, he almost fell  
 14 into my arms.  
 15 Q. You had difficulty getting him upstairs.  
 16 A. Yes, that's right, yes.  
 17 Q. And for the following six weeks, you looked after him  
 18 on your own.  
 19 A. Yes, the doctor was supposed to -- my local GP was  
 20 supposed to come. He didn't come and he didn't come  
 21 and he never did come.  
 22 They did eventually send a nurse, but basically  
 23 she just brought -- oh, I can't think what you call  
 24 them -- well, sort of nappies -- not nappies, but --  
 25 Q. Pads.

146

- 1 A. Yes, she had recently left her job at St Thomas', but  
 2 she'd had some experience of palliative care and she'd  
 3 come along, so she was there, yes.  
 4 Q. You were there, and you say in your statement:  
 5 "We willed him to go and he died peacefully."  
 6 A. That's right. Apparently that's what you do, going on  
 7 the advice of the nurse there. She said that was what  
 8 we should do, and that's what we did.  
 9 Q. And so John died June of 1994.  
 10 A. That's right, yes.  
 11 Q. And he was just 41 years old.  
 12 A. That's right.  
 13 Q. You've said in your statement that your initial  
 14 emotion was a sense of relief for him that his pain  
 15 was over.  
 16 A. That's right, yes.  
 17 Q. But it was over the following months that things  
 18 really hit you.  
 19 A. That's right, yes.  
 20 Q. And you've struggled really ever since then to cope  
 21 with the loss of John.  
 22 A. I have, yes.  
 23 Q. You've explained in your statement you got to a stage  
 24 where you tried to do lots of things, lots of classes,  
 25 lots of courses to try and keep yourself occupied.

148

1 A. Yes.  
 2 Q. But you became stressed, anxious and depressed.  
 3 A. Yes. I did try to go back to teaching after  
 4 18 months. I had about two terms, it was just  
 5 a temporary post, in a nursery. It all became too  
 6 much. I -- it was the day after the ... Dunblane --  
 7 Dunblane incident, and I had a breakdown in the  
 8 classroom in front of 25 small children, nursery  
 9 children, and I never went back to teaching after  
 10 that.  
 11 Q. You did begin to see a psychologist regularly.  
 12 A. Yes.  
 13 Q. You found --  
 14 A. She's very kindly here today to support me.  
 15 Q. And you've said that you found a psychologist who was  
 16 one of few who had specialist knowledge of AIDS.  
 17 A. Yes.  
 18 Q. And that she was a great help to you.  
 19 A. She was, yes, both -- I saw her before John died and  
 20 after.  
 21 Q. But you've described in your statement the impact of  
 22 losing John on your life, and if I may, I'm just going  
 23 to read out a passage from your statement where you  
 24 describe it very powerfully. You say this:  
 25 "I feel I have lost so many things in my life

149

1 Q. As we've heard, John was only 41 when he died and he  
 2 had to give up work two years before, and you were  
 3 unable to return to work.  
 4 A. Yes.  
 5 Q. So financially, things have not been easy for you in  
 6 the years that followed.  
 7 A. It hasn't been as bad for me as a lot of other widows.  
 8 I did have a pension from John because he was in work  
 9 until the end of his life. Although he hadn't worked  
 10 for two years, the firm kindly paid him. He was just  
 11 about to go on half pay when he died.  
 12 I had a teacher's pension, and I now have state  
 13 pension, you know, old age pension. Somehow we've  
 14 managed. And I've had the ex gratia payments.  
 15 Q. You use those to help with housing costs.  
 16 A. That's right. Yes, I still have a mortgage, but it's  
 17 an interest-free mortgage and it's very small now.  
 18 I think -- you know, as I say, I'm -- I manage.  
 19 Q. You've observed in your statement that for the first  
 20 four or so years after John died, and your son was  
 21 still under the age of 18, you received regular  
 22 payments from the Macfarlane Trust, but after that,  
 23 nothing.  
 24 A. That's right. At that time they -- the Macfarlane  
 25 Trust only gave payments to widows with children or

151

1 and the whole situation has affected me beyond  
 2 measure. I have lost the love of my life and been  
 3 left to bring up my son alone. I lost my career as  
 4 a teacher and have not been able to work since because  
 5 of bad depression. I am still devastated by not  
 6 having a second child. Since my son left home, now  
 7 married with two small children, I have lived alone.  
 8 It is very lonely with only the four walls to talk to.  
 9 There is nobody to confide in, to make me a cup of tea  
 10 or care for me when I'm ill, although my family help  
 11 as much as they can and have been a great comfort,  
 12 which is much appreciated.  
 13 "I think people must think that maybe after all  
 14 these years have gone by I would somehow forget what  
 15 had happened. In fact, John's death has permeated  
 16 every area of my life and affected every area of my  
 17 life. I lost the love of my life and he is not here  
 18 anymore."  
 19 I am going to ask you about two further matters,  
 20 Mary.  
 21 A. Mm-hm.  
 22 Q. Financial implications of what happened to John.  
 23 A. Yes.  
 24 Q. Then some of your campaigning activities.  
 25 A. Okay.

150

1 disabled widows.  
 2 Q. Since that time, and since there have been means  
 3 tested schemes, you've refused to apply because you  
 4 strongly disagree with the principle of means testing.  
 5 A. Yes, and I think most people here would agree with  
 6 that.  
 7 Q. You have received some funding from the English  
 8 Infected Blood Scheme that have assisted you to  
 9 recently receive counselling from the same  
 10 psychologist.  
 11 A. That's right, and I did -- last year I did receive one  
 12 winter payment, but neither of those were means  
 13 tested.  
 14 Q. In terms of the Skipton Fund, you said you had to  
 15 fight hard for those two payments. You were turned  
 16 down two or three times, but you were eventually  
 17 accepted with the help of one of the doctors from  
 18 St Thomas'.  
 19 A. That's right, Dr Bevan from St Thomas' helped me get  
 20 stage 1 and stage 2. Stage 2 I got on the probability  
 21 that John had hep C and -- well, we knew from the test  
 22 that he had hep C, and that he would possibly go on,  
 23 if the AIDS didn't get him -- well, the AIDS did get  
 24 him first, but, you know, the hep C could have been  
 25 a problem for him.

152

1 Q. You've recorded in your statement that you once went  
2 to see Martin Harvey when he first became  
3 chief executive of the Macfarlane Trust --  
4 A. That's right.  
5 Q. -- to ask for regular help for all widows not just  
6 yourself.  
7 A. Yes.  
8 Q. How did that conversation go?  
9 A. Well, I went to see him when he first became  
10 chief executive of the Macfarlane Trust. As you say,  
11 it wasn't really for me, I -- as much as some widows  
12 that I knew were struggling, and I thought he's a new  
13 broom, he'll be sympathetic. Boy, was I wrong.  
14 He said to me, "What did your husband do?" And  
15 I said, "He was an electronics engineer." And he  
16 said, "Well, don't they have some organisation or  
17 a scheme where they can help you?" And he never said  
18 anything about, you know, the Macfarlane Trust helping  
19 me, and I was disgusted. I couldn't -- I couldn't  
20 believe he was saying that to me.  
21 Q. We can see that John had been concerned about issues  
22 of financial stability and financial impact during his  
23 life. In particular, life insurance and costs of  
24 treatment. We'll look at a letter in that regard.  
25 Henry, it's 2336007, please. It's page 6.

153

1 A. That's right. Yes. He had been with I think the  
2 Prudential, and had some kind of -- I can't remember  
3 the exact policy, but just as some kind of savings  
4 policy, and he had a payout, and then he decided to  
5 try for life insurance, but he was turned down.  
6 I think there were questions about AIDS, I can't --  
7 I think that's why we must have written.  
8 Q. Then the letter goes on to say this:  
9 "The provision of health services for  
10 haemophiliacs is well established and rests with  
11 individual health authorities, who have detailed  
12 knowledge of local circumstances and are therefore  
13 best placed to determine local needs and priorities."  
14 Now, as I understand it from your statement, and  
15 it may have been what prompted John's approach to the  
16 MP, John was being charged for one particular kind of  
17 drug.  
18 A. Yes, he was being charged -- because he was still in  
19 work, he was charged for his antiviral drugs, AZT,  
20 Retrovir. He had to pay for a payment card, you know,  
21 for prescriptions, which we were absolutely disgusted  
22 about.  
23 Q. Now, you've continued campaigning and letter writing  
24 in the years since John has died.  
25 A. Yes.

155

1 It's a letter of 19 April 1988, and it's from  
2 the Department of Health and Social Security, the  
3 Parliamentary Undersecretary of State for Health  
4 addressed to Colin Moynihan MP.  
5 A. Mm-hm.  
6 Q. "Thank you for your letter of 1 March about your  
7 constituent, Mr J Grindley, and his concern over  
8 availability of life assurance for haemophiliacs  
9 infected with the human immunodeficiency virus and the  
10 funding of treatment for haemophiliacs. I am sorry  
11 for the delay in replying."

12 Then the first paragraph deals with the issue of  
13 insurance and says this:

14 "Decisions as to the risks undertaken by  
15 insurance companies are a matter for the commercial  
16 judgment of individual insurance companies. The  
17 government does not intervene in these decisions and  
18 recognises that insurance companies must take account  
19 of the commercial implications AIDS and HIV infection  
20 present. However, the government is in touch with the  
21 Association of British Insurers to ensure that each  
22 new application for cover is judged solely on the  
23 individual circumstances of the proposer."

24 Pausing there, John had obviously been concerned  
25 about a difficulty or inability to get life insurance.

154

1 Q. We've looked already at some of the letters sent by or  
2 in respect of matters that you raised or John raised,  
3 but we're just going to look at three more.  
4 Henry, could we have 2336007, page 11, please.  
5 We can see that the issue that was being raised  
6 here -- it's 18 April 1995:  
7 "Dear Mrs Grindley,  
8 "Thank you for your letter about the hepatitis C  
9 campaign being run by the Haemophilia Society."  
10 So this is the year following John's death.  
11 A. Yes.  
12 Q. "I have much sympathy with your comments and with the  
13 points which the Society make. As you may know, the  
14 issue has already been ventilated in the House of  
15 Lords, where the minister explained that the  
16 government does not accept liability for those  
17 infected by contaminated blood products on the grounds  
18 that such patients received the best treatment  
19 available, given the medical knowledge at that time.  
20 "Whilst a parallel can be drawn with those who  
21 contracted HIV, the minister claims that this was  
22 a special case, that the consequences are not  
23 comparable and that agreeing to what would be in  
24 effect no-fault compensation could involve substantial  
25 expenditure, not only for those cases, but for others

156

of a similar nature for which a precedent would have been created.

"However, having explained the government's stance, I do accept that there is an argument for consideration being given to ex gratia payments in certain cases and I shall seek opportunities to raise this in the House of Commons or informally with ministers."

So you were involved in trying to support a campaign for payments for those who had been infected with hepatitis C.

A. Yes, yes.

Q. Could we have, please, Henry, within the same exhibit, page 25.

A. Can I just say that --

Q. Yes, of course.

A. -- this is off my own bat individually. I wasn't involved in any particular group at that time.

Q. So page 25, please.

We can see this is a more recent letter, it's 19 June 2009, and this is after Lord Archer had reported. You gave evidence to the Archer Inquiry.

A. That's right, yes.

Q. Again, you have written to Dawn Primarolo about the government's response to Lord Archer's report, and the

157

believes its final response is as positive as possible. The government has published the final response on the Department of Health website."

Then we have a link to it:

"This includes details of the steps taken in response to each recommendation.

"Owing to diary commitments, it is not possible to meet with the minister. However, I hope this reply is helpful."

You had been involved with the Archer Inquiry, you gave your evidence.

A. Yes.

Q. And this letter was prompted by your view that the government's response was inadequate.

A. Yes, that's right.

Q. Then, finally, Mary, 2336007 -- so same exhibit, Henry, but page 28, please.

We can see this is more recent still, November 2012. Again, you've written to the Department of Health -- or in fact you've written to David Cameron and the letter has been passed to the Department of Health.

A. Yes.

Q. It says this:

"I was very sorry to read of your husband's

159

letter says this:

"I was sorry to read of the death of your husband and that you have been affected by the issue of contaminated blood. I appreciate that this must be a difficult time for you.

"This government deeply regrets that patients acquired serious infections as a result of NHS treatment some two or more decades ago, and extends every sympathy to the patients and their families who have suffered as a result of the very treatments which should have transformed their lives for the better.

"The department understands the sense of grievance that some people may feel as a result of what has happened, and that there are deeply held opinions on the appropriateness and timeliness of decisions and actions taken many years ago. In his report, Lord Archer did not find the government of the day to have been at fault and did not apportion blame.

"The government is committed to ensuring that people with haemophilia and others who have been infected with hepatitis C and/or HIV from blood and blood products are well cared for, supported in their communities and fully informed about how best to look after their health. The government gave very careful consideration to Lord Archer's recommendations and

158

death. The government is deeply sorry about the events that led to the infection of so many people with HIV and hepatitis C and has the utmost sympathy for all of those who were affected.

"I can assure you that the department sympathises with the distress and deep sense of injustice felt by the families of haemophilia patients infected with blood-borne viruses through their treatment. It is tragic that people were harmed because of the very treatments that were supposed to help them."

Pausing there, although we don't have your letter, Mary, it seems from what follows you were asking for a public inquiry.

A. Yes, possibly, yes, I was.

Q. It says this:

"It has been the view of successive governments that there is no justification for a public inquiry into these matters in England after all this time. The relevant facts are already in the public domain. All relevant documents held by the Department of Health on blood safety covering the period 1970 to 1985, when the heat treatment of clotting factor products was introduced, have now been published in line with the Freedom of Information Act. If any

160

further documents from that period come to light, the department will also publish them in line with the Freedom of Information Act. The issue now is how best to support those affected.

"Successive governments have recognised the plight of all those affected by NHS supplied contaminated blood or blood products, and a number of ex gratia payment schemes have been put in place to provide financial support. To date, these schemes have paid out over £264 million."

If we can go over the page.

"In January 2011, the then Secretary of State for Health, Andrew Lansley, made a statement to the House of Commons in which he said he viewed the events that led to thousands of patients contracting hepatitis C and HIV from NHS supplied blood and blood products as one of the great tragedies of modern healthcare. He also said how sorry he was that it had happened and expressed his deep regret for the pain and misery that many have suffered as a result."

Did you regard that as an adequate answer to your concerns?

A. Not at all, no. No.

Q. Mary, it's clear from your statement and from some of the many letters you've written -- and we've only

161

carpet and no one listened."

That's one of the reasons why you have continued over these years to write these letters, raise these issues.

A. Yes.

Q. Because you believe that's the right way for you to honour John's memory.

A. Yes. Can I also say, I did campaign over recombinant Factor VIII.

Q. You did. We have a number of those letters in the materials you've provided to the Inquiry.

A. Yes.

Q. That was a very important part of --

A. That was important to me, because I wanted -- I wanted, you know, people to be free of viruses and things. So that's why I campaigned, and I had a question put by my MEP to the European Parliament. At the time recombinant Factor VIII had VAT on it, I don't know whether it still has, but -- and this is what was stopping the haemophilia centres from purchasing it. So they were -- they were still, you know, having human Factor VIII in their centres because of the cost.

And -- but the European Parliament said it was up to the British Government about VAT, and the

163

touched on some of them --

A. Yes.

Q. -- how important it's been to you to try and raise these issues, as you and John did during John's life and subsequently.

A. Yes.

Q. I just wanted to read one further bit from your statement where you address this.

You say this:

"I felt all along that I never failed John in life, and I tried to be the best wife I could under the circumstances. I know he loved me and he told me near the end what I good wife I had been. However, I failed him in death, because I haven't been able to get justice for him and the thousands of others who have died or are still alive, many of whom I know personally, or the widows who I know or don't know.

"I know that John would want me to try and be happy. He didn't want me to cry after his funeral, and I didn't, but I've cried buckets since and still do. He said when he was ill that he wanted me to grieve for him for a year and then forget him, perhaps remarry with his blessing. Well, I have learnt that is impossible. We still have no closure, no admission of wrongdoing. Everything has been swept under the

162

British Government have said, you know, it was up to the European Parliament.

So -- but anyway, eventually it did come in via -- or first of all with Frank Dobson, I think he brought it in for children, and then subsequent years it's come in.

Q. Mary, those are the questions I have for you. I'm going to ask Mr Williams if there's anything further he'd like me to ask.

(Pause)

Mary, there's just one further point which Mr Williams asks me to raise with you.

A. Yes.

Q. We don't have the letters to display on screen, but I certainly have seen them and they've been provided by you, it's correspondence in February 1984.

A. Uh-huh.

Q. This is after John had undertaken that form of skin testing.

A. Right.

Q. It's correspondence in which John was asked by St Thomas' to donate blood and the letter reads:

"Dear Mr Grindley,

"We are desperately short of haemophiliac blood at the hospital, which means we have difficulty in

164

monitoring operations on patients with a problem similar to yours. We would be very grateful if you could donate some of your blood to us, assuming that you have not treated yourself within the last week."

I think, from memory, there were two such requests for John to donate blood.

A. Could you just tell me the dates again please?

Q. The first letter is 17 February 1984. The second letter I think follows fairly shortly thereafter. October of 1984.

Do you recall John being asked to donate blood?

A. Well, I don't know specific dates, but, yes, he did, because he was interested in medical research. He frequently gave blood for research at St Thomas'. But what it was for, I don't know.

Q. Thank you.

Mary, those are the questions, but is there something further that you would like to say?

A. Could I just raise, before I read my -- what I've got to say, the incident with Dr Savidge at St Thomas'. This was in 2003. I had requested from the National Haemophilia Database John's medical records, treatment records, for the American litigation, and the notes actually didn't come to me, I had to pick them up via St Thomas', from Dr Savidge. And Dr Savidge had a big

165

About a year after my husband died, I went to the GP because I was very depressed, and this was before my breakdown. He was very unhelpful, and more or less told me to get over what happened and move on in a cold -- very cold manner. A few friends and relatives have told me since to my face that this happened all long ago, and I should move on.

But how can I? I live with it every day. On the surface I may appear that I've moved on. I'm known for my smile, but underneath I haven't, and I don't think I ever will. I have many activities, feel I'm very popular and well liked, I enjoy socialising and I have plenty of friends, both ones who know my situation and those who don't. But I also have had deep periods of deep depression and loneliness, and even at times I've had suicidal thoughts.

There have been and still are days when I have had to force myself out of bed, where I don't wash all day. I sit around in my underwear and my nightwear with the curtains closed. I have been under a wonderful clinical psychologist who is here today for the past 18 months, who I was seeing before John died, and she is currently seeing me through this very difficult time and I'm sure beyond, and I thank her

167

row with me in the reception room -- reception at the Haemophilia Centre. He didn't want me to have the notes. And eventually he did give them to me, but when he gave them to me, he said, "These are possibly not accurate anyway". What he meant by that, I'm not quite sure, whether he was hiding something from me, or -- he possibly thought I was going to sue him, which I wasn't.

But I did get the notes eventually, and it really did have a very strong effect on me. I ran into the toilets at St Thomas' and cried.

Q. And those were treatment records from the National Haemophilia Database, as you've explained.

A. Yes.

Q. Previously you'd actually approached St Thomas' and asked for copies of John's records.

A. Yes.

Q. You were told it was all too long ago and they'd been destroyed.

A. That's right. I did get his ordinary medical records, but not the treatment records.

Q. Mary, there was something further I think you want to say.

A. Yes, if you wouldn't mind. Some of this has been repeated.

166

for all her support.

My son has also suffered greatly, going into denial and not knowing how to deal with what happened with no father, and a mother who was stricken with grief. He has only just started to open up to me this week by allowing me to read his witness statement. I hope now, after more than 25 years, we can begin to talk about what has happened more openly.

I am just one of thousands of people who have suffered from this dreadful tragedy. Indeed, as we know, thousands have died, and those left and their families have been left to endure horrendous physical and mental pain and suffering. What is more, they have been left without help, or no help, having to be means tested and begging for money.

The widows, some of whom I know, have been -- and some of whom have been tragically infected themselves, have been made to feel like second class citizens, scroungers, and treated worse than dogs and left to survive themselves.

Yet, all this should never have happened, and what has happened until now has been swept under the carpet and truths denied. I have in a small way been a little voice battling against the odds through nearly 40 years by my individual campaigning, trying

168

to halt unsuccessfully the use of unsuitable donors from American prisons and homeless. Still, the pharmaceutical companies continued to send out untreated blood products, even when they knew heat treated blood was available, for their profit, and the American government still allowed them to do it.

I tried to halt the importation of those blood products. I wrote to Margaret Thatcher, Kenneth Clarke and others who deliberately ignored what was happening and to successive governments who ignored pleas for help and never accepted responsibility, which was really their duty of care to the haemophilia community. But those letters fell on deaf ears.

I battled with the Macfarlane Trust to try to get regular payments for all widows, but to no avail.

I also campaigned for recombinant Factor VIII, but initially it was too expensive for haemophilia centres because of the VAT, and then only given eventually to children.

I promised my husband, when he was very ill, that I would seek justice for him. Until now, my efforts have been in vain. Although I feel I did all I could while he was alive, I feel I have failed him in death, because I have not been able to get the

169

for their tireless work on my behalf.

Very lastly, I would like to pay tribute to all those infected and affected who have given their evidence and all their witness statements to this inquiry. They have shown great courage to do so. I have met some amazing people, both before and during this inquiry. They are forever in my heart.

Thank you.

**MS RICHARDS:** Thank you, Mary.

Sir Brian.

**SIR BRIAN LANGSTAFF:** We have ended this stage of the Inquiry on a very powerful note. Not only powerful for your own story, without the documents, but all the more so for the way it has been methodically documented almost at every stage, and I can only thank you for that.

I would comment that those of us who have listened to you may perhaps reflect on your saying that haemophiliacs in your experience are people with real strength.

**A.** That's right.

**SIR BRIAN LANGSTAFF:** They may reflect that people who marry them also have real strength.

**A.** I think that's why we chose haemophiliacs, because of their strength.

171

justice for him and all the others who so tragically died or have been infected or affected.

I will fight on.

I'm extremely grateful for this opportunity to give my evidence. We all hope Sir Brian and his wonderful team will finally uncover the truth by this public inquiry, and I thank them for all their hard work.

I just hope, as we all do, that the government will be listening to these findings and act accordingly, to give all those infected and affected some closure and that we might finally get some closure that we have been denied.

I would like to thank my wonderful daughter-in-law here for all her help with my witness statement and for being here at my side. For my wonderful son, who has supported me through many difficult years. My friends and family here today. Lynne Kelly from Haemophilia Wales, who has supported me both before the public inquiry and since, and who has worked tirelessly to help bring this public inquiry, together with others.

I would like to thank the staff at Watkins & Gunn particularly Michael Imperato, Lucy O'Brien and Megan Rogers, and my barristers, Lloyd and Christian,

170

**SIR BRIAN LANGSTAFF:** You're fighting on.

**A.** Yes, I am. I am fighting on, Sir Brian.

**SIR BRIAN LANGSTAFF:** Thank you very much.

**A.** Thank you very much, thank you.

**SIR BRIAN LANGSTAFF:** Mary's evidence has brought this phase of the Inquiry to an end, and it's time to reflect on what we've heard and what we have yet to hear.

First, then, what we have heard.

Many of those who have given evidence have thanked the inquiry, and me, for giving them the opportunity they've had to do so. Well, I'm pleased about that, and you couldn't expect me to be anything else, could you? But thanks are really due the other way round. It takes no particular courage to sit here, rather than there (**Indicates**).

Doing that doesn't risk me, nor does sitting there risk most of the lawyers or inquiry staff, the bringing back to the surface of memories which may be too painful to be remembered. It doesn't involve me or counsel to the Inquiry or any of the Inquiry team having to reveal some of the most intimate details of our personal lives to total strangers, or to catalogue the indignities of trying to survive physically, mentally and financially.

172

Both individually and often as a family after the death of someone we valued above all others, it is to me remarkable that so many, despite their mixed emotions, have wanted to give evidence, and that others whose story deserved to be heard orally have allowed themselves to be persuaded to tell it in that way, despite the personal cost that it might involve.

In my view, true courage is shown when people have a choice between an easy option and a risky one, and they opt for the risky choice because that is the one which is most likely to help others, or allow them to do their duty by someone who is no longer here to do it for themselves.

So I'd like to pay tribute to every one of those who have chosen to give evidence when asked, for they have shown that sort of courage, and each in their own way, despite the risks of adding to their personal pain, has helped paint a composite picture which will help in trying to establish the truth. They have shone a light onto what has happened, and the everyday consequences and ripple effects of living with it, often for 30 years or more.

The Inquiry is particularly interested in the overall picture. Each individual account given may be subtly different, one from another, but each is

173

steps taken by the government so far as result of that letter, increasing payments in England, have helped, but many more witnesses have repeatedly drawn attention to the continuing variations between the home nations, although at the time of their infection there was no such thing as a devolved health administration. The grinding hardship of many is not put on hold while the inquiry continues. If, as a number of witnesses have argued, there is in truth no proper justification for the significant variations in financial support as between the nations of the UK, then there can be no proper reason for those variations to be perpetuated to await the outcome of the inquiry.

I've learnt today that this morning a government spokesman told the BBC this, and I quote:

"We are working with devolved administrations so that we can meet our commitment to guarantee equal support for all those infected and affected across the UK."

Now, perhaps it's the lawyer in me, but I note the wording. The wording is not "We will consider", it is not "We wish", it is not "We want"; it is "We commit, "our commitment to guarantee equal support". Those are the words which the government has issued

175

of value not just for its own sake, though it certainly is of value for that, but because taken together, they've painted the same themes from different perspectives. They've done that so clearly that you don't need me to recite those themes. Any observer can see them for themselves. They shape the context for what must follow.

But let me just mention a couple of the emerging themes.

First, it's clear that the impact of decisions made in the 1960s, 1970s and 1980s, or the consequences of not making decisions which might have been made, continue to this day.

Second, the evidence we heard only this week of a widow who became homeless after her husband's death, having had to spend the time caring for him when she might have spent it working for a wage had he not been infected, is just part of an overall picture of relentless hardship for many.

It's now just over a year ago since I wrote to the minister for the Cabinet Office calling for decisive action to be taken to alleviate this before any fundamental review which might follow from the Inquiry's conclusions.

Some evidence we've heard suggests that the

174

today.

We are independent of the government. We note those words. We wait to see what happens in consequence.

As to the outcomes of the Inquiry, may I make it clear that if wrong was done, I have the power under the Inquiries Act to say so. And, if it was, I will. If there is criticism to be made, I shall make it, and I shall not hesitate to name names where it is appropriate. If there was fault, I intend to say so.

Now, where actions should be taken in remedy, I expect to make robust recommendations. This is not the same as determining liability in a civil or criminal case. I have no power to do that. That is a matter for the courts. Whether my findings at the end of the day lead others to take matters before those courts is for them, not for me, to determine.

Another repeated theme has been the often unanswered call for help and psychological support for those suddenly facing what has seemed an unfair death sentence, with all its side-effects on partners, friends and family, or the gruelling courses of treatment they've undergone with their own side-effects.

It is appropriate, therefore, that when we begin

176

our next set of hearings, which will begin on February 24 next year, we shall hear in particular from experts on social and psychological impact -- one was here earlier today -- as well as from experts on hepatitis, HIV, blood and bleeding disorders. That evidence is intended to place what we have already heard in a wider context and prepare for the hearings with the decision-makers which will follow.

They will follow in early June. The exact date depends on timetabling the first witnesses, but we shall begin by exploring what those clinicians and, for that matter, those other witnesses who can shed light on the policies and practices of centres from across the UK who are most closely involved at the time, can tell us about what happened and why.

Well, you may ask: why wait until next June? Time is precious, aren't you wasting it? The answer is that we are taking time for good reason and wasting none of it.

This inquiry is not a small undertaking. The hearings are the visible part of the inquiry's work, but the majority of the inquiry team have been beavering away throughout on the investigation, and this will intensify to enable Ms Richards and her counsel team to be fully prepared to examine what the

177

archives.

All this and evidence of around 3,000 witnesses is to be considered, along with expert evidence. We shall also be arranging for further evidence from people who are infected or affected to be heard at the end of our evidence sessions, as I promised at the outset, people first and last. We may find space, too, for some to be heard during our exploration of specific terms of reference.

Having mentioned that, forgive me for repeating a theme which I've touched on at the end of each set of hearings so far.

You've seen -- you've seen today, you've seen throughout this week, you've seen over the last 12 weeks of hearings -- how the evidence of each witness adds something, something new, something different, to the overall picture. Just when you may think you've heard it all, another aspect is revealed. Written statements are the same. Each has real value, each sheds a slightly different light.

Each time I've asked for anyone who has been infected or has been affected by the suffering of someone close to them, or themselves, to pluck up the courage, it takes courage, I acknowledge, to make a statement, there has been a response. Well, I'm

179

decision-makers have to say from June onwards.

More than 11.5 million pages have been reviewed, and around 2.5 million pages already placed on the Inquiry's documents system, a figure which grows at an average of 40,000 pages per week.

These come from almost 600 organisations, repositories, archives, including international archives, trusts, haemophilia centres and government bodies. I have to confess that more documents have come to light than I had at first anticipated, and each page of each document has to be looked at. They have to be set in the right place. It feels at times like solving a million-piece jigsaw.

We've had extensive co-operation from most of those bodies, individuals, companies and organisations which hold documents, and I thank them for that. So I hope that I'm not going to be misinterpreted when I gently remind all of the expectation expressed at the highest levels of government that there will be full co-operation with this inquiry, and that having regard to the public interest in establishing the truth, that extends to waiving legal privilege, ensuring retention notices are in place, so that potentially relevant information is not destroyed, and ensuring or facilitating thorough searches of

178

asking again, and I'm especially interested in what those with a blood disorder such as thalassaemia or sickle cell anaemia may have to add.

Well, it's late in the day, but then I did promise we'd sit until we finished.

It remains for me just to mention two further things.

First, I feel sure that the witnesses who have been dealing with the most uncomfortable of issues have been able to do so much better because so many of you have been here supporting them, here and online.

Finally, it remains for me to wish you all, all here, a safe journey home.

Thank you.

**SIR BRIAN LANGSTAFF:** 24 February.

**(4.30 pm)**

**(The Inquiry adjourned until Monday, 24 February 2020)**
