### GUIDELINES ON THERAPEUTIC PRODUCTS TO TREAT HAEMOPHILIA AND OTHER HEREDITARY COAGULATION DISORDERS

1. A draft of the revised guidelines has been sent to CMO for comment.
2. A meeting has been arranged for 8 August between Dr Colvin, Dr Ludlam and CA-OPU2 to discuss the departmental view. I would be grateful for your views, by **Tuesday 30 July**, so that these can be taken on board when we meet the UKHCDO.
3. The Department did not have an opportunity to comment on the previous version of the guidelines, which were very badly put together and included inaccurate comments regarding licensing of fractionated blood products.

Dr A Rejman  
Room 420 Ext GRO-C  
EH

1. Please talk to Dr Rejman.
2. It is not clear why the HC has sent these guidelines to CMO - their letter says "for comment". Over a year ago, HCD-PH gave Dr Rejman our then draft guidelines document & he spent much effort advising the HC about our appraisal system (& kitemarking).
3. Nothing about patient involvement, no RC endorsement, nothing on costs - but at least part 6 has categories of some evidence.
