Dear Charlie

24 June 2010

Mistaken notification of "at risk" status for vCJD

I enclose a copy of a letter I sent to you a couple of months ago. I have still not had a reply to the questions posed in the last paragraph. In particular, I would be grateful if you could let me know if you have now cross-checked the records of these two patients to see if they have been treated elsewhere with potentially contaminated products.

If they have not been treated elsewhere, I would be happy to write to them both although neither of them was actually treated in Oxford and we have no regular contact with them. One of them moved to **GRO-C** a few years ago and I have no idea if she is still at the address she gave us when she left our area. It would therefore be helpful if you could provide me at least the postcode (if not full address) of this particular lady or the name of her current haematologist.

Best wishes,

Yours sincerely

Dr PLF Giangrande
Consultant Haematologist
