Dear GRO-B

I was glad to hear that you are getting on OK after your operation. I thought you might be interested to know that the blood you very kindly donated to me about 5mins after your admission was of great

help to me in my experiments one of which is illustrated on the cover of this card. Incidentally, as far as you were concerned, the result of this particular experiment was entirely normal. The reason I send you this card is that I'm becoming concerned about my were wolf in age.

Happy Christmas your friend
