Date Typed: 02/12/2014

Dear Andy,

Neil Cruickshank (GRO-C 1977)

GRO-C

Just a short note. Neil Cruickshank is a young man with severe haemophilia A who you will know. He has a history of Interferon induced psychosis contraindicating Interferon for future use in his case. He enquired today about the options for other therapies including regimens that now do not include alpha Interferon. I indicated to him that in view of the new options that are becoming available I would discuss this with you with a view to you reviewing his case.

Best wishes  
Yours sincerely,

GRO-C

**Henry G Watson**

Consultant Haematologist
