The medical treatment of tobacco addiction – From negligence to excellence

CPD Credits: 2 Duration: 2 hours Access period: 60 days
Price: free for members, £30 for non-members

‘A comprehensive interactive module developed by smoking cessation specialists. The module aims to develop healthcare professionals’ clinical knowledge around tobacco addiction and on prescribing stop smoking medications and management in order to better advise and support their patients.’

All clinicians require the confidence and the competence to provide appropriate advice and offer appropriate treatment for tobacco dependency. This educational module will support clinicians to develop these skills and embed them in their daily practice. Suitable for all clinicians e.g. GPs, outpatient clinics, inpatient wards - both trainees and consultant grade. Doctors and advanced nurse practitioners can prescribe this medication. To enable healthcare professionals to take responsibility for proactively addressing patients’ tobacco addiction. To develop healthcare professionals’ clinical knowledge around tobacco addiction and on prescribing stop smoking medications and management.

Financial support was provided as a Medical and Educational Goods and Service by Pfizer Limited. This resource has been made with an educational grant from Pfizer. They have had no input or involvement whatsoever in the design, development and content of the programme.
