Dear Mouneer

GRO-B : dob GRO-B 72
GRO-B

Thank you for your letter enclosing details of treatment received at LMT College and results of blood tests.

I saw him with his mother on 18/12/87 and agree that he has persistent generalised lymphadenopathy. He has been putting on some weight and there is no evidence that he has AIDS.

I explained his HIV status to both GRO-B and his mother and its distinction from AIDS and expected some questions but none were forthcoming. Mrs GRO-B is aware of the help which can be obtained from the Haemophilia Society if expenses are incurred and has agreed to let me know if assistance is needed in securing this.

Yours sincerely

GRO-C
