attention mrs henninger

1) kryobulin tim 2

i can confirm that at the moment we are only ordering this in home treatment packs. at some stage in the future we may need multipacks but at the moment it is impossible to give a firm answer on this. we appreciate that it will take time to prepare packaging for multipacks but would suggest that you do not take any action to prepare this for the time being.

2) feiba tim 4

we think it would be preferable to have a u.k. only 'neutral english' pack insert with the claim for reduction in hepatitis transmission deleted.

depending on the results of the medicines commission hearing it is possible that the same leaflet could be used should the licence be granted.
