re: your telex no. 3003

1. kryobulin lot.n. 33m13473

is manufactured from european plasma. in the future the
origin of source plasma will be indicated on the
accompanying test protocol of samples for batch release.

2. the expiration date will appear on all test protocols in
future. in accordance with our recent licence amendment
sheet the shelf life of lot no. 33m13473 will of course be
2 years.

3. according a.m. licence amendment the 6 months storage
possibility at 500c will appear in the insert sheet and on
product cartons respectively on covers. it will not be
mentioned on the labels of r/c vials for reasons of lack
of space.

4. the new packing elements will be ready at the time of release
of batch 33m13473 i.e. in approximately 4 weeks.

kind regards
