1  
2 (10.00 am)  
3  
4 (10.14 am)  
5 SIR BRIAN LANGSTAFF: Now, our first witness this morning is  
6 anonymous and will be known as Mr AW.  
7 Let me read out the restriction order guaranteeing  
8 his anonymity.  
9 The name and address of witness W3023 -- that's  
10 Mr AW to you and me -- and any other identifying  
11 information, such as the names of members of his family,  
12 as well as the witness's image or a description of their  
13 appearance, cannot be disclosed or published in any form  
14 unless express permission is given by me, or by the  
15 solicitor to the inquiry acting on my behalf.  
16 Witness W3023 must be referred to only as "Mr AW".  
17 This order remains in force for the duration of the  
18 Inquiry, and at all times thereafter, unless otherwise  
19 ordered, and I may vary or revoke this order by making  
20 a further order during the course of the Inquiry.  
21 Mr AW, would you come forward, please.  
22 **MR AW (sworn)**  
23 **Questioned by MS RICHARDS**  
24 MS RICHARDS: Mr AW, you were diagnosed with leukaemia at  
25 the age of 18 in December 1992?

3

1 June platelets on a number of occasions, through into  
2 early July, when you received two units of packed red  
3 cells.  
4 A. Yes, that's following the bone marrow transplant, which  
5 was the final part of my treatment.  
6 Q. The bone marrow transplant you had in May at University  
7 College Hospital.  
8 A. Correct, yes.  
9 Q. In April 1993, the tests showed that you were clear from  
10 leukaemia, and you essentially got on with your life  
11 after that.  
12 A. Yes.  
13 Q. You had check-ups initially monthly but afterwards on  
14 an annual basis.  
15 A. Correct, yes, yes.  
16 Q. You felt pretty well.  
17 A. I think it took a bit of time to get back to normality,  
18 just as a teenager of that age. It took me a little  
19 while to get up to what I felt normal, comfortable,  
20 confident in myself. So probably I'd say a year after  
21 the treatment had finished I'd actually say I was back  
22 to my normal health.  
23 Q. It was then ten years later, in 2003, that you received  
24 a letter from Luton and Dunstable Hospital. Now, we  
25 don't currently have a copy of that letter, but what can

2

1 A. Correct.  
2 Q. And you were treated at Luton and Dunstable Hospital and  
3 at University College Hospital London.  
4 A. Yes, correct.  
5 Q. You've explained in your witness statement that  
6 between December 1992 and May 1993 you received range of  
7 different treatments. At Luton and Dunstable in  
8 December 1992 you received a transfusion of five units  
9 of platelets and two units of blood.  
10 A. **(Nodded assent)**  
11 Q. Then at University College Hospital, between  
12 December 1992 and May 1993, you received 14 units of  
13 blood and 15 units of platelets.  
14 A. Yes.  
15 Q. Then we can also see just from some records that you  
16 received some further treatment in July 1993.  
17 Henry, could we have 3023015 on screen, please.  
18 We can see here it's a letter of 7 July 1993, and it  
19 says:  
20 "I am grateful to you for arranging a local top-up  
21 blood transfusion with two units of leucocyte depleted  
22 blood for this 19-year-old lad with ALL."  
23 Then if we have 3023016, please, we can see from  
24 your notes that in addition to the treatment you have  
25 identified in your witness statement, you received in

4

1 you recall it saying?  
2 A. There was a letter I received where -- from the previous  
3 appointments I had been seen at the haematology  
4 department where they'd noticed some raised -- some  
5 liver issues, shall we say, in terms of the results in  
6 the blood. And then I was going to actually see  
7 a different haematologist, a different name, someone  
8 I hadn't seen before to go on an appointment I didn't  
9 know too much about, really. For me it was a complete  
10 surprise.  
11 Q. So you went along to this appointment, and what did the  
12 consultant say to you?  
13 A. I do remember the words vividly. I think the first  
14 words that he mentioned were, "Do you actually know why  
15 you're here?" And I think that was -- at that point in  
16 time, okay, what's -- there was a bombshell about to be  
17 dropped. So, yeah, I vividly remember those words being  
18 mentioned to me. Just me myself, a consultant I hadn't  
19 seen before, never in all the different visits I'd had  
20 to the appointment, never seen this chap before. So  
21 that's when he said -- gave me the news, he said,  
22 "Unfortunately it looks like you're hepatitis C  
23 positive."  
24 Q. Can you recall if you were given any information at that  
25 stage about prognosis or treatment?

5

1 A. Not a great deal, really. I think when you get hit with  
 2 health news -- this wasn't obviously the first time,  
 3 this was ten years plus after having the leukaemia side  
 4 of things -- your brain goes into a bit of a fog, shall  
 5 we say. But I don't really remember too much  
 6 information. I think in my head hepatitis C -- didn't  
 7 know too much about what hepatitis C was. I think  
 8 probably I banded it in as something similar to what HIV  
 9 is, essentially, and how and why essentially was kind of  
 10 buzzing around in the head.

11 Q. We're going to look at a couple of documents related to  
 12 that appointment.  
 13 Henry, could we have 3023005, please, first. We can  
 14 see it says this. It's dated 16 April 2003. It relates  
 15 to a clinic on 14 April. It says:  
 16 "Thank you for referring this 28-year-old man to  
 17 clinic. He was unfortunately unclear as to the reason  
 18 for his attendance, and when I explained it was because  
 19 his liver function tests were abnormal and that he had  
 20 been found to be hepatitis C positive in September 2000,  
 21 he appeared rather shocked. His risk factors for  
 22 hepatitis C are clearly the multiple transfusions he  
 23 would have had in 1993, when having treatment for ALL.  
 24 At present, he is completely well and has no symptoms of  
 25 liver disease. I have arranged for him to have

7

1 attendance.  
 2 Henry, it's 3023007, please.  
 3 It's the first entry for 14 April 2003, "Has C" --  
 4 or it might be, "Hep C positive 2000. Didn't know why  
 5 here!" No explanation in the records of that  
 6 appointment as to the delay in informing you.  
 7 So from your perspective, you were told out of the  
 8 blue that you had hepatitis C.

9 A. Yes.

10 Q. If we have up on screen, please, 3023002, we can see  
 11 this is a letter written by a consultant at the Royal  
 12 Free Hospital where you were subsequently referred, and  
 13 we can see the consultant's view again set out as to  
 14 what the cause is or was of the hepatitis C.  
 15 "Many thanks for referring this 28-year-old man and  
 16 sending his liver biopsy slides for review. He first  
 17 became aware of hepatitis C virus infection in  
 18 April 2003. This was discovered as part of his routine  
 19 follow-up for ALL."  
 20 Then it says this:  
 21 "At first diagnosis of ALL he received blood  
 22 transfusions and blood products, and this is the likely  
 23 source of transmission of hepatitis C."  
 24 You've seen a number of doctors in different  
 25 hospitals in relation to this. The impression created

6

1 hepatitis C PCR and deliver ultrasound, and assuming the  
 2 PCR is positive and the ultrasound normal, we will  
 3 arrange for a liver biopsy thereafter."  
 4 So we can see from that you're described as  
 5 unfortunately unclear as to the reason for your  
 6 attendance.

7 A. Mm.

8 Q. You are told that you have hepatitis C, but that you  
 9 were found to be positive in September of 2000.

10 A. Three years earlier.

11 Q. Was there any discussion with you at that first  
 12 appointment as to why you were only being informed of  
 13 this in 2003?

14 A. With it being such a long time ago, I can't really  
 15 remember -- recall why the reason for the time lapse as  
 16 such.  
 17 I do actually -- one thing I do probably recall at  
 18 the time, that the consultant mentioned that because it  
 19 being a slow acting thing, it's -- we don't have to kind  
 20 of catch things quickly. I think that was kind of his  
 21 reassurance, that okay, it's not too much of a bad thing  
 22 those years have passed as such. So I do remember that  
 23 being mentioned, trying to put my mind at rest, shall we  
 24 say, but didn't seem to as such.

25 Q. We'll just look also at the consultant's records of that

8

1 by your records is that all are of the view that the  
 2 cause of your hepatitis C are the transfusions you  
 3 received in late 1992 or 1993.

4 A. Correct, yes.

5 Q. No one suggested to you that there's anything about your  
 6 life or lifestyle that would lead to a view of a  
 7 different cause.

8 A. No, no.

9 Q. If we then have up on screen, please, 3023003, please,  
 10 Henry.  
 11 We can see this -- it's a letter of referral to  
 12 Professor Dusheiko at the Royal Free hospital. You were  
 13 referred there by the consultant you saw at Luton and  
 14 Dunstable after the clinic in which the news was broken  
 15 to you.

16 A. I was, yes.

17 Q. We can see what's said there:  
 18 "I wonder if you would be kind enough to see this  
 19 somewhat anxious 27-year-old who has recently been  
 20 diagnosed with hepatitis C related liver disease. He  
 21 was treated in the 1990s for ALL and had a bone marrow  
 22 transplant in 1993, when he obviously had a number of  
 23 blood products. He is well from that point of view now,  
 24 but the haematologist noted that he was hepatitis C  
 25 antibody positive."

9

1 Then it says this:

2 "In fact, they found this on a blood test from

3 three years ago, which only came to light this year.

4 [Mr AW] is rather upset that this has taken a long time

5 to discover."

6 Then there's references to liver function tests

7 showing a persistently raised ALT at 170, and a liver

8 biopsy showing features suggesting early cirrhosis.

9 Is it correct to say you were rather upset it had

10 taken three years to tell you of your results?

11 A. Yes, pretty much.

12 Q. Had you been aware in 2000 that you were even being

13 tested for hepatitis C?

14 A. Not in the slightest.

15 Q. Now, could we have up on screen, please, Henry, 3023006.

16 This is a letter from January 2003, and it may be

17 that this helps explain why a letter was then sent to

18 you inviting you to come in to see the clinic. It says:

19 "I wonder if you would see this 28-year-old

20 gentleman. He remains in remission from the leukemia,

21 but more recently I have noticed that his liver function

22 tests show a raised ALT."

23 Then it says:

24 "Looking back in his notes, he was hepatitis C

25 positive when checked in September 2000, when the first

11

1 have been between 2000 and 2003 to tell you of the

2 diagnosis earlier.

3 We'll start, please, Henry, with 3023008, which is

4 a later letter. It's dated March 2006, and it's sent

5 from a haematologist to the legal services department

6 within the trust. The context for that, I think, is you

7 approached solicitors and there was some consideration

8 being given to the possibility of bringing a claim.

9 A. Yes, yes.

10 Q. And we can see this:

11 "We cannot deny that the hepatitis C infection was

12 detected in September 2000 and [Mr AW] was not informed

13 of this result until April 2003."

14 Then it says this:

15 "However, this was at least in part due to his

16 failure to attend an outpatient appointment at the time

17 the result first came available and several appointments

18 before and after."

19 Then it goes on to say:

20 "When the oversight was recognised, you were

21 promptly informed and referred to the gastroenterology

22 clinic."

23 We'll look then at the previous years and see

24 whether what's said here could be correct.

25 Could we have, please, Henry, first of all --

10

1 abnormality in his liver function test was detected."

2 So it would appear that in early 2000, consultants

3 looked at your notes and picked up upon the 2000 record

4 in the context of considering abnormal liver function

5 tests.

6 A. Yes.

7 Q. Had you been told that there was anything abnormal about

8 your liver function tests prior to 2003?

9 A. Nothing at all. There was a point probably around about

10 the 2000 period, from memory, and the only thing that

11 was picked up at that point in time, which is quite

12 a common thing from the treatment, the blood transfusion

13 being given, the body and the liver stores too much

14 iron, so the iron levels were quite high and dangerously

15 high, I think, to a degree. The normal thing for that

16 procedure then is just to give blood.

17 So it was around 2000, would you say roughly? 2000,

18 2001 period. Where probably on a quarterly basis I'd

19 have to go in just to give blood and over time they

20 would check and just see to make sure those iron levels

21 had come down to sort of a normal level. So that was

22 something -- the only thing, shall we say, that around

23 that time I was given sort of notification of and some

24 action against those, but nothing else.

25 Q. We'll have a look and see what opportunities there might

12

1 SIR BRIAN LANGSTAFF: Just pausing there for a moment.

2 So far there have been two explanations for the

3 delay: one that it was -- I think that was 003 -- only

4 just come to light, when it appears it had been in the

5 records all the time; and this, that it was his fault

6 for not attending an outpatient appointment when it

7 might have been discussed. But it goes on to say that

8 when the oversight was recognised, he was referred to

9 the gastroenterology clinic.

10 I thought the inference from the documents you have

11 shown us a moment or two ago was that the reason for his

12 referral was because of his high liver enzymes.

13 MS RICHARDS: Yes, that appears to be what other letters

14 say.

15 SIR BRIAN LANGSTAFF: So this is a different view of what

16 took place.

17 MS RICHARDS: That would seem to be the case. We are

18 inviting the hospital to respond to Mr AW's statement in

19 this documentation.

20 SIR BRIAN LANGSTAFF: Yes, thank you.

21 MS RICHARDS: So, Henry, could we have 3023014.

22 We can see this is a letter from September 2000. It

23 says:

24 "Dr Rejman has asked me to write to you as we have

25 sent several appointments to you but you failed to

13

1 attend."  
 2 So there were non-attendances prior  
 3 to September 2000. This says:  
 4 "He would like you to have a further blood test and  
 5 I am therefore enclosing the necessary forms. Please  
 6 could you come to the pathology department to have these  
 7 tests done at your own convenience."  
 8 Then the second paragraph says:  
 9 "When we have the results of these tests, we will  
 10 write to you again. In the meantime, we will be sending  
 11 you an appointment for January 2001, which will be your  
 12 next review in the clinic."  
 13 So that's the invitation in September 2000 for you  
 14 to come and have blood tests. No explanation in the  
 15 letter as to what the blood tests were for.  
 16 A. No, nothing there at all, no.  
 17 Q. You did go in response to this letter to the pathology  
 18 department and you did have the blood tests?  
 19 A. Mm-hm, yes.  
 20 Q. This letter suggests that when they have the results,  
 21 they'll write to you again. Did you ever receive  
 22 a letter telling you the results of those September 2000  
 23 blood tests?  
 24 A. No.  
 25 Q. We'll look then at your next attendance, which was

15

1 your hepatitis C result.  
 2 A. Mm-hm, yes.  
 3 Q. If we just look at the record of the notes of the  
 4 attendance -- well, we'll look at two documents. We'll  
 5 look at a letter first of all to your GP following that  
 6 clinic. 3023013, please.  
 7 So we can see the haematologist writing to your GP.  
 8 Again, there's the reference to you having been lost to  
 9 follow-up, but that's all before September 2000.  
 10 Then it says you remain completely asymptomatic, you  
 11 have been completely well in the last year, weight is  
 12 stable, refers to examination, full blood count  
 13 completely normal, given you an annual follow-up. So no  
 14 reference to anything to do with hepatitis C blood  
 15 result, no reference to anything to do with abnormal  
 16 liver function tests.  
 17 A. No.  
 18 Q. If we look at the notes -- Henry, it's 3023017,  
 19 please -- we can see that the entry for  
 20 21 February 2001, they have your new address now, we see  
 21 halfway down the page, we can see you obviously attended  
 22 in February 2001, various matters there set out, but  
 23 nothing to do with hepatitis C.  
 24 A. Yes.  
 25 Q. That was February 2001.

14

1 in February 2001.  
 2 Could we please have, Henry, 3023009.  
 3 This is a later letter in the context of the  
 4 litigation, but it gives us some dates. It says:  
 5 "I first saw [Mr AW] on 21 February 2001. He had  
 6 missed a number of clinic appointments since  
 7 12 January 2000."  
 8 So, again, clinic appointments earlier.  
 9 A. Mm-hm.  
 10 Q. Before your blood test, not afterwards:  
 11 "He had come up for a blood test on  
 12 18 September 2000 but without actually being seen."  
 13 You haven't been invited to be seen, you've just  
 14 been invited to go to the pathology department for  
 15 a test.  
 16 A. A blood test, yes.  
 17 Q. Which is exactly what you did.  
 18 A. Yes.  
 19 Q. Then the doctor continues:  
 20 "When I saw him, I didn't appreciate the fact that  
 21 he had not been told his hepatitis C result previously."  
 22 Then refers to subsequent visits and rising ALT  
 23 liver enzyme levels.  
 24 So the doctor who saw you on 21 February says here  
 25 that that doctor did not appreciate you hadn't been told

16

1 You attended in fact again in October of that year,  
 2 October 2001. It's 3023012, please, Henry.  
 3 You had gone for a check-up on 15 October 2001 in  
 4 view of your previous history in relation to the  
 5 leukaemia and the bone marrow transplantation, and  
 6 you're seen in the haematology department. There's  
 7 a discussion of your leukaemia. No evidence of  
 8 recurrence and a normal blood picture.  
 9 Again, October 2001, you're seen again.  
 10 A. Yes.  
 11 Q. No one tells you anything about liver function results  
 12 or hepatitis C.  
 13 A. No, no.  
 14 Q. If we have 3023020, please, Henry.  
 15 We can see here in the first half of the page the  
 16 clinic notes for that attendance in October 2001.  
 17 Hepatitis C not referred to there.  
 18 So we've had February 2001, October 2001. We come  
 19 on to March 2002. Could we have, please, Henry,  
 20 3023011.  
 21 A. Yes.  
 22 Q. This is again a letter from the haematologist to your  
 23 GP. It refers to a clinic on 6 March 2002. So you've  
 24 attended, you've had your annual review in the  
 25 haematology clinic:

17

1 "He remains well and has been free of infections  
2 over the last one year."  
3 Refers to blood count, blood film, clinical  
4 examination, and that you're in complete remission.  
5 Next review will be in a year's time.  
6 If we look again at the clinic notes, 3023020, this  
7 time the bottom half of the page, we can see again that  
8 you've been seen there. These are the records that have  
9 been recorded by the doctor. A further opportunity to  
10 tell you of the blood result, the hepatitis C --  
11 A. Yes.  
12 Q. -- and nothing was said to you.  
13 A. **(Nodded assent)**  
14 Q. That was March of 2002. You were seen again in December  
15 of 2002. 3023010.  
16 We can see it's a letter of 21 December 2002. It  
17 refers to a clinic on 18 December, and we can see in the  
18 first sentence you've attended for your routine review  
19 earlier because you were starting a new job in the  
20 January and you wanted to get the appointment done.  
21 A. Yes.  
22 Q. We can see there set out you are described as clinically  
23 and symptomatically well with no clinical problems.  
24 There's a reference to haemoglobin and platelets, and  
25 a reference to discussions about the possibility of

19

1 It says:  
2 "Thank you for your memorandum dated  
3 9 September 2004. Your comments are noted."  
4 Pausing there, you've not seen, I think, a copy of  
5 that memorandum.  
6 A. No.  
7 Q. Then it refers to a potential claim against the hospital  
8 in respect of the failure to inform you of the result of  
9 the hepatitis C blood test.  
10 Then it says this:  
11 "It is pleasing to note that steps have been taken  
12 to improve the review and follow-up of the laboratory  
13 results."  
14 Has the hospital explained to you what steps have  
15 been taken to improve the review and follow-up of  
16 laboratory results or --  
17 A. No, this one is an interesting one. So in terms of my  
18 records, certain things you just -- glare and jump out  
19 at you, and this one in particular was interesting  
20 because obviously this memorandum must have some sort of  
21 information based on me, myself. So it would be helpful  
22 to kind of see what reference is actually made in this  
23 in terms of what was done to improve those steps.  
24 Q. I understand you would like to both see the memorandum  
25 and also know what had led to the identification of

18

1 starting a family.  
2 A. Yes.  
3 Q. If we go to the notes for that appointment -- we can see  
4 in the letter there's no reference to hepatitis C or  
5 liver function tests of any kind. But can we look at  
6 3023018, please, Henry.  
7 The notes show a different picture.  
8 18 December 2002, we have various things there set out.  
9 Starts new job in January, et cetera. All well, no  
10 problem, fertility discussed, see one year. Then  
11 someone's written -- we don't know whether it's the same  
12 date or a later date, the handwriting does look as  
13 though it might be different:  
14 "Hepatitis C positive September 2000. Rising ALT.  
15 Refer to hepatologist."  
16 Was that drawn to your attention in December 2002?  
17 A. No, not at all.  
18 Q. So nothing until that April 2003 appointment that we've  
19 looked at?  
20 A. Yes.  
21 Q. If we have one further document on screen, please,  
22 Henry. It's 3023019.  
23 This is a letter, again written perhaps in the  
24 context of the threat of a legal claim because it's from  
25 the hospital's litigation adviser to the haematologist.

20

1 a need to improve the review and follow-up of laboratory  
2 results.  
3 A. Very much so, yes.  
4 Q. Now, if we then go back to April 2003, when you were  
5 given the diagnosis of hepatitis C.  
6 You say in your statement that the constant thought  
7 you've had and have had since then and not been able to  
8 expel is about whether there are others in the same  
9 position as you. Could you elaborate upon that?  
10 A. Yes. So I think for me, for definite, it was having --  
11 a strange one, almost like fortunate to have been found  
12 and know I have that, and in my head I have this kind of  
13 image of all the times when I had the transfusions  
14 given, and there's potential that there was someone next  
15 to me in a hospital bed in a ward, someone had maybe  
16 some sort of bike accident, needed two or three pints of  
17 blood given to him, and that person -- same blood type,  
18 and then let's just say they go on, fit, healthy life,  
19 lifestyle, 10/15 years, nothing's wrong at all, and all  
20 of a sudden certain things start to change, they go to  
21 see the GP, the GP says, "Okay, maybe we need to do some  
22 tests on you", and that person, or persons, who knows,  
23 then has that terrible news and finds out they're  
24 15 years plus, whereas for me, for myself -- that for me  
25 didn't seem right. Could I actually just be that one

21

- 1 person? It just didn't seem right. And I had that  
 2 fear, is some -- are there other people in that same  
 3 boat that don't get to know, and I did? So, yeah.
- 4 Q. I want to ask you a little about the impact of the  
 5 diagnosis on you.  
 6 You describe in your statement how you became very  
 7 introverted, in a deep place.
- 8 A. Yes, yes. Probably just after my 30th birthday, and  
 9 I do remember at the time one vivid instance of going to  
 10 a certain friend's birthday party, and at the time I had  
 11 just started the treatment. Mentally, being in a social  
 12 environment did have an effect on me as a person.  
 13 Confidence, just being in a social environment with  
 14 other people, in a gathering area, did they -- I did  
 15 tell the close-knit friends that I had at the time.  
 16 I think some of those did understand and obviously knew  
 17 what happened to me ten years earlier, but I don't think  
 18 they fully understood what hep C was as a condition.  
 19 And I do remember in certain instances just from  
 20 a mental perspective it definitely changed me as  
 21 a person. The mental impact was hard.
- 22 Q. You said in your statement you didn't take  
 23 antidepressants, but in retrospect you've wondered  
 24 whether you should have done and that they might have  
 25 helped.

23

- 1 Q. Then in October 2003 you were seen at the Royal Free.  
 2 You were told your genotype, which was 3A.
- 3 A. Mm.
- 4 Q. It was recommended to you that you embark upon pegylated  
 5 interferon and Ribavirin.
- 6 A. Mm.
- 7 Q. You say in your statement that the potential  
 8 side-effects were spelt out to you by the doctor at the  
 9 Royal Free.
- 10 A. Yes, they did say that obviously there's a variety of  
 11 side-effects, and everyone is different in terms of how  
 12 those side-effects hit you as a person, so kind of, you  
 13 know, what was going to come. But, yeah, I had no idea  
 14 in terms of how it would affect me and obviously  
 15 everyone is different.
- 16 Q. You started the six-month course of treatment  
 17 in August 2004. How was that?
- 18 A. The -- to know -- it was going into the unknown again,  
 19 really. I suppose in some ways being of a -- wouldn't  
 20 say call it a benefit as such, but having the treatment  
 21 I had ten years prior, having to take more medication  
 22 for a prolonged period, how it's going to affect you as  
 23 a person, how it's going to affect the people around  
 24 you, having to inject yourself.  
 25 So, yeah, it's not just how it's going to affect

22

- 1 A. Yes. I think definitely from my side, having the  
 2 treatment I went through ten years prior and the drugs  
 3 you're given at the time, I suppose really for me,  
 4 knowing I had to take two sets of drugs for hep C, the  
 5 last thing I probably wanted was additional medication  
 6 on top of what I was having.  
 7 So me in my stubbornness, I guess, was just to go --  
 8 let's concentrate on this issue first as opposed to the  
 9 mental side of things, really. Obviously things have  
 10 changed a hell of a lot now, we're in a different world  
 11 when it comes to mental health and how it's perceived,  
 12 but for me my core focus was getting over the treatment  
 13 and getting through the treatment.
- 14 Q. Did you receive any offer of counselling or  
 15 psychological support?
- 16 A. Not from memory.
- 17 Q. Now, you physically had felt okay. You weren't, as far  
 18 as you know, experiencing any physical symptoms of  
 19 hepatitis C.
- 20 A. Absolutely not.
- 21 Q. But you were told that there were potentially signs of  
 22 moderate liver damage, and so you were referred, as  
 23 we've seen in the correspondence, to Dr Dusheiko. You  
 24 had your liver biopsy and ultrasound scan.  
 25 A. Yes.

24

- 1 you, but it's how it's going to affect the people around  
 2 you as well, and then the unknown, once you start taking  
 3 them, what sort of side-effects are going to come and be  
 4 seen. Obviously for me the side-effects did build and  
 5 they got to a point where I think, of the six-month  
 6 period, I had to stop the treatment probably five months  
 7 in.
- 8 Q. You've described in your statement physical symptoms;  
 9 loss of appetite, loss of weight, fluctuating thyroid  
 10 functions.
- 11 A. Yes.
- 12 Q. After about four months you felt so ill, you were having  
 13 severe palpitations.
- 14 A. I think the palpitations were the ones which were  
 15 probably the big thing, really, so it's not nice.
- 16 Q. That led to your decision to stop the treatment early.
- 17 A. Yes, through the -- through the consultant I was seeing  
 18 at the time at the hospital. The reaction my body had  
 19 given to the drugs, clearing the virus I think fairly  
 20 early on, they were confident in thinking really at that  
 21 point in time it would be a good point to stop rather  
 22 than going for the full six-month cycle.
- 23 Q. Your mum's provided a statement to the Inquiry, and she  
 24 talks about the psychological effects of the treatment  
 25 on you. She said it made you angry. You could fly off

25

1 the handle. We've heard descriptions of mood swings and  
 2 anger from a number of witnesses who have undergone this  
 3 particular course of treatment. She says you felt  
 4 unclear.

5 A. Yes, I think the uncleanness is probably that early kind  
 6 of -- the mental side of things, and as I mentioned that  
 7 scenario there of being out in a social environment, how  
 8 you're perceived, the paranoia was a big thing.

9 That's the vivid thing my mind, the paranoia, being  
 10 out and -- I think as well, it's -- since that point in  
 11 time there's only certain people that probably have kind  
 12 of known about the hepatitis C and I've actually told.  
 13 So it's not something that I've kind of divulged in --  
 14 only to certain people, really. It's sort of kept in --  
 15 even my friends probably at the time, if I was to --  
 16 they probably won't even know about -- I've mentioned to  
 17 one or two close friends about the Inquiry and  
 18 everything, but it's -- yeah, it's not something you --  
 19 I feel I can kind of talk about too much really.

20 Q. You were worried you might have infected your wife. You  
 21 hadn't, but it was a cause of concern.

22 A. Yes. That spun through my head, that moment of sitting  
 23 with the consultant and, "Do you know why you're here  
 24 for?" and that was very ... yeah. Just think straight  
 25 off the bat and -- yeah.

27

1 from the hospital where you had the treatment?"

2 And quizzically getting a call from the GP in the  
 3 evening randomly out of the blue was enough of a shock  
 4 anyway, so that started putting sort of questions in my  
 5 mind and the cogs start turning again saying, "Okay,  
 6 what's happened here?"

7 This was probably from a timing perspective, I would  
 8 say, probably six to three months prior to the Inquiry  
 9 starting, so that -- I probably put two and two together  
 10 potentially.

11 More recently I've had a few trips to the GP -- GP  
 12 surgery. I'm not tied into a dedicated GP there.  
 13 I tend to have two or three GPs which I kind of trust  
 14 in. One of these was a new gentleman, quite newish to  
 15 the surgery, and I went for different symptoms at the  
 16 time, and he was just looking through my notes and said,  
 17 "Regarding hepatitis C, when were you last tested?" And  
 18 I said, "Well, I haven't been tested", and he said,  
 19 "Okay, I think it might be just good for you potentially  
 20 just to have a random test just to make everything's  
 21 okay in that area". I was taken aback by that a little  
 22 bit, thinking, well, this was 15 years prior, could it  
 23 return? Can it return?

24 So I did have a blood test done and from that there  
 25 was nothing found. Obviously, the antibodies still

26

1 Q. You were worried about the strain that it would place on  
 2 your relationship with your wife.

3 A. Exactly, as well, so --

4 Q. We'll come on to your employment in a few minutes, but  
 5 you weren't during the treatment working, and your wife  
 6 ended up reducing her full-time employment to part-time  
 7 in order to assist you.

8 A. Yes.

9 Q. So it was financially hard.

10 A. Yes, it was. Yes.

11 Q. In mid-2005, following further blood tests, you were  
 12 told that you were clear of hepatitis C.

13 A. Yes.

14 Q. What follow-up in terms of monitoring of your liver have  
 15 you received since the hepatitis C treatment was  
 16 completed?

17 A. So from kind of being discharged off from the Royal  
 18 Free, from the treatment for the hep C, there was no  
 19 follow-up from beyond that point.

20 Up until recently, we're only talking in the last  
 21 sort of six months where I'd had two phone calls,  
 22 evening phone calls from my GP surgery. One was  
 23 an out-of-the-blue call, "Very quick question we just  
 24 need to ask you, were you ever informed or told or have  
 25 any evidence that you were fully cleared and discharged

28

1 remain in the system, but they did say, "Oh, we've found  
 2 raised levels in the liver", the ALTs I think it was, or  
 3 FTs, I'm not sure which one, but he said, "I need to  
 4 refer you to the gastroenterologist", and I thought,  
 5 "Okay, this path, where is this leading to?" So I had  
 6 to go and have an ultrasound.

7 The ultrasound was done probably talking three  
 8 months -- yeah, in the summer this year, so went to have  
 9 the ultrasound done, and then back to see the GP, and  
 10 the GP said, "Okay, we've noticed from the ultrasound  
 11 results that the liver is quite bright, it's quite  
 12 bright", so from that he said, "I need to get you  
 13 referred to the gastroenterologist."

14 So a few weeks after then I went to see the  
 15 gastroenterologist at the hospital. Again, that was  
 16 a kind of a moment thinking we're going into a situation  
 17 again where you're just going to be given that kind of  
 18 bombshell news.

19 So there was a little bit of apprehension, yeah,  
 20 yeah, what was going to be found, shall we say. The  
 21 good news really was reassured straight away that there  
 22 was no scarring found on the liver, so they said the  
 23 scarring -- there's no visible scarring there. The  
 24 brightness in the liver from the ultrasound probably  
 25 would be down to a number of different things, could be

29

- 1 down to cholesterol, which has happened, my cholesterol  
2 is slightly raised, it could be down to blood pressure,  
3 but it's more a case of a dietary change or just  
4 a health style change, really, so there's nothing there.  
5 She said, "I don't really need to see you for many  
6 follow-up from that side."  
7 But this is only really recently. We're talking the  
8 summer of this year.  
9 Q. So between 2005, after you'd cleared hepatitis C and  
10 you'd been told you cleared it --  
11 A. Yes.  
12 Q. -- from that point until 2019 --  
13 A. Correct, yes.  
14 Q. -- there was no follow-up in terms of liver.  
15 A. Like I said there, to have that kind of brought back  
16 into the foreground again, saying, okay, it -- yeah, it  
17 was -- definitely that kind of fear factor started to  
18 creep back in again, thinking, hang about, should I have  
19 not been every year in the same way as leukaemia, you're  
20 given a outpatient view of things, but, no, given  
21 nothing at all.  
22 Q. You and your wife had wanted to have children, but  
23 because of the cancer treatment you'd had, the treatment  
24 for your leukaemia, you had to go down a route of IVF.  
25 A. Correct, yes.

31

- 1 there, just seeing that was incredible.  
2 Q. You also saw or heard evidence given during the first  
3 week of the Inquiry hearings --  
4 A. Yes.  
5 Q. -- in which there was a witness who spoke about  
6 infection with hepatitis C, again through transfusions  
7 post the autumn of 1991.  
8 A. Yes, yes.  
9 Q. When you heard that evidence, you felt I think less  
10 alone in what you'd experienced.  
11 A. Yes. We just were sitting watching the News at 10.  
12 Probably first/second week of the trial. It was just  
13 the moment of ... just sort of blown away. It was  
14 a new -- for me, it was like, I knew I wasn't the only  
15 one. Yes.  
16 Q. What was the effect of the hepatitis C diagnosis and the  
17 treatment that you then had to go through on your wife,  
18 your partner, and on your parents?  
19 A. Yeah, I -- it's not something probably I've talked about  
20 enough with them, but I know that -- like I said before,  
21 it's not just you that are having to deal with it; you  
22 have that periphery around you that are having to see  
23 the effects it's having on them. Yeah.  
24 Q. We have a statement from your mum to the Inquiry as well  
25 in any event, which we've read.

30

- 1 Q. You needed to do that anyway, that wasn't due to  
2 hepatitis C. But your hepatitis C diagnosis did cause  
3 problems in terms of where you could have your IVF.  
4 A. It did, yes. So with the fact that the hepatitis C  
5 antibodies obviously were found in me, you're  
6 restricted. So the first thing we were kind of told was  
7 we can't freeze any embryos or -- from my side -- from  
8 us, essentially, there are only two clinics available  
9 for you in the UK that would actually allow you to go  
10 and have the IVF treatment, [redacted] ... Okay, it was  
11 two clinics, and Chelsea and Westminster was the one of  
12 choice we went with eventually. But, yes, having that  
13 kind of -- be told again, you are hitting another hurdle  
14 and it felt like, okay, what -- another kind of kick in  
15 the teeth that something you want to have and being  
16 restricted down to two clinics, or the other alternative  
17 would've -- alternative would've been obviously to seek  
18 further afield.  
19 Q. Your mum again in her statement explains how everything  
20 that you've described caused you to lose confidence and  
21 self-esteem. She says it wasn't really until you saw  
22 a Panorama programme in 2017 that you began to be able  
23 to speak a little more freely about what had happened.  
24 A. Yes. Just sitting watching that programme was -- not  
25 just probably me watching that, but many others out

32

- 1 A. Okay.  
2 Q. What happened in terms of your employment? You had been  
3 in work at the time of your diagnosis. What then  
4 happened?  
5 A. At the time I had started in the January of 2003 with  
6 an IT company at the time. It was my second job  
7 post-university. Probably from a company perspective  
8 very small. I probably was in probably not a fantastic  
9 company to be in at the time to be supportive, shall we  
10 say, of my scenario. I mean, since that point in time  
11 I've worked for a lot -- let's say bigger companies and  
12 companies that kind of can know and understand, and I've  
13 seen people in situations where they've been given  
14 support, time off, things like that. So I was in this  
15 small company and obviously I told them my situation,  
16 the diagnosis, and I wouldn't probably need time off  
17 work as such. It wasn't long after that I could see  
18 things changing, and I was put in a position where  
19 literally I was, shall we say, pushed out of the  
20 company. So they're talking -- only been there sort of  
21 five months at that point in time.  
22 So then knowing you're jobless and at the same time  
23 having to then deal with a condition -- about to have  
24 treatment for a condition as well, it's not a nice  
25 scenario to be in.

33

- 1 Q. You were worried that you would not be able to get  
2 further employment because you didn't know how you'd  
3 explain your 14 months out of work.
- 4 A. Yes, yes, that was the other thing I was thinking: okay  
5 well, at some point I need to get myself back into  
6 employment, how -- you are going to be looked at and  
7 say, "Okay, what's happened in this window? Why have  
8 you been out of work for that point in time?" If  
9 I mention the hepatitis C, how is that going to come  
10 down on a prospective employer? Does it make me  
11 employable still? So, yeah, that was a constant kind of  
12 worry in your head as well.
- 13 Q. You have happily been able to obtain subsequent  
14 employment.
- 15 A. Yes, I think the blessing for me was in February 2005  
16 I started again with a small IT company, but this one  
17 was a very, very good one, and there was no -- no  
18 look-back, shall we say, of my kind of history. And  
19 I've spent five and a half years at this company. It's  
20 probably the best company I've ever worked with.
- 21 Q. One of the other problems has been the effect on your  
22 ability to get life insurance.
- 23 A. Yes. That's been a challenging one. I think it's  
24 a combination of both, so with the leukaemia plus the  
25 hepatitis C, life insurance in the very early days of --

35

- 1 those who have contracted hepatitis C as a result of  
2 receiving blood or blood products from the NHS prior  
3 to September 1991 are eligible to apply. This is  
4 because the Skipton Fund was set up with a specific  
5 purpose of providing ex gratia support to those who were  
6 infected before blood donor screening tests were  
7 introduced.
- 8 "As [Mrs AW] suggested that her son was infected  
9 with hepatitis C during the course of his treatment for  
10 leukaemia from December 1992, he is over 15 months away  
11 from this point of eligibility."
- 12 And I understand you've since approached the EIBSS  
13 but had a similar response.
- 14 A. Yes, my mother's -- yeah, she's gone down that path, and  
15 from a timing perspective obviously post-1991.
- 16 Q. You've referred in your statement to a letter from  
17 a legal adviser representing the National Blood  
18 Authority. It's dated 8 July 2005. We don't have the  
19 letter at the moment, but you've quoted from it, and it  
20 says this:
- 21 "We understand from our client, the National Blood  
22 Authority, that the transfusion history indicates  
23 significant donor exposure. Unfortunately our client is  
24 unable to investigate all of these donations and such  
25 an investigation is in any event likely to produce

34

- 1 once we'd got our first house, a few years after,  
2 looking at insurance policies, you go through -- you get  
3 to -- asked the standard questions. When those  
4 questions get ticked, that's it, "Sorry, we can't take  
5 things further."
- 6 It's got to the point really that thinking after  
7 such a window things would be made easier, they haven't,  
8 so to the point now where I've -- I have got life cover,  
9 shall we say. It's kind of based on an American company  
10 that I've gone with, so it's not your standard -- yeah,  
11 it doesn't cover you for that kind of -- the illness  
12 side of things. So I have some cover as such, but --  
13 yeah, so that's been another challenging thing, ringing  
14 through. You can't -- again, you're sort of deemed as  
15 a second class citizen in some ways and there's that  
16 blocker there.
- 17 Q. You were not eligible for any payment from the  
18 Skipton Fund.
- 19 A. Correct.
- 20 Q. We can see a letter at -- it's a different reference,  
21 please, Henry, it's 2926003, and it's page 3, please.
- 22 We can see it's a letter written by the Department  
23 of Health, Jane Ellison, to your mum's MP, and it says:  
24 "I am sorry to read that [Mr AW] is not eligible for  
25 the Skipton Fund. As your constituent highlights, only

36

- 1 a definite conclusion."
- 2 You've said in your statement you think that's  
3 a typographical error in the letter.
- 4 A. Yes.
- 5 Q. It should be "unlikely to produce a definite  
6 conclusion."
- 7 So there has clearly been some contact -- I think it  
8 may have been through your mother -- with the legal  
9 adviser to the National Blood Authority back in 2005.
- 10 You're not aware of there having been, I think, any  
11 more recent contact with the transfusion service?
- 12 A. No.
- 13 Q. You say this, Mr AW, in your statement. You'd like to  
14 know if there's anyone else in your situation who is  
15 infected so late, post the 1991 screening, and you would  
16 like to know what happened and how it happened to you.
- 17 A. Yes.
- 18 Q. You pose this:
- 19 "Was it really just a freak accident and the blood  
20 donor just slipped through the net?"
- 21 A. Mm.
- 22 Q. Those are the questions I have for you. I am going to  
23 ask Mr Snowden if there's anything else he would like me  
24 to ask.
- 25 There's nothing further. Is there anything you

37

1 would like to say?  
 2 A. Just a thank you, really, to my family for their  
 3 support, their patience for me as a person.  
 4 Especially my mother. She's been fantastic in terms  
 5 of what she's done, taking things this far.  
 6 Obviously my wife as well and what she's had to go  
 7 through with myself.  
 8 Probably too -- probably this is a bit of a strange  
 9 one at the moment, for someone to thank MPs. I'm going  
 10 to thank two MPs. For Diana Johnson, what she's done.  
 11 She's been immense in what she's done to promote the  
 12 message of what's happened. And Andy Burnham as well.  
 13 So those two MPs, to thank them for their efforts in  
 14 taking things to where things have got to now.  
 15 MS RICHARDS: Thank you.  
 16 Sir Brian.  
 17 SIR BRIAN LANGSTAFF: What you've described to us is a sense  
 18 of anxiety, apprehension, which has been added to by  
 19 a sense of isolation until recently. You described  
 20 yourself at one stage almost as being paranoid.  
 21 We are very grateful that you've overcome those  
 22 feelings, and it can't have been easy to come here  
 23 today, even with the protection of anonymity, and tell  
 24 those who are here what you find difficult to tell some  
 25 of your friends.

39

1 In her case too I make the same type of order as  
 2 I made earlier, but let me read it out so that you all  
 3 hear it.  
 4 The name and address of the witness W0507 -- that's  
 5 Mrs AX to you and me -- the name of her late husband and  
 6 any other member of her family, and any other  
 7 identifying information, such as the witness's image or  
 8 a description of their appearance, cannot be disclosed  
 9 or published in any form, unless express permission is  
 10 given by me or by the solicitor to the inquiry acting on  
 11 my behalf.  
 12 Witness W0507 must be referred to only as "Mrs AX".  
 13 This order remains in force for the duration of the  
 14 Inquiry and at all times thereafter, unless otherwise  
 15 ordered, and I may vary or revoke the order by making  
 16 a further order during the course of the Inquiry.  
 17 As you know, there will be no live streaming, either  
 18 visually or orally.  
 19 With that protection, may we have Mrs AX, please.  
 20 **MRS AX (sworn)**  
 21 **Questioned by MS FRASER BUTLIN**  
 22 MS FRASER BUTLIN: Mrs AX, you are here to tell us about  
 23 your late husband, and you are going to refer to him by  
 24 his name, [redacted], because it's too hard not say his  
 25 name when we're talking about him, but just to make it

38

1 It's important to hear evidence like yours for all  
 2 sorts of reasons. Thank you very much.  
 3 A. Thank you.  
 4 (...Applause...)  
 5 SIR BRIAN LANGSTAFF: We'll take a break until 11.30.  
 6 MS RICHARDS: Sir, I should say that there will be no live  
 7 streaming of the next witness, who is also anonymous.  
 8 Her evidence will not be live streamed.  
 9 SIR BRIAN LANGSTAFF: So if anyone is watching remotely,  
 10 they should know that the next witnesses, the remaining  
 11 witnesses of the day --  
 12 MS RICHARDS: No, just the next witness.  
 13 SIR BRIAN LANGSTAFF: The next witness.  
 14 MS RICHARDS: Then the live stream will be on again this  
 15 afternoon.  
 16 SIR BRIAN LANGSTAFF: Yes, I was going to say the next  
 17 witness, after lunch, and the two witnesses after lunch,  
 18 will both be fully available on the stream, but not the  
 19 next.  
 20 11.30.  
 21 **(11.05 am)**  
 22 **(A short break)**  
 23 **(11.30 am)**  
 24 SIR BRIAN LANGSTAFF: Well, our next witness, as you already  
 25 know, is anonymous. She will be known as Mrs AX.

40

1 clear that his name is covered by the restriction order  
 2 and mustn't be used outside of this room.  
 3 You met in 1972. Can you tell us a little bit about  
 4 what your husband was like before he became unwell?  
 5 A. He was just a normal, hardworking man. He had his own  
 6 business. We had nice holidays. We were just a normal  
 7 couple.  
 8 Q. He loved to ski.  
 9 A. He loved to ski. We had lots and lots of skiing  
 10 holidays before he became ill, and summer holidays, and  
 11 we just had a nice lifestyle.  
 12 Q. In July 1985, his ankles started to become swollen and  
 13 he was tired all the time.  
 14 A. Yes.  
 15 Q. What did the doctors find that was the problem?  
 16 A. Well, the GP was -- she didn't know what the problem  
 17 was, so she referred him to the local hospital and they  
 18 did various blood tests, and eventually said that he had  
 19 glomerulonephritis.  
 20 Q. Which is a kidney condition?  
 21 A. A kidney condition, yes.  
 22 Q. He always had to clear his throat.  
 23 A. Yes, he always had -- not a sore throat, but he always  
 24 had this sort of **(Demonstrated)** whenever he was talking,  
 25 and he had had that from being a child. He'd had his

41

1 tonsils out but it didn't make a difference, but he'd  
 2 always had that and they said eventually that's where  
 3 the infection could've come from. It's like  
 4 a meningitis type infection.  
 5 Q. They thought he had had an untreated streptococcal  
 6 throat infection, which had then affected the kidney  
 7 function.  
 8 A. That's correct, yes.  
 9 Q. He started receiving steroid treatments, but after  
 10 a while that was deemed to be unsuccessful, and he was  
 11 started then on plasma exchange.  
 12 A. Yes.  
 13 Q. Can you tell us about that process?  
 14 A. What do you mean?  
 15 Q. What did [redacted] have to go and do?  
 16 A. Oh, it's a form of dialysis, but he just used to go to  
 17 the local renal unit once a fortnight and they would  
 18 draw off his old -- his plasma and give him new plasma  
 19 from a donor.  
 20 The old plasma then was drained off and that seemed  
 21 to work for a while, stopped the kidneys from failing,  
 22 you know. It was a gradual failure and it seemed to  
 23 slow things down a little bit.  
 24 Q. You have a particular recollection of what the new  
 25 plasma looked like.

43

1 A. Yes.  
 2 Q. And at that point he became more unwell, I think.  
 3 A. Yeah, yeah. And the consultant at the time said he  
 4 thought that he would need full-time haemodialysis.  
 5 Q. In your husband's medical records there's a laboratory  
 6 report from April 1993 that we're just going to put up  
 7 on the screen. It's a different witness number, Henry.  
 8 It's 3807003, please.  
 9 We can see in the bottom right-hand corner there the  
 10 date of report, 26 April 1993, and it indicates that he  
 11 was positive for hepatitis C.  
 12 Were you or your husband aware in 1993 that he had  
 13 tested positive for hepatitis C?  
 14 A. No.  
 15 Q. Now, in your statement you thought your husband had  
 16 discovered he was hepatitis C positive in about 1995,  
 17 but having looked at some records, you think it was  
 18 actually 1996.  
 19 A. Yes.  
 20 Q. Can you tell us about how you came to find out?  
 21 A. It was a routine renal appointment. We used to go every  
 22 three months because we were dialysing at home then, so  
 23 it was just a routine clinical appointment, and they did  
 24 routine bloods. We had the consultation and then he  
 25 said at the end, "Oh, we just need to take these

42

1 A. Yes, it looked like peach melba.  
 2 Q. And the new plasma had "Baxter" written on the bags.  
 3 A. I think it was "Baxter". You know, it's a long time  
 4 ago. I can't -- I remember it being in a clear -- it  
 5 was clear fluid in a bag that was fed through a dialysis  
 6 machine.  
 7 Q. The old stuff coming off looked like peach melba --  
 8 A. The old stuff coming off looked like peach melba.  
 9 Q. -- and the new was clear.  
 10 A. Yes.  
 11 Q. You said in your statement that you recall that "Baxter"  
 12 was written on those bags.  
 13 A. I think it was "Baxter", yeah.  
 14 Q. Your husband had that treatment every fortnight for  
 15 about 18 months?  
 16 A. Yes.  
 17 Q. But over time, as you say, his kidney function did  
 18 gradually decrease.  
 19 A. Yes, he carried on -- he was still running the business,  
 20 we were still having holidays, he kept filling up with  
 21 fluid obviously, but -- because his kidneys weren't  
 22 working properly.  
 23 So, yeah, for 18 months we just tried to carry on as  
 24 best we could, but then they started to fail.  
 25 Q. His kidney function went down to just below 20 per cent.

44

1 bloods", so he got the blood forms out and then he got  
 2 a category 3 risk sticker out of his drawer and stuck  
 3 that on and I asked him why he was doing that, and he  
 4 said, "Oh, I don't really know", and he sort of flicked  
 5 through the notes and said, "Oh, it looks like you've  
 6 got hepatitis C."  
 7 Q. Because at that point -- we won't explain your role --  
 8 you actually worked in the hospital, so you understood  
 9 what category 3 risk stickers were.  
 10 A. Yeah.  
 11 Q. We asked the doctor, Dr Throssell, to respond to your  
 12 statement, and he said he can't now recall specific  
 13 details of what you discussed at the appointment, but he  
 14 provided us with some of the medical records and we've  
 15 correlated them with those that you had.  
 16 A. Yeah.  
 17 Q. He noted the 1993 test results and he indicated that the  
 18 next note in the clinical records is the document  
 19 3807004.  
 20 We can see it's in different handwriting to the rest  
 21 of the page. It's dated 1 March 1996. It says:  
 22 "To discuss and counsel re hepatitis C positivity on  
 23 next attendance. Needs category 3 stickers on samples."  
 24 So it doesn't appear that this was a consultation in  
 25 March 1996, but that there was a note of the need for

45

1 those stickers that you recall.

2 A. Mm-hm.

3 Q. You've provided us with the medical records, and

4 Dr Throssell has obviously looked at them as well, and

5 there isn't anything else between the 1993 result and

6 this note in 1996 that has any reference to hepatitis C.

7 We then come to the next entry in the notes, which

8 is 10 April 1996. It is an entry made by Dr Throssell.

9 There is a general discussion about your husband's

10 condition, and if we go over the page, there is a single

11 line: "Counselled re hepatitis C."

12 That consultation was then followed with a letter to

13 the general practitioner, which we'll have a look at.

14 It's 3807005, please. We can see it's dated

15 12 April 1996.

16 There is general discussion about your husband's

17 renal failure and being on home haemodialysis, and then

18 in the very last paragraph -- thank you -- it simply

19 says:

20 "Routine screening has shown him to be hepatitis C

21 positive, and I explained the significance of this to

22 him today."

23 What do you recall of being told about hepatitis C

24 at that appointment?

25 A. Not a lot. It made it more difficult because I did know

47

1 a gastroenterologist --

2 A. Yes.

3 Q. -- that was the response that a doctor gave you.

4 A. Yeah, yeah.

5 Q. When your husband was referred to the

6 gastroenterologist, he had an ultrasound of his liver

7 and he was told there was no scarring to it. What's

8 your recollection of what happened in relation to having

9 a liver biopsy and the discussions around having

10 treatment for the hepatitis C at that point.

11 A. As I don't think he -- the way it was explained to us

12 was a liver biopsy would determine if there was any

13 damage to the liver, but it also came with

14 complications, and I think we decided at the time he'd

15 got enough going on, he'd got end stage renal failure

16 and everything else that goes with that, and it was just

17 something else that, you know, if it wasn't affecting

18 him and it wasn't making him ill, then we didn't want to

19 do it.

20 Q. Because you were also advised alongside that the

21 prospects of success of interferon treatment --

22 A. Were very low.

23 Q. -- were very low.

24 A. Yes.

25 Q. Your husband obviously had the renal failure, and he

46

1 a little bit about hepatitis C anyway through my job,

2 and although Dr Throssell was really nice, I don't think

3 he knew as much about it as I did, and he sort of

4 dismissed it as, you know, saying, "But there's nothing

5 for you to worry about". And that's when I questioned

6 him about whether or not he ought to see

7 a gastroenterologist, you know, to have his liver

8 checked, and he more or less said, "Well, you can if you

9 want, but I don't think it's going to be -- it's not

10 going to help you in any way, you're not going to die of

11 it", I think were his words. "Hepatitis C won't kill

12 you," he said, "it will be something else."

13 So we just waited then for the appointment to go and

14 see the gastroenterologist.

15 Q. In terms of that referral to the gastroenterologist,

16 Dr Throssell responded and said he thinks it may have

17 been in relation to an appointment you had a year later

18 with a different doctor.

19 A. Mm.

20 Q. You're not entirely sure whether it was Dr Throssell or

21 whether it was in fact a year later with a different

22 doctor.

23 A. I can't remember.

24 Q. What you do know is that at the appointment when you

25 raised the question of going to see

48

1 also then had to have his parathyroid removed. You've

2 wondered whether the hepatitis C exacerbated his

3 renal failure, but you're not very sure.

4 A. I don't know.

5 Q. But it is a concern you have.

6 A. Yes, yes.

7 Q. He also had to have a hip replacement.

8 A. Yes.

9 Q. Again, you've wondered whether the hepatitis C affected

10 his bone strength.

11 A. Yes.

12 Q. What particularly made you concerned about that?

13 A. Well, when he had the hip replacement, the surgeon told

14 us that when he went -- when he went in, he put his hand

15 in and the bone just disintegrated in his hand,

16 literally just disintegrated.

17 He made a good recovery, made a really good

18 recovery, but, you know, we -- I think we were a bit

19 shocked at the time as to how bad it was. We didn't --

20 I mean, he was in a lot of pain, he was in a wheelchair,

21 you know, he couldn't walk. So, you know, he needed to

22 have it done. But I don't think we realised at the time

23 the extent of the damage.

24 Q. Your question has arisen, you don't know, but was there

25 a link to it being particularly bad because of the

49

- 1 hepatitis C?
- 2 A. A link, yes, yes, that made it worse, yes, yes.
- 3 Q. You've said earlier in your evidence that when your
- 4 husband was having the dialysis and dealing with the
- 5 renal failure, he had carried on working.
- 6 A. Yes, he ran his own business.
- 7 Q. And life had carried on for the two of you.
- 8 A. Yes, yes.
- 9 Q. Can you tell us a little bit about the emotional effect
- 10 of the diagnosis of hepatitis C on your husband?
- 11 A. Well, it -- like I said before, it was just something
- 12 else to deal with at the time, you know, you -- with any
- 13 chronic illness, you -- it's not something -- it's not
- 14 going to get better, so you adjust your life around
- 15 that. And then when somebody else comes along and says,
- 16 "You've got this as well" -- I'm sorry ...
- 17 Q. [Redacted] changed as a person.
- 18 A. Massive change. Yeah. He was -- he was horrible to
- 19 live with. He was just like a different person. And
- 20 I think he felt that, you know, life had been so cruel,
- 21 and he just didn't deserve to have something else as
- 22 well, you know, with everything else that was going on.
- 23 Yeah, he changed a lot.
- 24 Q. He became more insular.
- 25 A. Very, yes. He never told anybody he'd got hepatitis C,

51

- 1 So we were isolated from all the other patients, and
- 2 sometimes in not a very nice area. You'd be pushed into
- 3 a little corner somewhere with the oldest machine, the
- 4 oldest chair, no TV, no contact with anybody else, and
- 5 just made to feel, you know, like you'd got some
- 6 contagious disease. It was awful.
- 7 Q. Sometimes your home dialysis machine would break.
- 8 A. Yes.
- 9 Q. You'd then have to go into the hospital in this country.
- 10 A. Yes, yes.
- 11 Q. And much the same thing happened.
- 12 A. Yeah, I mean the -- it was an isolated -- you were in
- 13 isolation again, and you're on dialysis 4 hours
- 14 45 minutes, three times a week. It's a hell of a long
- 15 time to sit there on your own, you know, with no --
- 16 I mean, I used to sit there with him, but, you know,
- 17 it's not -- just not -- it's not really nice to have to
- 18 do. And then if you're not feeling well anyway, you
- 19 know, the way that you're treated, because they need to
- 20 isolate you, you know, and everybody used to come in all
- 21 this protective gear, you know, and it was just awful.
- 22 Q. There was one particular occasion when you were going
- 23 down to the coast and wanted to be -- [redacted] would
- 24 obviously need to be dialysed down there. What
- 25 happened?

50

- 1 because at the time I think people thought -- they
- 2 associated it with HIV, and there was a lot of stigma,
- 3 you know, people thought they could catch it by being --
- 4 touching you or whatever. I mean, I knew different, but
- 5 other people didn't know. And so we just lived in our
- 6 own little world. Yeah, we just got on with it.
- 7 Q. Not even the rest of the family knew.
- 8 A. No.
- 9 Q. Nobody knew.
- 10 A. No. [Redacted] knew, but [redacted] is a nursing sister
- 11 that dealt with -- well, we've been friends 55 years.
- 12 So she's like my sister.
- 13 COMPANION: A big sister.
- 14 MS FRASER BUTLIN: And that feeling of isolation and of
- 15 stigma was made worse because of changes to how your
- 16 husband had his dialysis.
- 17 A. Yeah.
- 18 Q. Can you tell us --
- 19 A. Very much so.
- 20 Q. -- about that? What happened?
- 21 A. We -- for -- well, I dialysed him at home for 21 years,
- 22 and -- but when he started to deteriorate, we had to
- 23 attend the hospital renal unit. But when we'd gone
- 24 abroad on holiday, we obviously had to tell them that
- 25 he'd got hepatitis C.

52

- 1 A. He could only go two days without dialysis, so if we
- 2 were going for any longer than that, he had to dialyse
- 3 wherever we were, and his mum lived in Paignton at the
- 4 time, and he hadn't seen her for a while. We were in
- 5 Sheffield, so, you know, it's a long way. By the time
- 6 we got there he would've needed to dialyse.
- 7 So the renal unit in Sheffield contacted Exeter,
- 8 which was the nearest hospital, and said could they
- 9 dialyse them, and they said no, because of his
- 10 hepatitis C, they hadn't got -- they hadn't got the
- 11 facility -- they hadn't got a machine that they could
- 12 use.
- 13 So she came -- she -- I mean, I wish she hadn't have
- 14 done it, but the renal nurse that tried to fix it up
- 15 said that his -- [redacted]'s mother was dying, so he
- 16 needed -- that's why he needed the dialysis, and they
- 17 relented and they said they'd do it. But I didn't know
- 18 any of this and when I got there she said, "I'm so sorry
- 19 to hear about your mother-in-law", and I had no idea
- 20 what she was talking about. It was only when we got
- 21 back to Sheffield that she'd told me what she'd done.
- 22 She said, "If I hadn't have done that, they wouldn't
- 23 have dialysed you."
- 24 Q. Your husband was on the renal transplant list, but his
- 25 health continued to deteriorate.

53

- 1 A. Mm-hm.  
 2 Q. He took early retirement in 2001.  
 3 A. Yes.  
 4 Q. Then in 2006 you were told he had renal cancer.  
 5 A. Yes.  
 6 Q. What can you tell us about how he came to be diagnosed  
 7 with renal cancer?  
 8 A. He was getting short of breath, and they advised us to  
 9 see a consultant cardiologist. So they made the -- he  
 10 had various tests, appointments, and then we went back,  
 11 and I thought it was just a routine follow-up  
 12 appointment, and when we actually got into the  
 13 consultant's -- it was a consultant I'd never seen  
 14 before, it was the first time I'd met him, and he'd  
 15 never met [redacted] before, and he was just -- he was  
 16 just looking through his notes and said, "Well, I'm  
 17 sorry to say it looks like you've got renal cancer".  
 18 And we were absolutely flabbergasted. We'd got no idea.  
 19 Then of course everything gets set into motion about  
 20 surgery and to remove the kidney. I mean, up to that  
 21 point, he did have cysts on his kidneys, but they'd been  
 22 beneficial because, without getting too technical,  
 23 dialysis patients don't make erythropoietin, which is in  
 24 your blood, which keeps your haemoglobin high, stops you  
 25 feeling tired all the time, and his cysts were producing

55

- 1 Q. Because he had got some fluid on the lungs.  
 2 A. Got some fluid on his lungs, yes.  
 3 Q. So what happened in relation to that?  
 4 A. He was referred back to the Northern General and to  
 5 a cardiology lady, who they put a tube in his back and  
 6 drew off all this fluid. It was quite a lot of fluid,  
 7 apparently. And they said they would test the fluid  
 8 that they'd taken off and they would ring us. He was in  
 9 hospital for about three days or something.  
 10 And I can remember getting the phone call at home,  
 11 and this lady rang and said, "There's no cancer in the  
 12 lungs, you know, the fluid was clear". You know, it's  
 13 sort of good news and we thought -- we were sort of, "Oh  
 14 yay, at last some good news."  
 15 Q. So you went back to discuss the removal of the kidney.  
 16 A. Yes.  
 17 Q. And what happened between the August and the October?  
 18 A. I can't remember. Nothing happened, you know --  
 19 Q. You kept phoning.  
 20 A. I just kept phoning and saying, "Have we got a date for  
 21 the surgery? You know, when is it going to happen?"  
 22 And I kept getting fobbed off with, you know, "Oh,  
 23 there's problems with the theatre because of his hep C.  
 24 They can only do it either at the end of the day or" --  
 25 yeah, it was the end of the day, that's the only time

54

- 1 EPO on their own, so he didn't need to have it as  
 2 an injection. So they were a good thing.  
 3 But then one turns rogue or whatever it does, but  
 4 then they assured us, they said, "If you're going to get  
 5 it, it's the best cancer to get because it's isolated in  
 6 the kidney, it's not going anywhere", you know, so we  
 7 were a little bit reassured, you know. I mean, it's  
 8 still a devastating diagnosis.  
 9 But we just sort of said, well, we'll -- you know,  
 10 just go along with whatever they advise -- you know,  
 11 advising you to do.  
 12 Q. He was then referred to the oncology department to look  
 13 at surgery to remove the kidney.  
 14 A. Yes, correct.  
 15 Q. What were you told?  
 16 A. In --?  
 17 Q. What were you told originally about the removal of the  
 18 kidney?  
 19 A. That they would just take it out, you know, they would  
 20 remove the kidney, and then -- there was no mention of  
 21 chemotherapy or anything. That was it, really. They  
 22 just said they would remove it and dialysis would carry  
 23 on as normal.  
 24 Q. There were then some concerns about his lungs.  
 25 A. Yes.

56

- 1 they could do it and the theatres were full, and then  
 2 they were only available on certain days, and they had  
 3 to co-ordinate it with his dialysis, and -- you know, it  
 4 just seemed like it was just too much trouble.  
 5 Q. When your husband finally went back in in the October of  
 6 2006, what did they find in relation to the kidney?  
 7 What were you told?  
 8 A. That the cancer had spread, you know, and that it was  
 9 inoperable, and it had spread to his lungs. And we  
 10 said, "Well, you know, we've already been told that  
 11 there was no cancer there", so it's -- this must have  
 12 happened between being told there was no cancer to  
 13 waiting for the surgery.  
 14 Q. Within your husband's medical records there's quite  
 15 a lengthy letter explaining what was going on during  
 16 that time. We haven't got it up on the screen, but the  
 17 explanation in relation to the delay from mid-August  
 18 to October was:  
 19 "... a problem we have with organisation of lists  
 20 across the two hospitals and the need to access the  
 21 dialysis unit. There is quite a considerable  
 22 administrative problem organising and getting access to  
 23 the theatre lists."  
 24 There's no reference to hepatitis C being an issue  
 25 but you recall in your conversations that that was

57

1 a significant --

2 A. Absolutely.

3 Q. -- element of it.

4 A. Yeah, yeah.

5 Q. Your husband had been given some treatment to try and

6 slow the cancer down, but as you say, by the October it

7 had spread into the renal vein and into the lymph nodes.

8 A. Mm.

9 Q. It was also into the lungs.

10 A. Yes.

11 Q. Your husband remained on medication to try and slow the

12 course of the cancer, even though it was inoperable, but

13 he died on [redacted] 2008.

14 A. My birthday.

15 Q. You've said in your statement you had to stay strong

16 while your husband was alive and you were caring for

17 him, but that after he died you didn't want to see

18 anyone.

19 A. **(Indicated dissent)**

20 Q. And you stayed off work for three months and couldn't

21 face the world.

22 A. Except this one **(Indicates)**.

23 Q. We talked earlier that you didn't particularly want to

24 say any more than that, but then there were difficulties

25 as well with the undertakers, and you did ask me to read

59

1 A. No.

2 Q. In fact, you're not even particularly aware of who the

3 EIBSS is.

4 A. I didn't know it existed.

5 Q. Until I asked you whether you'd heard from them.

6 A. Yes.

7 Q. Mrs AX, that's all I have to ask you. Is there anything

8 else you would like to say?

9 A. No.

10 MS FRASER BUTLIN: Sir.

11 SIR BRIAN LANGSTAFF: It's really important that you've come

12 to give this very moving evidence, and one of the

13 features of giving evidence orally is it is not just

14 what is said, but how you say it. And sometimes what

15 isn't said, but how you say it nonetheless, tells you

16 everything you need to know which words couldn't convey.

17 In my view, that's what you've shown us today.

18 So thank you very much.

19 A. Thank you.

20 **(...Applause...)**

21 SIR BRIAN LANGSTAFF: We'll take a break. We'll take

22 a break until 1.20.

23 MS FRASER BUTLIN: Thank you, sir.

24 SIR BRIAN LANGSTAFF: 1.20.

25 **(12.05 pm)**

58

1 a couple of paragraphs from your statement about the

2 difficulties you had in relation to the funeral

3 arrangements. I'll do that now, okay?

4 "My husband's hepatitis C infection affected his

5 funeral arrangements. I have a good friend of more than

6 50 years who is a clinical nurse specialist and who

7 worked at the hospital and in the course of her job

8 dealt with death all the time. When my husband was

9 dying, she held his hand and tried to make his final

10 moments less traumatic. She also advised me not to go

11 to the funeral home because the undertakers would refuse

12 to prepare his body due to his hepatitis C infection.

13 "My husband always dressed very smartly and he had

14 several beautiful suits. I picked out a lovely suit for

15 him to wear, but the funeral home wouldn't allow them to

16 dress him, and he was cremated in his hospital gown,

17 with his suit laid on top of him."

18 That's something you found particularly upsetting.

19 A. Yes.

20 Q. The final part I wanted to ask you about.

21 You and your husband received one payment from the

22 Skipton Fund at some time between 2003 and 2007, but

23 since then you've heard nothing further from the

24 Skipton Fund, and nothing from the new scheme, the

25 EIBSS.

60

1 **(The short adjournment)**

2 **(1.20 pm)**

3 SIR BRIAN LANGSTAFF: Our next witness is David.

4 MS FRASER BUTLIN: That's correct, sir.

5 SIR BRIAN LANGSTAFF: David, please.

6 **DAVID RANKIN (sworn)**

7 **Questioned by MS FRASER BUTLIN**

8 MS FRASER BUTLIN: David, you have haemophilia A, and you

9 started bruising when you were very young. You had been

10 adopted, so there were concerns that your adoptive

11 parents were mistreating you.

12 A. That's correct.

13 Q. But then you were diagnosed with haemophilia by a family

14 friend, GP, who spotted the signs, and you were told

15 that it was severe initially.

16 A. Yes.

17 Q. But subsequently that was changed down to moderate.

18 A. Yes. In the 1970s, late 1970s, there was a re-diagnosis

19 from mild to moderate.

20 Q. While you were growing up as a child, what impact did

21 the haemophilia have on your life?

22 A. I was prevented from doing a lot of things. I was

23 encouraged not to do any activities that could potentially

24 cause me harm. The main impact would've been at school,

25 when I was prevented from any sort of physical activity.

61

1 So I believe teachers didn't want the responsibility of  
2 being in charge of me when an injury occurred.  
3 For instance, I was very keen to play football as  
4 a young lad, but prevented from doing so because of the  
5 risk of injury. However, I was given a linesman's kit  
6 and encouraged to run the line. Not the same thing. My  
7 hero was Gordon Banks and I wanted to be a goalkeeper.  
8 Q. You were initially treated with plasma, then with  
9 cryoprecipitate until about 1983.  
10 A. Yes.  
11 Q. We'll come to the 1983 point in just a moment.  
12 Your mum passed away about five years ago, but when  
13 she was still alive, she organised for your medical  
14 records to be obtained, and you had a chunk of them at  
15 that point.  
16 A. Yes.  
17 Q. Within those documents there was a document from 1969 .  
18 We're just going to have a look at that.  
19 It's 3742005, please, Henry.  
20 We can see that it's a letter to your family doctor  
21 at the time saying that you had received treatment with  
22 cryoprecipitate between August and September 1969 , and  
23 it indicates that:  
24 "This centre is taking part in a survey arranged by  
25 the MRC cryoprecipitate working party in order to

63

1 and grow up with other people, normal people, and whilst  
2 Treloar's offered the opportunity for excellent medical  
3 care, my parents felt that being in a school that was  
4 exclusively for people with medical conditions, that  
5 that possibly wasn't the best way forward for me.  
6 Q. With hindsight, you're very glad that you remained where  
7 you were.  
8 A. Indeed, the statistics for haemophiliacs from Treloar's  
9 do not make good reading.  
10 Q. We'll come back to that feeling of being very fortunate  
11 to be here in a moment.  
12 You wanted to join the RAF as you were growing up.  
13 A. I did.  
14 Q. You wanted to fly jets, so you tried to join the school  
15 Cadet Force.  
16 A. Yes.  
17 Q. And they declined.  
18 A. I went to Portsmouth Grammar School and they had  
19 a combined Cadet Force unit, and attendance was  
20 compulsory. You needed to do a minimum of a year,  
21 attend an annual camp and one weekend camp and complete  
22 a proficiency certificate, so initial training syllabus.  
23 I assumed I would be joining it, and when I was excluded  
24 I wanted to know why. They felt, again, that the risks  
25 involved in cadet training were not appropriate for

62

1 discover whether transfusion jaundice occurs in patients  
2 suffering from haemophilia or Christmas disease who have  
3 been treated with blood, plasma or plasma concentrates."  
4 The doctor is then asked to indicate whether or not  
5 jaundice had occurred following your treatment in August  
6 and September 1969.  
7 As far as you're aware, did your parents consent to  
8 being part of that study?  
9 A. I actually think this document came to light fairly  
10 recently as opposed to when my mother was trying to  
11 obtain records, because I'm sure she would've reacted  
12 somewhat differently to that, had she known about it.  
13 As far as I'm aware, my parents were not made aware  
14 of this study, and certainly I -- the first thing I knew  
15 was when this letter came to light fairly recently.  
16 Q. As you were growing up, there were discussions about you  
17 going to Treloar's, but your parents didn't want you to  
18 go there.  
19 A. No.  
20 Q. What was their thinking?  
21 A. When I was initially adopted and it was discovered that  
22 I had haemophilia, an offer was made to take me back and  
23 replace me with somebody else, and my parents fought to  
24 keep me, fortunately. So my parents always had this  
25 attitude that I should stay within mainstream education

64

1 somebody with haemophilia.  
2 I did not want to be excluded from the activities  
3 that my peer group were undertaking, and so, with my  
4 parents' support, I argued and eventually the school  
5 said "Okay, join the CCF", and I elected to join the RAF  
6 section of the CCF.  
7 Q. Your parents subsequently moved down to Cornwall and  
8 there you were able to join the local Cadet Force.  
9 A. Yes.  
10 Q. At 16 you applied to join the RAF itself.  
11 A. Yes.  
12 Q. What happened?  
13 A. So at that stage you could apply for a test in advance.  
14 So at 16 you could apply to the RAF, test in advance and  
15 they would test -- it was a short test, a weekend at  
16 Biggin Hill to test your aptitude for pilot and/or  
17 navigator. I applied and was accepted, and set off in  
18 the very early hours of the morning from Truro station,  
19 about 5.30 in the morning, I remember, to get to  
20 Biggin Hill in Kent. I arrived at Biggin Hill,  
21 presented myself to the guard room, and my name was not  
22 on the list. So I was quite insistent and I said I had  
23 travelled all the way from Cornwall, I had the letter  
24 with me that was the initial acceptance letter.  
25 So after a little bit of digging around, somebody

65

- 1 came to see me and said I wasn't on the list because  
 2 they had sent me another letter saying that in view of  
 3 the haemophilia, which I had declared, I would not be  
 4 suitable for service in the RAF. That letter had  
 5 obviously arrived after I left to get to Biggin Hill.  
 6 On the strength of me being quite keen and  
 7 insistent, they said, "Seeing as you're here, you might  
 8 as well undertake the testing."  
 9 Q. And you passed.  
 10 A. So the way it worked is at the end of the weekend, the  
 11 list was read out, first of all for pilot, then for  
 12 navigator, then for those who were lucky enough to pass  
 13 the aptitude test for both pilot and navigator. The  
 14 list was read out in alphabetical order, and first list  
 15 for pilot, my name was not on the list; for navigator,  
 16 my name was not on the list; for pilot and navigator, my  
 17 name was not on the list. So at that point I figured  
 18 I'd made a complete and utter fool of myself.  
 19 However, because I was not on the list, my name was  
 20 read out last, having passed both the aptitude test for  
 21 pilot and navigator.  
 22 Q. But subsequently the chief medical officer declined to  
 23 allow you to go forward because of the haemophilia.  
 24 A. So initially I received a letter saying, despite the  
 25 pass for the aptitude test, in view of my medical

67

- 1 Q. Your parents then moved away from Cornwall and you went  
 2 with them.  
 3 A. Yes.  
 4 Q. And ended up working in a bank in London.  
 5 A. Initially in Crawley, and then I got transferred to the  
 6 Haywards Heath branch, where I ran into a chap called  
 7 Dick Simmons, who subsequently became the training  
 8 manager for the area. He spotted something in me which  
 9 I hadn't spotted, and he got me a job or got me on  
 10 a training course for a role in London in the insolvency  
 11 and debt recovery office. So, yes, I ended up working  
 12 in King's Cross.  
 13 Q. That timeline of being in Cornwall, then moving on up  
 14 eventually to London helps you pinpoint the date on  
 15 which you received Factor VIII --  
 16 A. Yes.  
 17 Q. -- that you believe infected you with hepatitis C.  
 18 A. I'd been very fortunate in Cornwall. So from the tail  
 19 end of 1979 onwards, I hadn't received any treatment at  
 20 all, and then I joined the bank on 2 August 1983,  
 21 a Tuesday. The following Monday I was playing rounders  
 22 with the local Rotaract club on the beach near Trevoise  
 23 Head in Cornwall. I was second into bat, and the person  
 24 in front of me, rather than throwing the bat on the  
 25 floor, threw the bat over his shoulder. I hadn't

66

- 1 history, I was deemed permanently unfit for service.  
 2 I argued that such characters as Douglas Bader had  
 3 successfully flown with the RAF, despite being a double  
 4 amputee, and at the time -- I cannot remember the name  
 5 of the pilot, but somebody had undergone fairly major  
 6 heart surgery and had also continued to fly with the  
 7 RAF.  
 8 So eventually I was invited for an interview with  
 9 the chief medical officer at Goodge Street in London.  
 10 I argued my case, he argued -- not his case, but the  
 11 case on behalf of the accountants, who didn't want to  
 12 run the risk of training me, only for me to be run over  
 13 outside the base and be unable to fulfil my duties.  
 14 After a lot of toing and froing, he did offer me  
 15 a desk job, which I, in the pride of a teenager,  
 16 declined, rather foolishly. I subsequently realised  
 17 that if I'd taken the desk job, I probably could've  
 18 transferred over into a flying role at a later date.  
 19 Q. That meant you had to decide on something you've  
 20 described as your plan B for your career.  
 21 A. Plan B had already been initiated. The process of  
 22 arguing with the RAF took some six years, so I didn't  
 23 really give up arguing until I was 21/22. In the  
 24 meantime, I had elected to find a job, and I found a job  
 25 with National Westminster Bank.

68

- 1 anticipated that, and it hit me in the face, cracking my  
 2 nose, my cheek and blacking my eye.  
 3 So I ended up at Treliiske Hospital in Cornwall, just  
 4 outside Truro, with a half-open packet of peas clutched  
 5 to my face, hoping that they'd have a look at it and  
 6 sort it out for me.  
 7 Q. That was August 1983.  
 8 A. It was, it was August 1983.  
 9 Q. At that point when you went in, you received Factor VIII  
 10 products.  
 11 A. Yes.  
 12 Q. You believe that they weren't necessary on that  
 13 occasion. Can you tell us why you think that?  
 14 A. The swelling was no longer increasing. The bat had  
 15 walloped me. I hadn't lost consciousness. It had -- it  
 16 had broken the joint between the cartilage and the bone,  
 17 but it wasn't to my mind a severe injury. Yes, looking  
 18 back at it today, it was a head injury of sorts. But as  
 19 I say, I wasn't suffering from any nausea, the bleed  
 20 seemed to be under control, it seemed to be sorting  
 21 itself out, and I would've preferred to have waited 24,  
 22 48 hours. My usual MO for bleeds was I would clot and  
 23 either it would hold or it wouldn't hold. So subsequent  
 24 to this I'd often leave things for 24 hours before doing  
 25 anything about it.

69

- 1 Q. When you received the Factor VIII, were you warned of  
2 any risks involved in receiving it?
- 3 A. I had no recollection of being told that there was  
4 a risk with the treatment, and I have had this  
5 conversation subsequently with my parents and neither of  
6 them remember it being mentioned at the time, because  
7 although I was over 18, my mother was accompanying me  
8 because obviously I wasn't fit to drive myself to the  
9 hospital, so she had driven me.
- 10 Q. You've tried to obtain your medical records from  
11 Treliske Hospital, but you were told they've been  
12 destroyed.
- 13 A. My mother did that on my behalf. So when I started to  
14 become ill in the mid-1990s, I deteriorated slowly, but  
15 mentally a little bit quicker than physically, and my  
16 mother took it upon herself, as was in her character, to  
17 try to find my medical records to pinpoint when this  
18 infection must have happened.
- 19 She was told by Treliske Hospital that my records  
20 were no longer available and that they had been  
21 destroyed. She did enquire whether they had any records  
22 of the treatment that they'd used and what they'd had  
23 and what they'd done with it, and they said no, they  
24 didn't have those records either.
- 25 Q. Subsequently there is an entry in your UKHCDO record --

71

- 1 recollection is that there was an issue with it.
- 2 Q. In 1990, you were working in London and went for  
3 a routine check-up at the Haemophilia Centre.
- 4 A. Yes.
- 5 Q. You received a phone call a few days later.  
6 Can you tell us what was discussed on that phone  
7 call?
- 8 A. So I can't remember the day but, yes, I'd been in for  
9 a blood test, and they telephoned me and asked -- they  
10 said they'd got some interesting results and they wanted  
11 to enquire whether I had been drinking the night before.  
12 I said yes, there had been somebody's leaving do and  
13 I had three or four pints, and they said, "Oh, okay,  
14 that possibly explains the results that we've got."  
15 I enquired what that was and they said, "Some of  
16 your liver function enzymes are elevated", and that was  
17 the end of the conversation. I was reassured by the  
18 fact that they thought it was possibly down to having  
19 a couple of beers.
- 20 Q. From then until your diagnosis, was there any follow-up  
21 of those blood tests that you are aware of?
- 22 A. Not that I recollect at the time. I know from  
23 subsequent conversations that in addition to the blood  
24 tests, they were also testing for at least HIV, and  
25 I think subsequently they did mention they were looking

70

- 1 A. Yes.
- 2 Q. -- of the treatment.
- 3 A. Yes.
- 4 Q. Did you ever receive Factor VIII again after that  
5 incident as far as you know?
- 6 A. I think possibly I did. I'm not certain. The next time  
7 I can recall receiving treatment will have been when I'd  
8 moved back to the south-east and was registered with  
9 St Thomas', and the first time I can recall requiring  
10 treatment, expecting to get Factor VIII, I was offered  
11 either DDAVP or tranexamic acid, which surprised me  
12 until I was told that they thought they had some issues  
13 with Factor VIII.
- 14 Q. So you'd gone in expecting Factor VIII at that point.
- 15 A. Yes.
- 16 Q. You were offered something different, and what exactly  
17 did you say and what did they say?
- 18 A. I was suffering from nosebleeds and I was expecting to  
19 be treated with Factor VIII, and St Thomas' said, "No,  
20 we'd rather go down the route of trying these  
21 alternatives". And in the end, for that injury, my nose  
22 was cauterised.
- 23 Q. Did they say specifically what they were concerned about  
24 in the Factor VIII?
- 25 A. I cannot recall that. All I know is that my

72

- 1 for non-hep A, non-hep B as well.
- 2 Q. But as far as you're concerned, at the time, between  
3 1990 until you were diagnosed, there weren't regular  
4 checks of your liver function tests that you knew about?
- 5 A. No, not that I knew about.
- 6 Q. You then moved north because you received a promotion.
- 7 A. Yes.
- 8 Q. And in 1992, you started to struggle at work. What was  
9 happening?
- 10 A. Unfortunately I've not been able to obtain my sickness  
11 record card, but I can visualise it and the entries were  
12 regular for flu-like symptoms. So I would ring up and  
13 say, "Look, I'm sorry, I'm unwell and it's flu."  
14 These flu occurrences were happening more and more  
15 regularly, and I didn't think an awful lot about it, but  
16 some of my colleagues sort of said, "You don't seem  
17 yourself, you don't seem to have the same amount of  
18 energy, the same vitality". And so it wasn't a huge  
19 surprise when the diagnosis was eventually given that  
20 I had hepatitis C.
- 21 Q. With your move north, your treatment transferred to  
22 Birmingham.
- 23 A. Yes.
- 24 Q. And you were asked to have blood tests.
- 25 A. Yes.

73

- 1 Q. What happened after that?
- 2 A. So I received a phone call saying that they'd like me to
- 3 come in as a result of the blood test. So I attended
- 4 the hospital. I wasn't able to see the person in
- 5 charge, Jonathan Wilde. A junior doctor spoke to me in
- 6 a corridor and delivered the death sentence that I had
- 7 hepatitis C. He went on to say that he felt it was as
- 8 a result of my lifestyle choices and that was pretty
- 9 much the tail end of the conversation. I was left to
- 10 drive myself back from Birmingham to [redacted].
- 11 Q. That news was delivered in the corridor.
- 12 A. In a corridor.
- 13 Q. With other patients around?
- 14 A. And people walking past, yes.
- 15 Q. After you had driven home, you then subsequently met
- 16 with Dr Wilde, Jonathan Wilde, and what did he say to
- 17 you?
- 18 A. So he apologised for the way the news had been
- 19 delivered. He was very sincere in his apology. He went
- 20 on to say that it was his choice to let patients know,
- 21 his patients know, that they had hepatitis C, and that
- 22 other clinics and other trusts were not telling their
- 23 patients because they had nothing to offer them in the
- 24 way of treatment.
- 25 He went on to say that he didn't have anything to

75

- 1 "We are setting up a joint clinic with the liver
- 2 doctors so we can discuss hepatitis C infection with you
- 3 further and, with your agreement, take the opportunity
- 4 to perform the new blood test to establish the situation
- 5 for you."
- 6 SIR BRIAN LANGSTAFF: And the new blood test is that
- 7 referred to in the last sentence of the first paragraph?
- 8 MS FRASER BUTLIN: It is, apologies, sir. Yes, exactly.
- 9 SIR BRIAN LANGSTAFF: Thank you.
- 10 MS FRASER BUTLIN: You attended for that blood test.
- 11 A. Yes.
- 12 Q. And you were confirmed to be PCR positive.
- 13 A. Yes.
- 14 Q. You didn't start treatment at that point, but treatment
- 15 came later.
- 16 A. My recollection is that it was still very much a trial.
- 17 So it was a fight to get on that trial. My viral load
- 18 at the time indicated that the trial would potentially
- 19 not be successful, and obviously the trial was
- 20 expensive, so there was a struggle to get me on that
- 21 trial with interferon.
- 22 Q. But at around this time, you decided to resign from the
- 23 Cadet Force that you'd been part of all of those years.
- 24 A. That was actually a little later than this.
- 25 Q. Ah, apologies. Sorry, your statement had -- can you

74

- 1 offer, but there was a hope that there might be
- 2 something available in the future, and as soon as there
- 3 was, he would let me know.
- 4 Q. You've recorded in your statement that he said that he
- 5 felt compelled to share the information with patients.
- 6 A. He felt it was important that his patients, that all
- 7 patients, should know the conditions that they were
- 8 suffering from in order that they could make either
- 9 arrangements or changes in their lifestyle accordingly.
- 10 Q. You received a letter following up from that discussion
- 11 with Jonathan Wilde. We're just going to look at it.
- 12 It's 0357002, please.
- 13 We can see the letter in the middle saying:
- 14 "We are currently reviewing all our patients who
- 15 have received coagulation factor concentrates in the
- 16 past to see whether they have evidence of chronic
- 17 inflammation of the liver caused by the hepatitis C
- 18 virus. It is well recognised that prior to heat
- 19 treatment of concentrates hepatitis C virus was very
- 20 readily transmitted in factor concentrates. In some
- 21 individuals, the virus settles in the liver and causes
- 22 chronic inflammation. It has recently been shown that
- 23 the drug interferon can eradicate the virus in some
- 24 people."
- 25 Then it goes on at the end to indicate:

76

- 1 tell us when you did resign from it, was it after
- 2 treatment?
- 3 A. Once I moved back to Sussex in early 2000 -- I believe
- 4 2002/2003 springs to mind. I'd have to find my
- 5 resignation letter.
- 6 Q. So we'll come back to that.
- 7 A. Yes.
- 8 Q. But in 1996, you became unwell, and then did start
- 9 treatment, and you went on interferon and Ribavirin.
- 10 A. Yes.
- 11 Q. What was that like?
- 12 A. Not enjoyable at all. The Ribavirin was supposed to
- 13 attenuate some of the side-effects of the interferon,
- 14 not too successfully. The main side-effects of
- 15 interferon are mood swings, violent mood swings. You
- 16 know it's going to happen, but there is absolutely
- 17 nothing you can do about it. Additionally, night
- 18 sweats, increased flu-like symptoms. It's not a nice
- 19 process at all.
- 20 Q. By then you were married.
- 21 A. Yes.
- 22 Q. And you've said you were surprised that your wife put up
- 23 with you at that point.
- 24 A. My then wife had previously been out with a haemophiliac
- 25 who tragically died, so she was aware of some of the

77

1 things with haemophilia. We had the discussion before  
 2 we were married. After my diagnosis, we had a further  
 3 discussion, and at all stages up to the point we  
 4 actually got married, I said to her, "If you want to  
 5 back out of this, I will understand entirely". And she  
 6 chose not to.

7 Q. You've described in your statement that you were a very  
 8 difficult person to live with during that time.

9 A. I didn't like living with me and I can't imagine that  
 10 anybody else would've found it in any way an enjoyable  
 11 experience.

12 Q. You continued to work during the treatment.

13 A. Yes.

14 Q. But a senior manager at work tried to remove you.

15 A. My immediate line manager had noticed difficulties, and  
 16 I had mentioned to him what was going on and he was  
 17 extremely sympathetic. I was then approached by the  
 18 clerk to this senior manager, and the clerk said that  
 19 this senior manager wished to interview me. He then  
 20 went on -- we had worked together, this clerk and I, and  
 21 he went on to say a warning, more than anything else,  
 22 that he felt that she intended to use the interview as  
 23 a means of dismissing me, or perhaps start the process  
 24 of dismissal.

25 So forewarned, I went into the interview.

79

1 your medical team, I'll do that and I'll keep in contact  
 2 with you and let you know what the decision was."

3 And the decision was very favourable. NatWest was  
 4 a fantastic employer. It was a case of, "No, no, we  
 5 understand entirely, most unfortunate set of  
 6 circumstances, we'd like you to retire early through  
 7 ill-health. We'll increase your service from 14 years  
 8 to 20 years for pension purposes. You may draw down  
 9 your pension immediately, and whilst you continue to  
 10 live, you will have full staff benefits."

11 I did take the precaution of showing this offer to  
 12 the union, and the union said, "It's the best offer  
 13 we've ever seen, you should rip their arm off at the  
 14 shoulder". So I was very, very grateful to both the  
 15 bank's doctor and the senior management at NatWest.

16 Q. In terms of that first round of treatment, it was  
 17 unsuccessful.

18 A. Yes.

19 Q. How were you told about that?

20 A. Essentially, it was a phone call to say, been  
 21 unsuccessful, no, they were taking me off the trial, so  
 22 that was it. A little bit of hope disappeared.

23 Q. What was your health like when you finished that  
 24 treatment?

25 A. I think anybody whose had hepatitis C, it is -- it's

78

1 A statement had been prepared for me and the interview  
 2 was along the lines that I must know that my performance  
 3 was not of a standard that was acceptable, and that  
 4 therefore I should sign this witness statement to that  
 5 effect, and that would then be the mainstay of the  
 6 dismissal process. I declined to sign that statement.  
 7 I felt it was inequitable and unfair and incorrect.

8 This senior manager wasn't particularly happy about  
 9 that, but there was very little that she could do about  
 10 it at that point.

11 Q. Then what happened in relation to work?

12 A. My line manager suggested that the health -- the  
 13 occupational health nurse, who was due to visit anyway,  
 14 should speak to me. I spoke to the occupational health  
 15 nurse. She was most sympathetic and she said, "Go and  
 16 pack up what you got from your desk and go home".  
 17 I said, "What do you mean?" She said, "Go home. We'll  
 18 take it from here. You will be paid sick for a minimum  
 19 of six months. If I can organise it, it will be a year.  
 20 During that period of time, we'll refer all of this to  
 21 the bank doctor. He may wish to see you, he may not,  
 22 and a decision will be taken."

23 The bank doctor was most sympathetic. He phoned me  
 24 up and said, "Look, there's no need to drag you all the  
 25 way down to London. If you're happy for me to speak to

80

1 described as flu-like symptoms. Severe malaise. You  
 2 don't want to do anything, you'd much rather stay in  
 3 bed. You can have brief bursts of activity, but it's  
 4 a general deterioration in both physical health and  
 5 consequently mental health. I certainly became  
 6 extremely lethargic, tendency to become melancholy or  
 7 depressed, and uncommunicative.

8 Q. And in 2001, your marriage broke down.

9 A. Yes.

10 Q. Partly because of the strain of her working all day, you  
 11 being retired, and all the mental effects that you were  
 12 suffering from.

13 A. You know, I understand entirely, it must be extremely  
 14 difficult to work all day to support somebody who  
 15 initially -- you got married, we're going to support  
 16 each other. To leave the house with this person still  
 17 in bed being miserable, come home perhaps to find them  
 18 in the armchair, sat in front of the TV having done  
 19 nothing all day in the way of housework, contributing to  
 20 the household. I was offering absolutely nothing and,  
 21 yeah, it took its toll. I do not blame her, and  
 22 hopefully she doesn't blame me too much either.

23 Q. One sadness from that time is the fact that you never  
 24 had children.

25 A. The period of time this happened was absolutely the

81

- 1 sweet spot for most couples to start a family, and that  
2 didn't happen for us, which is possibly fortunate, the  
3 difficulties with being ill, and also the awareness that  
4 I might not be around to father any children for very  
5 long was very much in the forefront of both of our  
6 minds.
- 7 Q. You've described that between 2003 and 2005, you became  
8 very insular.
- 9 A. Yes.
- 10 Q. Do you want to tell us anything else about that period  
11 of time in your life?
- 12 A. It's -- the slippery slope is one that you don't  
13 perceive at all when you're at the top of it. It's only  
14 really when you're well and truly going down that slope  
15 and you start to realise that, having had quite  
16 an active social life, various hobbies and activities,  
17 friends, parties, meals out, et cetera, et cetera, it  
18 just dawns on you that suddenly, through no fault of  
19 anybody else's but your own, you're sitting there on  
20 your own, hoping that nobody comes and knocks on the  
21 front door, not answering the phone, and just building  
22 a wall, is how I would describe it, and hoping to hide  
23 behind that wall until it all goes away or it's all  
24 over.
- 25 Q. One of the activities you had withdrawn from was the

83

- 1 where it was, it was just about all over, and so once we  
2 were due to come home, I was not in a fit state to  
3 drive. So I said to my friend, "I'm afraid you're going  
4 to have to drive home", and it was an agonising trip  
5 home for me.
- 6 Shortly after we got back I realised that things  
7 were not getting better, so the next thing was  
8 an ambulance trip from my house to St Thomas'.
- 9 Q. And then subsequently you were moved from St Thomas' up  
10 to Addenbrooke's.
- 11 A. My recollection is there was some -- dispute is the  
12 wrong term. My mother wanted me to go to Addenbrooke's.  
13 I'd already been to Addenbrooke's for my assessment  
14 prior to transplant, and my mother felt that this was --  
15 I needed to be in Addenbrooke's. St Thomas' didn't  
16 think I was stable enough to transfer. But eventually  
17 the point came when both hospitals agreed that that was  
18 the way forward, so it was a trip from St Thomas' to  
19 Addenbrooke's.
- 20 In the meantime, my reaction to the painkillers,  
21 mainly morphine, was that I'd become delusional,  
22 I think, certainly was having some very spectacular  
23 hallucinations. I've got -- I have got some relatively  
24 clear memories of that time, but they are pretty  
25 haphazard.

82

- 1 Cadet Force.
- 2 A. Yes.
- 3 Q. Why had you stopped doing that?
- 4 A. It was an activity -- I'd got so much out of cadets as  
5 a young lad, I wanted to pay that debt back, and  
6 I continued to try and do so until I realised that  
7 I really wasn't doing the things that I should be doing.  
8 I was now no longer physically capable of doing those  
9 things. So, with much regret, I offered my resignation.  
10 I felt it was no longer fair to the young people.  
11 I couldn't do what I was supposed to do.
- 12 Q. In 2005, you went with some friends down to watch the  
13 24-hour Le Mans.
- 14 A. I did.
- 15 Q. On the second day, you became unwell.
- 16 A. I had usual flu-like symptoms on the way down. I drove  
17 my car on the way down there, and the -- we would go  
18 down several days before the race started, set up camp,  
19 a large marquee tent, lots of individual sleeping tents.  
20 We went to collect some firewood and I was feeling more  
21 and more unwell, letting other people do most of the  
22 donkey work, and then I just took to my bed, and that  
23 was it. I never did get to see any of the race.  
24 I heard it, but I didn't get to see any of the racing.  
25 I was in more and more pain. Not entirely sure

84

- 1 Q. Looking back, sometimes you're not entirely sure what  
2 was really going on and what were the hallucinations and  
3 the paranoia that you were feeling.
- 4 A. Certainly. I do know that I had already had the  
5 diagnosis of hepatic encephalitis, so that would have  
6 contributed to it, plus also large amounts of morphine.
- 7 Q. You stabilised and were allowed to go back to your  
8 parents' house.
- 9 A. Addenbrooke's got me stable and they said, "Look, you  
10 can wait here for a liver, but it's probably going to be  
11 better for you if you're in a more familiar and friendly  
12 environment". So I went back to -- rather than going  
13 back to my house, because I wasn't fit to look after  
14 myself, I went to wait at my parents' house, mainly  
15 bedridden.
- 16 Q. You were waiting for a call to say there was a suitable  
17 liver --
- 18 A. Yes.
- 19 Q. -- transplant.
- 20 A. The process had been explained to me quite clearly, that  
21 when a suitable liver -- I was fairly close to the top  
22 of the list at this stage, and as soon as a suitable  
23 liver -- for those who don't know, it's basically blood  
24 type for liver transplants, so as soon as an O positive  
25 liver became available, they would give me a call and

85

1 I would get myself up to Addenbrooke's, my dad would  
 2 drive me up to Addenbrooke's, and then we'd go through  
 3 the pre-operation process in preparation for a liver.  
 4 And that's indeed what happened. We got a phone  
 5 call. We did get told to treat it as a dry run because  
 6 they weren't certain whether that liver would be in  
 7 a fit state to transplant by the time we got the liver  
 8 and me up to Addenbrooke's. I don't recall being told  
 9 where the liver was coming from but they did say it  
 10 wasn't sourced in-house.  
 11 I got to the hospital and they said, "Look,  
 12 time-wise, it's still within the time frame, so we're  
 13 going to go for it, with your consent". At that stage,  
 14 it's not a case of consent; it's the only choice you've  
 15 got. So prepared for the operation, told to get  
 16 a little bit of sleep while they did the work, went  
 17 down, premeds, lights out, and the next thing I knew  
 18 I was coming round in the recovery room.  
 19 Q. Initially it seemed like everything had gone fairly  
 20 well, but after 48 hours you deteriorated.  
 21 A. Initial sense of absolute euphoria. I'm alive. All is  
 22 good. And that was pretty much -- I was very weak.  
 23 It's a huge operation, two surgeons having their hands  
 24 inside you; one doing the removal, one putting the other  
 25 one back in. I wasn't really aware of anything other

87

1 nursing staff and they all looked very surprised to see  
 2 me. No breakfast had been ordered for me, and  
 3 subsequently the medical team did say they had not  
 4 expected me to make that Sunday.  
 5 Q. You had a second transplant --  
 6 A. Indeed.  
 7 Q. -- at the beginning of December 2005. What can you tell  
 8 us about that?  
 9 A. I was incredibly weak by that stage. It was very touch  
 10 and go as to whether it was a waste of everybody's time.  
 11 But we did go ahead with it, and that liver had actually  
 12 been sourced in-house, so Addenbrooke's were very  
 13 confident that it would be -- well, it'd be down to me  
 14 physically whether I could cope with it or not, and we  
 15 went for it and here I am.  
 16 So I came to after the second operation -- actually,  
 17 in truth, I came to during that operation. I was in  
 18 such a weakened state that the anaesthetist had tried to  
 19 use the minimum amount of anaesthesia, and unfortunately  
 20 I had slipped back into consciousness during the  
 21 operation. It had been noted. I was subsequently asked  
 22 whether I was aware of it. Yes, I was aware of it.  
 23 Q. That continues to give you nightmares.  
 24 A. I had some very, very bad nightmares at the time and,  
 25 yes, it -- it's still somewhere that -- unfortunately

86

1 than the faces of the medical team, looking more sombre  
 2 than I would expect, and eventually it was explained to  
 3 me that although the liver had gone in nice and pink and  
 4 healthy, it hadn't started to do its job. So blood  
 5 (inaudible) was still good, it wasn't dead, it wasn't  
 6 being rejected, it just was not working.  
 7 Consequently, the only course of action was another  
 8 liver transplant, and they hoped that another suitable  
 9 liver would be available in time.  
 10 Q. There was one particular Saturday afternoon when it was  
 11 very solemn.  
 12 A. So initially I was quite well, but I started to  
 13 deteriorate. I ended up on the high dependency unit at  
 14 Addenbrooke's and in an awful lot of pain. I was not  
 15 healing, so as fast as they were trying to get units of  
 16 blood in me, it was leaking out from all over the place,  
 17 basically.  
 18 I had been in and out of consciousness, and it was  
 19 a Saturday afternoon, and I remember coming to and  
 20 seeing a lot of familiar faces, but the one thing that  
 21 struck me was in amongst those familiar faces was the  
 22 hospital padre, and none of those faces looked  
 23 particularly cheerful.  
 24 Slipped into unconsciousness, and on the Sunday  
 25 morning I remember sort of coming to and croaking at the

88

1 your mind takes you back to these places when you least  
 2 expect it and certainly you don't want it.  
 3 Q. You were very weak after the second transplant.  
 4 A. When I went into hospital, first of all, I weighed about  
 5 22/23 stone. When I finally left hospital  
 6 in February 2006, I weighed just over 11 stone.  
 7 Physically I got to the point where I could do  
 8 nothing for myself whatsoever. To pick up a plastic cup  
 9 half full of water was almost all I could manage. So it  
 10 really did take its toll on me.  
 11 I had become institutionalised. I was not getting  
 12 any better, any worse. Although I did not fulfil the  
 13 criteria to leave hospital, it was felt that the only  
 14 way I would make any form of recovery would be back in,  
 15 again, a familiar environment and not staring at the  
 16 same walls in the ward that I had been for several  
 17 months.  
 18 Q. You say in your statement you had become a difficult and  
 19 uncooperative patient.  
 20 A. Yes. I've had counselling for this. I still haven't  
 21 quite forgiven myself for it. I had had plenty of  
 22 spells in hospital and had remained cheerful and  
 23 co-operative. On this occasion, I wasn't able to do so,  
 24 and I recognise that my behaviour was certainly not what  
 25 I would hope for myself, although obviously the nursing

89

1 staff were very understanding. When I subsequently went  
 2 back to apologise, they said there was absolutely no  
 3 need, but it's still something which does not sit well  
 4 with me.

5 Q. You've said in your statement logically you understand  
 6 that anyone else in the position would've been exactly  
 7 the same.

8 A. I would forgive anybody else, but I struggle to forgive  
 9 myself.

10 Q. You were discharged back to your parents' house.

11 A. Yes.

12 Q. And you say that the initial delight of being discharged  
 13 soon faded.

14 A. I hadn't smelt fresh air for -- well, since the middle  
 15 of October until the middle of February. So I remember  
 16 being wheeled out, because I wasn't capable of walking,  
 17 into the ambulance, and that just brief smell of fresh  
 18 air was quite euphoric again.

19 They got me home to my parents' house, lifted me in,  
 20 and -- a combination of things. So obviously my parents  
 21 had other things to do, so I didn't have the nursing  
 22 staff at my beck and call as I had done before, and it  
 23 was a long and painful process to get back to a state  
 24 where I could look after myself.

25 Q. It took three months before you could walk again.

91

1 By all accounts from other people I'd become very  
 2 talkative having got the initial hit, and it is  
 3 phenomenally addictive, but I was not told that at the  
 4 time. I did notice that my use of these lozenges --  
 5 I was in pain, I did need to use the lozenges, but my  
 6 usage accelerated, which obviously, with the benefit of  
 7 hindsight, is a clear indication that not only was my  
 8 body becoming tolerant of it, but it was starting to  
 9 want and crave the drug.

10 It got to the point where I realised I had a problem  
 11 with them. I had -- the phrase I used to choose to use  
 12 was I had become dependent upon them, but in reality  
 13 that's an addiction. I was addicted to them.

14 I decided not to keep them in the house because  
 15 I would just consume them, so I kept them at my parents'  
 16 house, which is some 6 miles away from mine. But I had  
 17 a key, so I would sneak over there in the small hours of  
 18 the morning. So 2.30/3 o'clock, I'd drive over there,  
 19 help myself to -- they come in a strip of four and sneak  
 20 off back home, and I'd probably demolish two of them on  
 21 the journey on the way home. So my consumption was  
 22 rapidly accelerating.

23 It came to the point where I decided it was  
 24 an issue, so I would stop using them. I can't remember  
 25 how many I was using at the time. But in my wisdom,

90

1 A. Yes.

2 Q. It took until August 2006 when you managed to find your  
 3 car keys --

4 A. Correct.

5 Q. -- and drive.

6 A. Yes.

7 Q. It took about a year before you could function  
 8 independently.

9 A. Certainly. My mother would -- she really didn't want me  
 10 to go and live on my own again, but it was important for  
 11 me to do that, but I would have regular visits, and  
 12 she'd come round with food and with housekeeping  
 13 materials and so -- yeah, although I was living on my  
 14 own, it was certainly not unaided.

15 Q. While you were in hospital, you had been given a lot of  
 16 opiates.

17 A. Yes.

18 Q. You continued to use fentanyl after your discharge.

19 A. Lovely stuff! Yes, I had been given lozenges, fentanyl  
 20 lozenges. A bit like some of the candy you would have  
 21 had as a kid, sort of a lollipop stick with little blob  
 22 of material on the end, quite sweet-tasting, and you get  
 23 a very good initial hit from these things. They come in  
 24 various strengths, and at one stage I was on the  
 25 strongest ones.

92

1 I decided to go cold turkey. A friend of mine asked if  
 2 I'd help him collect a vehicle he had purchased, an old  
 3 ex-army fire engine from a place called Withams near  
 4 Grantham on the A1. So I accompanied him, and on the  
 5 way back I was driving said fire engine. Lovely warm  
 6 day coming down the M11, had both doors open on the side  
 7 of it, and I started to shiver, and I became very, very  
 8 shivery. I thought, that's a bit odd, obviously a bug  
 9 of some sort.

10 By the time we got back to Plumpton -- quite a long  
 11 journey -- I started to experience paranoia. I could  
 12 feel my skin crawling. Local pub, I was quite convinced  
 13 all these people -- I know everybody in there, but they  
 14 were all staring at me, they all had some intent,  
 15 I don't know what.

16 So I retreated home, spent a very uncomfortable  
 17 night, and the following day I rang my mother to say,  
 18 "I don't know what's going on, something's wrong". She  
 19 figured it out. She said, "When is the last time you  
 20 had some fentanyl?" I said Friday. This is now Sunday.  
 21 But I hadn't got any, and I had used the stash at her  
 22 house, unbeknownst to her, so she phoned the local  
 23 pharmacist who said, "I can't give you any fentanyl,  
 24 I haven't got any, but I have got a patch, I'm willing  
 25 to let you have a patch, which -- it will take a while

93

1 to kick in, but will tide you over until we can get you  
2 some lozenges."  
3 So that was it, straight back on the lozenges for  
4 another period of time. I did speak to my GP, a very  
5 understanding man, but he said, "No, we're going to step  
6 down the analgesic", and I wasn't prepared to do that.  
7 So in the end, I went cold turkey again. I went on  
8 holiday with some friends of mine to Spain without any  
9 lozenges. It was a torrid four or five days, more for  
10 them than for me I suspect, but I did come home and  
11 I haven't touched them since.  
12 Q. But it had taken you three years to --  
13 A. Yes.  
14 Q. -- be free of the dependency.  
15 A. Mm.  
16 Q. Since the second liver transplant, you've had regular  
17 blood tests for hepatitis C.  
18 A. Yes.  
19 Q. And you are undetectable.  
20 A. Yes.  
21 Q. The doctors are puzzled by that.  
22 A. Puzzled would be an understatement, yes.  
23 Q. Do you want to say what has been happening?  
24 A. So I had an enormous viral load before my first liver  
25 transplant and before my second liver transplant. There

95

1 trust the NHS, and I'm absolutely convinced that every  
2 person I deal with has got my best interests at heart.  
3 But it is difficult to disassociate what has happened to  
4 me with current treatment.  
5 Q. Another aspect of that has been the question of records  
6 going missing and the availability of your medical  
7 records.  
8 A. Yes, yes.  
9 Q. As we spoke about earlier, before your mum passed away,  
10 she had tried to look for records and she applied to the  
11 UKHCDO at that point.  
12 A. I didn't know this, but yes, she had.  
13 Q. You've now discovered that's what she had done.  
14 A. Yes.  
15 Q. And she received some documents from them, but there  
16 seem to be some missing, and then in August this year  
17 your father received a further letter from them  
18 providing further records.  
19 A. Yes, out of the blue he said to me, "I've had contact  
20 addressed to your mum, do you want me to follow it up?"  
21 I said, "Yes, by all means". So totally unsolicited on  
22 our behalf, somebody had done a trawl through the  
23 records and discovered that they did have some records  
24 that they claimed they didn't have the previous time.  
25 Q. The original letter, which, as you say, was addressed to

94

1 is no other case on record of somebody with such a high  
2 viral load no longer having any trace of hepatitis C in  
3 their system. So it was 2005, the last transplant, so  
4 we are now nearly 14 years on, and regular six-monthly  
5 blood tests, no sign of hepatitis C to date.  
6 However, the medical team are not willing to give me  
7 an assurance that that's the end of it, so I still have  
8 that sword of Damocles hanging over my head.  
9 Q. You've said in your statement that although doctors are  
10 keen for you to live as long as possible, they're also  
11 keen to make lifestyle choices for you. What do you  
12 mean by that?  
13 A. So we have had some discussions. I have always been  
14 overweight, fat, and so I stopped attending my annual  
15 check-up a couple of years ago simply because I was fed  
16 up of driving 80 miles to be told, "You're still  
17 overweight, you need to lose weight". The conversation  
18 regarding my blood work -- my blood work has been  
19 constant for all of that time, so I elected not to go  
20 anymore.  
21 Q. Part of that was the discussion around weight, but  
22 you've also said in your statement you struggle to trust  
23 doctors.  
24 A. I am far more cynical, sceptical, call it what you will,  
25 now than I used to be. So I have no choice. I need to

96

1 your mum, was:  
2 "We have recently become aware of the fact that we  
3 have additional information. If you want it, please  
4 email us."  
5 A. Yes.  
6 Q. Your dad followed that up.  
7 A. He did.  
8 Q. We have the letter in response. It's 3742003, please,  
9 Henry. Thank you.  
10 It's from August 2019, and it says this:  
11 "We are contacting you because you previously  
12 requested a copy of the personal information held about  
13 your relative at the National Haemophilia Database.  
14 Following that request, we sent you all the information  
15 that was held on our electronic database. It was  
16 assumed at the time that the electronic record was  
17 a complete record.  
18 "However, on recent inspection of the paper archive,  
19 we discovered that some details, from paper forms  
20 submitted to the database in the 1970s through to the  
21 1990s, were archived but not entered into the electronic  
22 record. These forms were submitted many years ago by  
23 your relative's Haemophilia Centre when the database was  
24 held in Oxford, before paper reporting was phased out in  
25 2000.

97

1 "Please see the enclosed additional paperwork that  
2 we have found on your relative when going through this  
3 archived material. We apologise unreservedly that you  
4 were not sent all the information after your initial  
5 request and for any distress or difficulties that this  
6 may have caused."

7 With that letter, you were provided with some  
8 further documentation.

9 You've also said in your statement that you're now  
10 a very different person to who you were in the early  
11 1990s.

12 A. Yes.

13 Q. Can you tell us a little of how you feel you've changed?

14 A. I suppose the initial thing I should say is that  
15 undoubtedly we all age and change. However, I think  
16 I've changed more than you would expect.

17 Notwithstanding the insults both mental and physical.

18 I was very gregarious. I was an active member of  
19 Round Table. I was involved in the Army Cadet Force.  
20 I was the chairman of the sports and social club at  
21 work, and, yes, my leisure time was full of activities  
22 involving other people. All of those things have been  
23 taken away from me.

24 I have rebuilt a life post-transplant, and the  
25 people I mix with now are very nice people, but it's --

99

1 particularly your mum had over you through the years and  
2 the effect on their mental health. Do you want to say  
3 anything particularly about your mum and the effect it  
4 had on her?

5 A. So my attitude on this is, I was adopted, they had the  
6 opportunity to give me back, they chose not to do so.  
7 When I started counselling, we touched upon this and  
8 I was asked how I felt as an adopted child, and I felt  
9 cherished, and that hasn't changed.

10 My parents, John and Pat, have given me every  
11 encouragement and every support, and it -- this is going  
12 to become quite emotional -- in some respects that  
13 support and encouragement has been repaid by huge  
14 amounts of anxiety and fear. No parent should stand by  
15 a hospital bed, watching their child essentially dying,  
16 repeatedly.

17 I have no idea of the anguish that my mother went  
18 through during those months up at Addenbrooke's. She  
19 effectively moved into a house up at Addenbrooke's while  
20 I was there, and nothing was too much effort for her.  
21 I would not be here without the effort of both of my  
22 parents, but in particular my mother.

23 The only satisfaction or the only glimmer of  
24 satisfaction, I suppose, is that she saw me come out of  
25 hospital and start to rebuild my life, something which

98

1 it does strike me that an awful lot of the activities  
2 I undertake now are less social and less gregarious than  
3 they once were. I am a more melancholy person than  
4 I once was, certainly more cynical, less trusting. Yes,  
5 less full of the hope I once might have had.

6 Q. You're now engaged to Jan.

7 A. Yes.

8 Q. You've tried to live together with her and her son, but  
9 you've struggled to cope with that.

10 A. Yes. We have touched upon my building the wall. Well,  
11 that happened again once I was back on my own, so 2006  
12 onwards.

13 So when I first came out of hospital, my friends  
14 were very pleased to see me, lots of social activities  
15 were encouraged, people would come and visit. But  
16 I obviously made it quite clear that's not what  
17 I wanted, so those visits became less and less. My  
18 going out became less and less. And I find that keeping  
19 my own company is what I -- I don't think "prefer" is  
20 the right word, but that's my default method of  
21 operation. So I very much wanted to share my home and  
22 my life with both Jan and her son, but found I was  
23 incapable of tolerating them in my space.

24 Q. Your dad has also provided us with a statement, and he  
25 has spoken about the fear and the anxiety that he and

100

1 I'm sure on more than one occasion she didn't think was  
2 going to happen.

3 Q. You've mentioned that you've had counselling.

4 A. Yes.

5 Q. You had to seek that privately.

6 A. I did. I wouldn't have done so. It was at the  
7 insistence of a very good friend and my mother, who both  
8 said, "Look, we know you're going to be anti this", and  
9 I was, and they said, "But go and give it a go". And so  
10 I was on benefits at the time, so it was at a reduced  
11 rate, but no, it did cost me, and it was a very useful  
12 process. I embarked upon it merely out of curiosity to  
13 see what the process was, but I did find it very useful.

14 Q. Had you ever been offered counselling by the NHS?

15 A. No.

16 Q. We spoke earlier about your earlier retirement due to  
17 ill-health and you were then reliant on benefits.

18 A. Yes.

19 Q. You applied for Disability Living Allowance, and that  
20 was rejected initially.

21 A. Yes. Obviously my wife and I married, we were both  
22 working for the bank in separate -- she was in branch  
23 banking, I was in the head office department, and we  
24 embarked upon our married lives with the assumption we  
25 would both be earning for a period of time and we would

101

1 look forward to a future together that should've been  
 2 within remunerated. I was on a successful career path.  
 3 So it came quite devastating really that suddenly there  
 4 was I not earning any money, career over. And it was  
 5 a struggle.  
 6 The bank were very good, so I did draw down my  
 7 pension early, but it was -- a lump sum had been  
 8 commuted to settle the liabilities that any young person  
 9 would have at that time.  
 10 And, yes, we were struggling financially, and my  
 11 mother took umbrage at this, as anybody who met her  
 12 might imagine, and she had made enquiries as to whether  
 13 there was any support available, because she saw what  
 14 had happened to both myself and other haemophiliacs was  
 15 unjust.  
 16 I do recall that Frank Dobson, the then health  
 17 minister, stood up in the Houses of Commons and said,  
 18 "These people are suffering, we have a system available,  
 19 that's the benefit system, so they should apply for  
 20 benefits". So that's what we did, and it was rejected  
 21 out of hand, without so much as a by your leave.  
 22 Again, my mother waded in and wrote to my local MP ,  
 23 Nicholas Soames, and got a very nice letter from  
 24 Nicholas Soames saying he would look into the matter and  
 25 wished me all the best. Within a very short period of

103

1 reasons for this decision and stressing the particularly  
 2 careful consideration which had been given to all the  
 3 issues.  
 4 "The government's general policy is that  
 5 compensation or other financial help to patients is only  
 6 given to patients when the NHS or individuals working in  
 7 it have been at fault. After looking at a number of  
 8 different approaches to the question of special payments  
 9 and thinking long and hard about the issues involved,  
 10 ministers decided that they could not make an exception  
 11 to that general policy in the case of haemophiliacs  
 12 infected with hepatitis C. The government is funding  
 13 a project, developed by the Haemophilia Society, which  
 14 aims to meet the advice and information needs of young  
 15 people with haemophilia who have been infected with  
 16 hepatitis C.  
 17 "I hope that Mrs Rankin and her son will accept that  
 18 the issues were very difficult in this case and that the  
 19 most careful consideration was given to them."  
 20 Then it notes you had been awarded the Disability  
 21 Living Allowance.  
 22 What were your mum's thoughts about that response ?  
 23 A. Inadequate I think would be an understatement. She  
 24 wasn't satisfied that that was the right decision to  
 25 have been made. She was adamant that a mistake had been

102

1 time -- I can't remember how long it was -- I received a  
 2 letter saying, "Oh, we have reviewed the situation and  
 3 you are going to receive benefits in full for life". So  
 4 the higher rate of disability for life.  
 5 Q. We'll come to the for life point in just a moment, but  
 6 in between you being rejected for the Disability Living  
 7 Allowance and it then being accepted, as you say, your  
 8 mum had written to the MP.  
 9 A. Yes.  
 10 Q. You also received a letter back from your MP enclosing a  
 11 letter from Frank Dobson.  
 12 A. Yes.  
 13 Q. We're just going to have a look at that now. 0357003,  
 14 please, Henry.  
 15 It says this -- we are not entirely sure of the  
 16 date. We can see it in the top right-hand corner, but  
 17 it's not entirely clear what it is. But the response is  
 18 this:  
 19 "I am sorry to hear that Mrs Rankin's son has  
 20 haemophilia and has been infected with hepatitis C. On  
 21 28 July last year, I announced the decision not to  
 22 introduce a special payment scheme for people infected  
 23 in this way. Ministers do appreciate that they and  
 24 their families felt deep disappointment at the decision.  
 25 I wrote to the Haemophilia Society explaining the

104

1 made and, furthermore, that once that mistake had been  
 2 realised, that the wrong approach had been taken and the  
 3 wrong conclusions had been reached, some form of  
 4 restitution was due.  
 5 Q. You said a moment ago that you were awarded the  
 6 Disability Living Allowance for life.  
 7 A. Yes.  
 8 Q. What happened when the DLA changed to a PIP?  
 9 A. When the decision was made to switch from DLA to PIP,  
 10 I was invited to attend an assessment for PIP.  
 11 I decided that that's not what I want to do. I did not  
 12 wish to go through the embarrassment and ignominy of  
 13 jumping through yet more hoops for something which  
 14 I didn't think was right in the first place. So  
 15 I decided no, I was not going to do that.  
 16 Q. You've said you decided for your own self-esteem that  
 17 you needed to do something.  
 18 A. Yes.  
 19 Q. And what do you now do?  
 20 A. I very fortunately -- if I take a step back for  
 21 a moment, the original prognosis post-transplant was  
 22 that I could expect hopefully between five and  
 23 seven years of life, possibly as little as three,  
 24 depending on how virulently the virus returned.  
 25 About five years ago, my clinical team said, "Look,

105

1 there's still no sign of hepatitis C, so as things stand  
 2 at the moment, we see no reason why you shouldn't see  
 3 75". So the prognosis changed greatly and I thought,  
 4 well, although I could sit on a sofa for the rest of my  
 5 life watching daytime TV, that probably wouldn't be  
 6 particularly healthy medically -- mentally. So I  
 7 thought I best find something to do.

8 My skill set was far too out of date to return to  
 9 banking, and not that I wanted to anyway, bit of  
 10 a poison challis these days, so I thought: what can  
 11 I do? I'm afraid to say my confidence was nonexistent.  
 12 I thought: what can I offer?

13 I did think, well, perhaps driving examiner. Nice  
 14 civil service job with a pension at the end of it, can't  
 15 be too difficult. But that would have been a full-time  
 16 job, which is something I wasn't capable of doing at the  
 17 time.

18 I had a discussion with my next door neighbour, who  
 19 runs a small driving school, and he said, "Why don't you  
 20 think about coming and working with me and teaching  
 21 driving instruction?" I had been an instructor with the  
 22 Army Cadet Force, so I had a skill set that was  
 23 transferable there, and so, yes, I've ended up in what  
 24 I like to call logistics, but, yes, it's various aspects  
 25 of the logistics industry, teaching people to drive,

107

1 senior management or even executive management. If  
 2 I had stayed working for NatWest, albeit now it's Royal  
 3 Bank of Scotland Group, assuming a natural progression  
 4 through that career path, I probably would've retired as  
 5 a senior manager by this age, mortgage free and on  
 6 a full salary pension.

7 So the remuneration I currently receive is  
 8 considerably less than that that I had anticipated as  
 9 a result of my career path.

10 Q. Those are the questions I have for you. Is there  
 11 anything else you would like to say?

12 A. No, other than to thank the chair and all of your team.  
 13 This was a process I was not certain that I wanted to be  
 14 part of. Like many haemophiliacs of my age, we all  
 15 remember the tombstone leaflet, where suddenly it became  
 16 necessary to be anonymous, and it's something that stays  
 17 with you. But your team have made it, if not an easy  
 18 process, a process that has not been difficult. So  
 19 thank you, Sir Brian, and thank your team.

20 SIR BRIAN LANGSTAFF: Well, you've given us a detailed,  
 21 objective, precise account of what has happened to you,  
 22 concentrating, I suspect, more upon the facts than upon  
 23 your intimate feelings about it, that may be  
 24 a reflection of the wall that you've described, but  
 25 thank you very much for that.

106

1 undertaking the delivery of drivers' CPC, fork lift  
 2 courses, et cetera, et cetera. So, yes, I embarked upon  
 3 a different industry, and I have found it most  
 4 rewarding. It has rebuilt my confidence and given me  
 5 something to do.

6 Q. That work is flexible, convenient, nearby the house.  
 7 A. Yes.  
 8 Q. Which makes it manageable.  
 9 A. It makes it manageable, it means that I can dictate when  
 10 I'm working, when I'm not working. And, yeah, that's  
 11 something that I find is necessary.

12 Q. You've also received payments from the EIBSS.  
 13 A. Yes.  
 14 Q. Which helps as well.  
 15 A. Yes, it does. Are we going to talk about finances?  
 16 Q. I was about to ask you, did you have anything else you  
 17 wanted to say about them?  
 18 A. When -- the last year that I worked in full for NatWest  
 19 bank which was in 1996. 1997 was when I was retired  
 20 through ill-health. My income for that year gross was  
 21 approximately £25,000. So that was 1996. The payments  
 22 from the EIBSS is -- have only just caught up with what  
 23 I was earning back in 1996.  
 24 Within the bank there was a tiering system, and  
 25 I was A tiered, which means I was suitable to go on to

108

1 It is, as all witness evidence is, but yours in  
 2 respects which is true of yours alone and not of others,  
 3 particularly valuable to this inquiry. Thank you.

4 A. Thank you, Sir Brian.

5 **(...Applause...)**

6 SIR BRIAN LANGSTAFF: Well, we'll take a break until 2.50.  
 7 **(2.30 pm)**

8 **(A short break)**

9 **(2.50 pm)**

10 SIR BRIAN LANGSTAFF: Our next witness wishes to be known as  
 11 Mary, does she?  
 12 MS RICHARDS: Yes, sir.  
 13 SIR BRIAN LANGSTAFF: Mary, please.  
 14 **MARY GRINDLEY (affirmed)**  
 15 **Questioned by MS RICHARDS**

16 MS RICHARDS: Mary, you're here to talk about your late  
 17 husband, John.  
 18 A. That's right.  
 19 Q. Who had severe haemophilia A.  
 20 A. That's right.  
 21 Q. We're going to put a picture of John on the screen.  
 22 Henry, it is 2336018, please.  
 23 Was that your wedding day?  
 24 A. It was, yes.  
 25 Q. We're going to leave that picture on the screen apart

109

- 1 from when we have documents up.  
 2 So you met John first of all when you were at  
 3 teacher training college.  
 4 A. That's right, yes.  
 5 Q. He was the brother of a friend of yours.  
 6 A. That's right, yes. I was at training -- at teacher's  
 7 training college in north London, and I was a friend of  
 8 John's sister. Do you want me to elaborate?  
 9 Q. Well, I think it was -- you met him a few times over the  
 10 following years, but you didn't start going out together  
 11 until a few years later, in the mid-1970s; is that  
 12 right?  
 13 A. Yes, I became a family friend. I originally -- I first  
 14 met John when I went to south-east London, where he  
 15 lived, with John's sister. And it was actually the  
 16 Romans that brought us together! Because we went to --  
 17 I went with John's sister to a lecture about the Romans  
 18 at Hornimans Museum in south-east London, and history  
 19 was my main subject at college.  
 20 Q. And you stayed in touch with the family, you became  
 21 a family friend.  
 22 A. Yes.  
 23 Q. It was a few years later, in the mid-1970s, you and John  
 24 started going out.  
 25 A. Yes. It was mainly after John's sister got married and

111

- 1 despite their difficulties.  
 2 Q. He was able to do some City & Guilds qualifications in  
 3 electronics engineering, despite the amount of school  
 4 he'd missed.  
 5 A. Yes. He passed his City & Guilds in electronics  
 6 engineering.  
 7 Q. Now, when you'd first met John, he had been in  
 8 a wheelchair because he had had some form of surgery to  
 9 his legs.  
 10 A. No, he was in -- he was in his wheelchair because of his  
 11 haemophilia, the deterioration of the joints. But  
 12 I don't know much about -- but he had some kind of  
 13 operation, which I considered quite a miracle, really.  
 14 He was able to walk much more than he had done. He  
 15 could not bend his knees. When we got married, he  
 16 couldn't kneel down at the altar. But he could walk  
 17 much better than he had been previously.  
 18 Q. You say in your statement you were drawn to him in  
 19 particular because of his strength of character.  
 20 A. Yes.  
 21 Q. And you observed many haemophiliacs that you've met over  
 22 the years have tremendous strength.  
 23 A. Yes, I would like to pay tribute to each and every one  
 24 of you here, because, yes, I think it is -- they've --  
 25 because they've had to fight for all that they -- their

110

- 1 left home.  
 2 Q. The two of you got engaged in 1977.  
 3 A. That's right.  
 4 Q. On the Silver Jubilee day.  
 5 A. That's right.  
 6 Q. You married the following year in Suffolk, which is  
 7 where you were from.  
 8 A. Yes.  
 9 Q. I just want to ask you a little about John's life before  
 10 the two of you met.  
 11 He had spent a lot of his childhood in Evelina  
 12 Children's Hospital in London.  
 13 A. He had, yes, yes. He lost a lot of schooling because of  
 14 his haemophilia, and I think his education suffered  
 15 quite a bit.  
 16 Q. But there then came a time when he went to Treloar's  
 17 College.  
 18 A. That's right, yes.  
 19 Q. And he became head boy.  
 20 A. He became head boy. I think it was because he was the  
 21 oldest. I think that was in 1971/1972.  
 22 Q. He recalled that as a happy time.  
 23 A. He did. He enjoyed it very much, yes. I was talking  
 24 recently to some old boys from Treloar's and they were  
 25 talking about the camaraderie that they had there,

112

- 1 treatment and financial things.  
 2 Q. Up until the mid-1970s, John was receiving  
 3 cryoprecipitate as his main treatment.  
 4 A. Sorry, could you repeat?  
 5 Q. Up until about 1976, as we'll see from some  
 6 correspondence --  
 7 A. Yes.  
 8 Q. -- John had been receiving cryoprecipitate, but he was  
 9 one of the first then to move on at St Thomas' to  
 10 Factor VIII concentrate and home treatment.  
 11 A. Yes, he was very eager to get on to home treatment.  
 12 Q. We'll just have look at a letter from early 1976.  
 13 Henry, it's 2336021, please.  
 14 We can see it's dated 21 January 1976. It's  
 15 addressed to John's GP, and it says this:  
 16 "We are at last receiving sufficient supplies of  
 17 freeze ..."  
 18 I'm sorry, are you able to follow it?  
 19 A. I'm fine, thank you.  
 20 Q. "We are at last receiving sufficient supplies of freeze  
 21 dried Factor VIII concentrate to be able to offer to  
 22 suitable haemophiliacs the material and equipment to  
 23 treat their own bleeding episodes at home. This has  
 24 come to be widely regarded as an improvement in the  
 25 management of the ordinary run of episodes of

113

1 haemophiliac bleeding. I have been reviewing the  
 2 haemophiliacs who attend here and I think that  
 3 Mr Grindley would be suitable for this form of  
 4 management."  
 5 The "here" was the Haemophilia Centre at St Thomas'  
 6 Hospital by this time.  
 7 A. That's right.  
 8 Q. The letter continues:  
 9 "We would see that Mr Grindley had sufficient  
 10 understanding of his disorder to know when he should  
 11 give himself a treatment and how much he should give.  
 12 We will teach him to perform his own venipunctures and  
 13 to administer his doses. We would see that he  
 14 understood the possible risks of intravenous therapy and  
 15 that he made appropriate plans for the storage and  
 16 disposal of his equipment. We would of course supply  
 17 the treatment materials and the necessary syringes,  
 18 needles and so forth."  
 19 Then it talks about and the possibility of allergic  
 20 reactions.  
 21 Do you know what information was given to John about  
 22 any risks of going on to this course of treatment?  
 23 A. Well, I wasn't actually married to him then and I was  
 24 teaching in Suffolk. I only saw him during, you know,  
 25 holidays, school holidays. Not that I know of.

115

1 A. Yes, he did, and he did improve. He was able to go out  
 2 more and do more things, yes, definitely.  
 3 Q. He was working by this time in a small electronics firm  
 4 in south-east London.  
 5 A. That's right, yes.  
 6 Q. After you married, you moved to London to join him.  
 7 A. Yes, I possibly had the better job, but we wanted John  
 8 to stay under St Thomas', and Suffolk wouldn't have  
 9 provided the -- such good treatment.  
 10 Q. You became pregnant and you had your son.  
 11 A. Yes.  
 12 Q. You talk about the relationship between John and your  
 13 son in this way in your statement. You say:  
 14 "There were things John couldn't do, like play  
 15 football with him, but he did what he could and was  
 16 a really good father to his son."  
 17 A. He was, yes.  
 18 Q. Indeed, your son in his witness statement has said:  
 19 "He was as good a dad as anybody could ask for."  
 20 I have nothing but fond memories."  
 21 A. Good.  
 22 Q. I wanted to ask you about a Haemophilia Society meeting  
 23 that you and John attended.  
 24 A. Mm-hm.  
 25 Q. Henry, if we could have the photo back up on the screen,

114

1 Q. Don't worry.  
 2 Then we're going to just look at the records and see  
 3 the wide range of Factor VIII products that John  
 4 received over the years.  
 5 Henry, could we have 2336009, please, and could we  
 6 go to page 9, please.  
 7 We can see here this is an extract from the National  
 8 Haemophilia Database records, and we see from 1969 --  
 9 there is a reference to 1969 John receiving Factor VIII  
 10 BPL, but then it's fresh frozen plasma or  
 11 cryoprecipitate until we get to 1970. Then there's  
 12 again some references to Factor VIII BPL.  
 13 Then we can see that John received a range of  
 14 different products, including Koate, Factor VIII,  
 15 Profilate and cryobulin.  
 16 Then, please, Henry, could we have page 16.  
 17 The last page took us up to 1980, and we see on this  
 18 page, from 1980 onwards, again we can see him receiving  
 19 cryobulin, BPL Factor VIII, haemophil, Profilate -- so  
 20 a full range of different commercial products as well as  
 21 the NHS product.  
 22 A. **(Nodded assent)**  
 23 Q. John was keen to use home treatment.  
 24 A. Yes.  
 25 Q. He found it liberating.

116

1 please.  
 2 You say in your statement you think it was 1983 and  
 3 it was an AGM of the Haemophilia Society.  
 4 A. Yes, April 1983.  
 5 Q. You remember it because news had broken of the first  
 6 English haemophiliac to die from AIDS.  
 7 A. That's right, yes.  
 8 Q. You recount in your statement you stood up at the  
 9 meeting and you asked what the implications might be in  
 10 terms of being able to have other children, because you  
 11 desperately wanted a second child.  
 12 A. Yes, that's right.  
 13 Q. And was there any response?  
 14 A. Yes, it was Dr Macfarlane who was speaking, and he said  
 15 basically, "We don't know how AIDS is transmitted, put  
 16 everything on hold as far as having a second child."  
 17 Q. You and John went home and you discussed it and you  
 18 decided you couldn't take the risk of having a second  
 19 child.  
 20 A. No, that's right.  
 21 Q. You decided not to have a physical relationship from  
 22 that point onwards.  
 23 A. That's right, yes.  
 24 Q. You say in your statement the thought of no more  
 25 children nearly broke you.

117

- 1 A. It did. I remember an incident -- we lived in a small  
2 flat, and my mother-in-law had brought a pram for my  
3 son, and we asked her if she could take it away and sell  
4 it because there would be no more children, and it  
5 nearly broke me.
- 6 Q. You say from that day onwards, you and John changed your  
7 lifestyle in other respects. He would use his own  
8 towel, crockery --
- 9 A. Yes.
- 10 Q. -- cutlery and the like.
- 11 A. Yes.
- 12 Q. You think that was the first you'd heard of AIDS or  
13 HTLV III, but you say in your statement you had been  
14 aware, and John had been aware, of problems of  
15 infections with hepatitis prior to that.
- 16 A. You're talking about non-A, non-B?
- 17 Q. Yes.
- 18 A. Yes, I think John was well aware before we got married  
19 that he had non-A, non-B.
- 20 Q. You remember, your statement says, writing indeed to  
21 Ronald Reagan in 1980 about that.
- 22 A. That's right, yes.
- 23 Q. Because you were concerned about American blood --
- 24 A. Yes.
- 25 Q. -- as long ago as 1980.

119

- 1 will necessarily be several years before redevelopment  
2 can be completed. Planning has already begun, however,  
3 and although I cannot yet say how soon it will be  
4 possible to start building, I can assure you that  
5 ministers are very much aware of the need for the new  
6 laboratory.
- 7 "You have asked Mrs Thatcher to stop the impact of  
8 Factor VIII from abroad. May I say that I can  
9 understand your feelings, but I am afraid that this is  
10 simply not possible at present. However, the upgrading  
11 programme described by Sir George will enable the Blood  
12 Products Laboratory to double its output of Factor VIII  
13 by the end of next year, though it will still be  
14 necessary for health authorities to purchase some  
15 Factor VIII commercially."
- 16 So we can see from that that in early 1981, you were  
17 sufficiently knowledgeable about and concerned about the  
18 risks of American products to write to central  
19 government.
- 20 A. Mm.
- 21 Q. That was the response that you received.
- 22 A. Yes.
- 23 Q. You continued to write on this particular issue to  
24 politicians over the years.
- 25 A. Yes.

118

- 1 A. That's right.
- 2 Q. You wrote to Margaret Thatcher, who was Prime Minister,  
3 in 1981.
- 4 A. Yes.
- 5 Q. You have said this -- sorry, we'll see the response,  
6 actually. 2336007, please, Henry.
- 7 We can see it's a letter of 16 March 1981 from the  
8 Department of Health and Social Security to you:
- 9 "Dear Mrs Grindley,  
10 "Thank you for your letter of 12 February addressed  
11 to the Prime Minister about Factor VIII. I have been  
12 asked to reply. I am sorry I have not been able to do  
13 so earlier.
- 14 "The National Blood Transfusion Service, including  
15 the Blood Products Laboratory, was the subject of  
16 an adjournment debate on 15 December. In his reply,  
17 a copy of which I enclose, Sir George Young spoke about  
18 the need to redevelop the Blood Products Laboratory,  
19 which manufactures a range of blood products for the  
20 NHS, including Factor VIII for the treatment of  
21 haemophiliacs.
- 22 "However, Sir George emphasised that it is not  
23 possible to redevelop overnight a facility as complex as  
24 that laboratory. A number of issues are involved, for  
25 example funding, technology and plasma supply, and it

120

- 1 Q. There is a letter we'll pick up in 1987.  
2 Henry, it's the same exhibit number, 2336007, but  
3 it's page 7, please.
- 4 We can see from this -- it's just the last page of  
5 the letter.
- 6 A. Yes, I've lost the rest of it. I don't know where it  
7 is.
- 8 Q. That's your handwriting at the bottom.
- 9 A. Yes, scribbled, yes.
- 10 Q. It's very legible, but this ending is important. The  
11 ending of the letter from Lord Skelmersdale was this:  
12 "We have fully financed the new 60 million BPL at  
13 Elstree to ensure the earliest possible completion date.  
14 The new factory was opened on 29 April 1987. Production  
15 is expected within the next few months, leading to very  
16 substantial products next year and self-sufficiency in  
17 all products by 1989."
- 18 So we can see, although we don't know the date of  
19 this letter, it obviously postdates April 1987, and it's  
20 the same issue that you'd picked up on back in 1981.
- 21 A. That's right.
- 22 Q. You and John read what you could about AIDS and tried to  
23 inform yourself about the situation.
- 24 A. That's right, yes.
- 25 Q. We can see that John raised concerns with your MP in

121

1 late 1983. We'll have a look at two letters, Mary.  
 2 A. Uh-huh.  
 3 Q. Henry, it's page 3 of this exhibit, please.  
 4 So this is a letter from your MP written at John's  
 5 behest to Kenneth Clarke, then Minister of State and the  
 6 Department of Health and Social Security. It is dated  
 7 2 November 1983.  
 8 It says:  
 9 "Dear Kenneth,  
 10 "Mr Grindley is a constituent of mine who came to  
 11 see me. He suffers from haemophilia and, as a result,  
 12 has to have regular blood transfusions. He is very  
 13 concerned about the spread of AIDS, particularly as  
 14 apparently the United Kingdom imports most of its blood  
 15 products from the United States. The particular  
 16 ingredient which he requires, Factor VIII, the clotting  
 17 factor, is I understand imported mainly from Alpha  
 18 Therapeutic Corporation in California. As you know,  
 19 there has been a serious spread of the AIDS problem in  
 20 the United States and it can be passed on by blood  
 21 transfusions.  
 22 "Mr Grindley tells me that another haemophiliac  
 23 recently died of AIDS, which he acquired from a  
 24 foreign ..."  
 25 SIR BRIAN LANGSTAFF: Must be "blood".

123

1 of AIDS is as yet unknown and there is no conclusive  
 2 proof that the disease has been transmitted by American  
 3 blood products.  
 4 "Nevertheless, I would like to assure your  
 5 constituent that the government is committed to making  
 6 this country self-sufficient in blood products. Over  
 7 £2 million has already been spent on improving the  
 8 production facilities of the Blood Products Laboratory  
 9 at Elstree, Herts, and a major redevelopment programme  
 10 is underway. When this is complete, the Central Blood  
 11 Laboratories Authority will have a new laboratory of  
 12 a size capable of meeting the demands of England and  
 13 Wales for blood products.  
 14 "Meanwhile, in the absence of a satisfactory  
 15 alternative, we shall be dependent upon imports from the  
 16 USA for an adequate supply of Factor VIII. While there  
 17 is as yet no test for AIDS, such imports prepared from  
 18 plasma collected after March this year will be subject  
 19 to new regulations initiated by the US Food and Drug  
 20 Administration designed to exclude donors from high risk  
 21 groups, eg persons with symptoms and signs suggestive of  
 22 AIDS, sexually active homosexual or bisexual men with  
 23 multiple partners, intravenous drug abusers.  
 24 "Although future supplies of Factor VIII, both for  
 25 export and for use in America, will be manufactured from

122

1 MS RICHARDS: Should be "blood product":  
 2 "This seems to me to be a very serious, and I should  
 3 be grateful if you could let me know what action the  
 4 DHSS is taking to make sure that AIDS is not imported  
 5 into the United Kingdom with foreign blood products. Is  
 6 there any way of synthesising these products, and is  
 7 there any programme to ensure that the United Kingdom is  
 8 self-sufficient in blood products at some foreseeable  
 9 time in the future?"  
 10 Then he refers to enclosing some copies of newspaper  
 11 articles which John had passed on to your MP.  
 12 A. Mm.  
 13 Q. We'll see the response to this letter. It's the next  
 14 page, please, Henry.  
 15 It's dated 16 December 1983, and it's from the Joint  
 16 Parliamentary Undersecretary of State and the Department  
 17 of Health, and it says this:  
 18 "Thank you for your letter of 2 November addressed  
 19 to Kenneth Clarke about acquired immune deficiency  
 20 syndrome (AIDS) and the supply of blood products in this  
 21 country.  
 22 "I can well appreciate the anxiety, particularly  
 23 amongst haemophiliacs and their families, which recent  
 24 press reports on AIDS may have caused, and would first  
 25 of all like to put matters into perspective. The cause

124

1 plasma collected in accordance with these regulations,  
 2 there is still a quantity of stock which has been made  
 3 from pre-March plasma. The FDA has recently decided not  
 4 to ban the use of such stocks because to do so would  
 5 cause a crisis of supply. The same considerations apply  
 6 here.  
 7 "We are of course anxious to minimise the possible  
 8 risk of the transmission of AIDS by blood donation in  
 9 this country. My department, in conjunction with  
 10 regional transfusion directors, has issued a leaflet,  
 11 'AIDS and how it concerns blood donors', which asks  
 12 people from high risk groups to refrain from giving  
 13 blood. A copy is enclosed. I hope you find this  
 14 useful."  
 15 That was the response that you and John received to  
 16 the concerns you'd raised about the spread of AIDS from  
 17 blood products.  
 18 A. Yes.  
 19 Q. That we can see was late 1983.  
 20 You recall John having some kind of skin or patch  
 21 test in November 1983.  
 22 A. Yes.  
 23 Q. We'll look at what happened to John's arm as a result,  
 24 but before we do that, can you remember what the test  
 25 comprised at all?

125

- 1 A. Well, I didn't actually go with John at the time. As  
2 far as I remember, it was like a prick test that you  
3 would have for allergies. As you know, at this time  
4 there was no actual blood test for AIDS as far as  
5 I know, and as far as I remember, it's a prick test on  
6 the arm like you would -- it was about, you know, four  
7 or five different pricks on the arm.
- 8 Q. We can see a photo of how John's arm responded. It is  
9 2336028, please, Henry.
- 10 So we can see there what happened to John's arm, and  
11 then could we go to the next page, please, and see what  
12 was written on the back of the photo. There's  
13 a difference between the black and the blue ink here.
- 14 A. Yes.
- 15 Q. That has some significance in terms of when it was  
16 written.
- 17 A. Yes, in the blue was what I wrote on the back of the  
18 photograph when I took it in November 1983.
- 19 The rest of it, in black, is what I've put on the  
20 photo for the Inquiry.
- 21 Q. So we can see the date that it was was November 1983,  
22 and your understanding, yours and John's, was this some  
23 form of AIDS reaction test.
- 24 A. Yes. In his notes it doesn't say AIDS, but that -- we  
25 called it an AIDS test.

127

- 1 A. Yes.
- 2 SIR BRIAN LANGSTAFF: Well, it must follow that if there was  
3 no test at the time, and this is referring to one, it  
4 must be looking at a sample retrospectively.
- 5 A. This test, when it says negative, it refers to the prick  
6 test.
- 7 MS RICHARDS: The skin test.
- 8 A. The skin test.
- 9 SIR BRIAN LANGSTAFF: I see.
- 10 MS RICHARDS: That was Mary and John's understanding at the  
11 time, that the skin test was the available test at the  
12 time, not a blood test.
- 13 A. Yes.
- 14 MS RICHARDS: And this is the information that they were  
15 provided with, as I understand from Mary.
- 16 SIR BRIAN LANGSTAFF: Thank you.
- 17 MS RICHARDS: Your recollection in your witness statement,  
18 Mary, was that John was given a diagnosis of HIV in  
19 1986.
- 20 A. Yes.
- 21 Q. The records and diary entries that we've been able to  
22 look at subsequently suggest that it was probably 1985.
- 23 A. Yes. It's a bit confusing as to what happened.
- 24 Q. Well, again, we'll just look at two or three documents  
25 to see what information there is in the records about

126

- 1 Q. Yours and John's understanding of the way in which  
2 John's skin reacted was that he was negative.
- 3 A. Yes. John explained it to me as -- that because the arm  
4 blew up, it meant he had good immunity at that time.
- 5 Q. We'll look at his clinical notes. 2336026, please,  
6 Henry. It's the entry at the very top of the page, if  
7 you could highlight the first three lines in yellow  
8 please, Henry.
- 9 We can see the words, "HTLV test neg 22/11/83  
10 sample."
- 11 A. That's right.
- 12 Q. So John's understanding that this was a negative and  
13 therefore a good result was shared by the clinicians or  
14 clinician who made the entries in the record.
- 15 A. Yes. And can I make the point that I think the first  
16 sentence possibly refers to him giving blood, because he  
17 used to give blood for research. But what that research  
18 was, I don't know.
- 19 SIR BRIAN LANGSTAFF: If the test for HTLV, HIV as it  
20 became, was not in operation in 1983, to your  
21 understanding, this must have been something written in  
22 afterwards, referring to a sample taken on 22 November.
- 23 A. I really can't say.
- 24 MS RICHARDS: This is the form in which you've received this  
25 extract from his notes.

128

- 1 dates.
- 2 Henry, could we have -- in fact, it's further down  
3 that page. Could you highlight the entry for  
4 1 April 1985, please.
- 5 **(Pause)**
- 6 So we can see the date is 1 April 1985.
- 7 A. Thank you.
- 8 Q. It refers to John being given Profilate, and then it  
9 says, "HTLV III positive. Serocon. To discuss  
10 implications with patient."
- 11 A. Yes.
- 12 Q. That appears to be the positive HTLV result.
- 13 A. Yes.
- 14 Q. But there is an entry in John's diary to suggest that  
15 what he was told in July of 1985 was that the test was  
16 negative, and we'll just look at that. 2336027.
- 17 We can see the date. If we could just zoom in,  
18 please, on the 16 July entry. Thank you. The date  
19 is July 1985. We can see a meticulous record here.
- 20 Is this your writing or John's writing?
- 21 A. This is John's writing.
- 22 Q. We can see a record there of a bleed, and the treatment  
23 that he received.
- 24 Then the very bottom entry is, "Got results from  
25 AIDS test. Neg."

- 129
- 1 A. Yes.
- 2 Q. So --
- 3 A. Two months later.
- 4 Q. John's understanding there -- we don't have any clinical  
5 records that show him being told of his diagnosis, but  
6 his understanding there was that it was negative.
- 7 A. Yes. I don't think he would lie -- we had a very good  
8 relationship. I don't think he would have lied to me  
9 and put that in the diary if it wasn't true.
- 10 Q. We can see a later blood test in October 1985.  
11 Henry, that's 2336023, please.  
12 We see this is a test for John. The serum date is  
13 21 October 1985, "Antibodies to HTLV III detected."  
14 Indeed, it was after that the records show you  
15 yourself went to be tested too.
- 16 A. Yes.
- 17 Q. And had an anxious wait until the negative result came  
18 back.  
19 So whether it was April, July or October, in the  
20 course of that year, John and you learnt that he had  
21 been infected with HIV.
- 22 A. I'm not clear. I'm still not clear. My memory is --  
23 has gone. I've tried to put things in the back of my  
24 mind for many years, and the years -- this a long time  
25 ago.
- 130
- 1 John always said that he converted from negative to  
2 positive on heat-treated blood, but I don't -- I don't  
3 know. I --
- 4 Q. Don't worry about the precise dates, Mary, because the  
5 records themselves do not paint a clear or consistent  
6 picture.
- 7 A. Yes. But I can't remember, when I went to have my  
8 tests, whether we actually knew at that time or not.
- 9 Q. Whatever the precise date, can you recall what  
10 information was provided to John about prognosis or  
11 treatment?
- 12 A. There again my memory has gone. I mean, I think the  
13 general prognosis was only a few years, but I don't know  
14 what specific things were said to John. We certainly  
15 thought it -- you know, he wouldn't live very long.
- 16 Q. Now, the two of you didn't tell many people of the  
17 diagnosis initially, you kept it to yourselves.
- 18 A. Yes. Yes.
- 19 Q. He was able to continue work and he didn't for a number  
20 of years show signs of physical deterioration, so you  
21 tried to carry on as normal as best you could.
- 22 A. Well, yes, for the sake of our young son, we did,  
23 really.
- 24 Q. It was in the early 1990s that John started to become  
25 seriously unwell.

- 131
- 1 A. That right, yes.
- 2 Q. We have a couple of photos that show you and John  
3 together in the early 1990s. Henry, could we have,  
4 first of all, please, 2336020.  
5 We can see that's a picture of the two of you. Was  
6 that in your garden?
- 7 A. No, it was in a relative's -- no, a friend's garden.  
8 That was the summer before John died.
- 9 Q. So that would've been 1993?
- 10 A. That's right, yes.
- 11 Q. And then we have 2336019, please.
- 12 A. And that's I think more or less the last picture I've  
13 got of John. That was about -- it's possibly about  
14 four months before he died.
- 15 Q. When John became ill, he decided he would tell people,  
16 and he made a list of the people he needed to tell.
- 17 A. That's right.
- 18 Q. And he just phoned them up and told them.
- 19 A. That's right, yes.
- 20 Q. You said that must have been incredibly difficult for  
21 him.
- 22 A. Well, yes, yes, it was, yes. But he -- that was the way  
23 he was -- that was what he was like. He -- I don't know  
24 whether you're coming to it, but he, two years before he  
25 died, when he more or less -- he was technically in work
- 132
- 1 for the last two years of his life because they very  
2 kindly paid him, but he gave up about two weeks -- two  
3 years before he died. And he actually went into the  
4 undertakers and he paid for his funeral plan, and  
5 subsequently he went in two or three times and actually  
6 told them what was wrong with him so that I wouldn't  
7 have to deal with that when the time came. And also he  
8 thought of the undertakers themselves, that they knew  
9 what they were dealing with, and how they could handle  
10 him.
- 11 Q. Indeed, he planned the music and the poetry he wanted to  
12 have at his funeral.
- 13 A. That's right. We planned it all together.
- 14 Q. He went to see the Reverend Tanner to ask him to conduct  
15 his funeral, which he agreed to do.
- 16 A. That's right.
- 17 Q. It was at that point you say this in your statement:  
18 "It was when we were planning John's funeral that  
19 I remember him lying down on the couch and crying for  
20 the very first time."  
21 A. Yes.
- 22 Q. "John was an incredibly strong person and I never knew  
23 him to cry. It was totally out of character. He said,  
24 'I don't want to die.'"  
25 A. What do you say to somebody? What do you say?

133

- 1 Q. You said, "I know you don't."  
 2 A. When your partner is dying like that, you don't know  
 3 what to say, do you?  
 4 Q. Before John had to give up work in 1992, he was starting  
 5 to have to take time off work and was starting to look  
 6 unwell.  
 7 A. Yes.  
 8 Q. So he took the decision to tell the managing director of  
 9 the firm of his illness.  
 10 A. That's right.  
 11 Q. And word got around.  
 12 A. Excuse me, I think he -- I think they already knew  
 13 because there had been incidents at work, which you may  
 14 refer to.  
 15 Q. Yes, we'll look at a couple of the examples you've given  
 16 in your statement, Mary.  
 17 Henry, could we have 2336006, please.  
 18 We can see on the left-hand side:  
 19 "Danger, watch out, it's a Mr Grindley!"  
 20 You've written on there:  
 21 "This is a copy of a notice put up on the wall at  
 22 the electronics firm where he worked."  
 23 Then if we have, please, the following page, page 3:  
 24 "Danger, government health warning, Mr Grindley can  
 25 seriously damage your health. Congratulation, you've

135

- 1 Q. You've given a couple of examples in your statement of  
 2 experiences you had with neighbours.  
 3 A. Yes.  
 4 Q. One was where you were living in a house with two flats  
 5 and there was a young couple who had somehow found out  
 6 of John's condition. The young woman upstairs came down  
 7 the stairs with her child in the pushchair, you opened  
 8 the doors at the same time and she suddenly shouted  
 9 something to the effect, "Your husband's got AIDS, your  
 10 husband's got AIDS."  
 11 A. John wasn't even positive then, so I don't know -- yes,  
 12 she backed off and I think that was the last I saw of  
 13 her. She got a transfer.  
 14 Q. You've also described another time where you had  
 15 a neighbour who was harassing you. You say she must  
 16 have found out about John. Amongst other things, you  
 17 saw her smash John's car window.  
 18 A. Yes.  
 19 Q. Eventually you were moved to a new house where you  
 20 didn't have trouble.  
 21 A. Yes, and that was through the police, actually.  
 22 Q. In 1987, early 1987, you saw the press reported some  
 23 comments made by Edwina Currie, then a junior health  
 24 minister, when she had said at a meeting:  
 25 "Good Christian people who wouldn't dream of

134

- 1 just meet HF head-hunters [sic]."  
 2 A. HF is high frequency. It's an electronics term.  
 3 Q. Again, that's a copy of a notice put up on the wall of  
 4 the firm where John worked.  
 5 A. Yes. Yes, I think this was a prank. I don't think it  
 6 was actually malicious, because John was well liked, but  
 7 I really don't quite know the motivation.  
 8 I think the management got to know about it, it was  
 9 a small family firm, and it was soon taken down, and the  
 10 firm were very good about it.  
 11 But I do have another document, which you probably  
 12 haven't got, where John actually had to sign to say that  
 13 he was -- it was some kind of pass to get into the store  
 14 where the electronics parts were that he needed for his  
 15 work. So he had to sign this pass to say he was -- it  
 16 was okay for him to come in.  
 17 So -- but I must say, the firm, John's firm, were  
 18 very, very good to him. Very, very good to him.  
 19 Q. Now, you talk in your statement more generally about the  
 20 stigma associated with HIV and AIDS.  
 21 A. Yes.  
 22 Q. You said that you and John had to lie to people.  
 23 Sometimes they became suspicious and you felt like  
 24 second class citizens.  
 25 A. That's right, yes.

136

- 1 misbehaving will not catch AIDS."  
 2 A. That's right.  
 3 Q. You wrote to her about this.  
 4 A. I did, yes.  
 5 Q. We can see the reply that you got at 2336002, page 2,  
 6 please.  
 7 It's dated 23 March 1987 and it says this:  
 8 "Dear Mrs Grindley,  
 9 "Mrs Currie has asked me to thank you for your  
 10 letter of 13 February about her remarks on 12 February  
 11 about AIDS. She has asked me to reply.  
 12 "I am sorry that you do not agree with what she  
 13 said. We are very concerned about the dangers of AIDS.  
 14 There is no cure or vaccine and no prospect that either  
 15 will be developed for some years. The government is  
 16 supporting research and funding a wide-ranging public  
 17 education campaign to bring home the threat that AIDS  
 18 poses to us all. It is essential that the message is  
 19 put across clearly, at every opportunity, that the only  
 20 way to stop AIDS spreading is for all our people to  
 21 behave responsibly.  
 22 "I understand that you take particular exception to  
 23 Mrs Currie's reminder about good Christian people not  
 24 catching the disease. She had in mind merely that, for  
 25 most people, a responsible and caring way of life should

137

1 protect them and their loved ones from the threat of  
 2 AIDS in future.  
 3 "Thank you for taking the trouble to write about  
 4 this important matter."  
 5 A. Can I just say --  
 6 Q. Yes.  
 7 A. -- how angry I was at the time, and how angry I still am  
 8 at her remark.  
 9 Q. Now, you'd started to try and explain things to your  
 10 son.  
 11 A. Yes.  
 12 Q. The time came when you had to tell him that his daddy  
 13 was seriously ill and that he might die.  
 14 A. Yes.  
 15 Q. Unsurprisingly, you describe him as becoming quite  
 16 anxious and not wanting to be parted from his father at  
 17 the time.  
 18 A. That's right.  
 19 Q. John also learnt around 1992, your statement says, that  
 20 he had been infected with hepatitis C.  
 21 A. Yes.  
 22 Q. But he had been aware of non-A, non-B hepatitis and  
 23 having that for some years.  
 24 A. He had, but I think at that time there was -- the hep C  
 25 test had just come in.

139

1 A. Yes, the one that's peculiar to AIDS.  
 2 Q. Yes, that was February 1994, and he was admitted to  
 3 St Thomas'.  
 4 A. That's right.  
 5 Q. Then at Easter of 1994 he had serious diarrhoea and  
 6 sickness.  
 7 A. Yes.  
 8 Q. And was admitted again.  
 9 A. It was -- I can never say it, crypto --  
 10 Q. Cryptosporidiosis.  
 11 A. Yes.  
 12 Q. We'll come back to that in a moment.  
 13 A. Yes.  
 14 Q. But around this time your father was also very ill.  
 15 A. Yes, he was, he -- I think -- in April 1993 the -- about  
 16 a year before, he'd had a major stroke and was in  
 17 Ipswich Hospital, and then he was -- I think he was  
 18 transferred to a hospital in the north of Suffolk, right  
 19 in the wilds of Suffolk, and to a geriatric hospital,  
 20 and he had another stroke there.  
 21 Q. Your father died about eight months before John.  
 22 A. Yes.  
 23 Q. In the period prior to your father's death you were  
 24 travelling to Suffolk to visit him.  
 25 A. Yes, yes.

138

1 Q. So the formal diagnosis was made and he was told.  
 2 A. Yes.  
 3 Q. You and he regarded it really as just one more thing  
 4 because he was so ill with HIV by that stage.  
 5 A. He was, yes.  
 6 Q. But for the sake of completeness, we will put up  
 7 a letter that was sent to you subsequently by the  
 8 UKHCDO. It is 2336008, page 2, please.  
 9 It's a letter in response, I think, to a request  
 10 from you for records about batch numbers.  
 11 A. Yes.  
 12 Q. It's May 2003. It's from Dr Hay. But it says this:  
 13 "Much later epidemiological evidence suggests that  
 14 patients developed hepatitis C following their first  
 15 exposure to concentrate, which in your husband's case  
 16 was BPL concentrate in 1969."  
 17 So your understanding is that John had been infected  
 18 with non-A, non-B hepatitis C for many years.  
 19 A. Yes.  
 20 Q. It was a relatively short period of time between John  
 21 becoming seriously ill and his death.  
 22 A. He was losing weight and getting very tired, but I don't  
 23 think he had major symptoms until he had two opportunist  
 24 infections.  
 25 Q. He had pneumonia.

140

1 Q. And then coming back to London.  
 2 A. Yes.  
 3 Q. And you had a particular fear in your mind at that time.  
 4 A. Yes.  
 5 Q. Because John had spoken of suicide.  
 6 A. That's right, yes. He -- well, he said in the past that  
 7 if things got too bad he would inject himself with air.  
 8 And I -- because he wasn't -- he was off work by then,  
 9 but he wasn't too bad, he could just about fend for  
 10 himself for a day or so, you know, and -- but  
 11 I sometimes would have to stay overnight in my -- in my  
 12 father's house when visiting him in [redacted] or  
 13 further up in Suffolk, and I didn't know, when I came  
 14 back, what I might find.  
 15 Q. Your fear was you might come home from visiting your  
 16 dying father to find your husband had taken his own  
 17 life.  
 18 A. I don't think John would've done it, but --  
 19 Q. But you had that extra worry.  
 20 A. Yes.  
 21 And also can I just mention, that in between my  
 22 father dying and John dying, John's father died, and we  
 23 went to see -- John was just about able to walk then.  
 24 We went to see John's father in hospital as he was  
 25 dying, and John said to his father, "See you soon, Dad.

- 141
- 1 See you soon, Dad."
- 2 Q. Was that the last time he saw his father?
- 3 A. Yes. They are actually -- they are buried together or
- 4 scattered together, the ashes are scattered together.
- 5 Q. So after -- when John was in hospital for the second
- 6 time around Easter 1994, you had to go and help nurse
- 7 him in hospital because there weren't sufficient nursing
- 8 staff to --
- 9 A. Well, there were nurses around, but they were busy. He
- 10 needed so much attention that, you know, he wasn't
- 11 getting it, you know. I had to help him onto the toilet
- 12 and things like that and try and feed him. He wasn't
- 13 eating much because -- and it was coming out of
- 14 different orifices, yes.
- 15 Q. You had to leave your son, who was now a teenager, to
- 16 fend for himself, you said, which you still feel guilty
- 17 about.
- 18 A. Yes.
- 19 Q. John was sent home from St Thomas' with little warning.
- 20 A. That's right.
- 21 Q. And you describe he was sent home in an ambulance with
- 22 other patients and he was the last to be dropped off
- 23 because you lived furthest away, so it was a long
- 24 journey.
- 25 A. I was with him when he was actually discharged, but they
- 142
- 1 wouldn't allow me to go home in the ambulance with him,
- 2 and so I managed to get home. It was a long way from
- 3 St Thomas' to where we lived, and he was the last one to
- 4 be dropped off. They discharged him, and when the
- 5 ambulance dropped him off, he almost fell into my arms.
- 6 Q. You had difficulty getting him upstairs.
- 7 A. Yes, that's right, yes.
- 8 Q. And for the following six weeks, you looked after him on
- 9 your own.
- 10 A. Yes, the doctor was supposed to -- my local GP was
- 11 supposed to come. He didn't come and he didn't come and
- 12 he never did come.
- 13 They did eventually send a nurse, but basically she
- 14 just brought -- oh, I can't think what you call them --
- 15 well, sort of nappies -- not nappies, but --
- 16 Q. Pads.
- 17 A. Pads, that's right, for him, and that was about all.
- 18 So it was a very -- and we were sleeping in the same
- 19 bed because we didn't have any more room. It was -- it
- 20 was hell, actually.
- 21 Q. Eventually nurses from the local hospice helped you
- 22 nurse him for a few days at home.
- 23 A. Yes, that's right.
- 24 Q. Then John was transferred to St Christopher's Hospice,
- 25 which is where he had wanted to --
- 143
- 1 A. Yes, before he was discharged from St Thomas', he said
- 2 he wanted to die in St Thomas', but prior to that we
- 3 had -- when he was well, we had looked at a hospice.
- 4 Q. You visited him every day whilst he was there.
- 5 A. That's right, yes.
- 6 Q. And you've said the staff there were very good.
- 7 A. They were wonderful.
- 8 Q. And you were allowed to sleep there for the last four
- 9 days.
- 10 A. Yes, in a bed in the same room, yes. I didn't wash,
- 11 I didn't take my clothes off, I didn't eat, I just paid
- 12 attention to him.
- 13 Q. On the last day of John's life, you say his mother was
- 14 there.
- 15 A. Yes.
- 16 Q. There was a nurse from St Thomas' there.
- 17 A. Yes, she had recently left her job at St Thomas', but
- 18 she'd had some experience of palliative care and she'd
- 19 come along, so she was there, yes.
- 20 Q. You were there, and you say in your statement:
- 21 "We willed him to go and he died peacefully."
- 22 A. That's right. Apparently that's what you do, going on
- 23 the advice of the nurse there. She said that was what
- 24 we should do, and that's what we did.
- 25 Q. And so John died June of 1994.
- 144
- 1 A. That's right, yes.
- 2 Q. And he was just 41 years old.
- 3 A. That's right.
- 4 Q. You've said in your statement that your initial emotion
- 5 was a sense of relief for him that his pain was over.
- 6 A. That's right, yes.
- 7 Q. But it was over the following months that things really
- 8 hit you.
- 9 A. That's right, yes.
- 10 Q. And you've struggled really ever since then to cope with
- 11 the loss of John.
- 12 A. I have, yes.
- 13 Q. You've explained in your statement you got to a stage
- 14 where you tried to do lots of things, lots of classes,
- 15 lots of courses to try and keep yourself occupied.
- 16 A. Yes.
- 17 Q. But you became stressed, anxious and depressed.
- 18 A. Yes. I did try to go back to teaching after 18 months.
- 19 I had about two terms, it was just a temporary post, in
- 20 a nursery. It all became too much. I -- it was the day
- 21 after the ... Dunblane -- Dunblane incident, and I had
- 22 a breakdown in the classroom in front of 25 small
- 23 children, nursery children, and I never went back to
- 24 teaching after that.
- 25 Q. You did begin to see a psychologist regularly.

- 145
- 1 A. Yes.
- 2 Q. You found --
- 3 A. She's very kindly here today to support me.
- 4 Q. And you've said that you found a psychologist who was
- 5 one of few who had specialist knowledge of AIDS.
- 6 A. Yes.
- 7 Q. And that she was a great help to you.
- 8 A. She was, yes, both -- I saw her before John died and
- 9 after.
- 10 Q. But you've described in your statement the impact of
- 11 losing John on your life, and if I may, I'm just going
- 12 to read out a passage from your statement where you
- 13 describe it very powerfully. You say this:
- 14 "I feel I have lost so many things in my life and
- 15 the whole situation has affected me beyond measure.
- 16 I have lost the love of my life and been left to bring
- 17 up my son alone. I lost my career as a teacher and have
- 18 not been able to work since because of bad depression.
- 19 I am still devastated by not having a second child.
- 20 Since my son left home, now married with two small
- 21 children, I have lived alone. It is very lonely with
- 22 only the four walls to talk to. There is nobody to
- 23 confide in, to make me a cup of tea or care for me when
- 24 I'm ill, although my family help as much as they can and
- 25 have been a great comfort, which is much appreciated.
- 146
- 1 "I think people must think that maybe after all
- 2 these years have gone by I would somehow forget what had
- 3 happened. In fact, John's death has permeated every
- 4 area of my life and affected every area of my life.
- 5 I lost the love of my life and he is not here anymore."
- 6 I am going to ask you about two further matters,
- 7 Mary.
- 8 A. Mm-hm.
- 9 Q. Financial implications of what happened to John.
- 10 A. Yes.
- 11 Q. Then some of your campaigning activities.
- 12 A. Okay.
- 13 Q. As we've heard, John was only 41 when he died and he had
- 14 to give up work two years before, and you were unable to
- 15 return to work.
- 16 A. Yes.
- 17 Q. So financially, things have not been easy for you in the
- 18 years that followed.
- 19 A. It hasn't been as bad for me as a lot of other widows.
- 20 I did have a pension from John because he was in work
- 21 until the end of his life. Although he hadn't worked
- 22 for two years, the firm kindly paid him. He was just
- 23 about to go on half pay when he died.
- 24 I had a teacher's pension, and I now have state
- 25 pension, you know, old age pension. Somehow we've

- 147
- 1 managed. And I've had the ex gratia payments.
- 2 Q. You use those to help with housing costs.
- 3 A. That's right. Yes, I still have a mortgage, but it's
- 4 an interest-free mortgage and it's very small now.
- 5 I think -- you know, as I say, I'm -- I manage.
- 6 Q. You've observed in your statement that for the first
- 7 four or so years after John died, and your son was still
- 8 under the age of 18, you received regular payments from
- 9 the Macfarlane Trust, but after that, nothing.
- 10 A. That's right. At that time they -- the Macfarlane Trust
- 11 only gave payments to widows with children or disabled
- 12 widows.
- 13 Q. Since that time, and since there have been means tested
- 14 schemes, you've refused to apply because you strongly
- 15 disagree with the principle of means testing.
- 16 A. Yes, and I think most people here would agree with that.
- 17 Q. You have received some funding from the English Infected
- 18 Blood Scheme that have assisted you to recently receive
- 19 counselling from the same psychologist.
- 20 A. That's right, and I did -- last year I did receive one
- 21 winter payment, but neither of those were means tested.
- 22 Q. In terms of the Skipton Fund, you said you had to fight
- 23 hard for those two payments. You were turned down two
- 24 or three times, but you were eventually accepted with
- 25 the help of one of the doctors from St Thomas'.
- 148
- 1 A. That's right, Dr Bevan from St Thomas' helped me get
- 2 stage 1 and stage 2. Stage 2 I got on the probability
- 3 that John had hep C and -- well, we knew from the test
- 4 that he had hep C, and that he would possibly go on, if
- 5 the AIDS didn't get him -- well, the AIDS did get him
- 6 first, but, you know, the hep C could have been
- 7 a problem for him.
- 8 Q. You've recorded in your statement that you once went to
- 9 see Martin Harvey when he first became chief executive
- 10 of the Macfarlane Trust --
- 11 A. That's right.
- 12 Q. -- to ask for regular help for all widows not just
- 13 yourself.
- 14 A. Yes.
- 15 Q. How did that conversation go?
- 16 A. Well, I went to see him when he first became
- 17 chief executive of the Macfarlane Trust. As you say, it
- 18 wasn't really for me, I -- as much as some widows that
- 19 I knew were struggling, and I thought he's a new broom,
- 20 he'll be sympathetic. Boy, was I wrong.
- 21 He said to me, "What did your husband do?" And
- 22 I said, "He was an electronics engineer." And he said,
- 23 "Well, don't they have some organisation or a scheme
- 24 where they can help you?" And he never said anything
- 25 about, you know, the Macfarlane Trust helping me, and

149

1 I was disgusted. I couldn't -- I couldn't believe he  
2 was saying that to me.

3 Q. We can see that John had been concerned about issues of  
4 financial stability and financial impact during his  
5 life. In particular, life insurance and costs of  
6 treatment. We'll look at a letter in that regard.  
7 Henry, it's 2336007, please. It's page 6.

8 It's a letter of 19 April 1988, and it's from the  
9 Department of Health and Social Security, the  
10 Parliamentary Undersecretary of State for Health  
11 addressed to Colin Moynihan MP.

12 A. Mm-hm.

13 Q. "Thank you for your letter of 1 March about your  
14 constituent, Mr J Grindley, and his concern over  
15 availability of life assurance for haemophiliacs  
16 infected with the human immunodeficiency virus and the  
17 funding of treatment for haemophiliacs. I am sorry for  
18 the delay in replying."

19 Then the first paragraph deals with the issue of  
20 insurance and says this:

21 "Decisions as to the risks undertaken by insurance  
22 companies are a matter for the commercial judgment of  
23 individual insurance companies. The government does not  
24 intervene in these decisions and recognises that  
25 insurance companies must take account of the commercial

151

1 Retrovir. He had to pay for a payment card, you know,  
2 for prescriptions, which we were absolutely disgusted  
3 about.

4 Q. Now, you've continued campaigning and letter writing in  
5 the years since John has died.

6 A. Yes.

7 Q. We've looked already at some of the letters sent by or  
8 in respect of matters that you raised or John raised,  
9 but we're just going to look at three more.

10 Henry, could we have 2336007, page 11, please.

11 We can see that the issue that was being raised  
12 here -- it's 18 April 1995:

13 "Dear Mrs Grindley,  
14 "Thank you for your letter about the hepatitis C  
15 campaign being run by the Haemophilia Society."  
16 So this is the year following John's death.

17 A. Yes.

18 Q. "I have much sympathy with your comments and with the  
19 points which the Society make. As you may know, the  
20 issue has already been ventilated in the House of Lords,  
21 where the minister explained that the government does  
22 not accept liability for those infected by contaminated  
23 blood products on the grounds that such patients  
24 received the best treatment available, given the medical  
25 knowledge at that time.

150

1 implications AIDS and HIV infection present. However,  
2 the government is in touch with the Association of  
3 British Insurers to ensure that each new application for  
4 cover is judged solely on the individual circumstances  
5 of the proposer."

6 Pausing there, John had obviously been concerned  
7 about a difficulty or inability to get life insurance.

8 A. That's right. Yes. He had been with I think the  
9 Prudential, and had some kind of -- I can't remember the  
10 exact policy, but just as some kind of savings policy,  
11 and he had a payout, and then he decided to try for life  
12 insurance, but he was turned down. I think there were  
13 questions about AIDS, I can't -- I think that's why we  
14 must have written.

15 Q. Then the letter goes on to say this:

16 "The provision of health services for haemophiliacs  
17 is well established and rests with individual health  
18 authorities, who have detailed knowledge of local  
19 circumstances and are therefore best placed to determine  
20 local needs and priorities."

21 Now, as I understand it from your statement, and it  
22 may have been what prompted John's approach to the MP,  
23 John was being charged for one particular kind of drug.

24 A. Yes, he was being charged -- because he was still in  
25 work, he was charged for his antiviral drugs, AZT,

152

1 "Whilst a parallel can be drawn with those who  
2 contracted HIV, the minister claims that this was  
3 a special case, that the consequences are not comparable  
4 and that agreeing to what would be in effect no-fault  
5 compensation could involve substantial expenditure, not  
6 only for those cases, but for others of a similar nature  
7 for which a precedent would have been created.

8 "However, having explained the government's stance,  
9 I do accept that there is an argument for consideration  
10 being given to ex gratia payments in certain cases and I  
11 shall seek opportunities to raise this in the House of  
12 Commons or informally with ministers."

13 So you were involved in trying to support a campaign  
14 for payments for those who had been infected with  
15 hepatitis C.

16 A. Yes, yes.

17 Q. Could we have, please, Henry, within the same exhibit,  
18 page 25.

19 A. Can I just say that --

20 Q. Yes, of course.

21 A. -- this is off my own bat individually. I wasn't  
22 involved in any particular group at that time.

23 Q. So page 25, please.

24 We can see this is a more recent letter, it's  
25 19 June 2009, and this is after Lord Archer had

153

- 1 reported. You gave evidence to the Archer Inquiry.
- 2 A. That's right, yes.
- 3 Q. Again, you have written to Dawn Primarolo about the  
4 government's response to Lord Archer's report, and the  
5 letter says this:
- 6 "I was sorry to read of the death of your husband  
7 and that you have been affected by the issue of  
8 contaminated blood. I appreciate that this must be  
9 a difficult time for you.
- 10 "This government deeply regrets that patients  
11 acquired serious infections as a result of NHS treatment  
12 some two or more decades ago, and extends every sympathy  
13 to the patients and their families who have suffered as  
14 a result of the very treatments which should have  
15 transformed their lives for the better.
- 16 "The department understands the sense of grievance  
17 that some people may feel as a result of what has  
18 happened, and that there are deeply held opinions on the  
19 appropriateness and timeliness of decisions and actions  
20 taken many years ago. In his report, Lord Archer did  
21 not find the government of the day to have been at fault  
22 and did not apportion blame.
- 23 "The government is committed to ensuring that people  
24 with haemophilia and others who have been infected with  
25 hepatitis C and/or HIV from blood and blood products are

155

- 1 A. Yes.
- 2 Q. It says this:
- 3 "I was very sorry to read of your husband's death.  
4 The government is deeply sorry about the events that led  
5 to the infection of so many people with HIV and  
6 hepatitis C and has the utmost sympathy for all of those  
7 who were affected.
- 8 "I can assure you that the department sympathises  
9 with the distress and deep sense of injustice felt by  
10 the families of haemophilia patients infected with  
11 blood-borne viruses through their treatment. It is  
12 tragic that people were harmed because of the very  
13 treatments that were supposed to help them."
- 14 Pausing there, although we don't have your letter,  
15 Mary, it seems from what follows you were asking for  
16 a public inquiry.
- 17 A. Yes, possibly, yes, I was.
- 18 Q. It says this:
- 19 "It has been the view of successive governments that  
20 there is no justification for a public inquiry into  
21 these matters in England after all this time. The  
22 relevant facts are already in the public domain. All  
23 relevant documents held by the Department of Health on  
24 blood safety covering the period 1970 to 1985, when the  
25 heat treatment of clotting factor products was

154

- 1 well cared for, supported in their communities and fully  
2 informed about how best to look after their health. The  
3 government gave very careful consideration to  
4 Lord Archer's recommendations and believes its final  
5 response is as positive as possible. The government has  
6 published the final response on the Department of Health  
7 website."
- 8 Then we have a link to it:
- 9 "This includes details of the steps taken in  
10 response to each recommendation.
- 11 "Owing to diary commitments, it is not possible to  
12 meet with the minister. However, I hope this reply is  
13 helpful."
- 14 You had been involved with the Archer Inquiry, you  
15 gave your evidence.
- 16 A. Yes.
- 17 Q. And this letter was prompted by your view that the  
18 government's response was inadequate.
- 19 A. Yes, that's right.
- 20 Q. Then, finally, Mary, 2336007 -- so same exhibit, Henry,  
21 but page 28, please.
- 22 We can see this is more recent still, November 2012.  
23 Again, you've written to the Department of Health -- or  
24 in fact you've written to David Cameron and the letter  
25 has been passed to the Department of Health.

156

- 1 introduced, have now been published in line with the  
2 Freedom of Information Act. If any further documents  
3 from that period come to light, the department will also  
4 publish them in line with the Freedom of Information  
5 Act. The issue now is how best to support those  
6 affected.
- 7 "Successive governments have recognised the plight  
8 of all those affected by NHS supplied contaminated blood  
9 or blood products, and a number of ex gratia payment  
10 schemes have been put in place to provide financial  
11 support. To date, these schemes have paid out over  
12 £264 million."
- 13 If we can go over the page.
- 14 "In January 2011, the then Secretary of State for  
15 Health, Andrew Lansley, made a statement to the House of  
16 Commons in which he said he viewed the events that led  
17 to thousands of patients contracting hepatitis C and HIV  
18 from NHS supplied blood and blood products as one of the  
19 great tragedies of modern healthcare. He also said how  
20 sorry he was that it had happened and expressed his deep  
21 regret for the pain and misery that many have suffered  
22 as a result."
- 23 Did you regard that as an adequate answer to your  
24 concerns?
- 25 A. Not at all, no. No.

157

1 Q. Mary, it's clear from your statement and from some of  
 2 the many letters you've written -- and we've only  
 3 touched on some of them --  
 4 A. Yes.  
 5 Q. -- how important it's been to you to try and raise these  
 6 issues, as you and John did during John's life and  
 7 subsequently.  
 8 A. Yes.  
 9 Q. I just wanted to read one further bit from your  
 10 statement where you address this.  
 11 You say this:  
 12 "I felt all along that I never failed John in life,  
 13 and I tried to be the best wife I could under the  
 14 circumstances. I know he loved me and he told me near  
 15 the end what I good wife I had been. However, I failed  
 16 him in death, because I haven't been able to get justice  
 17 for him and the thousands of others who have died or are  
 18 still alive, many of whom I know personally, or the  
 19 widows who I know or don't know.  
 20 "I know that John would want me to try and be happy.  
 21 He didn't want me to cry after his funeral, and  
 22 I didn't, but I've cried buckets since and still do. He  
 23 said when he was ill that he wanted me to grieve for him  
 24 for a year and then forget him, perhaps remarry with his  
 25 blessing. Well, I have learnt that is impossible. We

159

1 the British Government about VAT, and the British  
 2 Government have said, you know, it was up to the  
 3 European Parliament.  
 4 So -- but anyway, eventually it did come in via --  
 5 or first of all with Frank Dobson, I think he brought it  
 6 in for children, and then subsequent years it's come in.  
 7 Q. Mary, those are the questions I have for you. I'm going  
 8 to ask Mr Williams if there's anything further he'd like  
 9 me to ask.  
 10 **(Pause)**  
 11 Mary, there's just one further point which  
 12 Mr Williams asks me to raise with you.  
 13 A. Yes.  
 14 Q. We don't have the letters to display on screen, but  
 15 I certainly have seen them and they've been provided by  
 16 you, it's correspondence in February 1984.  
 17 A. Uh-huh.  
 18 Q. This is after John had undertaken that form of skin  
 19 testing.  
 20 A. Right.  
 21 Q. It's correspondence in which John was asked by  
 22 St Thomas' to donate blood and the letter reads:  
 23 "Dear Mr Grindley,  
 24 "We are desperately short of haemophiliac blood at  
 25 the hospital, which means we have difficulty in

158

1 still have no closure, no admission of wrongdoing.  
 2 Everything has been swept under the carpet and no one  
 3 listened."  
 4 That's one of the reasons why you have continued  
 5 over these years to write these letters, raise these  
 6 issues.  
 7 A. Yes.  
 8 Q. Because you believe that's the right way for you to  
 9 honour John's memory.  
 10 A. Yes. Can I also say, I did campaign over recombinant  
 11 Factor VIII.  
 12 Q. You did. We have a number of those letters in the  
 13 materials you've provided to the Inquiry.  
 14 A. Yes.  
 15 Q. That was a very important part of --  
 16 A. That was important to me, because I wanted -- I wanted,  
 17 you know, people to be free of viruses and things. So  
 18 that's why I campaigned, and I had a question put by my  
 19 MEP to the European Parliament. At the time recombinant  
 20 Factor VIII had VAT on it, I don't know whether it still  
 21 has, but -- and this is what was stopping the  
 22 haemophilia centres from purchasing it. So they were --  
 23 they were still, you know, having human Factor VIII in  
 24 their centres because of the cost.  
 25 And -- but the European Parliament said it was up to

160

1 monitoring operations on patients with a problem similar  
 2 to yours. We would be very grateful if you could donate  
 3 some of your blood to us, assuming that you have not  
 4 treated yourself within the last week."  
 5 I think, from memory, there were two such requests  
 6 for John to donate blood.  
 7 A. Could you just tell me the dates again please?  
 8 Q. The first letter is 17 February 1984. The second letter  
 9 I think follows fairly shortly thereafter. October of  
 10 1984.  
 11 Do you recall John being asked to donate blood?  
 12 A. Well, I don't know specific dates, but, yes, he did,  
 13 because he was interested in medical research. He  
 14 frequently gave blood for research at St Thomas'. But  
 15 what it was for, I don't know.  
 16 Q. Thank you.  
 17 Mary, those are the questions, but is there  
 18 something further that you would like to say?  
 19 A. Could I just raise, before I read my -- what I've got to  
 20 say, the incident with Dr Savidge at St Thomas'. This  
 21 was in 2003. I had requested from the National  
 22 Haemophilia Database John's medical records, treatment  
 23 records, for the American litigation, and the notes  
 24 actually didn't come to me, I had to pick them up via  
 25 St Thomas', from Dr Savidge. And Dr Savidge had a big

161

1 row with me in the reception room -- reception at the  
 2 Haemophilia Centre. He didn't want me to have the  
 3 notes. And eventually he did give them to me, but when  
 4 he gave them to me, he said, "These are possibly not  
 5 accurate anyway". What he meant by that, I'm not quite  
 6 sure, whether he was hiding something from me, or -- he  
 7 possibly thought I was going to sue him, which I wasn't.  
 8 But I did get the notes eventually, and it really  
 9 did have a very strong effect on me. I ran into the  
 10 toilets at St Thomas' and cried.  
 11 Q. And those were treatment records from the National  
 12 Haemophilia Database, as you've explained.  
 13 A. Yes.  
 14 Q. Previously you'd actually approached St Thomas' and  
 15 asked for copies of John's records.  
 16 A. Yes.  
 17 Q. You were told it was all too long ago and they'd been  
 18 destroyed.  
 19 A. That's right. I did get his ordinary medical records,  
 20 but not the treatment records.  
 21 Q. Mary, there was something further I think you want to  
 22 say.  
 23 A. Yes, if you wouldn't mind. Some of this has been  
 24 repeated.  
 25 About a year after my husband died, I went to the GP

163

1 father, and a mother who was stricken with grief. He  
 2 has only just started to open up to me this week by  
 3 allowing me to read his witness statement. I hope now,  
 4 after more than 25 years, we can begin to talk about  
 5 what has happened more openly.  
 6 I am just one of thousands of people who have  
 7 suffered from this dreadful tragedy. Indeed, as we  
 8 know, thousands have died, and those left and their  
 9 families have been left to endure horrendous physical  
 10 and mental pain and suffering. What is more, they have  
 11 been left without help, or no help, having to be means  
 12 tested and begging for money.  
 13 The widows, some of whom I know, have been -- and  
 14 some of whom have been tragically infected themselves,  
 15 have been made to feel like second class citizens,  
 16 scroungers, and treated worse than dogs and left to  
 17 survive themselves.  
 18 Yet, all this should never have happened, and what  
 19 has happened until now has been swept under the carpet  
 20 and truths denied. I have in a small way been a little  
 21 voice battling against the odds through nearly 40 years  
 22 by my individual campaigning, trying to halt  
 23 unsuccessfully the use of unsuitable donors from  
 24 American prisons and homeless. Still, the  
 25 pharmaceutical companies continued to send out untreated

162

1 because I was very depressed, and this was before my  
 2 breakdown. He was very unhelpful, and more or less told  
 3 me to get over what happened and move on in a cold --  
 4 very cold manner. A few friends and relatives have told  
 5 me since to my face that this happened all long ago, and  
 6 I should move on.  
 7 But how can I? I live with it every day. On the  
 8 surface I may appear that I've moved on. I'm known for  
 9 my smile, but underneath I haven't, and I don't think  
 10 I ever will. I have many activities, feel I'm very  
 11 popular and well liked, I enjoy socialising and I have  
 12 plenty of friends, both ones who know my situation and  
 13 those who don't. But I also have had deep periods of  
 14 deep depression and loneliness, and even at times I've  
 15 had suicidal thoughts.  
 16 There have been and still are days when I have had  
 17 to force myself out of bed, where I don't wash all day.  
 18 I sit around in my underwear and my nightwear with the  
 19 curtains closed. I have been under a wonderful clinical  
 20 psychologist who is here today for the past 18 months,  
 21 who I was seeing before John died, and she is currently  
 22 seeing me through this very difficult time and I'm sure  
 23 beyond, and I thank her for all her support.  
 24 My son has also suffered greatly, going into denial  
 25 and not knowing how to deal with what happened with no

164

1 blood products, even when they knew heat treated blood  
 2 was available, for their profit, and the American  
 3 government still allowed them to do it.  
 4 I tried to halt the importation of those blood  
 5 products. I wrote to Margaret Thatcher, Kenneth Clarke  
 6 and others who deliberately ignored what was happening  
 7 and to successive governments who ignored pleas for help  
 8 and never accepted responsibility, which was really  
 9 their duty of care to the haemophilia community. But  
 10 those letters fell on deaf ears.  
 11 I battled with the Macfarlane Trust to try to get  
 12 regular payments for all widows, but to no avail.  
 13 I also campaigned for recombinant Factor VIII, but  
 14 initially it was too expensive for haemophilia centres  
 15 because of the VAT, and then only given eventually to  
 16 children.  
 17 I promised my husband, when he was very ill, that  
 18 I would seek justice for him. Until now, my efforts  
 19 have been in vain. Although I feel I did all I could  
 20 while he was alive, I feel I have failed him in death,  
 21 because I have not been able to get the justice for him  
 22 and all the others who so tragically died or have been  
 23 infected or affected.  
 24 I will fight on.  
 25 I'm extremely grateful for this opportunity to give

165

1 my evidence. We all hope Sir Brian and his wonderful  
 2 team will finally uncover the truth by this public  
 3 inquiry, and I thank them for all their hard work.  
 4 I just hope, as we all do, that the government will  
 5 be listening to these findings and act accordingly, to  
 6 give all those infected and affected some closure and  
 7 that we might finally get some closure that we have been  
 8 denied.  
 9 I would like to thank my wonderful daughter-in-law  
 10 here for all her help with my witness statement and for  
 11 being here at my side. For my wonderful son, who has  
 12 supported me through many difficult years. My friends  
 13 and family here today. Lynne Kelly from  
 14 Haemophilia Wales, who has supported me both before the  
 15 public inquiry and since, and who has worked tirelessly  
 16 to help bring this public inquiry, together with others.  
 17 I would like to thank the staff at Watkins & Gunn  
 18 particularly Michael Imperato, Lucy O'Brien and Megan  
 19 Rogers, and my barristers, Lloyd and Christian, for  
 20 their tireless work on my behalf.  
 21 Very lastly, I would like to pay tribute to all  
 22 those infected and affected who have given their  
 23 evidence and all their witness statements to this  
 24 inquiry. They have shown great courage to do so.  
 25 I have met some amazing people, both before and during

167

1 of the Inquiry to an end, and it's time to reflect on  
 2 what we've heard and what we have yet to hear.  
 3 First, then, what we have heard.  
 4 Many of those who have given evidence have thanked  
 5 the inquiry, and me, for giving them the opportunity  
 6 they've had to do so. Well, I'm pleased about that, and  
 7 you couldn't expect me to be anything else, could you?  
 8 But thanks are really due the other way round. It takes  
 9 no particular courage to sit here, rather than there  
 10 **(Indicates)**.  
 11 Doing that doesn't risk me, nor does sitting there  
 12 risk most of the lawyers or inquiry staff, the bringing  
 13 back to the surface of memories which may be too painful  
 14 to be remembered. It doesn't involve me or counsel to  
 15 the Inquiry or any of the Inquiry team having to reveal  
 16 some of the most intimate details of our personal lives  
 17 to total strangers, or to catalogue the indignities of  
 18 trying to survive physically, mentally and financially.  
 19 Both individually and often as a family after the  
 20 death of someone we valued above all others, it is to me  
 21 remarkable that so many, despite their mixed emotions,  
 22 have wanted to give evidence, and that others whose  
 23 story deserved to be heard orally have allowed  
 24 themselves to be persuaded to tell it in that way,  
 25 despite the personal cost that it might involve.

166

1 this inquiry. They are forever in my heart.  
 2 Thank you.  
 3 MS RICHARDS: Thank you, Mary.  
 4 Sir Brian.  
 5 SIR BRIAN LANGSTAFF: We have ended this stage of the  
 6 Inquiry on a very powerful note. Not only powerful for  
 7 your own story, without the documents, but all the more  
 8 so for the way it has been methodically documented  
 9 almost at every stage, and I can only thank you for  
 10 that.  
 11 I would comment that those of us who have listened  
 12 to you may perhaps reflect on your saying that  
 13 haemophiliacs in your experience are people with real  
 14 strength.  
 15 A. That's right.  
 16 SIR BRIAN LANGSTAFF: They may reflect that people who marry  
 17 them also have real strength.  
 18 A. I think that's why we chose haemophiliacs, because of  
 19 their strength.  
 20 SIR BRIAN LANGSTAFF: You're fighting on.  
 21 A. Yes, I am. I am fighting on, Sir Brian.  
 22 SIR BRIAN LANGSTAFF: Thank you very much.  
 23 A. Thank you very much, thank you.  
 24 **(...Applause...)**  
 25 SIR BRIAN LANGSTAFF: Mary's evidence has brought this phase

168

1 In my view, true courage is shown when people have  
 2 a choice between an easy option and a risky one, and  
 3 they opt for the risky choice because that is the one  
 4 which is most likely to help others, or allow them to do  
 5 their duty by someone who is no longer here to do it for  
 6 themselves.  
 7 So I'd like to pay tribute to every one of those who  
 8 have chosen to give evidence when asked, for they have  
 9 shown that sort of courage, and each in their own way,  
 10 despite the risks of adding to their personal pain, has  
 11 helped paint a composite picture which will help in  
 12 trying to establish the truth. They have shone a light  
 13 onto what has happened, and the everyday consequences  
 14 and ripple effects of living with it, often for 30 years  
 15 or more.  
 16 The Inquiry is particularly interested in the  
 17 overall picture. Each individual account given may be  
 18 subtly different, one from another, but each is of value  
 19 not just for its own sake, though it certainly is of  
 20 value for that, but because taken together, they've  
 21 painted the same themes from different perspectives.  
 22 They've done that so clearly that you don't need me to  
 23 recite those themes. Any observer can see them for  
 24 themselves. They shape the context for what must  
 25 follow.

169

1 But let me just mention a couple of the emerging  
2 themes.

3 First, it's clear that the impact of decisions made  
4 in the 1960s, 1970s and 1980s, or the consequences of  
5 not making decisions which might have been made,  
6 continue to this day.

7 Second, the evidence we heard only this week of  
8 a widow who became homeless after her husband's death,  
9 having had to spend the time caring for him when she  
10 might have spent it working for a wage had he not been  
11 infected, is just part of an overall picture of  
12 relentless hardship for many.

13 It's now just over a year ago since I wrote to the  
14 minister for the Cabinet Office calling for decisive  
15 action to be taken to alleviate this before any  
16 fundamental review which might follow from the Inquiry's  
17 conclusions.

18 Some evidence we've heard suggests that the steps  
19 taken by the government so far as result of that letter,  
20 increasing payments in England, have helped, but many  
21 more witnesses have repeatedly drawn attention to the  
22 continuing variations between the home nations, although  
23 at the time of their infection there was no such thing  
24 as a devolved health administration. The grinding  
25 hardship of many is not put on hold while the inquiry

171

1 Now, where actions should be taken in remedy,  
2 I expect to make robust recommendations. This is not  
3 the same as determining liability in a civil or criminal  
4 case. I have no power to do that. That is a matter for  
5 the courts. Whether my findings at the end of the day  
6 lead others to take matters before those courts is for  
7 them, not for me, to determine.

8 Another repeated theme has been the often unanswered  
9 call for help and psychological support for those  
10 suddenly facing what has seemed an unfair death  
11 sentence, with all its side-effects on partners, friends  
12 and family, or the gruelling courses of treatment  
13 they've undergone with their own side-effects.

14 It is appropriate, therefore, that when we begin our  
15 next set of hearings, which will begin on February 24  
16 next year, we shall hear in particular from experts on  
17 social and psychological impact -- one was here earlier  
18 today -- as well as from experts on hepatitis, HIV,  
19 blood and bleeding this orders. That evidence is  
20 intended to place what we have already heard in a wider  
21 context and prepare for the hearings with the  
22 decision-makers which will follow.

23 They will follow in early June. The exact date  
24 depends on timetabling the first witnesses, but we shall  
25 begin by exploring what those clinicians and, for that

170

1 continues. If, as a number of witnesses have argued,  
2 there is in truth no proper justification for the  
3 significant variations in financial support as between  
4 the nations of the UK, then there can be no proper  
5 reason for those variations to be perpetuated to await  
6 the outcome of the inquiry.

7 I've learnt today that this morning a government  
8 spokesman told the BBC this, and I quote:  
9 "We are working with devolved administrations so  
10 that we can meet our commitment to guarantee equal  
11 support for all those infected and affected across the  
12 UK."

13 Now, perhaps it's the lawyer in me, but I note the  
14 wording. The wording is not "We will consider", it is  
15 not "We wish", it is not "We want"; it is "We commit,  
16 "our commitment to guarantee equal support". Those are  
17 the words which the government has issued today.

18 We are independent of the government. We note those  
19 words. We wait to see what happens in consequence.

20 As to the outcomes of the Inquiry, may I make it  
21 clear that if wrong was done, I have the power under the  
22 Inquiries Act to say so. And, if it was, I will. If  
23 there is criticism to be made, I shall make it, and  
24 I shall not hesitate to name names where it is  
25 appropriate. If there was fault, I intend to say so.

172

1 matter, those other witnesses who can shed lights on the  
2 policies and practices of centres from across the UK who  
3 are most closely involved at the time, can tell us about  
4 what happened and why.

5 Well, you may ask: why wait until next June? Time  
6 is precious, aren't you wasting it? The answer is that  
7 we are taking time for good reason and wasting none of  
8 it.

9 This inquiry is not a small undertaking. The  
10 hearings are the visible part of the inquiry's work, but  
11 the majority of the inquiry team have been beaver-  
12 ing away throughout on the investigation, and this will  
13 intensify to enable Ms Richards and her counsel team to  
14 be fully prepared to examine what the decision-makers  
15 have to say from June onwards.

16 More than 11.5 million pages have been reviewed, and  
17 around 2.5 million pages already placed on the Inquiry's  
18 documents system, a figure which grows at an average of  
19 40,000 pages per week.

20 These come from almost 600 organisations,  
21 repositories, archives, including international  
22 archives, trusts, haemophilia centres and government  
23 bodies. I have to confess that more documents have come  
24 to light than I had at first anticipated, and each page  
25 of each document has to be looked at. They have to be

173

1 set in the right place. It feels at times like solving  
 2 a million-piece jigsaw.  
 3 We've had extensive co-operation from most of those  
 4 bodies, individuals, companies and organisations which  
 5 hold documents, and I thank them for that. So I hope  
 6 that I'm not going to be misinterpreted when I gently  
 7 remind all of the expectation expressed at the highest  
 8 levels of government that there will be full  
 9 co-operation with this inquiry, and that having regard  
 10 to the public interest in establishing the truth, that  
 11 extends to waiving legal privilege, ensuring retention  
 12 notices are in place, so that potentially relevant  
 13 information is not destroyed, and ensuring or  
 14 facilitating thorough searches of archives.  
 15 All this and evidence of around 3,000 witnesses is  
 16 to be considered, along with expert evidence. We shall  
 17 also be arranging for further evidence from people who  
 18 are infected or affected to be heard at the end of our  
 19 evidence sessions, as I promised at the outset, people  
 20 first and last. We may find space, too, for some to be  
 21 heard during our exploration of specific terms of  
 22 reference.  
 23 Having mentioned that, forgive me for repeating  
 24 a theme which I've touched on at the end of each set of  
 25 hearings so far.

174

1 You've seen -- you've seen today, you've seen  
 2 throughout this week, you've seen over the last 12 weeks  
 3 of hearings -- how the evidence of each witness adds  
 4 something, something new, something different, to the  
 5 overall picture. Just when you may think you've heard  
 6 it all, another aspect is revealed. Written statements  
 7 are the same. Each has real value, each sheds  
 8 a slightly different light.  
 9 Each time I've asked for anyone who has been  
 10 infected or has been affected by the suffering of  
 11 someone close to them, or themselves, to pluck up the  
 12 courage, it takes courage, I acknowledge, to make  
 13 a statement, there has been a response. Well, I'm  
 14 asking again, and I'm especially interested in what  
 15 those with a blood disorder such as thalassaemia or  
 16 sickle cell anaemia may have to add.  
 17 Well, it's late in the day, but then I did promise  
 18 we'd sit until we finished.  
 19 It remains for me just to mention two further  
 20 things.  
 21 First, I feel sure that the witnesses who have been  
 22 dealing with the most uncomfortable of issues have been  
 23 able to do so much better because so many of you have  
 24 been here supporting them, here and online.  
 25 Finally, it remains for me to wish you all, all

175

1 here, a safe journey home.  
 2 Thank you.  
 3 **(...Applause...)**  
 4 SIR BRIAN LANGSTAFF: 24 February.
