Dear I

THE ADVISORY GROUP ON TESTING FOR HEPATITIS B SURFACE
ANTIGEN AND ITS ANTIBODY: THIRD REPORT

I am able to let you have 40 copies of the Report for distribution. You might like to know that we have sent copies to Regional Transfusion Directors, Regional Medical and Scientific Officers (the Northern Ireland Scientific Officer included because he attends R Sc Os meetings here and receives papers from the Departmental Secretariat) and to a number of bodies who have an interest in the report, eg the Medical Research Council and Health and Safety Commission. *We have also sent copies to the Hepatitis Reference Centres.*

You might also like to see a copy of what we propose to say about the report in our Department Quarterly Bulletin of Publications which goes out to the NHS.

Yours sincerely

Health Services
Division 1.
