KOATE-HT : PROTOCOL FOR NIBSC RELEASE

The U.K. protocol has not yet been amended to meet the NIBSC requirements.

Could you please arrange for changes to be made as follows:-

- 1) The name should be "KOATE-HT" as given in our product licence.
- 2) The heat-treatment method employed should be briefly described, e.g., "dry heat-treated at 68°C for 72 hours".

Please let me know if this request creates any problems for Q.A.

Regards,

Marie Tatt.
