**LETTER DR LETTER RECOMBINANT FACTOR VIII (POH3/4301/308)**

1. I enclose a suggested letter of reply to Dr Lee.
2. SofS has in the meantime received a letter from John Marshall who received from Dr Lee a copy of her letter to you (POH3/4301/308). A copy of the letter from Mr Marshall and from Dr Lee to Mr Marshall is attached.
3. I also attach some background information. I am sorry that this is so lengthy, but Dr Lee raises a number of points in her letter.
4. I also attach copies of two letters in response to Dr Lee's original letter in the Lancet. One is from the Haemophilia Society supporting the use of recombinant Factor VIII. The other comes from the US, suggesting that it is possible to destroy parvovirus in plasma derived products. I am informed by MCA, that this is not so for the case of any of the currently available products.
