18 March 1996

cc Mrs K Marsden FPA-FPS

RECOMBINANT BLOOD PRODUCTS

- 1 I'd be grateful for your advice contributions to the attached letter from Mr Goulston.
- 2 My obvious concern is whether this should indeed be raised as a PES pressure, whether in fact it already has been and what are the clinical issues around use of recombinant factor viii.
- 3 Please don't assume too much knowledge of this issue which I am slowly picking up from Karen Marsden.

Robert Newton
